Speaking In Tongues Tom Tilley 2022-05-01 When you no longer believe in eternity, every moment counts -- A memoir of breaking free and reinvention From the outside, Tom Tilley's childhood seemed ordinary. The first son of a pastor, he grew up in a beautiful country town where life revolved around football, his loving family and their Pentecostal faith. But behind church doors, a strictly enforced set of rules included a looming ultimatum: if Tom didn't speak in tongues, he'd go to hell and be outcast from his close-knit, devout community. The older Tom became, the more he

questioned the teachings of the church, especially around speaking in tongues. And the more he heard about his parents' adventurous lives before they found God, the more he wanted the freedom to make those 'mistakes' that the church forbade. Eventually, after years of suppressing his doubts in silence, Tom spoke up. Having the courage to do so came at a huge personal cost, leading to a decision that would take his family to breaking point. What happened next is surprising, and Tom's journey to independence will inspire readers to ask what's true in their own lives and who they really are. Told with empathy and searing honesty, *Speaking in Tongues* is a powerful coming-of-age story about questioning the life created for you and building your true self, one recycled brick at a time.

Facing Mount Kenya Jomo Kenyatta 1978-12-29 Facing Mount Kenya, first published in 1938, is a monograph on the life and customs of the Gikuyu people of central Kenya prior to their contact with Europeans. It is unique in anthropological literature for it gives an account of the social institutions and religious rites of an African people, permeated by the emotions that give to customs and observances their meaning. It is characterised by both insight and a tinge of romanticism. The author, proud of his African blood and ways of thought, takes the reader through a thorough and clear picture of Gikuyu life and customs, painting an almost utopian picture of their social norms and the sophisticated codes by which all aspects of the society were governed. This book is one of a kind, capturing and documenting traditions fast disappearing. It is therefore a must-read for all who want to learn about African culture.

Just Keep a Bag Packed Edna Carr Green 2013 Most memoirs are written by famous men—important men who have led successful lives. One hears little of their wives except a "thank you for your patience" or a dedication in the introduction. This memoir is nothing like that. I have been married for fifty-two years, but you will scarcely find a mention of my husband in this book. This is my story. It is the story of a girl who left the still-war-torn United Kingdom and entered the confusing world of the Middle East. New languages, new customs, and a quick shift from the life of a single girl in Regent's Park to a mother with a tiny baby in an Arab village with no doctors or other facilities, not even a telephone to call home. A sense of humor was required to survive, so I hope the reader will find the story amusing.

Understanding Young People's Science Aspirations Louise Archer 2016-08-12 Understanding Young People's Science Aspirations offers new evidence and understanding about how young people develop their aspirations for education, learning and, ultimately, careers in science. Integrating new findings from a major research study with a wide ranging review of existing international literature, it brings a distinctive sociological analytic lens to the field of science education. The book offers an explanation of how some young people do become dedicated to follow science, and what might be done to increase and broaden this population, exploring the need for increased scientific literacy among citizens to enable them to exercise agency and lead a life underpinned by informed decisions about their own health and their environment. Key issues considered include: why we should study young people's science aspirations the role of families, social class and science capital in career choice the links between ethnicity, gender and science aspirations the implications for research,

Council 2009-11-29 Improving the Measurement of Late-Life Disability in Population Surveys summarizes a workshop organized to draw upon recent advances to improve the measurement of physical and cognitive disability in population surveys of the elderly population. The book questions whether or not the measures of activities of daily living and instrumental activities of daily living used in many population surveys are sufficient as the primary survey-based indicators of late-life disability. If not, should they be refined or should they be supplemented by other measures of disability in surveys? If yes, in what ways should disability measures be changed or modified to produce population estimates of late-life disability and to monitor trends? The book also discusses what further research is needed to advance this effort.
