The Encyclopedia of Christianity: A-D - ed FAHLBUSCH 1999

This multifaceted and up-to-date encyclopedia is sure to be of interest to pastors and church workers of all confessions, equally so to students, scholars, and researchers around the world who are interested in any aspect of Christianity or religion in general. The first volume contains 465 articles that address a comprehensive list of topics.

The City of Dusk - Tara Sim 2022-03-22

'A glorious tapestry of magic and murderous gods' - BuzzFeed News
 'Fans of A Darker Shade of Magic and All of Us Villains will want to pick this up' - BookRiot 'A delightful, complex, intimate yet explosive debut adult fantasy' - Strange Horizons DARKNESS FALLS. GODS RISE. The Four Realms - Life, Death, Light, and Darkness - all converge on the City of Dusk. For each realm there is a god, and for each god there is an heir. But the gods have withdrawn their favour from the once vibrant and thriving metropolis. And without it, all the realms are dying. Unwilling to stand by and watch the destruction, the four heirs - Angelica, an elemental with her eyes set on the throne; Risha, a necromancer fighting to keep the peace; Nikolas, a soldier who struggles to see the light; and Taesia, a shadow-wielding rogue with a reckless heart - will become reluctant allies in the quest to save their city. But their rebellion will cost them dearly. Set in a world of bone palaces and shadow magic, of vengeful gods and defiant chosen ones, The City of Dusk is Tara Sim's crackling adult fantasy debut.

The Ashgate Research Companion to Thomas Hardy - Rosemarie Morgan 2016-03-23

In The Ashgate Research Companion to Thomas Hardy, some of the most prominent Hardy specialists working today offer an overview of Hardy scholarship and suggest new directions in Hardy studies. The contributors cover virtually every area relevant to Hardy's fiction and poetry, including philosophy, palaeontology, biography, science, film, popular culture, beliefs, gender, music, masculinity, tragedy, topography, psychology, metaphysics, illustration, bibliographical studies and contemporary response. While several collections have surveyed the Hardy landscape, no previous volume has been composed especially for scholars and advanced graduate students. This companion is specially designed to aid original research on Hardy and serve as the critical basis for Hardy studies in the new millennium. Among the features are a comprehensive bibliography that includes not only works in English but, in acknowledgment of Hardy's explosion in popularity around the world, also works in languages other than English.

Dark Matter - Blake Crouch 2016

In this world he's woken up to, Jason's life is not the one he knows. His wife is not his wife. His son was never born. And Jason is not an ordinary college physics professor, but a celebrated genius who has achieved something remarkable. Something impossible. Is it this world or the other that's the dream? And even if the home he remembers is real, how can Jason possibly make it back to the family he loves? The answers lie in a journey more wondrous and horrifying than anything he could've imagined - one that will force him to confront the darkest parts of himself even as he battles a terrifying, seemingly unbeatable foe.

Quantum Aspects of Life - Derek Abbott 2008-09-12

This book presents the hotly debated question of whether quantum mechanics plays a non-trivial role in biology. In a timely way, it sets out a

