[Having Your Second Child First](#) - Ina Sinsheimer 2018-03-23

First Step Nursery School was founded in 1977 by Ina Sinsheimer. Grounded in a deep respect for children, the teaching of independence, and caring for others, the small Santa Monica preschool has remained consistent for 40 years. In Ina's words "I hope that when a child walks out of the gate they will climb any mountain they wish to climb, educational or otherwise. I hope they have learned to question the world, ask 'Can you explain that to me?' or say, 'I do not understand' or 'I do not agree'. More importantly, I hope they choose for their life's work something that will make this a better world and that they find someone to share their life, because no matter how successful you are, life without someone to love is incomplete.

Discourse 2.0 - Deborah Tannen 2013-03-12

Our everyday lives are increasingly being lived through electronic media, which are changing our interactions and our communications in ways that we are only beginning to understand. In Discourse 2.0: Language and New Media, editors Deborah Tannen and Anna Marie Trester team up with top scholars in the field to shed light on the ways language is being used in, and shaped by, these new media contexts. Topics explored include: how Web 2.0 can be conceptualized and theorized; the role of English on the worldwide web; how use of social media such as Facebook and texting shape communication with family and friends; electronic discourse and assessment in educational and other settings; multimodality and the "participatory spectacle" in Web 2.0; asynchronicity and turn-taking; ways that we engage with technology

including reading on-screen and on paper; and how all of these processes interplay with meaning-making. Students, professionals, and individuals will discover that Discourse 2.0 offers a rich source of insight into these new forms of discourse that are pervasive in our lives.

Islamic Militant Activism in Belgium, The Netherlands and Germany - Martijn de Koning 2020-06-25

Based on ethnographic research in Belgium, The Netherlands, and Germany, this book presents a novel approach to studying Muslim militant activism. While much existing research focuses on the process of radicalization, these authors introduce a different set of questions that investigate specific modes of activism, and their engagement with dominant discourses and practices in media and state policies. Drawing on social movement theory and Foucault's work on counter-conduct, this research explores how da'wa networks came about, and how activists developed themselves in interaction with state and media practices. This perspective highlights a form of activism and resistance in which activists turn against policies and debates centring on Muslims and Islam, while attempting to create and protect an alternative space for themselves in which they can experience Islam according to their own perception of it. The study will contribute to debates about resistance, social movements and militant activism among Muslims in Europe.

Open Adoption and Diverse Families - Abbie E. Goldberg 2019

Whereas adoption was once a private affair cloaked in secrecy and sealed records, adoptions in the US today are increasingly open - that is, birth and adoptive families meet and become acquainted before the adoption, and remain in contact once it is complete. Experts agree that open adoption comes with many benefits for both birth families and adoptive families and their children, but what does it actually look like for families experiencing it, and what can we learn from those experiences? *Open Adoption and Diverse Families* reveals the strengths, vulnerabilities, daily struggles and triumphs of adoptive families today. Drawing on extensive interviews with lesbian, gay, and heterosexual parents, many of whom adopted transracially, psychologist Abbie Goldberg confronts the extraordinary questions that open adoption poses: How do adoptive parents feel about openness when they first learn about it, and why do their feelings change over time? How does contact unfold and evolve as a child grows? What types of boundary challenges arise between adoptive and birth family members, particularly in the age of social media and networking? How do adoptive parents talk about adoption with their children, and how does this vary depending on level and type of contact with birth families? Confronting head-on difficult subjects such as birth parents' mental illness and racial differences between birth and adoptive families, *Open Adoption and Diverse Families* chronicles the decisions and dynamics that adoptive parents sign up for when they pursue option adoption, and is a must-read for all families pursuing or experiencing this exceptional approach to building a family.

Decolonising Childhoods in Eastern Africa - Oduor Obura 2021-06-13

This book deconstructs Eurocentric narratives and showcases local voices to re-examine childhood in Eastern Africa. Moving away from portrayals of eastern African childhood as characterised by want, the author argues for a differentiated and pluralist nature of the eastern African childhood. Taking a chronological approach, the author provides a multidisciplinary critical reading of Africanist research on childhood in eastern Africa, drawing from anthropological and cultural studies, while examining writings from the pre-imperial and colonial periods. Moving into the contemporary period, the book reveals the continuity, tensions and ruptures of these portrayals in humanitarian, legal, and journalistic discourses, before exploring postcolonial writings on childhood in works by Eastern African novelists. Based on such a multidisciplinary perspective, this book will be of interest to scholars of African literature, eastern African history, critical childhood studies, museums and Africanist epistemologies.
