Counselling Skills for Working with Trauma - Christiane Sanderson 2013-09-21

Counselling Skills for Working with Trauma is a practical, introductory guide to counselling survivors of child abuse, neglect, rape, sexual violence, sexual trafficking, religious sexual abuse, and domestic abuse. Written in an accessible style, it provides a comprehensive introduction to complex trauma accompanied by advice on how to create a safe environment in which survivors can learn the skills to restore control over trauma symptoms, to aid healing and post traumatic growth. The book covers all of the key principles including: understanding the role of dissociation in complex trauma; the role of attachment; managing flashbacks, panic attacks, nightmares and dissociation; responding to shame and guilt; managing relationships; and the impact of working with complex trauma. It explores how practitioners can work more effectively with trauma, and offers techniques and skills which can easily be integrated into different therapeutic models. Featuring highlighted top tips, common pitfalls and a range of exercises, this is an essential guide for all professionals working with child and adult survivors of trauma.

Treating Self-Destructive Behaviors in Trauma Survivors - Lisa Ferentz 2014-09-08

Treating Self-Destructive Behaviors in Trauma Survivors, 2nd ed, is a book for clinicians who specialize in helping trauma survivors and, during the course of treatment, find themselves unexpectedly confronted with client disclosures of self-destructive behaviors, including self-mutilation and other manifestations of deliberately "hurting the body" such as bingeing, purging, starving, substance abuse and other addictive behaviors. Arguing that standard safety contracts are not effective, renowned clinician Lisa Ferentz introduces viable treatment alternatives, assessment tools, and new ways of understanding self-destructive

behavior using a strengths-based approach that distinguishes between the "experimental" non-suicidal self-injury (NSSI) that some teenagers occasionally engage in and the self-destructive behaviors that are repetitive and chronic. In the new edition, many of the treatment strategies are cross referenced to a useful workbook, giving therapists and clients concrete ways to integrate theory into practice. In addition, Ferentz emphasizes the importance of assessing for and strengthening clients' self-compassion, and explains how nurturing this idea cognitively, emotionally, and somatically can become the catalyst for motivation and change. The book also explores a cycle of behavior that clinicians can personalize and use as a template for treatment. In its final sections, the book focuses on counter-transferential responses and the different ways in which therapists can work with self-destructive behaviors and avoid vicarious traumatization by adopting tools and strategies for self-care. *Treating Self-Destructive Behaviors in Trauma Survivors*, 2nd ed, can be used on its own or in conjunction with the accompanying client-focused workbook, *Letting Go of Self-Destructive Behaviors: A Workbook of Hope and Healing*.

Counseling Children Through the World of Play - Daniel S. Sweeney PhD 2001-05-25

If we are to touch the hearts of hurting children, we must enter their world, the world of play. Play therapy honors children by meeting them in their world. Children say with toys what they have difficulty saying with words. Toys become the play therapist's tools to help unlock the healing process for wounded children. Whether you are a psychologist, a social worker, a family therapist, a pastoral counselor, a group-home worker, or a children's ministry worker, this book will help you build relationships that minister to the souls of hurting children and bring understanding to the confusion of their pain. Through these nurturing relationships,

children will be freed to understand and process emotional pain.

Person-Centred Therapy - Keith Tudor
2006-09-27

The person-centred approach is one of the most popular, enduring and respected approaches to psychotherapy and counselling. Person-Centred Therapy returns to its original formulations to define it as radically different from other self-oriented therapies. Keith Tudor and Mike Worrall draw on a wealth of experience as practitioners, a deep knowledge of the approach and its history, and a broad and inclusive awareness of other approaches. This significant contribution to the advancement of person-centred therapy: Examines the roots of person-centred thinking in existential, phenomenological and organismic philosophy. Locates the approach in the context of other approaches to psychotherapy and counselling. Shows how recent research in areas such as neuroscience support the philosophical premises of person-centred therapy. Challenges person-centred therapists to examine their practice in the light of the history and philosophical principles of the approach. Person-Centred Therapy offers new and exciting perspectives on the process and practice of therapy, and will encourage person-centred practitioners to think about their work in deeper and more sophisticated ways.

