## **The World According To Garp** - John Irving

2012-05-10

This is the life and times of T. S. Garp, the bastard son of Jenny Fields - a feminist leader ahead of her times. It is also the life and death of a famous mother and her almost-famous son; theirs is a world of sexual extremes - even of sexual assassinations. It is a novel rich with 'lunacy and sorrow'; yet the dark, violent events of the story do not undermine a comedy both ribald and robust. It provides almost cheerful, even hilarious evidence of its famous last line: "In the world according to Garp, we are all terminal cases."

Middlesex - Jeffrey Eugenides 2003-09-01

Winner of the 2003 Pulitzer Prize for Fiction: the

dazzling international bestseller from the author of *The Virgin Suicides* . a rollicking family epic like no other!

## **Girls of Paper and Fire** - Natasha Ngan

2018-11-06

Uncover a riveting story of palace intrigue set in a sumptuous Asian-inspired fantasy world in the breakout YA novel that *Publisher's Weekly* calls "elegant and adrenaline-soaked." In this richly developed fantasy, Lei is a member of the Paper caste, the lowest and most persecuted class of people in Ikhara. She lives in a remote village with her father, where the decade-old trauma of watching her mother snatched by royal guards for an unknown fate still haunts her. Now, the guards are back and this time it's Lei they're

after -- the girl with the golden eyes whose rumored beauty has piqued the king's interest. Over weeks of training in the opulent but oppressive palace, Lei and eight other girls learns the skills and charm that befit a king's consort. There, she does the unthinkable: she falls in love. Her forbidden romance becomes enmeshed with an explosive plot that threatens her world's entire way of life. Lei, still the wide-eyed country girl at heart, must decide how far she's willing to go for justice and revenge.

*The Magicians* - Lev Grossman 2009-10-08  
Quentin Coldwater is brilliant but miserable. Obsessed with the fantasy novels he read as a child, he finds the real world just doesn't compare. Then one day it happens: he stumbles unexpectedly into a hidden world and is invited to join a very exclusive college, where he will learn the secrets of magic. But something is still missing. And now Quentin will do anything to find what he's always been looking for. Praise for *The Magicians* Trilogy 'The best fantasy

trilogy of the decade.' Charles Stross 'The most entertaining and compelling fantasy I've read in a long time.' The Times 'Lev Grossman has conjured a rare creature: a trilogy that simply gets better and better as it goes along... Literary perfection.' Erin Morgenstern 'May just be the most subversive, gripping, and enchanting fantasy novel I've read this century.' Cory Doctorow 'Dark and dangerous and full of twists. Hogwarts was never like this.' George R. R. Martin 'Sad, hilarious, beautiful, and essential to anyone who cares about modern fantasy.' Joe Hill 'A darkly cunning story about the power of imagination itself.' The New Yorker 'The *Magicians* ought to be required reading... a terrific, at times almost painfully perceptive novel of the fantastic.' Kelly Link 'Brilliantly explores the hidden underbelly of fantasy and easy magic, taking what's simple on the surface and turning it over to show us the complicated writhing mess beneath.' Naomi Novik

An illuminating study of the complex relationship between children and media in the digital age. Now, as never before, young people are surrounded by media—thanks to the sophistication and portability of the technology that puts it literally in the palms of their hands. Drawing on data and empirical research that cross many fields and continents, authors Valkenburg and Piotrowski examine the role of media in the lives of children from birth through adolescence, addressing the complex issues of how media affect the young and what adults can do to encourage responsible use in an age of selfies, Twitter, Facebook, and Instagram. This important study looks at both the sunny and the dark side of media use by today's youth, including why and how their preferences change throughout childhood, whether digital gaming is harmful or helpful, the effects of placing tablets and smartphones in the hands of toddlers, the susceptibility of young people to online advertising, the legitimacy of parental concerns

about media multitasking, and more.

**Communities in Action** - National Academies of Sciences, Engineering, and Medicine  
2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the

United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Alchemyst - Michael Scott 2010

While working at pleasant but mundane summer jobs in San Francisco, fifteen-year-old twins, Sophie and Josh, suddenly find themselves caught up in the deadly, centuries-old struggle between rival alchemists, Nicholas Flamel and John Dee, over the possession of an ancient and powerful book holding the secret formulas for alchemy and everlasting life.

**Parenting Matters** - National Academies of Sciences, Engineering, and Medicine 2016-12-21  
Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From

birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population,

and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the

United States.

**The Hate U Give** - Angie Thomas 2018-08

Read the book that inspired the movie! Sixteen-year-old Starr lives in two worlds: the poor neighbourhood where she was born and raised and her posh high school in the suburbs. The uneasy balance between them is shattered when Starr is the only witness to the fatal shooting of her unarmed best friend, Khalil, by a police officer. Now what Starr says could destroy her community. It could also get her killed. Inspired by the Black Lives Matter movement, this is a powerful and gripping novel about one girl's struggle for justice.

2018-09-11

A decade after its release, the astonishing opener to Patrick Ness's Chaos Walking trilogy still resonates. Celebrate ten years of this groundbreaking book with a beautiful anniversary hardcover edition. Todd Hewitt is the only boy in a town of men. Ever since the settlers were infected with the Noise germ, Todd can hear everything the men think, and they can hear everything he thinks. Todd is just a month away from becoming a man, but in the midst of the cacophony, he knows that the town is hiding something from him — something so awful that Todd is forced to flee with only his dog, whose simple, loyal voice he hears too. With hostile men from the town in pursuit, the two stumble upon a strange and eerily silent creature: a girl. Who is she? Why wasn't she killed by the germ like all the other females on New World? Propelled by Todd's gritty narration, readers are in for a white-knuckle journey in which a boy on the cusp of manhood must unlearn everything he

knows in order to figure out who he truly is.

The Left Hand Of Darkness - Ursula K. Le Guin  
2012-12-06

Winter is an Earth-like planet with two major differences: conditions are semi arctic even at the warmest time of the year, and the inhabitants are all of the same sex. Tucked away in a remote corner of the universe, they have no knowledge of space travel or of life beyond their own world. And when a strange envoy from space brings news of a vast coalition of planets which they are invited to join, he is met with fear, mistrust and disbelief . . . 'The Left Hand of Darkness' is a groundbreaking work of feminist science fiction, an imaginative masterpiece which poses challenging questions about sexuality, sexism

and the organisation of society.

Praise for The Unbecoming of Mara Dyer: 'Haunting and dreamlike... the intrigue and romance will inescapably draw you in' - Cassandra Clare, bestselling author of The Mortal Instruments series. 'The Unbecoming of Mara Dyer strikes a rare balance of darkly funny, deliciously creepy and genuinely thoughtful. One minute I was laughing out loud, and the next, I was so scared I wanted to turn on all the lights and hide under the covers. Michelle Hodkin's talent and range are obvious, from her chilling descriptions to romantic scenes that almost crackled on the page. I've never read anything quite like it.' Science need not be dull and bogged down by jargon, as Richard Dawkins proves in this entertaining look at evolution. The themes he takes up are the concepts of altruistic and selfish behaviour; the genetical definition of selfish interest; the evolution of aggressive behaviour; kinship theory; sex ratio theory; reciprocal altruism; deceit; and the natural selection of sex differences. 'Should be read, can be read by almost anyone. It describes with great skill a new face of the theory of evolution.' W.D. Hamilton, Science
