Nutrient Requirements of Laboratory Animals, - National Research Council 1995-02-01

In the years since the third edition of this indispensable reference was published, a great deal has been learned about the nutritional requirements of common laboratory species: rat, mouse, guinea pig, hamster, gerbil, and vole. The Fourth Revised Edition presents the current expert understanding of the lipid, carbohydrate, protein, mineral, vitamin, and other nutritional needs of these animals. The extensive use of tables provides easy access to a wealth of comprehensive data and resource information. The volume also provides an expanded background discussion of general dietary considerations. In addition to a more user-friendly organization, new features in this edition include: A significantly expanded section on dietary requirements for rats, reporting substantial new findings. A new section on nutrients that are not required but that may produce beneficial results. New information on growth and reproductive performance among the most commonly used strains of rats and mice and on several hamster species. An expanded discussion of diet formulation and preparation—including sample diets of both purified and natural ingredients. New information on mineral deficiency and toxicity, including warning signs. This authoritative resource will be important to researchers, laboratory technicians, and manufacturers of laboratory animal feed.

Guinea Pigs Online: Bunny Trouble - Amanda Swift 2015-03-10

Fuzzy and Coco, the guinea pigs of Strawberry Park, London, are enjoying the spring, cleaning out their hutch and looking forward to the Easter Fair! But then Fuzzy's owner Ben, comes home very upset. The Rescue Center for local animals has to close down, and all because a very

naughty bunny called Binny made a huge mess and chewed through all the cages! And, worst of all, the Rescue Center's Easter Fair will have to be cancelled. Things get worse when Ben brings Binny the Bunny home to stay with the guinea pigs. Binny causes lots of trouble--she poops everywhere and is very rude to Coco. Meanwhile, Fuzzy and Terry, the guinea pig next door, plan to help get the Easter Fair back on track by using the internet to invite all of the locals to come help fix up the Rescue Center. Coco and Eduardo try to help Binny improve her behavior, but she is too naughty to listen. She is a very sad bunny--she wants to be a pet in a home of her own, like Fuzzy and Coco. But then she runs off and everyone is scared that the fox will find her and eat her! The day of the Easter Fair arrives, and lots of volunteers turn up to help fix the Rescue Center. It won't have to close after all! But where is Binny--the Easter Bunny? Fuzzy and Terry told everyone that she should be there! At the last minute, Eduardo and Coco find her, and they rush to the Rescue Center. It's not too late! Binny is adopted by a lovely little girl, the Rescue Center can stay open, and all because of the cleverness of the Guinea Pigs Online!

The Laboratory Rabbit, Guinea Pig, Hamster, and Other Rodents - Mark A. Suckow 2012-01-09

This is a single volume, comprehensive book sanctioned by the American College of Laboratory Animal Medicine (ACLAM), covering the rabbit, guinea pig, hamster, gerbil and other rodents often used in research. This well illustrated reference includes basic biology, anatomy, physiology, behavior, infectious and noninfectious diseases, husbandry and breeding, common experimental methods, and use of the species as a research model. It is a resource for advancements in the humane and

responsible care of: rabbit, guinea pig, hamster, gerbil, chinchilla, deer mouse, kangaroo rat, cotton rat, sand rat, and degu Includes up-to-date, common experimental methods. Organized by species for easy access during bench research.

The Male and Female Brain: Molecular Mechanisms of Sex Differences - Laura Musazzi 2021-12-30

Chlamydial Infections - William Robert Bowie 1990-05-25

The proceedings of the 6th International Symposium on Chlamydial Infections, published by Cambridge University Press in 1986, became an essential source of reference for researchers and clinicians interested in infections caused by this important group of organisms. This, the latest volume arising from the 7th Symposium, follows the successful pattern of its predecessor to provide a wide-ranging and contemporary account of Chlamydial research. Chlamydia continues to be a major cause of sexually transmitted disease and infertility in man, with growing awareness that there may be an important co-factor in the spread of AIDS. Ocular chlamydia infection is the world's prime cause of preventable blindness. This has prompted major research into new methods of diagnosing and preventing chlamydial disease. At the same time a new species of Chlamydia has been designated, Chlamydia pneumoniae, whose clinical impact is under detailed investigation.

