Contemporary Families Richard J. Gelles 1995 In this major new introduction to family studies and the sociology of the family, Richard J Gelles shows the links between the institutional constraints shaping family structure and processes and the family environment itself. A sensitivity to family diversity across history, gender, nationality, culture and age, as well as a strong focus on the theoretical and research bases, are important features of the book. There are also extensive discussions of contemporary topics such as: family violence; later life families; the variety of family structures and practices in different cultures and nationalities; the work//family nexus; and family stress. An instructor's manual by Tricia Dyk is available to those who

Close Relations Susan A. McDaniel 2004 Designed for courses in Marriage and the Family, and Sociology of the Family. Inequality and Growth Theo S. Eicher 2007-01-26 Even minute increases in a country's growth rate can result in dramatic changes in living standards over just one generation. The benefits of growth, however, may not be shared equally. Some may gain less than others, and a fraction of the population may actually be disadvantaged. Recent economic research has found both positive and negative relationships between growth and inequality across nations. The questions raised by these results include: What is the impact on inequality of policies designed to foster growth? Does inequality by itself facilitate or detract from economic growth, and does it amplify or diminish policy effectiveness? This book provides a forum for economists to examine the theoretical, empirical, and policy issues involved in the relationship between growth and inequality. The aim is to develop a framework for determining the role of public policy in enhancing both growth and equality. The diverse range of topics, examined in both developed and developing countries, includes natural resources, taxation, fertility, redistribution, technological change, transition, labor markets, and education. A theme common to all the essays is the importance of education in reducing inequality and increasing growth.

Development Research in Practice Kristoffer Bjärkefur 2021-07-16 Development Research in Practice leads the reader through a complete empirical research project, providing links to continuously updated resources on the DIME Wiki as well as illustrative examples from the Demand for Safe Spaces study. The handbook is intended to train users of development data how to handle data effectively, efficiently, and ethically. "In the DIME Analytics Data Handbook, the DIME team has produced an extraordinary public good: a detailed, comprehensive, yet easy-to-read manual for how to manage a data-oriented research project from beginning to end. It offers everything from big-picture guidance on the determinants of high-quality empirical research, to specific practical guidance on how to implement specific workflows—and includes computer code! I think it will prove durably useful to a broad range of researchers in international development and beyond, and I learned new practices that I plan on adopting in my own research group.†? —Marshall Burke, Associate Professor, Department of Earth System Science, and Deputy Director, Center on Food Security and the Environment, Stanford University "Data are the essential ingredient in any research or evaluation project, yet there has been too little attention to standardized practices to ensure high-quality data collection, handling, documentation, and exchange. Development Research in Practice: The DIME Analytics Data Handbook seeks to fill that gap with practical guidance and tools, grounded in ethics and efficiency, for data management at every stage in a research project. This excellent resource sets a new standard for the field and is an essential reference for all empirical researchers.†? —Ruth E. Levine, PhD, CEO, IDinsight "Development Research in Practice: The DIME Analytics Data Handbook is an important resource and a must-read for all development economists, empirical social scientists, and public policy analysts. Based on decades of pioneering work at the World Bank on data collection, measurement, and analysis, the handbook provides valuable tools to allow research teams to more efficiently and transparently manage their work flows—yielding more credible analytical conclusions as a result.†? —Edward Miguel, Oxfam Professor in Environmental and Resource Economics and Faculty Director of the Center for Effective Global Action, University of California, Berkeley "The DIME Analytics Data Handbook is a must-read for any data-driven researcher looking to create credible research outcomes and policy advice. By meticulously describing detailed steps, from project planning via ethical and responsible code and data practices to the publication of research papers and associated replication packages, the DIME handbook makes the complexities of transparent and credible research easier.†? —Lars Vilhuber, Data Editor, American Economic Association, and Executive Director, Labor Dynamics Institute, Cornell University

Real-World Decision Making Morris Altman 2015-06-23 The first and only encyclopedia to focus on the economic and financial behaviors of consumers, investors, and organizations, including an exploration of how people make good—and bad—economic decisions. Traditional economic theories speculate how and when people should spend money. But consumers don't always behave as expected and often adopt strategies that might appear unorthodox yet are, at times, more effective than the rule prescribed by conventional wisdom. This groundbreaking text examines the ways in which people make financial decisions, whether it is because they are smart but atypical in their choices ... or just irrational decision makers. A leading authority on behavioral economics, Morris Altman and more than 150 expert contributors delve into key concepts in behavioral economics, economic psychology, behavioral finance, neuroeconomics, experimental economics, and institutional economics to help inform economic models based on reality, not theory. Through 250 informative entries, the book explores various aspects of the subject including decision making, economic analysis, and public policy. In addition to introducing concepts to readers new to the subject, the book sheds light on more advanced financial topics in a manner that is objective, comprehensive, and accessible.