Lesbian Families' Challenges and Means of Resiliency - Anne M. Prouty Lyness 2006

An inside look at the unique challenges of the lesbian experience Lesbian Families' Challenges and Means of Resiliency: Implications for Feminist Family Therapy is a unique collection of interdisciplinary feminist examinations of the resiliency of lesbian couples and families. Leading feminist researchers and clinicians discuss parenting within lesbian families, with a focus on personal resiliency. These thought-provoking and insightful articles address the challenges of having and raising children in a society that struggles to accept alternative family structures. Lesbian Families' Challenges and Means of Resiliency examines a wide range

of issues facing lesbian couples, with a special focus on parenting and couple violence. The book's contributors examine the unique challenges of lesbian and gay parenting; adversities facing lesbian parents and the coping methods they employ; violence among lesbian couples and the lesbian community's response to domestic violence; and the application of feminist theory to validate, strengthen, and promote resiliency in lesbian couples. The book also includes interviews with single or partnered lesbians who had children through adoption, artificial insemination, or a previous relationship. Topics examined in Lesbian Families' Challenges and Means of Resiliency include: parenting artificial insemination lesbian family therapy family law couple violence lesbian community feminist research feminist couple therapy and much more Lesbian Families' Challenges and Means of Resiliency is a vital professional aid for psychotherapists, family therapists, psychologists, social workers, and counselors. It's an equally valuable resource for academics working in family studies, women's studies, queer studies, gender studies, and sociology.

Handbook of Evidence-Based Psychodynamic Psychotherapy - Raymond A. Levy 2008-09-20

The importance of conducting empirical research for the future of psychodynamics is presented in this excellent new volume. In Handbook of Evidence Based Psychodynamic Psychotherapy: Bridging the Gap Between Science and Practice, the editors provide evidence that supports this type of research for two primary reasons. The first reason concerns the current marginalization of psychodynamic work within the mental health field. Sound empirical research has the potential to affirm the important role that psychodynamic theory and treatment have in modern psychiatry and psychology. The second reason that research is

crucial to the future of psychodynamic work concerns the role that systematic empirical investigations can have in developing and refining effective approaches to a variety of clinical problems. Empirical research functions as a check on subjectivity and theoretical alliances in on-going attempts to determine the approaches most helpful in working with patients clinically. *Handbook of Evidence Based Psychodynamic Psychotherapy: Bridging the Gap Between Science and Practice* brings together a panel of distinguished clinician-researchers who have been publishing their findings for decades. This important new book provides compelling evidence that psychodynamic psychotherapy is an effective treatment for many common psychological problems.

Optimal Impulsive Control for Cancer Therapy - João P. Belfo 2020-06-19

This Springer brief discusses the use of control engineering methods to plan a cancer therapy which tends to reduce tumour size in patients, striking a balance that minimizes the toxic effects of the treatment. The authors address the design and computation of impulsive control therapies, a methodology previously underexplored in the application of control methods to medical modelling. This allows simulation of such discrete events as taking a pill rather than relying on the supply of therapy being continuous and steady. The book begins with an introduction to the topic, before moving onto pharmacokinetic, pharmacodynamical and tumour-growth models and explaining how they describe the relationship between a certain therapy plan and the evolution of cancer. This is placed firmly in the context of work introducing impulsive differential equations. The final chapter summarizes the research presented and suggests future areas of research to encourage readers in taking the subject forward. This book is of interest to biomedical engineers, researchers and students, particularly those with a background in systems and control engineering.

Advanced Clinical Social Work Practice - Eda Goldstein 2009-09-02

Advanced Clinical Social Work Practice traces the development of relational ideas from their origin in object relations and self psychology to their evolution in current relational, intersubjectivity, and attachment theory. Relational treatment emphasizes openness and collaboration between client and therapist, mutual impact, the client's subjectivity, and the therapist's empathy, genuineness, and use of the self in therapeutic interaction. The approach treats the relationship and dialogue between client and therapist as crucial to the change process and shows how the therapeutic relationship can be used to help clients and therapists bridge differences, examine similarities, overcome impasses, and manage enactments. The relational emphasis on the subjective experience of both client and therapist is beautifully illustrated throughout this book as the authors draw from their clinical work with clients from diverse backgrounds, including gay and lesbian clients, immigrants, and clients of color. They demonstrate how relational principles and techniques can be applied to multiple problems in social work practice for example, life crises and transitions, physical and sexual abuse, mental disorders, drug addiction, and the loss of a loved one. The authors also discuss the integration of relational constructs in short-term treatment and with families and groups. This volume opens with a historical perspective on the role of relational thinking in social work and the evolution of relational theory. It presents an overview of the key concepts in relational theory and its application throughout the treatment process with diverse clients and in different practice modalities. The book concludes with a discussion of the challenges in learning and teaching new theoretical and practice paradigms, particularly in creating a more mutual exchange in the classroom and during supervision.

Play from Birth to Twelve - Doris Pronin Fromberg 2012-11-12

In light of recent standards-based and testing movements, the issue of play in childhood has

taken on increased meaning for educational professionals and social scientists. This second edition of *Play From Birth to Twelve* offers comprehensive coverage of what we now know about play, its guiding principles, its dynamics and importance in early learning. These up-to-date essays, written by some of the most distinguished experts in the field, help students explore: all aspects of play, including new approaches not yet covered in the literature how teachers in various classroom situations set up and guide play to facilitate learning how play is affected by societal violence, media reportage, technological innovations and other contemporary issues which areas of play have been studied adequately and which require further research.
