Democracy Assistance from the Third Wave Paulina Pospieszna 2014-02-28 The role of Western NGOs in the transition of postcommunist nations to democracy has been well documented. In this study, Paulina Pospieszna follows a different trajectory, examining the role of a former aid recipient (Poland), newly democratic itself, and its efforts to aid democratic transitions in the neighboring states of Belarus and Ukraine. Belarus is widely regarded as the most authoritarian state in the region, while Ukraine is witnessing a slow, if often troubled, democratic consolidation. Each state presents a different set of challenges to outside agencies. As Pospieszna shows, Poland is uniquely positioned to offer effective counsel on the transition to democracy. With similarities of language and culture, and a shared history, combined with strong civic activism and success within the European Union, Poland's regional policies have successfully combined its need for security and a motivation to spread democracy as primary concerns. Pospieszna details the founding, internal workings, goals, and methods of Poland's aid programs. She then compares the relative degrees of success of each in Belarus and Ukraine and documents the work yet to be done. As her theoretical basis, Pospieszna analyzes current thinking on the methods and effectiveness of NGOs in transitions to democracy, particularly U.S.- and European-led aid efforts. She then views the applicability of these methods to the case of Poland and its aid recipients. Overwhelmingly, Pospieszna finds the greatest success in developmental programs targeting civil society—workers, intellectuals, teachers, students, and other NGO actors. Through extensive interviews with government administrators and NGO workers in Poland and the United States, coupled with archival research, Pospieszna assembles an original perspective on the mitigation of the 'postcommunist divide'. Her work will serve as a model for students and scholars of states in transition, and it provides an overview of both successful and unsuccessful strategies employed by NGOs in democracy assistance.

**Democracy and Dictatorship in Europe** Sheri Berman 2019 Democracy and Dictatorship in Europe examines the development of various political regimes in Europe from the ancien regime up through the present day. It analyzes why democracy flourishes at some times and in some places but not others and draws lessons from European history that can help us better understand the political situation the world finds itself in today.

Future of Liberation Theology Ivan Petrella 2006-06-28 There is a notion amongst some academics that Latin American Liberation Theology has had its day, a dream killed off by the Nicaraguan and Salvadoran revolutions, the 1989 demise of socialism and the "end of history" claims of the champions of capitalism. However in this book Petrella proves this to be an ill-conceived notion, and shows that this theology can be reinvented to bring its preferential option for the poor into the real world. The actualisation of historical projects is possible by adopting the methods developed by the Brazilian champion of critical legal studies, Robert Unger. Doing so will entail the rejection of these theologians' unitary concepts of a despised and rejected capitalism and a canonized and accepted socialism. Petrella argues for a reconstruction of these concepts and those of democracy and property too. He closely analyses the differences in democracy and capitalism as practised across the USA and Europe in support for the reconstruction of these concepts bringing about far-reaching suggestions for the future of liberation theology.

**The Third Wave** Samuel P. Huntington 2012-09-06 Between 1974 and 1990 more than thirty countries in southern Europe, Latin America, East Asia, and Eastern Europe shifted from authoritarian to democratic systems of government. This global democratic revolution is probably the most important political trend in the late twentieth century. In *The Third Wave*, Samuel P. Huntington analyzes the causes and nature of these democratic transitions, evaluates the prospects for stability of the new democracies, and explores the possibility of more countries becoming democratic. The recent transitions, he argues, are the third major wave of democratization in the modern world. Each of the two previous waves was followed by a

reverse wave in which some countries shifted back to authoritarian government. Using concrete examples, empirical evidence, and insightful analysis, Huntington provides neither a theory nor a history of the third wave, but an explanation of why and how it occurred. Factors responsible for the democratic trend include the legitimacy dilemmas of authoritarian regimes; economic and social development; the changed role of the Catholic Church; the impact of the United States, the European Community, and the Soviet Union; and the "snowballing" phenomenon: change in one country stimulating change in others. Five key elite groups within and outside the nondemocratic regime played roles in shaping the various ways democratization occurred. Compromise was key to all democratizations, and elections and nonviolent tactics also were central. New democracies must deal with the "torturer problem" and the "praetorian problem" and attempt to develop democratic values and processes. Disillusionment with democracy, Huntington argues, is necessary to consolidating democracy. He concludes the book with an analysis of the political, economic, and cultural factors that will decide whether or not the third wave continues. Several "Guidelines for Democratizers" offer specific, practical suggestions for initiating and carrying out reform. Huntington's emphasis on practical application makes this book a valuable tool for anyone engaged in the democratization process. At this volatile time in history, Huntington's assessment of the processes of democratization is indispensable to understanding the future of democracy in the world.

