**Ling 1995** - 2000-01-01

*Youth, Popular Culture and Moral Panics* - John Springhall 1999-04-28  
The international controversy (highlighted in Britain by the Bulger case) over the relationship between video nasties and crime is one that has a long prior history. Do books, films or magazines create a corrupting environment which encourages crime and moral decay? Dr. Springhall has written a highly perceptive and entertaining account of how commercial culture in Britain and America has been viewed, since its inception during the Industrial Revolution, as a force likely to undermine national morals. There has been wave after wave of scares: from the Victorian penny gaff theatres and penny dreadful novels to Hollywood gangster films, and American horror comics. A final chapter refers to video nasties, violence on television, 'gansta-rap' and computer games, each in turn playing the role of folk devils which must be causing delinquency. Why particular issues suddenly galvanize public attention, and why so many people have associated delinquency with entertainment, form the fascinating subjects of this groundbreaking book.

This highly original collection of essays, first published in 1989, is concerned with the nature of children and their moral and political status. The international team of contributors explore, and in some cases criticise and revise popular thought on children and their place in society. The book is divided into three parts: the first deals with the historical, social and psychological framework of contemporary perspectives on children and childhood; a second set of papers takes up questions about the position of the young in democracy, the limits of parental authority and the appropriateness of characterising only child-adult relationships in terms of a social contract; the final essays are concerned with adult attitudes toward children's lives and experiences. These essays will interest philosophers, political scientists, as well as all those professionally concerned with the education and care of children.

**The Awkward Age in Women's Popular Fiction, 1850-1900** - Sarah Bilston 2004-07-22

This book demonstrates that 'the awkward age' formed a fault-line in Victorian female experience, an unusual phase in which restlessness, self-interest, and rebellion were possible. Tracing evolving treatments of female adolescence through a host of long-forgotten women's fictions, the book reveals that representations of the girl in popular women's literature importantly anticipated depictions of the feminist in the fin de siècle New Woman writing; conservative portrayals of girls' hopes, dreams, and subsequent frustrations helped clear a literary and cultural space for the New Woman's 'awakening' to disaffected consciousness. The book thus both historicises the evolution and mythic appeal of the female adolescent and works to receive suggestive exchanges between apparently diverse female literary traditions.

**Hollywood Highbrow** - Shyon Baumann 2018-06-05

Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

[Narratives Unfolding](#) - Martha Langford 2017-07-18

Somewhere between global and local, the nation still lingers as a concept. National art histories continue to be written - some for the first time - while innovative methods and practices redraw the boundaries of these imagined communities. *Narratives Unfolding* considers the mobility of ideas, transnationalism, and entangled histories in essays that define new ways to see national art in ever-changing nations. Examining works that were designed to reclaim or rethink issues of territory and dispossession, home and exile, contributors to this volume demonstrate that the writing of national art histories is a vital project for intergenerational exchange of knowledge and its visual formations.

Essays showcase revealing moments of modern and contemporary art history in Canada, Egypt, Iceland, India, Ireland, Israel/Palestine, Romania, Scotland, Turkey, and the United Arab Emirates, paying particular attention to the agency of institutions such as archives, art galleries, milestone exhibitions, and artist retreats. Old and emergent art cities, including Cairo, Dubai, New York, and Vancouver, are also examined in light of avant-gardism, cosmopolitanism, and migration. *Narratives Unfolding* is both a survey of current art historical approaches and their connection to the source: art-making and art experience happening somewhere.

[Understanding the City through its Margins](#) - André Chappatte 2017-07-28

Cities the world over and in particular developing countries suffer from uneven development and inequality. This is often coupled with the view that these inequalities constitute unfortunate anomalies. In contrast, this edited volume draws out the ways in which the city has not been able to exist without its margins, both materially, ideationally, and socially. In this book the margins are, first, the mirrors of the city and, second, a fundamental route through which various centers can legitimate and sustain their power. Contemporary case studies are compared to a number of those from history with the accent on Asia, Africa and the Middle East, and engage with the underlying theoretical questions of what is the urban margin and what is marginality in urban society and spaces?
