Studies in the Psychology of Sex v4 - Havelock Ellis 2015-11-07
umescence—the process by which the organism is brought into the physical and psychic state necessary to insure conjugation and detumescence—to some extent comes about through the spontaneous action of internal forces. To that extent it is analogous to the physical and psychic changes which accompany the gradual filling of the bladder and precede its evacuation. But even among animals who are by no means high in the zoölogical scale the process is more complicated than this. External stimuli act at every stage, arousing or heightening the process of tumescence, and in normal human beings it may be said that the process is never completed without the aid of such stimuli, for even in the auto-erotic sphere external stimuli are still active, either actually or in imagination. The chief stimuli which influence tumescence and thus direct sexual choice come chiefly—indeed, exclusively—through the four senses of touch, smell, hearing, and sight. All the phenomena of sexual selection, so far as they are based externally, act through these four senses.[1] The reality of the influence thus exerted may be demonstrated statistically even in civilized man, and it has been shown that, as regards, for instance, eye-color, conjugal partners differ sensibly from the unmarried persons by whom they are surrounded. When, therefore, we are exploring the nature of the influence which stimuli, acting through the sensory channels, exert on the strength and direction of the sexual impulse, we are intimately concerned with the process by which the actual form and color, not alone of living things generally, but of our own species, have been shaped and are still being shaped. At the same time, it is probable, we are exploring the mystery which underlies all the subtle appreciations, all the emotional undertones, which are woven in the web of the whole world as it appeals to us through those sensory

passages by which alone it can reach us. We are here approaching, therefore, a fundamental subject of unsurpassable importance, a subject which has not yet been accurately explored save at a few isolated points and one which it is therefore impossible to deal with fully and adequately. Yet it cannot be passed over, for it enters into the whole psychology of the sexual instinct.

Art & Its Shadow - Mario Perniola 2004-05-01

Art and its Shadow is an extraordinary analysis of the state and meaning of contemporary art and film. Ranging across the work of Andy Warhol, cyberpunk, Wim Wenders, Derek Jarman, thinking on difference and the possibility of a philosophical cinema, Mario Perniola examines the latest and most disturbing tendencies in art. Perniola explores how art - notably in posthumanism, psychotic realism and extreme art - continues to survive despite the hype of the art market and the world of mass communication and reproduction. He argues that the meaning of art in the modern world no longer lies in aesthetic value (above the art work), nor in popular taste (below the art work), but beside the artwork, in the shadow created by both the art establishment and the world of mass communications. In this shadow is what is left out of account by both market and mass media: the difficulty of art, a knowledge that can never be fully revealed, and a new aesthetic future.

Sex Appeal - Paul Abramson 2010-02-02

An epidemic of sexually-transmitted infections and sexual violence is upon us. Political interests are overriding sexual freedom in the name of morality. Marriages are just as likely to fail as they are to succeed. Why, in a time of unprecedented personal liberties and medical knowledge, are so many Americans so uncertain about what constitutes ethical sexual behavior? Sex Appeal is neither a moralistic screed nor a self-

indulgent guide to sexual utopia. Instead, it charts a thoughtful course between extremes to present six ethical principles for sexual health and happiness: do no harm, celebrate sex, be careful, know yourself, speak up and speak out, and throw no stones. *Sex Appeal* elaborates upon each of these principles, asserting that sex can be fun, safe, and life-enhancing if approached in the right spirit and with the information necessary to make wise sexual choices. Providing clear guidelines for individuals seeking answers to their own personal questions about sex, the book also connects these questions to larger issues, such as how we as a society can reduce levels of sexual harm and sexually-transmitted infections, and how everyday individual choices can support this effort. Persuasive and eminently readable, *Sex Appeal* offers a welcome dose of clarity and common sense to today's most pressing sexual issues.

The Sex Appeal of the Inorganic - Mario Perniola 2022-06-02

In *The Sex Appeal of the Inorganic*, Mario Perniola puts forth the radical argument that we are shifting away from organic sexuality, based on desire and pleasure, and moving towards a more neutral inorganic and artificial sexuality, a sexuality always available but indifferent to beauty, age or form. Perniola takes the reader on a tour of Western philosophy, from Descartes, Kant and Hegel to Heidegger, Wittgenstein and Sartre, to reframe our understanding of personal experience and the aesthetic world around us. In order to realize the sex appeal of the inorganic Perniola argues that we must become 'things that feel', we must think ourselves closer to the inorganic, creating an alliance between senses and things. Examples from contemporary culture that, for Perniola, are emblems of the sex appeal of the inorganic, include progressive rock music, fashion, deconstructive architecture and the novels of Georges Perec.

