The Dual Artist Novel - Orla Siobhán Flock 2023-03-31

The artist novel occupies a prominent place in literary history. Although research into this genre, which is usually perceived as especially rigid, may seem to be exhausted at a first glance, a closer look at the development of the artist novel reveals its sheer incomparable malleability and resilience. In this book Orla Flock turns her attention to those types of artist novels, which she calls dual artist novels, which depict the artistic and personal development of both a male and a female artist. The juxtaposition of the male and the female artist narratives reveals both the rootedness of the genre in literary tradition and subverts established but outdated notions of genre and gender. On both a structural and a narrative level, the dual artist novel challenges established but confining views and demonstrates that even incremental, nuanced development over time can ultimately lead to vast transformation. By reshaping the formerly rigid genre of the artist novel to include numerous and diverse voices while staying true to the thematic tradition, the dual artist novel subverts both the notion of static genre definitions as well as limiting conceptions of gender.

Women's Rights: International studies on gender roles and its influence on human rights - Mônica Sapucaia 2018-09-18

This book, which I am pleased to preface, is divided into two parts of great relevance to contemporary feminist studies, especially to the peripheral countries of the capitalist world. In it lie essays that I divide into two categories. On the one hand, we have articles that address structural issues involving human rights and, in particular, women's rights. These are the texts that discuss the way in which the subject of human rights, in the contexts of the regional economic communities, are inserted; there are also the texts that address the bankruptcy of the patriarchal political system regarding the political representation of women in countries like India and Brazil; and the chapter in which the authors reflect on the need for an international feminist normative that breaks with the predominantly male discourse in international law, which disregards feminist proposals for normalization. The other part of the book covers varied subjects that connect with the feminist agenda and gender studies as well as contemporary identity processes. These are studies on the reproductive rights of women; sexual and domestic violence against women; environmental degradation and its relation to the patriarchal model to the detriment of traditional cultures; the immigration of women for marriage as a conscious choice; mental health and its relation to gender issues. Chapters: 1. REGIONAL ECONOMIC COMMUNITIES IN HUMAN AND WOMEN'S RIGHTS PROTECTION 2. WOMEN REPRODUCTIVE RIGHTS: A REFLECTION ABOUT INTERNATIONAL PROTECTION OF HUMAN RIGHTS 3. WOMEN AND MENTAL HEALTH: A STUDY ON ADOLESCENCY AND GENDER IN BRAZIL 4. A PROGRAM TO COMBAT HARASSMENT AGAINST WOMEN: CONSIDERATION FOR IMPLEMENTATION AT THE UNIVERSITY 5. DOMESTIC AND FAMILY VIOLENCE AGAINST WOMEN IN BRAZIL: IS THERE LIGHT AT THE END OF THE TUNNEL? 6. ENVIRONMENTAL PATRIARCHY AND INDIGENOUS WOMEN: FROM INVISIBILITY TO RESISTANCE 7. MARRIAGE EMIGRATION OF WOMEN FROM RUSSIA 8. RESERVATIONS, INTERSECTIONALITY, AND WOMEN'S REPRESENTATION IN INDIAN POLITICS 9. FIGHTING AGAINST GENDER INEQUALITY IN PARLIAMENT: CHALLENGES AND PERSPECTIVES FROM THE BRAZILIAN CASE 10. BUILDING UP AN INTERNATIONAL FEMINIST LAW

Dual-career Marriage - Lisa R. Silberstein 2014-01-14

Dual-career marriage, in which wife and husband each pursue a professional career, offers a window into the changing landscape of gender roles and relations. In the span of a single generation, the family in which both parents work outside the home has gone from being the exception to being the rule. This book examines the multi-layered implications this impressive, rapid change holds for the fabric of family and marital life and for the course of men's and women's work lives. Intensive interviews with dual-career wives and husbands provide rich information about four major issues: * In what ways and for whom do dual-career marriages replicate the traditional gender arrangements of one-career marriages, and in what ways do dual-career marriages represent a revolution in gender roles? * How do the two careers of spouses develop side by side, and in what ways do dual-career spouses