distinct quantum biology agenda. The burgeoning fields of nanotechnology, biotechnology, quantum technology, and quantum information processing are now strongly converging. The acronym BINS, for Bio-Info-Nano-Systems, has been coined to describe the synergetic interface of these several disciplines. The living cell is an information replicating and processing system that is replete with naturally-evolved nanomachines, which at some level require a quantum mechanical description. As quantum engineering and nanotechnology meet, increasing use will be made of biological structures, or hybrids of biological and fabricated systems, for producing novel devices for information storage and processing and other tasks. An understanding of these systems at a quantum mechanical level will be indispensable. Contents:Foreword (Sir R Penrose)Emergence and Complexity:A Quantum Origin of Life? (P C W Davies)Quantum Mechanics and Emergence (S Lloyd)Quantum Mechanisms in Biology:Quantum Coherence and the Search for the First Replicator (J Al-Khalili & J McFadden)Ultrafast Quantum Dynamics in Photosynthesis (A O Castro, F Olsen, C F Lee & N F Johnson)Modelling Quantum Decoherence in Biomolecules (J Bothma, J Gilmore & R H McKenzie)The Biological Evidence:Molecular Evolution: A Role for Quantum Mechanics in the Dynamics of Molecular Machines that Read and Write DNA (A Goel)Memory Depends on the Cytoskeleton, but is it Quantum? (A Mershin & D V Nanopoulos)Quantum Metabolism and Allometric Scaling Relations in Biology (L Demetrius)Spectroscopy of the Genetic Code (J D Bashford & P D Jarvis)Towards Understanding the Origin of Genetic Languages (A D Patel)Artificial Quantum Life:Can Arbitrary Quantum Systems Undergo Self-Replication? (A K Pati & S L Braunstein)A Semi-Quantum Version of the Game of Life (A P Flitney & D Abbott)Evolutionary Stability in Quantum Games (A Iqbal & T Cheon)Quantum Transmemetic Intelligence (E W Piotrowski & J S≈adkowski)The Debate:Dreams versus Reality: Plenary Debate Session on Quantum Computing (For Panel: C M Caves, D Lidar, H Brandt, A R Hamilton, Against Panel: D K Ferry, J Gea-Banacloche, S M Bezrukov, L B Kish, Debate Chair: C R Doering, Transcript Editor: D Abbott)Plenary Debate: Quantum Effects in Biology: Trivial or Not? (For Panel: P C W Davies, S Hameroff, A Zeilinger, D Abbott, Against Panel: J Eisert, H M Wiseman, S M Bezrukov, H Frauenfelder, Debate Chair: J Gea-Banacloche, Transcript Editor: D Abbott)Nontrivial Quantum Effects in Biology: A Skeptical Physicist's View (H Wiseman & J Eisert)That's Life! — The Geometry of π Electron Clouds (S Hameroff) Readership: Graduate students and researchers in quantum physics, biophysics, nanosciences, quantum chemistry, mathematical biology and complexity theory, as well as philosophers of science. Keywords:Quantum Biology;Quantum Computation;Quantum Mechanics;Biophysics;Nanotechnology;Quantum Technology;Quantum Information Processing;Bio-Info-Nano-Systems (BINS);Emergence;Complexity;Complex Systems;Cellular Automata;Game Theory;Biomolecules;Photosynthesis;DNA;Genetic Code;DecoherenceKey Features:Is structured in a debate style, where contributors argue opposing positionsBrings together some of the finest minds and latest developments in the fieldIs entirely unique and there are no competing titles

Monstrosities - Paul Youngquist 2003

Paul Youngquist reveals the cultural politics of embodiment in Britain in the late 18th & early 19th centuries. Drawing on the histories of

medicine, economics, liberalism & nationalism, his work shows that bodies are not simply born, but rather built by cultural practices directed toward particular social ends.

The Strangest Man - Graham Farmelo 2009-01-22

'A monumental achievement - one of the great scientific biographies.' Michael Frayn *The Strangest Man* is the Costa Biography Award-winning account of Paul Dirac, the famous physicist sometimes called the British Einstein. He was one of the leading pioneers of the greatest revolution in twentieth-century science: quantum mechanics. The youngest theoretician ever to win the Nobel Prize for Physics, he was also pathologically reticent, strangely literal-minded and legendarily unable to communicate or empathize. Through his greatest period of productivity, his postcards home contained only remarks about the weather. Based on a previously undiscovered archive of family papers, Graham Farmelo celebrates Dirac's massive scientific achievement while drawing a compassionate portrait of his life and work. Farmelo shows a man who, while hopelessly socially inept, could manage to love and sustain close friendship. *The Strangest Man* is an extraordinary and moving human story, as well as a study of one of the most exciting times in scientific history. 'A wonderful book . . . Moving, sometimes comic, sometimes infinitely sad, and goes to the roots of what we mean by truth in science.' Lord Waldegrave, *Daily Telegraph*