What can we expect from these experiences? How are the world's leading thinkers applying both foundational knowledge and novel insights as we seek to understand consumer psychology in a constantly changing landscape? And how can informed readers both contribute to and evaluate our knowledge? This handbook offers a critical overview of both fundamental topics in consumer psychology and those that are of prominence in the contemporary marketplace, beginning with an examination of individual psychology and broadening to topics related to wider cultural and marketplace systems. [Perspectives on Marital Interaction](#) Patricia Noller 1988 This book explores the subject of marital interaction. It brings together the work of international scholars and is divided into four sections: communication as a means by which couples manage everyday life; communication as a means of expression of emotion; communication and problem-solving; coping with relationships outside marriage. The text is interdisciplinary and looks at the issue from various angles: social psychology, clinical psychology and communications. Particular attention is paid to the emergence of sex differences in interaction patterns and the experience of counselling plays an important part.

Islam, Family Life, and Gender Inequality in Urban China Xiaowei Zang 2012-06-12 This book studies the relationship between Islam, family processes, and gender inequality among Uyghur Muslims in Ürümqi, China. Empirically, it shows in quantitative terms the extent of gender

inequalities among Uyghur Muslims in Ürümqi and tests whether the gender inequalities are a difference in kind or in degree. It examines five aspects of gender inequality: employment, income, household task accomplishment, home management, and spousal power. Theoretically, it investigates how Islamic affiliation and family life affect Uyghur women's status. Zang's research involved rare and privileged access to a setting which is difficult for foreign scholars to study due to political restrictions. The data are drawn from fieldwork in Ürümqi between 2005 and 2008, which include a survey of 577 families, field observations, and 200 in-depth interviews with local Uyghurs. The book combines qualitative and quantitative data and methods to study gendered behavior and outcomes. The author's study reinterprets family power and offers a more nuanced analysis of gender and domestic power in China and makes a pioneering effort to study spousal power, gender inequality in labor market outcomes, and gender inequality in household chores among members of ethnic minorities in China. The book will be of interest to students and scholars of ethnic studies, Chinese studies, Asian anthropology and cultural sociology.

Handbook of Contemporary Behavioral Economics Morris Altman 2015-01-30 At a time when both scholars and the public demand explanations and answers to key economic problems that conventional approaches have failed to resolve, this groundbreaking handbook of original works by leading behavioral economists offers the first comprehensive articulation of behavioral economics theory. Borrowing from the findings of psychologists, sociologists, political scientists, legal scholars, and biologists, among others, behavioral economists find that intelligent individuals often tend not to behave as effectively or efficiently in their economic decisions as long held by conventional wisdom. The manner in which individuals actually do behave critically depends on psychological, institutional, cultural, and even biological considerations. "Handbook of Contemporary Behavioral Economics" includes coverage of such critical areas as the Economic Agent, Context and Modeling, Decision Making, Experiments and Implications, Labor Issues, Household and Family Issues, Life and Death, Taxation, Ethical Investment and Tipping, and Behavioral Law and Macroeconomics. Each contribution includes an extensive bibliography.

The Economic Psychology of Tax Behaviour Erich Kirchler 2007-06-21 Tax evasion is a complex phenomenon which is influenced not just by economic motives but by psychological factors as well. Economic-psychological research focuses on individual and social representations of taxation as well as decision-making. In this 2007 book, Erich Kirchler assembles research on tax compliance, with a focus on tax evasion, and integrates the findings into a model based on the interaction climate between tax authorities and taxpayers. The interaction climate is defined by citizens' trust in authorities and the power of authorities to control taxpayers effectively; depending on trust and power, either voluntary compliance, enforced compliance or no compliance are likely outcomes. Featuring chapters on the social representations of taxation, decision-making and self-employed income tax behaviour, this book will appeal to researchers in economic psychology, behavioural economics and public administration.

Consumer Behaviour Michael R. Solomon 1999 Intended for European students, this work presents the issues, illustrative examples, data and research concerning European consumer markets and behaviour, while retaining material from the US and covering the other major global markets. The text utilizes a five-part "wheel" structure, which moves from the micro- to the macro- level. It expands in focus and coverage from individual consumers and their internal dynamics, through group and household consumption decisions, to larger social structures/sub-cultures, and finally mass cultures consumption activities.

