## **Big Pharma, Women, and the Labour of Love** - Thea Cacchioni 2015-01-01

Cacchioni moves beyond the search for a sexual pharmaceutical drug for women to ask a broader question: how does the medicalization of female sexuality already affect women's lives?

## Narrating the Everyday: Windows on Life in Central South Africa - Asta Rau 2019-01-01

The chapters in this book reflect on the practice of using narratives to understand individual and social reality. They all reveal dimensions of the same concrete reality: contemporary society of Central South Africa. Except for two, all the chapters originated from research in the program The Narrative Study

of Lives, situated in the Department of Sociology at the University of the Free State in Bloemfontein, South Africa. Each chapter opens a window on an aspect of everyday life in Central South Africa. Each window displays the capacity of the narrative as a methodological tool in qualitative research to open up better understandings of everyday experience. The chapters also reflect on the epistemological journey towards unwrapping and breaking open of meaning. Narratives are one of many tools available to sociologists in their quest to understand and interpret meaning. But, when it comes to deep understanding, narratives are particularly effective in opening up more intricate levels of meaning associated with emotions,

feelings, and subjective experiences.

*Talk to Strangers* - David Topus  
2012-04-24

Connect to the world around you and realize the enormous potential in talking to strangers. Everyday, random encounters really can change lives, when you make them happen the right way and leverage the connection at the other end. *Talk to Strangers* explains how to stand out and tap the potential of others by taking notice of who is standing alongside you on the bank line, the latte pickup point, or the ticket counter at the airport. David Topus' life-changing message is that we should "always connect," which means going beyond online relationships and engaging in the random, real-life interactions that have unlimited potential to supercharge businesses, accelerate careers, and enrich your life. Why there is opportunity through the people you meet wherever you go. The four key beliefs of successful random connectors. Techniques

for creating comfort and trust quickly with complete strangers. How to optimize and monetize your newly-established contacts. When you connect to those in your everyday world, you'll discover the life-expanding potential of random encounters and unlimited opportunities.

*Talking to Strangers* - Gary Gumpert 1990

The implications of converging interests between information and financial industries are discussed in view of the need for a new international order.

of close relationships. What varies from relationship to relationship is not whether partners hurt each other, but how their relationship is affected by hurtful episodes. Given the potential influence of hurt feelings on people's interpersonal relationships, it is not surprising that scholars have begun to study the antecedents, processes, and outcomes associated with hurt. This collection integrates the various issues addressed by researchers, theorists, and practitioners who study the causes of hurt feelings, the interpersonal events associated with hurt, and the ways people respond to hurting and being hurt by others. To capture the breadth and depth of the literature in this area, the work of scholars from a variety of disciplines - including social psychology, communication, sociology, and family studies - is highlighted.

*Social Attitudes in Contemporary China* - Chen Yu  
2016-02-12

Unlike many studies of social attitudes, which are based on

large scale quantitative surveys, or which focus on the attitude of elites, this book considers the views of ordinary people, and is based on in-depth, qualitative interviews. This approach results in rich, nuanced data, and is especially helpful for highlighting ambivalent attitudes, where respondents may hold positive and negative views on a particular topic, views which are liable to change. The book examines attitudes on a range of subjects of current importance, including views on nationalism and internationalism, housing preferences, and educational ambitions. Throughout, the book explores how far attitudes are influenced by traditional Chinese values or by the neo-liberal outlook fostered by recent reforms, and concludes that materialism and individualism have increased.

increasingly turned their gaze to the symbolic and cultural elements of technologies. From studying online game communities, locative and social media to YouTube and mobile media, ethnographic approaches to digital and networked media have helped to elucidate the dynamic cultural and social dimensions of media practice. The Routledge Companion to Digital Ethnography provides an authoritative, up-to-date, intellectually broad, and conceptually cutting-edge guide to this emergent and diverse area. Features include: a comprehensive history of computers and digitization in anthropology; exploration of various ethnographic methods in the context of digital tools and network relations; consideration of social networking and communication technologies on a local and global scale; in-depth analyses of different interfaces in ethnography, from mobile technologies to digital archives.

*Principles and Practice of Child and Adolescent Forensic Mental Health* - Elissa P.

Benedek 2009-10-20

When care of younger patients raises thorny legal questions, you need answers you can trust: that's why this book belongs on every clinician's reference shelf. Principles and Practice of Child and Adolescent Forensic Mental

Health is a timely and authoritative source that covers issues ranging from child custody to litigation concerns as it walks clinicians through the often-confusing field of depositions and courtroom testimony. The book expands on the 2002 volume Principles and Practice of Child and Adolescent Forensic Psychiatry winner of the 2003 Manfred S. Guttmacher Award, to meet pressing twenty-first-century concerns, from telepsychiatry to the Internet, while continuing to cover basic issues, such as forensic evaluation, psychological screening, and the interviewing of children for suspected sexual abuse, that are important to both new and experienced practitioners. Many of its chapters have been entirely rewritten by new authors to provide fresh insight into such topics as child custody; juvenile law; abuse, neglect, and permanent wardship cases; transcultural, transracial, and gay/lesbian parenting and adoption; and the reliability and suggestibility