Quantum Night - Robert J. Sawyer 2016-03-01

With such compelling and provocative novels as *Red Planet Blues*, *FlashForward* and *The WWW Trilogy*, Robert J. Sawyer has proven himself to be "a writer of boundless confidence and bold scientific extrapolation" (*New York Times*). Now, the Hugo and Nebula Award-winning author explores the thin line between good and evil that every human being is capable of crossing... Experimental psychologist Jim Marchuk has developed a flawless technique for identifying the previously undetected psychopaths lurking everywhere in society. But while being cross-examined about his breakthrough in court, Jim is shocked to discover that he has lost his memories of six months of his life from twenty years previously—a dark time during which he himself committed heinous acts. Jim is reunited with Kayla Huron, his forgotten girlfriend from his lost period and now a quantum physicist who has made a stunning discovery about the nature of human consciousness. As a rising tide of violence and hate sweeps across the globe, the psychologist and the physicist combine forces in a race against time to see if they can do the impossible—change human nature—before the entire world descends into darkness.

The Light of Other Days - Arthur C. Clarke 2010-07-08

In the most exciting SF collaboration ever, Arthur C. Clarke and his acknowledged heir Stephen Baxter pool talent and unprecedented cosmic insights as well as page-turning plotting skills and breathlessly good writing to produce the most awesome novel of the future since 2001: *A Space Odyssey*.

Quantum Man - Ken Fegradoe 1992

What does it mean to be a man in a world of dissolving sexual stereotypes? How far have sexual politics gone to effect a shift in male consciousness? Beyond the New Man of the 80's and the Wild Man of the American men's movement there lies a more radical conception: the quantum vision of the undiscovered sex.

Last Post - 1974

Out - 1998-07

The Transient, the Emperor, and the Man Left Alone - Jacob Harrell 2016-05-09

Derren Washington's life has never amounted to much, and lately it has become boring and stale. Sure, he does well for himself. He has a job, a place to live, and is breathing and living enough for most people and all Derren believes he needs. And then one morning, Derren is awoken to an unexpected knock that changes the course of his life, spurring a mad journey that he never could have possibly imagined. Confronted with the sudden loss of his apartment and, subsequently, everything he has ever owned, Derren must face the insensitive marriage of blind chance and sheer coincidence. His situation becomes even more dire after a regrettably made phone call finds him abducted by a group of towering extraterrestrials who have mistaken him for their long, lost emperor. Now Derren struggles to navigate and survive in a baffling world amid suffocating seas of deceit and absurdity in hopes of one day making his way home and finding some meaning in his life. This science fiction novel tells the tale of one man's unintended adventure as he stumbles from one confusing world to another in an attempt to regain what he has lost.

Stardust - Neil Gaiman 2006-08-29

Young Tristran Thorn will do anything to win the cold heart of beautiful Victoria—even fetch her the star they watch fall from the night sky. But to do so, he must enter the unexplored lands on the other side of the ancient wall that gives their tiny village its name. Beyond that old stone wall, Tristran learns, lies Faerie—where nothing, not even a fallen star, is what he imagined. From #1 *New York Times* bestselling author Neil Gaiman comes a remarkable quest into the dark and miraculous—in pursuit of love and the utterly impossible.