*Development and Society* 2006

Juggling the Bear 1999 This paper focuses on the expansion of NATO through Russian membership. Many dismiss Russian membership as a political nonstarter due to the perceived high economic and political costs. This paper argues that the US should advocate Russian membership into NATO as a means to counter internal threats to Russian democratization, construct an effective security architecture for post-Cold War Europe, and address emerging challenges to Asia-Pacific security, notably, China's rise as a regional "peer competitor", and its burgeoning relationship with Russia. US support for Russian NATO membership would combat the threats to Russian democratization. These threats include the steady expansion of organized crime, the popular nationalist-authoritarian political elite, and an increasingly discontented military. Russian membership would also provide an "air of security" in which the fledgling democracy can take flight. If the US truly intends to go beyond the Cold War barriers it entrenched, it must lead Europe in the construction of a genuine pan-continental security structure that includes Russia as a full member.

**Crossing Borders in the Asia-Pacific** James Cotton 2002 The impact across borders of transnational identities, business links and ideas has been on the international political agenda for a long time. These cross border phenomena have a steady and profound influence on domestic politics and international relations. However, they also represent a challenge because these factors can subvert accustomed views of sovereignty. The essays in this book stress the diversity and influence as well as the limitations of cross border phenomena in the Asia-Pacific, a region home to the principles of non-interference and respect for autonomy. Emerging from this collection is a picture of an area dynamically affected by the penetration of ideas, organized interests, and financial flows. Though national borders have become more porous, state power and local identities still resist, shape and modify cross border influences.

**Consolidating Taiwan's Democracy** John Franklin Copper 2005 Consolidating Taiwan's Democracy assesses the often-heard argument that political change in Taiwan, especially that resulting from recent elections that brought a change of ruling parties (first in the executive branch of government and then the legislative branch), proves that Taiwan's democratization has been "finalized" or consolidated. The author sees both positive and negative aspects to democracy's consolidation in Taiwan.

**Consolidating the Third Wave Democracies** Larry Diamond 1997-09-08 An in-depth analysis of the struggle to consolidate new and fragile

democracies—available in two paperback volumes for course use. The global trend that Samuel P. Huntington has dubbed the "third wave" of democratization has seen more than 60 countries experience democratic transitions since 1974. While these countries have succeeded in bringing down authoritarian regimes and replacing them with freely elected governments, few of them can as yet be considered stable democracies. Most remain engaged in the struggle to consolidate their new and fragile democratic institutions. Consolidating the Third Wave Democracies provides an in-depth analysis of the challenges that they face. Consolidating the Third Wave Democracies is available in two paperback volumes, each introduced by the editors and organized for convenient course use. The first paperback volume, Themes and Perspectives, addresses issues of institutional design, civil-military relations, civil society, and economic development. It brings together some of the world's foremost scholars of democratization, including Robert A. Dahl, Samuel P. Huntington, Juan J. Linz, Guillermo O'Donnell, Adam Przeworski, Philippe C. Schmitter, and Alfred Stepan. The second paperback volume, Regional Challenges, focuses on developments in Southern Europe, Latin America, Russia, and East Asia, particularly Taiwan and China. It contains essays by leading regional experts, including Yun-han Chu, P. Nikiforos Diamandouros, Thomas B. Gold, Michael McFaul, Andrew J. Nathan, and Hung-mao Tien.

**Democracy (Made in Taiwan)** Chih-Yu Shih 2008-01-17 While political scientists generally see Taiwan as a success state because of its economic modernization and political democratization, this book reinterprets Taiwan's success from the Confucian and postcolonial perspectives. Democracy (Made in Taiwan) uncovers the hegemonic construction of the myth of the "success state" and challenges political scientists to abandon both the liberal-centrism and state-centrism prevailing in the literature of democratization.