of children's statements. It also includes significant material not found in the previous volume: Two chapters on special education offer an introduction to screening instruments and help practitioners determine a child's potential need for special education programs and services. A chapter on cultural competence helps readers improve the accuracy and responsiveness of forensic evaluations and minimize the chance of an unjust outcome resulting from misguided expert opinion. The section on youth violence features three new chapters -- Taxonomy and Neurobiology of Aggression, Prevention of School Violence, and Juvenile Stalkers -- plus a newly written chapter on assessment of violence risk, offering guidance on how to confront problems such as bullying and initiate effective family interventions. A chapter on psychiatric malpractice and professional liability addresses these legal concerns with an eye toward cases involving minors. A chapter on

psychological autopsy covers evaluation of the circumstances surrounding pediatric suicides, describing various types of equivocal deaths and discussing legal issues such as admissibility of the autopsy in court. A newly written chapter on the Internet expands the previous book's focus on child pornography to help practitioners deal with issues ranging from online threats to emotional and legal consequences of interactions in cyberspace. This is a valuable reference not only for practitioners in psychiatry and the mental health field but also for attorneys and judges. It opens up a field that may be too often avoided and helps professionals make their way through legal thickets with confidence.

author examines social factors such as changes in the physical construction of urban neighbourhoods; changes in family life including reduced family size, increasing rates of divorce and increased physical mobility of the family unit; school life and mounting pressure to perform well in examinations and be a good student; access to foreign and domestic media as well as access to the internet. Drawing on the fields of social and cultural anthropology, Alex Cockain shows that the process of self understanding in a changing spatial, social and cultural world involves ongoing disjointed efforts to achieve a sense of security and belonging on the one hand and a degree of increased autonomy in their relationships with, for example, parents and teachers on the other. This book will appeal to anyone interested in Chinese Society, Social and Cultural Anthropology, Asian Anthropology and Youth Studies.

**Don't Talk to Strangers -**  
Bethany Campbell 2010-01-13

They were strangers in a seductive game of hide-and-seek. One by one, the women were disappearing. Each had been young, vulnerable...and each had been spending time on the Internet "chatting" with a mysterious stranger. It was Carrie Blue's job to track down that stranger, to put herself on the Internet in the guise of a lonely young student, and to smoke out a cunningly seductive killer. But soon Carrie is drawn inexorably into a world where truth is indistinguishable from fiction, where fantasy and reality collide. It proves far more difficult than she ever could have imagined to resist the lure of a twisted mind--one that may already have figured out who Carrie is, and marked her as his next kill.

*Single Girl Problems* - Andrea Bain 2018-01-13

Single women over the age of 29 are seen as lonely, miserable, undesirable, and cat-crazy. Family members, friends — heck, even perfect strangers ask, “When are you going to get married?” This book flips the script on what it means to be a single woman in the twenty-first century. With dating horror story anecdotes and advice about online dating, self-esteem, sex, money, and freezing your eggs, Andrea Bain takes the edge off being single and encourages women to never settle.

### **Talking to Strangers -**

Malcolm Gladwell 2019-09-10

THE INTERNATIONAL

BESTSELLER 'Compelling, haunting, tragic stories . . .

McConnachie, Sunday Times

Book of the Year The routine

traffic stop that ends in

tragedy. The spy who spends years undetected at the highest

levels of the Pentagon. The

false conviction of Amanda

Knox. Why do we so often get

other people wrong? Why is it

so hard to detect a lie, read a

Using stories of deceit and fatal errors to cast doubt on our strategies for dealing with the unknown, Malcolm Gladwell takes us on an intellectual adventure into the darker side of human nature, where strangers are never simple and misreading them can have disastrous consequences.

### Social Media in Rural China -

Tom McDonald 2016-09-13

China's distinctive social media platforms have gained notable

popularity among the nation's vast number of internet users,

but has China's countryside been 'left behind' in this

communication revolution?

Tom McDonald spent 15

months living in a small rural

Chinese community

researching how the residents

use social media in their daily

lives. His ethnographic findings

suggest that, far from being

left behind, many rural Chinese

people have already integrated

social media into their

experience. Throughout his

McDonald argues that social media allows rural people to extend and transform their social relationships by deepening already existing connections with friends known through their school, work or village, while also experimenting with completely new forms of relationships through online interactions with strangers, particularly when looking for love and romance. By juxtaposing these seemingly opposed relations, rural social media users are able to use these technologies to understand, capitalise on and challenge the notions of morality that underlie rural life.

### **I Won't Go With Strangers -**

Dagmar Geisler 2018-04-03

Lu won't go with just anyone! Lu is waiting to be picked up after school. She stands on the sidewalk, all alone, and it starts to rain. Ms. Smith walks by, and offers to take her home. Ms. Smith lives in Lu's neighborhood—but does Lu

really know her? Lu asks herself, what's her first name? Does she dye her hair red? What's her dog's name? And she says, "I don't know you, so I won't go with you! And besides, Mama said I should wait." As other adults—all of whom Lu has met in some capacity before—offer to take her home, Lu continues to consider if she really knows them. One by one, she refuses to go with them. Until, finally, the person Mama said she should go home with shows up—though his appearance is a surprise to the reader! This sensitively narrated story illustrates how clear rules and arrangements can help protect and empower children during an especially vulnerable time of day. The ending includes a prompt for readers to create their own similar "safe" list, and a list of resources for parents.