Background Lesions in Laboratory Animals E-Book - Elizabeth Fiona McInnes 2011-10-24

Background Lesions in Laboratory Animals will be an invaluable aid to pathologists needing to recognize background and incidental lesions while examining slides taken from laboratory animals in acute and chronic toxicity studies, or while examining exotic species in a diagnostic laboratory. It gives clear descriptions and illustrations of the majority of background lesions likely to be encountered. Many of the lesions covered are unusual and can be mistaken for treatment-related findings in

preclinical toxicity studies. The Atlas has been prepared with contributions from experienced toxicological pathologists who are specialists in each of the laboratory animal species covered and who have published extensively in these areas. over 600 high-definition, top-quality color photographs of background lesions found in rats, mice, dogs, minipigs, non-human primates, hamsters, guinea pigs and rabbits a separate chapter on lesions in the reproductive systems of all laboratory animals written by Dr Dianne Creasy, a world expert on testicular lesions in laboratory animals a chapter on common artifacts that may be observed in histological glass slides extensive references to each lesion described aging lesions encountered in all laboratory animal species, particularly in rats in mice which are used for carcinogenicity studies

Pathology of Small Mammal Pets - Patricia V. Turner 2017-11-29
Pathology of Small Mammal Pets presents a ready reference for veterinarians, veterinary pathologists, and technicians who work with small mammal companion animals. Provides up-to-date, practical information on common disease conditions in small mammal companion animals Offers chapters logically organized by species, with comprehensive information on diagnosing diseases in each species Takes a practical, system-based approach to individual disease conditions Covers clinical signs, laboratory diagnostics, gross pathology, histopathology, and differential diagnoses in detail Includes relevant information for conventional breeding operations and breeding facilities, with strategies for disease management in herds and colonies Features information on normal anatomy in included species to assist in recognizing pathology
Peaceful Uses of Atomic Energy - 1958

Animal Models in Toxicology - Shayne C. Gad 2006-10-30

Reflecting more than a decade's worth of changes, Animal Models in Toxicology, Second Edition is a practical guide to the common statistical problems encountered in toxicology and the methodologies that are available to solve them. The book presents a historical review of the use of animal models and an overview of broad considerations of me

The Anatomical Record - Charles Russell Bardeen 1979

Issues for 1906- include the proceedings and abstracts of papers of the American Association of Anatomists (formerly the Association of American Anatomists); 1916-60, the proceedings and abstracts of papers of the American Society of Zoologists.

Visualization of Receptors - Gerard Morel 1997-02-26

A multiplicity of methods for visualization are described in Visualization of Receptors. This book of techniques covers immunocytology, radioautography, in situ hybridization, plasmon resonance, RT in vitro PCR, and X-ray crystal structure analysis. Lecturers, researchers, practitioners, technicians, and students will find all the principles and protocols they require and the means of implementing them. Topics discussed include localization of ligands (in vitro or in vivo), visualization

of immunoreactivities of ligand and receptor proteins, detection and quantification of mRNA expression, amplification of signals, and determination of 3-D structure. Details of protocols with illustrations of results and commentaries are provided throughout the book.

Raising Guinea Pigs - David Ernest Lantz 1921

The Guinea Pigs - Ludvík Vaculík 1986

The Guinea Pigs is a chilling fable about dehumanization and alienation representing Vaculik's vision of the menace of Soviet domination in the wake of the 1969 invasion. Written in 1970, it is a sweeping condemnation of totalitarianism, embedded in a rich, imaginative, highly experimental narrative. In the words of the New York Review of Books it is "one of the major works of literature produced in postwar Europe."
