If you have ever killed time surfing the Internet, chances are you have taken a personality quiz or two. Many corporations and organizations have begun to rely on personality evaluations as part of their employee hiring process. A popular example of these assessments is the Myers-Briggs Type Indicator (MBTI) test. The MBTI test is a questionnaire devised to assess a person's decision-making and perception. It analyzes an individual's personality framework and can be extremely helpful in determining their communication style, preferred work environment, and general interests. The Myers-Briggs test also actuates the similarities and differences between people and enables more harmonious interpersonal relationships. It was first published in 1962 by psychological theorists Isabel Briggs-Myers and her mother, Katharine Cook Briggs; the MBTI test is one of the oldest personality tests in existence. The mother-daughter team began developing the test in the 1940s to measure people's cognitive preferences in how they made decisions and viewed the world. They first came up with the idea after a lengthy study of Carl Jung's proposed typological theories. Jung published the book *Psychological Types* in which he theorized that there are four primary functions by which people perceive the world. Myers and Briggs took Jung's theories further by creating the MBTI test. Their original goal was to help women determine which jobs during the war would be the best fit for them. Since then, the MBTI test has grown to become one of the most widely taken personality assessments in the world. In the United States alone, the MBTI test is taken nearly two and a half million times each year. The Relationship Between Myers-Briggs Personality Type and the Career Decision-making Process Jolaine B. Wosepka 1988 This study was designed to determine if a personality test, The Myers-Briggs Type Indicator (MBTI), and a career decision-making process questionnaire could be used to identify specific personality types, and examine the problems and influences these types have in the career decision-making process. The sample for this study consisted of 33 undeclared/undecided students, 25 females and 8 males, enrolled in the fall 1987 freshman and sophomore classes. Two research questions and 13 hypotheses directed this study. Research question 1 asked, "Can the Myers-Briggs Type Indicator be used to assess career decision-making in undecided students?" Results indicated that two Myers-Briggs types, Feeling and Perceiving, appeared twice as often as other types. Research question 2 asked, "Can the career decision-making process questionnaire be used to assess career decision-making in undecided students?" Results found that Introverted types reported greater indecision and anxiety in career decision-making. Correlations between MBTI types and career influences revealed relationships between: Perceiving types and their interests, Thinking types and faculty members, Judging types and earning a degree, Feeling types and making money.

The Difference Between "Getting By" and Thriving As An ENFP Abraham Maslow put the desire for "self-actualization" at the top of his famous pyramid of human needs. Maslow taught us that we will never really be complete, happy, or satisfied unless we are striving for our full potential. That is why I wrote this book. This book is about thriving as your best self. It's about thriving in a world where so many people settle for average. Other books on personality types include brief descriptions of each type, sometimes with a few tips. This book goes deeper than any other book, website or guide and includes the reasoning behind the strategies so you can truly understand the ENFP.

Here is a preview of what is inside this book: Foreword An Introduction to MBTI The Four Dimensions of the MBTI Why is the Myers-Briggs Type Indicator Significant? Uncovering the "Virtuoso": Who is an ISTP? Why are ISTPs Indispensable Leaders? The 7 Greatest Strengths of an ISTP The 5 Greatest Areas of Improvement for an ISTP What Makes an ISTP Happy? What are Some Common Careers of an ISTP? Common Workplace Behaviors of an ISTP ISTP: Parenting Style and Values Why do ISTPs Make Good Friends? ISTP Romance 7 Actionable Steps for Overcoming Your Weaknesses as an ISTP The 10 Most Influential ISTPs We Can Learn From Conclusion An excerpt from the book: The key to being happy, regardless of type, is to have a purpose in life - a task where you feel useful and successful with meaningful relationships. A good career is especially important for an ISTP. They need a work environment where they can use their hands, create, fix things, solve problems, and enjoy independence. They also need good relationships with people who respect their independence and communication style even if they are loners. One of the most important things an ISTP needs is a good job. Their desire for independence might make them excel as a freelancer or running their own business. However, they can also be happy in a traditional work environment for as long as they are given freedom and are not bogged down with bureaucracy. The important thing is that the ISTP person has a chance to play - learn how things work, build things, fix things, and use his hands. An ISTP needs a good job because they cannot stomach the idea of spending a large portion of their time on a useless task. They will promptly quit any job that is not a good use of their time. They will become aggravated over bureaucracy and waste. Without a job that complements their personality, an ISTP will be unhappy.
