Urinary Tract Infection Treatment - Kim Hilton 2019-05-10

Urinary Tract Infection (UTI) is a common infection, especially among women. This infection can start mild but might be chronic, even life-threatening when left untreated. Most people don't recognize the first symptom of UTI until the infection becomes chronic. This is one of the most widespread infections in humans and it can occur in any part of the urinary system. The urinary system includes the ureters, urethra, kidneys, and bladder. It becomes severe and life-threatening when it reaches the kidneys; this is known as pyelonephritis and it can cause sepsis when it enters the blood. Fortunately, there are natural ways you can deal with UTI and also prevent their future occurrence. This book is focused on natural ways to treat urinary tract infections using simple home remedies. The strategies involve ways to flush out the bad bacteria while stimulating the good bacterial flora. Ways to boost your immune system to stay against harmful bacteria are also provided Learn how to protect your urethra, maintain a balanced flora and create an environment inhospitable to bacteria. Urinary Tract Infection Cure and Treatment Manual - Dr Betty King
2023-02-07

Urinary tract infection (UTI) is common in women and men. It is caused by bacteria that move from the urethra (urine canal) through the bladder and into the ureters (a tube that carries urine from the kidneys to the bladder). UTI can cause fever, fatigue, and feeling stuffed up. It can also lead to a UTI infection in the bladder (cystitis) or the kidney (pyelonephritis). UTI is most common in people over 50 years old and those with a weak immune system. It is also more common in people who have had a UTI before. UTI is treated with antibiotics. If a sexually transmitted infection causes a UTI (STI), antibiotic treatment will not cure the infection. Still, it will help prevent the infection's spread to other people. UTI is a severe infection that can lead to long-term problems if not treated correctly. Anyone can get a UTI, but it is more common in people who are elderly, have a weakened immune system, or have a history of UTI. UTI is also more common in people who have sex with other people. Urinary tract infection (UTI) is an infection of the urinary tract, which is the system of organs and tissues that transports urine from the kidneys to the bladder. Infection with a UTI can cause urinary tract pain, discomfort, and a burning sensation when you urinate. If left untreated, a UTI can lead to more severe problems, such as kidney infection and even a UTI abscess. UTIs are very common, and they can occur at any age. But they are ubiquitous in women and are also more likely to occur in people with a history of UTIs. Bacteria usually cause UTIs, but viruses can also cause them. There are many ways to get a UTI. *Deliver with Delight* - Rakhi Kapoor 2020-03-10

The Big Secret, Incontinence - Sophia Kangarlu, M.D. and Anita Kanga
2010-07-23

Incontinence is one of the biggest secrets of our time. More than 25 million Americans suffer from some form of incontinence. Incontinence affects all aspects of our life. It affects the location of the vacation, the job, the social gatherings, the finances, the color of our clothing, even our movements. It affects our food, our drink, sleep and rest, the time of laughter, and virtually all aspects of life. But still we do not hear anything about it in the media, not between people, not between doctors and patients, and not between husbands and wives. Everybody is so embarrassed about incontinence that they do not want to talk about it and usually neglect it, and by negligence, most of the time, it becomes worse and decreases the quality of life significantly. It causes men and

women to isolate themselves and do behaviors that surprise others, and often loved ones resent them without knowing the real cause. People even cancel important social events of close friends because of incontinence such as weddings, anniversaries, trips, and more. Billions of dollars are spent; environment pollution is worsening, and the rate of depression and isolation increasing. People lose their independence and get transferred to nursing homes because of keeping this secret. It is time the big secret comes out. We want to talk about it loud and clear. I plead to the media, to all women advocates, to all health advocates, to human rights advocates, to environmentalists, to all elderly advocates—let's break the silence many people suffered and are suffering still today. I plead to all women and men, at any age, to break the silence. Do appropriate exercises at any age. These exercises are illustrated in this book. The accompanying DVD illustrates the exercises and can help you significantly reduce the incidence of incontinence. I plead to all mothers and fathers to teach these exercises to your children. May the future generation be luckier and healthier than we are. There is help out there. Just ask for it; do your part. Talk to your doctor.