**Understanding Third World Politics** Brian Clive Smith 2003 Praise for the first edition: "... this masterful and concise volume overviews the range of approaches social scientists have applied to explain events in the Third World." —Journal of Developing Areas Understanding Third World Politics is a comprehensive, critical introduction to political development and comparative politics in the non-Western world today. Beginning with an assessment of the shared factors that seem to determine underdevelopment, B. C. Smith introduces the major theories of development—development theory, modernization theory, neo-colonialism, and dependency theory—and examines the role and character of key political organizations, political parties, and the military in determining the fate of developing nations. This new edition gives special attention to the problems and challenges faced by developing nations as they become democratic states by addressing questions of political legitimacy, consensus building, religion, ethnicity, and class.

Elections, Parties and Representation in Post-Communist Europe F. Millard 2004-04-06 Elections, Parties and Representation in Post-Communist Europe 1990-2002 stresses the ways in which the development of political parties affected the quality of democracy, the nature of political representation, and political accountability in the early stages of post-communist politics. It also analyzes the nature and consequences of the corpus of parliamentary candidates and deputies for the representation of social classes, women and minorities. In contrast with the wide social profile of communist parliaments, politics largely became the playground of new highly educated male elites.

**Democracy Assistance** Peter Burnell 2013-10-23 This examination of how Western governments support democracy worldwide considers how countries use this aid. Attention is paid to post-conflict situations and semi-authoritarian regimes where democratization has stalled, and

international support of democratic decentralization is assessed.

**Transitions to Democracy** Kathryn Stoner 2013-04-15 Fifteen case studies by scholars and practitioners demonstrate the synergy between domestic and international influences that can precipitate democratic transitions. As demonstrated by current events in Tunisia and Egypt, oppressive regimes are rarely immune to their citizens' desire for democratic government. Of course, desire is always tempered by reality; therefore how democratic demands are made manifest is a critical source of study for both political scientists and foreign policy makers. What issues and consequences surround the fall of a government, what type of regime replaces it, and to what extent are these efforts successful? Kathryn Stoner and Michael McFaul have created an accessible book of fifteen case studies from around the world that will help students understand these complex issues. Their model builds upon Guillermo O'Donnell, Philippe C. Schmitter, and Laurence Whitehead's classic work, *Transitions from Authoritarian Rule*, using a rubric of four identifying factors that can be applied to each case study, making comparison relatively easy. *Transitions to Democracy* yields strong comparisons and insights. For instance, the study reveals that efforts led by the elite and involving the military are generally unsuccessful, whereas mass mobilization, civic groups, and new media have become significant factors in supporting and sustaining democratic actors. This collection of writings by scholars and practitioners is organized into three parts: successful transitions, incremental transitions, and failed transitions. Extensive primary research and a rubric that can be applied to burgeoning democracies offer readers valuable tools and information.

**Protecting Democracy** Morton H. Halperin 2005 Over the past several decades, democracy has taken root or been re-established in a number of countries with support from other democratic states and private groups. While the increase in the number of democracies worldwide has been widely heralded, very little has been written on how democracy can be protected and sustained where it has been chosen by the people of a state. In this first comprehensive guide to preventing and responding to threats to coups and erosions in democracies. Through case studies and in-depth analyses, this book provides legal and policy justification for these processes and discusses how they can be made more effective, combining the findings of an international task force on threats to democracy with contributions from leading scholars and policymakers.

**The Resilience of Democracy** Peter Burnell 2022-09-19 This volume brings together studies of the small number of previously established states that have retained and/or restored democracy despite - in many cases - formidable economic, social or political challenges. It seeks to establish common themes, whether or not they appear to fit a grand casual theory. It is, after all, the very adaptability of democratic systems that characterises their persistence, durability and resilience.

**Pacted Democracy in the Middle East** Hicham Alaoui 2022-05-17 This book provides a new theory for how democracy can materialize in the Middle East, and the broader Muslim world. It shows that one pathway to democratization lays not in resolving important, but often irreconcilable, debates about the role of religion in politics. Rather, it requires that Islamists and their secular opponents focus on the concerns of pragmatic survival—that is, compromise through pacting, rather than battling through difficult philosophical issues about faith. This is the only book-length treatment of this topic, and one that aims to redefine the boundaries of an urgent problem that continues to haunt struggles for democracy in the aftermath of the Arab Spring.

