Living with Cancer Denise Thornton 2011-03-18 Cancer hits hard at any age, but it is especially challenging for teens who must battle their disease while negotiating the tricky terrain of adolescence. This book explores the range of challenges cancer places on both teens who have cancer and teens who have friends or family members with cancer. Denise Thornton follows cancer's devastating path through a teen's life from diagnosis to treatment and survivorship, with special attention to how cancer can affect relations with friends and family, and its impact on school life. Living with Cancer explores the toll cancer can take on self image and looks at how teens facing cancer have found a sense of balance and control. Each chapter takes advantage of expert knowledge and new information that is continually coming to light, but the bulk of the book is made up of narratives shared by teens whose lives have been changed by cancer. This book will prove immensely useful for teens who are facing cancer, as well as friends and family members who want to understand and support them.

I'm Not a Mourning Person Kris Carr 2023-09-19 From New York Times bestselling author Kris Carr, comes a transformational book about love, loss, and all the life-changing insights we receive when we embrace them. A few years ago, Kris Carr's world was falling apart. Her father was dying, she had to pivot her business because of the pandemic, and she was on the verge of reaching her twenty-year milestone of living with an incurable Stage IV cancer diagnosis. While sitting in a CVS parking lot, she broke down, finally allowing herself to feel the massive stress and sadness she had been suppressing in order to seem strong for those around her, and for herself. And then she asked herself, "If embracing my intense emotions helped me feel even the slightest bit better, why was I so determined to avoid them? And given how all-encompassing this hint of catharsis felt, where else in my life have I been avoiding grief?" In this book, Kris shares her (embarrassing, painful, helpful, hilarious, and sometimes inappropriate) stories and observations about what to expect when you're not expecting your world to fall apart. If your life has been turned upside down—whether it be the dissolving of a relationship or marriage, the end of a job or career, any other number of significant unexpected transitions. . . or, like Kris, you are wrestling with the pain that comes from an illness or the death of a loved one, this book is filled with real-life experiences, practices, and insights that can help you feel better—not cured—but better. It will provide comfort and community as you learn that these big messy emotions can be a catalyst to take inventory of your life, figure out what matters most, and reset. . . because as Kris says, "when we're brave enough to tend to our hearts: Our messy emotions can teach us how to be free—not free from pain, but free from the fear of pain and the barrier it creates to fully living."

Radical Remission Kelly A. Turner, PhD 2014-03-18 In her New York Times bestseller, *Radical Remission: Surviving Cancer Against All Odds*, Dr. Kelly A. Turner, founder of the Radical Remission Project, uncovers nine factors that can lead to a spontaneous remission from cancer—even after conventional medicine has failed. While getting her Ph.D. at the University of California, Berkley, Dr. Turner, a researcher, lecturer, and counselor in integrative oncology, was shocked to discover that no one was studying episodes of radical (or unexpected) remission—when people recover against all odds without the help of conventional medicine, or after conventional medicine has failed. She was so fascinated by this kind of remission that she embarked on a ten month trip around the world, traveling to ten different countries to interview fifty holistic healers and twenty radical remission cancer survivors about their healing practices and techniques. Her research continued by interviewing over 100 Radical Remission survivors and studying over 1000 of these cases. Her evidence presents nine common themes that she believes may help even terminal patients turn their lives around.

The Tapping Solution Nick Ortner 2013-04-02 Nick Ortner, founder of the Tapping World Summit and best-selling filmmaker of *The Tapping Solution*, is at the forefront of a new healing movement. In his upcoming book, *The Tapping Solution*, he gives readers everything they need to successfully start using the powerful practice of tapping - or Emotional Freedom Techniques (EFT). Tapping is one of the fastest and easiest ways to address both the emotional and physical problems that tend to hamper our lives. Using the energy meridians of the body, practitioners tap on specific points while focusing on particular negative emotions or physical sensations. The tapping helps calm the nervous system to restore the balance of energy in the body, and in turn rewire the brain to respond in healthy ways. This kind of conditioning can help rid practitioners of everything from chronic pain to phobias to addictions. Because of tapping's proven success in healing such a variety of problems, Ortner recommends to try it on any challenging issue. In *The Tapping Solution*, Ortner describes not only the history and science of tapping but also the practical applications. In a friendly voice, he lays out easy-to-use practices, diagrams, and worksheets that will teach readers, step-by-step, how to tap on a variety of issues. With chapters covering everything from the alleviation of pain to the encouragement of weight loss to fostering better relationships, Ortner opens readers' eyes to just how powerful this practice can be. Throughout the book, readers will see real-life stories of healing ranging from easing the pain of fibromyalgia to overcoming a fear of flying. The simple strategies Ortner outlines will help readers release their fears and clear the limiting beliefs that hold them back from creating the life they want.

