Forthcoming Books - Rose Army 1990

Minds Divided - Stephen E. Wald 2008

Right Brain Sex - Carol G. Wells 1989

A sex therapist explains how to use techniques to alleviate boredom, eliminate sexual inhibitions, achieve relaxation, utilize the imagination, and heighten passion

New Woman - 1992

Right-brain Sex - Carol G. Wells 1991

The American Journal of Forensic Psychology - 1991

Parapsychology, New Age, and the Occult - 1993

Creative Visualization - Shakti Gawain 2008-11

With more than 6 million copies of this pioneering work sold worldwide, "Creative Visualization" explains the art of using mental imagery and affirmation to produce positive changes.

The Technique - Robert Cornelius 2012-04

My book is a culmination of fifteen years of research and field study in an area that not many people are aware of, that being the subconscious mind. Instead of writing another non-fiction, how-to-book, I decided to convey all the experiences I had attained and all the knowledge I had acquired by incorporating them into an autobiographical novel. The information that is offered in my book is done in such a manner that the reader is not only entertained, but more importantly, enlightened toward understanding how to make life a little much easier and satisfying by utilizing a method I have coined "The Technique." Through the use of flash-backs and descriptive narrative, the storyline follows best-selling novelist John Templeton as he embarks upon an adventurous 10-day writing odyssey by delving into the inner world of subconscious awareness and creative

intelligence, searching for the elusive fulfillment toward achieving true mental, physical and emotional well-being, harmony and balance.

What he discovers along this rare and unusual journey is the very heart of the novel which is divided into 3 parts: Books 1,2 and 3, Book 1 focuses on terminology, book 2 in character development, while book 3 encompasses methodology, all woven into one neat package.

On Cassette - 1990

Somos nosso cérebro? - FERNANDO VIDAL 2020-05-07

Somos nosso cérebro? oferece uma exploração crítica do neurocentrismo, a crença de que "somos nossos cérebros", que se difundiu nos anos 1990. Encorajados pelos avanços da neuroimagem, as humanidades e as ciências sociais adotaram uma "virada neurocientífica" na forma de neuro-subespecialidades em campos como antropologia, estética, educação, história, direito, sociologia e teologia. Empresas comerciais duvidosas, mas bem-sucedidas, como "neuromarketing" e "neurobica" surgiram para tirar proveito da sensibilidade aumentada para todo o universo neuro. Embora não seja hegemônica nem monolítica, a visão neurocêntrica encarna uma poderosa ideologia que está no cerne de alguns dos mais importantes debates filosóficos, éticos, científicos e políticos da atualidade. Somos nosso cérebro? escolhido livro do ano em 2018 pela International Society for the History of the Neurosciences, examina a lógica interna de tal ideologia, sua genealogia e suas principais encarnações contemporâneas.

Right-Brain Sex - Carol G. Wells 1991-05-01

Pornography and Sexual Representation - Joseph W. Slade 2001

A three volume reference guide to the available literature concerning pornography and sexual representation in America.

Subject Guide to Books in Print - 1993

American Book Publishing Record - 1990

Library Journal - 1989

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

The Best Self-help and Self-awareness

Books - Stephen Fried 1995

A guide that aims to help readers and librarians select the most useful books among the mass of self-help publications, while exploring the key ideas and trends in popular psychology. It examines the concepts behind the foremost personal and interpersonal issues in self-help books.

The Brain That Changes Itself - Norman Doidge
2008-08-07

An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure.

Being Brains - Fernando Vidal 2017-07-04

Being Brains offers a critical exploration of neurocentrism, the belief that “we are our brains,” which became widespread in the 1990s. Encouraged by advances in neuroimaging, the humanities and social sciences have taken a “neural turn,” in the form of neuro-subspecialties in fields such as anthropology, aesthetics, education, history, law, sociology, and theology. Dubious but successful commercial enterprises such as “neuromarketing” and “neurobics” have emerged to take advantage of the heightened sensitivity to all things neuro. While neither hegemonic nor monolithic, the neurocentric view embodies a powerful ideology that is at the heart of some of today’s most important philosophical, ethical, scientific, and political debates. Being Brains, chosen as 2018 Outstanding Book in the History of the Neurosciences by the International Society for the History of the Neurosciences, examines the internal logic of such ideology, its genealogy, and its main contemporary incarnations.