help or hinder each other's careers? * How do work and family combine in dual-career marriages? * How are relationships between spouses and between parents and children affected by dual careers? This book presents a subtle, textured portrait of contemporary dual-career marriage -- examining the complicated interplay of expectations, behaviors, and emotions within and between dual-career spouses. The author observes that the centrality of family or work to each spouse's sense of self powerfully affects how the couple negotiates the challenges posed by dual-career marriage, including feelings of competition between spouses, questions of geographic moves, and division of domestic tasks. The study illuminates many issues of clinical relevance, such as the common hazard of dual-career spouses having little time for marital intimacy once the rigorous demands of careers and children are met, and the complicated intrapersonal as well as interpersonal tensions generated by gender roles in transition.

Boundary Issues and Dual Relationships in the Human Services - Frederic G. Reamer 2020-11-24

Should a therapist disclose personal information to a client, accept a client's gift, or provide a former client with a job? Is it appropriate to exchange e-mail or text messages with clients or correspond with them on social networking websites? Some acts, such as initiating a sexual relationship with a client, are clearly prohibited, yet what about more subtle interactions, such as hugging or accepting invitations to a social event? Is maintaining a friendship with a former client or a client's relative a conflict of interest? Frederic G. Reamer offers a frank analysis of a range of boundary issues that human-service practitioners may confront. He confronts the ethics of intimate relationships with clients and former clients, the healthy parameters of practitioners' self-disclosure, the giving and receiving of gifts and favors, and the unavoidable and unanticipated circumstances of social encounters and geographical proximity. With case studies addressing challenges in the mental health field, school contexts, child welfare, addiction programs, home health care, elder services, and prison, rural, and military settings, Reamer offers effective, practical risk-management models that prevent problems and help balance dual relationships. Since the publication of the previous edition of *Boundary Issues and Dual Relationships in the Human Services* in 2012, digital technology has transformed how human-service professionals deliver services to clients. This third edition brings the book up to date, adding discussion of the ways in which practitioners' online communications and technology-based relationships with clients can violate ethical standards and providing practical advice for how to resolve boundary issues.

D.H. Lawrence, the Poet who was Not Wrong - Douglas A. Mackey 1986-01-01

Although D. H. Lawrence is justly celebrated as the author of such seminal novels as *The Rainbow*, *Sons and Lovers*, *Women in Love*, *The Plumed Serpent*, and *Lady Chatterley's Lover*, he also produced a considerable body of poetry, collected together in a thousand-page volume in 1928. The overall quality of the writer's verse is superb. It is permeated with the Lawrencean voice, the incandescent language, the recurrent symbology, the sense of wonder at nature, the subtle portrayals of human relationships, and the metaphysical thrust. Mackey provides the first lengthy examination of Lawrence's poems. Complete with Chronology, Bibliography, and Index.

Origins and Ends of the Mind - Christian Kerslake 2007

Figures of the Unconscious 7 In *Origins and Ends of the Mind*, a collection of theoretical essays by philosophers and psychoanalysts, encounters are arranged between Freudian and Lacanian psychoanalysis on the one hand and attachment theory, evolutionary psychology, and philosophy of mind on the other. Psychoanalysts claim that states of mind are inexorably structured by children's relationships with their parents. But the theory of attachment, evolutionary psychology, and contemporary philosophy of mind have all recently reintroduced the claim that mental development and pathology are to a large degree determined by innate factors. Today, Lacanian psychoanalysis most vigorously defends psychoanalytic theory and practice from the encroachment of the biomedical and cognitive sciences. However, classical psychoanalytic theories--the Oedipus complex, primary and secondary repression, sexual difference, and the role of symbols--are being dismantled and reintegrated into a new synthesis of biological and psychological theories.