Advertising Culture and Translation - Rosanna Masiola 2017-03-07

This book is the first comprehensive study combining and integrating advertising, culture and translation within the framework of colonial, Commonwealth, and postcolonial studies, and globalization. It addresses a number of controversial issues evident in two relatively young disciplines, as a result of decades of research and teaching in university

courses. A cross-cultural approach to translational issues and the translatability of advertising cohesively is adopted here, exploring the dynamics of the conflict between the 'centre' and the 'periphery'. It introduces the concept of advertising English as lingua franca (AELF), marking new trends in the domain of varieties of English around the world (VEAW). The data examined here show the ambivalent polarity conditioning advertising and translation: both have been mutually exclusive, and both have been subject to bans, censorship and ideological control, racism, propaganda, and stereotyping. In their fundamental principles and concepts of theories and applications, however, neither discipline can exist outside a free market and total freedom of expression and trust.

Sex Appeal - Kate Botting 1996

An illustrated study of human sexual attraction takes a close-up look at the mysterious forces that trigger sexual chemistry, discussing such topics as varying concepts of beauty, the role of hormones and scent, aphrodisiacs, and more.

Companion Animals and Us - Anthony L. Podberscek 2005-07-21

Over the past 30 years there has been a tremendous growth in interest in the multidisciplinary field of human-companion animal interactions and relationships. This is not surprising considering that pets are kept in at least half of the households in Western societies. What then, is so special about the relationships people have with their pets? Are we very different from our ancestors in the ways we feel about animals? What does pet-keeping tell us about ourselves and our relationships with people? Can pets be good for our health? Do they help promote empathy for other humans? These questions and more are explored in this book. *Companion Animals and Us* brings together some of the newest research from a wide variety of disciplines including anthropology, history, psychology, sociology, human and veterinary medicine. This book will make fascinating reading for anyone interested in understanding more about the human-pet relationship.

Extreme Beauty - James Swearingen 2003-01-01

What do we mean when we speak of "beauty"? What do we experience?

Beauty is no longer the human experience of the harmonious object; today an aesthetics of difference has revolutionised our ways of seeing the beautiful. Now, we live in a time of "extreme beauty." Extreme Beauty explores art, literature, politics, and philosophy in order to illuminate how the concept and experience of beauty has changed. The essays range from Hegel and Modernism to Marcel Duchamp and the Avant-Garde, postmodern poetics, boredom and Proust, the romance of Arendt and Heidegger, fascism and the consumption of the flesh, postcolonialism and imagination to Derrida and the glory and gift of death.

Studies in the Psychology of Sex - Havelock Ellis 2004-10-15

Sex Appeal - Steven Heller 2000-03-01

In this first book to seriously examine the use and/or abuse of sex and innuendo in the mass media, interviews with leading figures in mainstream marketing focus on sex and innuendo, from the so-called satiric pornography of Calvin Klein ads and the muscle men and women hawking Evian water, to the sensual allure used in graphic and advertising design in music, art, film, packaging, and publishing.

Architecture, Means and Ends - Vittorio Gregotti 2010-11-15

Vittorio Gregotti—the architect of Barcelona's Olympic Stadium, Milan's Arcimboldi Opera Theater, and Lisbon's Centro Cultural de Belém, among many other noted constructions—is not only a designer of international repute but an acclaimed theorist and critic. *Architecture, Means and Ends* is his practical and imaginative reflection on the role of the technical aspects of architectural design, both as part of the larger process of innovation and in relation to the mythic opposition between vision and construction. Interweaving the seemingly irreconcilable concerns of aesthetics, meaning, and construction, *Architecture, Means and Ends* reflects Gregotti's overarching claim that buildings always have a symbolic, cultural content. In this book, he argues that by making symbolic expression a primary objective in the design of a project, the designer will produce a practical aesthetic as well as an ethical solution. *Architecture, Means and Ends* embraces that philosophy and will appeal to those, like Gregotti, working at the intersections of the history of design, art criticism, and architectural theory.

[The Tao of Male Sex Appeal](#) - Jim Carrera 2004-08-01

The true measure of a nation's worth in this great family of nations is proportionate to that nation's contribution to the welfare and happiness of the whole. Similarly, an individual is measured by the contributions he or she makes to the well being of the community in which he or she lives. If inventions therefore have played the important part here assigned to them in the gradual development of our complex national life, it becomes important to know what contributions the African American has made to the inventive skill of this country. In this book you will learn that the African American has contributed a disproportionate amount of creativity and resourcefulness on a list of more than 1100 U.S. Patents for inventions ranging from the propeller, the gas mask, air conditioning, pain relieving drugs, heart pace-maker controls and cellular phones to the elevator, rapid-fire guns, nuclear reactors and three-stage rockets. Throughout their long history, African Americans have created a rich, complex and highly diverse culture laced with outstanding role models

who have helped make America the strongest country in the world.