Not as a Stranger Morton Thompson 1956

The China Study T. Colin Campbell 2006 Referred to as the "Grand Prix of epidemiology" by The New York Times, this study examines more than 350 variables of health and nutrition with surveys from 6,500 adults in more than 2,500 counties across China and Taiwan, and conclusively demonstrates the link between nutrition and heart disease, diabetes, and cancer. While revealing that proper nutrition can have a dramatic effect on reducing and reversing these ailments as well as curbing obesity, this text calls into question the practices of many of the current dietary programs, such as the Atkins diet, that are widely popular in the West. The politics of nutrition and the impact of special interest groups in the creation and dissemination of public information are also discussed.

Wild Cheryl Strayed 2012-05-01 Selected to be read on Radio Four's Book of the Week. 'One of the best books I've read in the last five or ten years... Wild is angry, brave, sad, self-knowing, redemptive, raw, compelling, and brilliantly written, and I think it's destined to be loved by a lot of people, men and women, for a very long time.' --Nick Hornby At twenty-six, Cheryl Strayed thought she had lost everything. In the wake of her mother's rapid death from cancer, her family disbanded and her marriage crumbled. With nothing to lose, she made the most impulsive decision of her life: to walk eleven-hundred miles of the west coast of America - from the Mojave Desert, through California and Oregon, and into Washington state - and to do it alone. She had no experience of long-distance hiking and the journey was nothing more than a line on a map. But it held a promise - a promise of piecing together a life that lay in ruins at her feet. Strayed's account captures the agonies - both mental and physical - of her incredible journey; how it maddened and terrified her, and how, ultimately, it healed her. Wild is a brutal memoir of survival, grief and redemption: a searing portrayal of life at its lowest ebb and at its highest tide.

Disrupting Breast Cancer Narratives Emilia Nielsen 2019-01-01 Engaging with discussions surrounding the culture of disease, *Disrupting Breast Cancer Narratives* explores politically insistent narratives of illness. Resisting the optimism of pink ribbon culture, these stories use anger as a starting place to reframe cancer as a collective rather than an individual problem. *Disrupting Breast Cancer Narratives* discusses the ways emotion, gender, and sexuality, in relation to breast cancer diagnosis and treatment, all become complicated, relational, and questioning. Providing theoretically informed close-readings of breast cancer narratives, this study explores how disruption functions both personally and politically.

Highlighting a number of contributors in the field of health and gender studies including Barbara Ehrenreich, Kathlyn Conway, Audre Lorde, and Teva Harrison, this work takes into account documentary film, television, and social media as popular mediums used to explore stories of disease.

Although there was a certain glamour to anorexics, I didn't want to be one. I just wanted to excel in dieting. And weighing in at 80 pounds on 300 calories a day, I was the best little dieter there ever was." In scalding prose, Portia de Rossi reveals the pain and illness that haunted her for decades. From her lowest point, Portia began the painful climb back to health and happiness, ultimately falling head over heels in love with Ellen DeGeneres. In this remarkable and landmark book, she tells a story that inspires hope and nourishes the spirit.