The Dual Nature of Life - Gennadiy Zhegunov 2005-07-25

Life is a diverse and ubiquitous phenomenon on Earth, characterized by fundamental features distinguishing living bodies from nonliving material. Yet it is also so complex that it has long defied precise definition. This book from a seasoned biologist offers new insights into the nature of life by illuminating a fascinating architecture of dualities inherent in its existence and propagation. Life is connected with individual living beings, yet it is also a collective and inherently global phenomenon of the material world. It embodies a dual existence of cycles of phenotypic life, and their unseen driver — an uninterrupted march of genetic information whose collective immortality is guaranteed by individual mortality. Although evolution propagates and tunes species of organisms, the beings produced can be regarded merely as tools for the survival and cloning of genomes written in an unchanging code. What are the physical versus informational bases and driving forces of life, and how do they unite as an integrated system? What does time mean for individuals, life on the global scale, and the underlying information? This accessible examination of principles and evidence shows that a network of dualities lies at the heart of biological puzzles that have engaged the human mind for millennia.

Our Human Herds: The Theory of Dual Morality (Second Edition,

Unabridged) - Stephen Martin Fritz 2019-05-14

Let us imagine that somewhere in present day South America a nation exists as the United States was constituted in 1789. George Washington is its president and Thomas Jefferson its secretary of state. It is a nation that allows only white males to vote, and its president, cabinet officials, and many of its citizens own slaves. If the America of 1789 existed right now, what would we think of it? Would it be right to invade it in order to liberate its people? Would we consider a complete embargo of it, until it changed its ways? Would it be a pariah among nations? Or would we recognize and cooperate with it, declaring its president and secretary of state political geniuses? Maybe we would just do nothing and trust that in 100 or so years it will straighten itself out? What would be the correct way to think of such a nation and its leaders? Three hundred years ago, if a woman was raped and became pregnant we'd kill the rapist and spare the baby. Today, we spare the rapist and kill the baby. One hundred years ago only heterosexual marriages were legal. Today political leaders around the world are celebrating gay relationships. How and why does our moral outlook change in such matters? By the time you are done reading this book, you will have concrete answers to these questions and many more. "This is a learned, thoroughly researched study - and dazzlingly bright. The effervescent approach to writing makes its pages fly by ... Studies as brilliant as this one deserve a far wider audience. An engrossing and mind-expanding examination of morality" ~Kirkus Reviews

The Metaphysics of Sex ...in a Changing World! - Christopher Alan Anderson 2014-07-16

Is sex metaphysical? This is to say, does it have a purpose and a nature that is encoded in the very construct of the universe? These are the questions the author takes up in this day and age where most everything is up for grabs. This writing is not without an examination of sensitive issues and explicit terms. Think of it as a third way, if you will. It resides between the "fixed" identity of our declining religions and the "fluid" identity of the emerging L,G,B,T,Q movement. In that it presents to us all another choice. In the end, it is about a construct for sexual balance that any reader can understand and use as a guide for his or her life.

Dual-Process Theories of the Social Mind - Jeffrey W. Sherman 2014-05-01

"This volume provides an authoritative synthesis of a dynamic, influential area of psychological research. Leading investigators address all aspects of dual-process theories: their core assumptions, conceptual foundations, and applications to a wide range of social phenomena. In 38 chapters, the volume addresses the pivotal role of automatic and controlled processes in attitudes and evaluation; social perception; thinking and reasoning; self-regulation; and the interplay of affect, cognition, and motivation. Current empirical and methodological developments are described. Critiques of the duality approach are explored and important questions for future research identified"--

Life-Span Development and Behavior - David L. Featherman 2014-01-14
This volume continues the tradition of the Life-Span Development Series, presenting overviews of research programs on a variety of developmental topics. Research and theory in life-span development have given increased attention to the issues of constancy and change in human development and to the opportunities for, and constraints on, plasticity in structure and function across life. Acknowledging the need for and existence of interconnection between age and developmental periods, it focuses on conditions for possibly discontinuous development that emerge at later periods. Contributors to this series are sensitive to the restrictive consequences of studying only specific age periods, such as old age, infancy, or adolescence. Each scholar attempts to relate the facts about one age group to similar facts about other age groups, and to move toward the study of transformation of characteristics and processes over the life span.