**Political Parties and Democracy** Larry Diamond 2001-12-21 Political parties are one of the core institutions of democracy. But in democracies around the world—rich and poor, Western and non-Western—there is growing evidence of low or declining public confidence in parties. In membership, organization, and popular involvement and commitment, political parties are not what they used to be. But are they in decline, or are they simply changing their forms and functions? In contrast to authors of most previous works on political parties, which tend to focus exclusively on

long-established Western democracies, the contributors to this volume cover many regions of the world. Theoretically, they consider the essential functions that political parties perform in democracy and the different types of parties. Historically, they trace the emergence of parties in Western democracies and the transformation of party cleavage in recent decades. Empirically, they analyze the changing character of parties and party systems in postcommunist Europe, Latin America, and five individual countries that have witnessed significant change: Italy, Japan, Taiwan, India, and Turkey. As the authors show, political parties are now only one of many vehicles for the representation of interests, but they remain essential for recruiting leaders, structuring electoral choice, and organizing government. To the extent that parties are weak and discredited, the health of democracy will be seriously impaired. Contributors: Larry Diamond and Richard Gunther • Hans Daalder • Philippe Schmitter • Seymour Martin Lipset • Giovanni Sartori • Bradley Richardson • Herbert Kitschelt • Michael Coppedge • Ergun Ozbudun • Yun-han Chu • Leonardo Morlino • Ashutosh Varshney and E. **The Role of Civil Society in Africa's Quest for Democratization** Abadir M. Ibrahim 2016-12-08 This book tests many of the assumptions, hypotheses, and conclusions connected with the presumed role of civil society organizations in the democratization of African countries. Taking a comparative approach, it looks at countries that have successfully democratized, those that are stuck between progress and regression, those that have regressed into dictatorship, and those that are currently in transitional flux and evaluates what role, if any, civil society has played in each instance. The countries discussed—South Africa, Ghana, Nigeria, Ethiopia, Egypt and Tunisia—represent a diverse set of social and political circumstances and different levels of democratic achievement, providing a rich set of case studies. Each sample state also offers an internal comparison, as each has historically experienced different stages of democratization. Along the course of each case study, the book also considers the effect that other traditionally studied factors, such as culture, colonization, economic development and foreign aid, may have had on individual attempts at democratization. The first extensive work on civil society and democratization in Africa, the book adds new insights to the applicability of democratization theory in a non-Western context, both filling a gap in and adding to the existing universal scholarship. This book will be useful for scholars of political science, economics, sociology and African studies, as well as human rights activists and policy makers in the relevant geographical areas.

**Civil Society and Democracy in Africa** Nelson Kasfir 2013-04-03 This work critically reviews the conventional uses of the concept of civil society in promoting democratization in Africa and suggests omissions and modifications are needed for more accurate analyses.

**Pacific Asia in Quest of Democracy** Roland Rich 2007 What does democracy look like in Pacific Asia? Can democratic governance in the region survive the challenges of corruption, violence, and soft authoritarianism? What impact are economic pressures likely to have? These are among the broad questions tackled in *Pacific Asia in Quest of Democracy*, a comparative study of democratic structures and practices in Indonesia, the Philippines, South Korea, Taiwan, and Thailand. the institutions and legal underpinnings of democracy, the roles of political parties and politicians, the significance of a changing political culture. He also draws on his long experience living and working in the region to explore the public conversations taking place and the media that facilitates them. Asia lack a long democratic tradition, much more significant are the innovative democratic design and the enthusiasm for democratic participation exhibited there.

**The Ombudsman, Good Governance and the International Human Rights System** Linda C. Reif 2013-12-19 This book uses comparative law and comparative international law approaches to explore the role of human rights ombuds, classic-based ombuds and other types of ombuds institutions in human rights protection and promotion, their methods of application of international and domestic human rights law and their roles in strengthening good governance. It highlights the increasing importance of national human rights ombuds institutions globally and their roles as

national human rights institutions (NHRIs). Chapters address: ombuds institutions as mechanisms to strengthen democratic, horizontal and vertical accountability, the rule of law and good governance; national human rights ombuds institutions as NHRIs; the investigatory, litigation, promotional and other powers of human rights and classic-based ombuds and their methods for applying international and domestic human rights law; ombuds institutions and the protection and promotion of international children's rights; national human rights ombuds additional mandates as OPCAT national preventive mechanisms, UN Convention on the Rights of Persons with Disabilities Article 33(2) framework mechanisms and EU national equality bodies; human rights ombuds and business and human rights; ombuds institutions, gender and women's rights; the European Ombudsman and human rights; national human rights ombuds and other ombuds models by region, accompanied by case studies on national human rights ombuds; and the legal and extra-legal factors affecting ombuds institutional effectiveness.