The Last Lecture Randy Pausch 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. "We cannot change the cards we are dealt, just how we play the hand." —Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—"Really Achieving Your Childhood Dreams"—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have . . . and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Frank: The True Story that Inspired the Movie Jon Ronson 2014-01-16 Jon Ronson's Frank: The True Story that Inspired the Movie is a memoir of

funny, sad times and a tribute to outsider artists too wonderfully strange to ever make it in the mainstream. It tells the true story behind the fictionalized movie. In the late 1980s Jon Ronson was the keyboard player in the Frank Sidebottom Oh Blimey Big Band. Frank wore a big fake head. Nobody outside his inner circle knew his true identity. This became the subject of feverish speculation during his zenith years. Together, they rode relatively high. Then it all went wrong. Twenty-five years later and Jon has co-written a movie, Frank, inspired by his time in this great and bizarre band. Frank premiered at the Sundance Film Festival and won many prizes, including Best Screenplay (for Jon Ronson and Peter Straughan) at the 2014 British Independent Film Awards; it starred Michael Fassbender, Maggie Gyllenhaal and Domhnall Gleeson, and was directed by Lenny Abrahamson. 'Frank works as satire, as memoir, as comedy bromance, but it works mostly because it is just so weird' - Guardian

Best. Movie. Year. Ever. Brian Raftery 2020-03-31 From a veteran culture writer and modern movie expert, a celebration and analysis of the movies of 1999—"a terrifically fun snapshot of American film culture on the brink of the Millennium....An absolute must for any movie-lover or pop-culture nut" (Gillian Flynn). In 1999, Hollywood as we know it exploded: Fight Club. The Matrix. Office Space. Election. The Blair Witch Project. The Sixth Sense. Being John Malkovich. Star Wars: The Phantom Menace. American Beauty. The Virgin Suicides. Boys Don't Cry. The Best Man. Three Kings. Magnolia. Those are just some of the landmark titles released in a dizzying movie year, one in which a group of daring filmmakers and performers pushed cinema to new limits—and took audiences along for the ride. Freed from the restraints of budget, technology, or even taste, they produced a slew of classics that took on every topic imaginable, from sex to violence to the end of the world. The result was a highly unruly, deeply influential set of films that would not only change filmmaking, but also give us our first glimpse of the coming twenty-first century. It was a watershed moment that also produced The Sopranos; Apple's AirPort; Wi-Fi; and Netflix's unlimited DVD rentals. "A spirited celebration of the year's movies" (Kirkus Reviews), Best. Movie. Year. Ever. is the story of not just how these movies were made, but how they re-made our own vision of the world. It features more than 130 new and exclusive interviews with such directors and actors as Reese Witherspoon, Edward Norton, Steven Soderbergh, Sofia Coppola, David Fincher, Nia Long, Matthew Broderick, Taye Diggs, M. Night Shyamalan, David O. Russell, James Van Der Beek, Kirsten Dunst, the Blair Witch kids, the Office Space dudes, the guy who played Jar-Jar Binks, and dozens more. It's "the complete portrait of what it was like to spend a year inside a movie theater at the best possible moment in time" (Chuck Klosterman).

Teratologies Jackie Stacey 2013-07-23 Stories of cancer are full of monster and marvels; the monstrosity of the disease and the treatments, the marvels of the cures and the saved lives. Still one of the most dreaded diseases to haunt our imaginations, cancer is more than an illness - it is a cultural phenomenon. People who have cancer are bombarded with competing explanations of their conditions: it is genetically inherited; it is environmentally produced; it is the result of their personality. *Teratologies - A Cultural Study of Cancer* investigates how this disease is perceived, experienced and theorised in contemporary society. It explores changing beliefs about the causes of, and the cures for, cancer in both biomedicine and its increasingly popular alternative counterparts. Analysing conventional and alternative medical accounts, self-help manuals and patients' personal stories, Jackie Stacey takes a critical look at the place of heroes, metaphors, the self and the body in these competing bids to produce the authoritative definition of the meaning of cancer today. Interspersed with these detailed textual investigations are discussions of broader issues such as the feminist debates about the history of science, the place of consumer culture in health practices and the status of patients and of health professionals in postmodern society. Combining autobiographical narratives with contemporary theoretical debates, the author carves out a specifically feminist analysis of the cultural dimensions of cancer. She brings accounts of her own illness under the critical lens of academic scrutiny and situates these personal stories within a discussion of contemporary cultural change.