X-Treme Possibilities - Paul Cornell 2013-10-31

'Open your mind to extreme possibilities' Scully's desire to be recognised as 'a medical doctor', ooze, mouthfuls of difficult dialogue and the tendency for characters not to make it through the pre-titles sequence were just a few of the tragically underexamined elements of THE X-FILES phenomenon - until the first edition of this book. Now the authors take their study of television's weirdest show through to the end of series five, and THE X-FILES movie. X-TREME POSSIBILITIES presents a unique analysis of the programme that transformed US television. While sometimes witty and light-hearted, this volume is also a serious study of the elements that made the show such a success. As well as a detailed episode guide of the first five seasons, the book pieces together the nature of the series' Conspiracy - and attempts to discover just what the truth is. Never before has THE X-FILES been put under such focused, affectionate and bizarre scrutiny. Please note this new release of the second edition has not been updated.

Beyond the Unexplored Space: The Philosophy & Science-Fiction Works of Olaf Stapledon - Olaf Stapledon 2021-01-08

This meticulously edited Olaf Stapledon collection is formatted for your eReader with a functional and detailed table of contents: x000D_ Novels: x000D_ Last and First Men: A Story of the Near and Far Future x000D_ Last Men in London x000D_ Odd John: A Story Between Jest and Earnest x000D_ Star Maker x000D_ Darkness and the Light x000D_ Sirius: A Fantasy of Love and Discord x000D_ Death into Life x000D_ Short Stories: x000D_ The Flames x000D_ The Seed and the Flower x000D_ The Road to the Aide Post x000D_ A Modern Magician x000D_ East is West x000D_ A World of Sounds x000D_ Arms Out of Hand x000D_ Philosophical Works: x000D_ A Modern Theory of Ethics: A Study of the Relations of Ethics and Psychology x000D_ Interplanetary Man?

Indian Review of Books - 1993

Pay Attention - John Horgan 2020-12-15

A day in the inner and outer lives of a college professor, blogger, divorced father, thinker, and yearner. What would it feel like to wake up inside the head of someone who writes about science for a living? John Horgan, acclaimed author of the bestseller *The End of Science*, answers that question in his genre-bending new book *Pay Attention*, a stream-of-consciousness account of a day in the life of his alter ego, Eamon Toole—a blogger, college professor, and divorced father. This work of fact-based fiction, or "faction," follows Toole as he wakes up in his rented apartment in upstate New York, meditates with the mantra "Duh," commutes via train and subway to an engineering school in New Jersey, teaches a William James essay on consciousness to freshmen, squabbles about Thomas Kuhn with colleagues over lunch, takes a ferry to Manhattan and spends the evening with his bossy, Tarot-reading girlfriend, Emily, on whom he plans to spring a big question. Throughout the day, Toole struggles to be rational while buffeted by fears and yearnings. Thoughts of sex and death keep intruding on his ruminations over quantum spookiness, the neural code, the Singularity and free will. *Pay Attention* is a profane, profound meditation on the entanglements of our inner and outer worlds and the elusiveness of truth.

Future Sex - Emily Witt 2017-01-03

Emily Witt is single and in her thirties. She has slept with most of her male friends. Most of her male friends have slept with most of her female friends. Sexual promiscuity is the norm. But up until a few years ago, she still envisioned her sexual experience achieving a sense of finality, 'like a monorail gliding to a stop at Epcot Center'. Like many people, she imagined herself disembarking, finding herself face-to-face with another human being, 'and there we would remain in our permanent station in life: the future'. But, as we all know, things are more complicated than that. Love is rare and frequently unreciprocated. Sexual acquisitiveness is risky and can be hurtful. And generalizing about what women want or don't want or should want or should do seems to lead nowhere. Don't our temperaments, our hang-ups, and our histories define our lives as much as our gender? In *Future Sex*, Witt captures the experiences of going to

bars alone, online dating, and hooking up with strangers. After moving to San Francisco, she decides to say yes to everything and to find her own path. From public health clinics to cafe conversations about 'coregasms', she observes the subcultures she encounters with awry sense of humour,

capturing them in all their strangeness, ridiculousness, and beauty. The result is an open-minded, honest account of the contemporary pursuit of connection and pleasure, and an inspiring new model of female sexuality - open, forgiving, and unafraid.