**Democratic Consolidation in Turkey** Müge Aknur 2012-01 Although Turkey began its transition to democracy as early as the 1950s, it is still far from having reached a level of consolidated democracy with the country's sixty-year history of democratic politics being punctuated by numerous breakdowns and restorations of democracy. In an attempt to examine why consolidation of Turkish democracy has taken so long, this book aims at analyzing various factors including state, political parties, civil society, civil-military relations, socio-economic development, the EU as an international actor and the rise of internal threats (political Islam and separatist Kurdish nationalism) that both hinder and enhance democratic consolidation in Turkey. By highlighting the strengths and shortcomings of the Turkish experience from these perspectives, this book suggests the optimal policy priorities for current and future Turkish governments to establish a consolidated democracy in Turkey. Contributors: Muge Aknur, Canan Aslan-Akman, Filiz Baskan, Gulgun Erdogan-Tosun, Siret Hursoy, Aysegul Komsuoglu, Gul M. Kurtoglu-Eskisar, Yesim Kustepeli, Nazif Mandaci, Ibrahim Saylan, & Ugur Burc Yildiz.

**Democracy and Diversity** Benjamin Reilly 2007-12-06 A study of the way in which the democratizing states of Asia and the Pacific have managed political change, with particular focus on innovative reforms to democratic institutions such as electoral systems, political parties and executive governments

**Democracy on the Precipice** Zygmunt Bauman 2012-01-01 Democracy is well-established and soundly practiced in most European countries. But despite unprecedented progress, there is growing dissatisfaction with the state of democracy and deepening mistrust of democratic institutions; a situation exacerbated by the economic crisis. Are Europe's democracies really under threat? Has the traditional model of European democracy exhausted its potential? A broad consensus is forming as to the urgent need to examine the origins of the crisis and to explore visions and strategies which could contribute to rebuilding confidence in democracy. As Europe's guardian of democracy, human rights and the rule of law, the Council of Europe is committed to exploring the state and practice of European democracy, as well as identifying new challenges and anticipating future trends. In order to facilitate this reflection, the Council of Europe held a series of Democracy Debates with the participation of renowned specialists working in a variety of backgrounds and disciplines. This publication presents the eight Democracy Debate lectures. Each presentation analyses a specific aspect of democracy today, placing the issues not only in their political context but also addressing the historical, technological and communication dimensions. The authors make proposals on ways to improve democratic governance and offer their predictions on how democracy in Europe may evolve. Together, the presentations contribute to improving our understanding of democracy today and to recognising the ways it could be protected and strengthened.

*The Power of the Ballot Box* Christian Schafferer 2003 The Power of the Ballot Box analyzes the impact on Taiwanese politics of the "Third Wave" of

democratization that swept across East Asia in the last decades of the twentieth century. Christian Schafferer's work looks beyond regional and global causes to pinpoint the true indigenous foundations of Taiwan's--and on a broader scale East Asia's--political development, and examines the pivotal importance of Taiwanese local elections in the island's democratization process. Based on extensive research and in-depth interviews with leading Taiwanese politicians and political scientists, the book provides a detailed history of Taiwan's electoral experience from the turn of the twentieth century, through the Kuomintang regime, to the present day. This is supplemented by a focused case study of the watershed 1997 Taiwanese local elections and their profound impact on the Taiwanese political landscape.

**A Theory of Religious Democracy** Hamid Hadji Haidar 2006 The rise of democracy is thought to be the pre-eminent development of the twentieth century. In the last two decades, the study of democracy and democratisation has been one main strand of the comparative study of politics, and particular attention has been paid to the relationship between Islam and democracy. Focusing on a proceduralist definition of democracy in terms of 'equality' and 'popular participation', Hadji Haidar articulates a Shi'a Islamic theory of religious democracy, which finds its parallel in Western secular democracy in the unspecified concept of democracy and has a particular religious component. His analysis compares ideal secular democracy and ideal religious democracy, and contrasts actual secular democracy with actual religious democracy.