The Cambridge Handbook of Compliance Benjamin van Rooij 2021-05-20 Compliance has become key to our contemporary markets, societies, and modes of governance across a variety of public and private domains. While this has stimulated a rich body of empirical and practical expertise on compliance, thus far, there has been no comprehensive understanding of what compliance is or how it influences various fields and sectors. The academic knowledge of compliance has remained siloed along different disciplinary domains, regulatory and legal spheres, and mechanisms and interventions. This handbook bridges these divides to provide the first one-stop overview of what compliance is, how we can best study it, and the core mechanisms that shape it. Written by leading experts, chapters offer perspectives from across law, regulatory studies, management science, criminology, economics, sociology, and psychology. This volume is the definitive and comprehensive account of compliance.

Conflict and Decision Making in Close Relationships Erich Kirchler 2013-01-11 Love and money are important aspects of the everyday lives of couples. This book focuses on the daily routines of disagreement, conflict and joint decisions on these, and other issues such as work, leisure and children, create in the household. Central to the authors' research is a unique diary study of forty couples, who kept a daily record of their joint decisions over the course of a year. The diaries show how challenging, varied and complex the conflicts and decision making of normal everyday life can be and reveal that goals frequently change during the decision-making process with the result that the final outcome often achieves a goal distinct from the original intention. Furthermore, the dynamics of decision making differ according to the problem at stake, the decision-making history of the couple, and the quality of the partnership. The results of the diary study are discussed within the overall context of current research in the field as a whole, including discussion of joint decision-making case studies, close relationships, decision-making research in general and special research methods. Numerous results of psychological, sociological, economic and consumer behaviour studies are summarised and integrated into a model of household decision-making. This book will be primarily of interest to students and researchers in social psychology and economic psychology, but its interdisciplinary and applied nature will also make it of relevance to professionals working in the fields of family therapy and consumer behaviour.

Handbook of Economic Psychology W.F. Van Raaij 2013-03-09 The idea to publish a Handbook of Economic Psychology came up as a natural consequence of a discussion concerning appropriate reading material for courses in economic psychology. The discussion took place a few years ago in the Department of Economic Psychology at Tilburg University, The Netherlands. It was noted that there was a surprising lack of collections of pertinent readings, to say nothing about the lack of textbooks in the English language. So the present editors, who had been involved in the discussion, decided to start working on a Handbook. The situation has changed quite a lot since then. There are now a number of books, internationally available in the English language, in economic psychology or behavioral economics. The interest in this field of study is expanding quite impressively. The Journal of Economic Psychology is now (1988) in its ninth volume and many other journals are publishing articles in the field. The application of psychological theories and methods to economic problems or the study of economic experiences and behavior is variously referred to as economic psychology or behavioral economics. While in principle we do not want to overdo the differences between the two, we have a feeling that economic psychology has a slightly stronger flavor of psychology than behavioral economics which in its turn seems to be closer to economics. Psychologists tend to feel more at home in economic psychology, while economists seem to favor behavioral economics.

Vacation Decision Making Alain Decrop 2006-01-01 The focus of this book is on holiday planning and decision making, which is the cornerstone of tourist behaviour and tourism marketing. The first three chapters deal with the basics, including an overview of decision-making paradigms and variables (chapter 1), a critical review of existing tourist behaviour models (chapter 2) and a description of the methods that may be used for studying holiday decision making (chapter 3). The chapters that follow relate the findings of an in-depth qualitative and interpretative study that followed the decision making process of 25 Belgian households during a whole year. Chapter 4 discusses the context in which holiday decisions are made. In the next two chapters, the focus is on the decision-making process in itself both at the generic and holiday levels (chapter 5) and at the destination level (chapter 6). Post-experience processes are investigated in chapter 7, whereas group processes are the particular focus of chapter 8. Chapter 9 presents the integrative and conclusive part of the book where a new typology of holidaymakers is proposed. The book has a subject index.

Moral Sentiments and Material Interests Professor Emeritus of Economics University of Massachusetts and Adjunct Professor Department of Politics Herbert Gintis 2005 Moral Sentiments and Material Interests presents an innovative synthesis of research in different disciplines to argue that cooperation stems not from the stereotypical selfish agent acting out of disguised self-interest but from the presence of "strong reciprocators" in a social group. Presenting an overview of research in economics, anthropology, evolutionary and human biology, social psychology, and sociology, the book deals with both the theoretical foundations and the policy implications of this explanation for cooperation. Chapter authors in the remaining parts of the book discuss the behavioral ecology of cooperation in humans and nonhuman primates, modeling and testing strong reciprocity in economic scenarios, and reciprocity and social policy. The evidence for strong reciprocity in the book includes experiments using the famous Ultimatum Game (in which two players must agree on how to split a certain amount of money or they both get nothing.)
