## **Africa's Finances** - Raj Bardouille 2008

Globally, the volume of remittances to developing countries exceeds the development aid budgets. This volume explores the contribution of remittances to Africa's finances and provides concrete guidelines as to how these may be expanded. It contains essays by the field leaders in this area which record, review and revise our knowledge base on Africa's remittance patterns. The advent of new information communication technologies can contribute to an expanded capture of remittances from the African diaspora and in Africa new forms of money transfer are already taking shape which reflect this affordance. The volume also examines other resources, such as skills, that the African diaspora remits in its patterns of contact with Africa. The volume, shaped out of a conference on remittances and the African diaspora held at the Institute for African Development at Cornell University, is a timely reminder of the substantial role to be played in Africa's development by Africans themselves.

## **Governing the Ungovernable** - Ishrat Husain 2018

Pakistan, since its independence in 1947, had to face tumultuous years for the first four decades. Despite the many challenges, both internal and external, the country was able to register a 6 per cent average annual growth rate during the first forty years of its existence. The country was ahead of India and Bangladesh in all economic and social indicators. Since 1990, the country has fallen behind its neighbouring countries and has had a decline in the growth rate. This book attempts to examine the reasons behind this slowdown, the volatile and inequitable growth of the last twenty-five years, and through a process of theoretical and empirical evidence argues that the most powerful explanatory hypothesis lies in the decay of institutions of governance. It also suggests a selective and incremental approach of restructuring some key public institutions that pertain to accountability, transparency, security, economic growth, and equity.

## **Theories of Income Distribution** - Athanasios Asimakopulos 2012-12-06

This book brings together the work of scholars who have written for it independent essays in their areas of particular expertise in the general field of income distribution. The first eight chapters provide a review of the major theories of income distribution, while the final two are concerned with problems of empirical estimates and inferences. One of these chapters presents estimates of factor shares in national income in the United States, the United Kingdom and Canada, while the other examines how relationships between the size distribution of income and economic development are being investigated. A convenient way of conveying an understanding of how economic theorists have dealt with the distribution of income is to examine separately each major approach to this subject. Each contributor was thus assigned a particular approach, or a major theorist. No attempt was made to avoid the apparent duplication that occurs when the same references are examined by different contributors. The reader gains by seeing how the same material can be treated by those looking at it from different perspectives. A chapter each has been devoted to Marx and Marshall.

## **The Basic School** - Ernest L. Boyer 1995-11-27

A micro-community approach to education with vision and values The U.S. education system has remained somewhat static as the world changes furiously around it. The Basic School: A Community for Learning offers a model for the future. The classroom — and by extension, the school — is positioned as a little community focused on learning. Teachers are empowered with real leadership, parents are partners, resources are rich, and the curriculum is coherent and centralized. This book describes how to bring this dream-school into reality through a series of small steps forward that, over time, become a journey through progress.

## **Implementing a Human Development Strategy** - Keith Griffin 1994-11-12

'Readers will find in these pages a very lucid, creative, and highly readable version of many of the ideas that have taken shape through the medium of the Human Development Reports during the last four years. Busy policy makers all over the world will find this an indispensable primer.' - Mahbub ul Haq, from the preface. This book introduces the basic concepts of human development and presents policy guidelines for implementing a human development strategy in developing countries. Human development is seen both as an end in itself and as a means to

increase the capabilities of people. The role of the state, the market and of people's participation in such a strategy are described. Specific chapters discuss the structure of incentives, allocation of public sector resources, structural reforms, the relationship of human development to environmental issues and finance and administration.

## **Solar and Space Physics** - National Research Council 2014-09-25

In 2010, NASA and the National Science Foundation asked the National Research Council to assemble a committee of experts to develop an integrated national strategy that would guide agency investments in solar and space physics for the years 2013-2022. That strategy, the result of nearly 2 years of effort by the survey committee, which worked with more than 100 scientists and engineers on eight supporting study panels, is presented in the 2013 publication, *Solar and Space Physics: A Science for a Technological Society*. This booklet, designed to be accessible to a broader audience of policymakers and the interested public, summarizes the content of that report.

## **Determinism in Education** - William Chandler Bagley 1925

## **Economic Reform in Vietnam** - Keith Griffin 2016-01-20

Vietnam, along with China, stands out as a rare success story among transition economics. This authoritative study of the reform process since 1989 pays particular attention to the way the macroeconomics framework can contribute to an environment that encourages human development and helps to reduce poverty. Thus there are chapters on macroeconomics reforms, international trade policies, the role of the state, rural development, education and health, environmental issues and poverty and gender inequality. Although areas of weakness are indicated, emphasis is placed on the success Vietnam has experienced compared to other transition economies. The lessons of both the successes and failures of the reform process for policymakers elsewhere are outlined. *Electromagnetic Interference Impact of the Proposed Emitters for the High Frequency Active Auroral Research Program (HAARP)* - Gregory Alan Robertshaw 1993

It is also a great gift for anyone who hates reading books - there is not really much to read. :) *Opportunities for High-Power, High-Frequency Transmitters to Advance Ionospheric/Thermospheric Research* - National Research Council (U.S.)

## **Alternative Strategies for Economic Development** - Keith Griffin 1999-06-30

The question of alternative strategies for economic development is the subject of great controversy and intense debate amongst practitioners and academics concerned with economic and social progress in the Third World. The core of this book is an analysis of the six most widely adopted

strategies of development namely monetarism, the open economy, industrialisation, the green revolution or agriculture-led development, redistributive strategies of development and socialist strategies.

*The Child-Centered School* - H. Rugg 1980-06

*The American College* - Abraham Flexner 1908

*Studies in Development Strategy and Systemic Transformation* - K. Griffin 2000-05-15

*Studies in Development Strategy and Systemic Transformation* contains eleven essays by Keith Griffin on many of the contemporary leading issues in economic development. Topics covered include the role of culture in long-term economic growth, globalization and economic governance, human development, and the effects of the distribution of productive wealth on the pace of development. There are also discussions of alternative reform strategies in the transition economies and of an investment-led strategy of structural adjustment in Sub-Saharan Africa.

*Melodious Accord* - Alice Parker 1991

*Global Economic Prospects 2006* -

International migration, the movement of people across international

boundaries to improve economic opportunity, has enormous implications for growth and welfare in both origin and destination countries. An important benefit to developing countries is the receipt of remittances or transfers from income earned by overseas emigrants. Official data show that development countries' remittance receipts totaled 160 billion in 2004, more than twice the size of official aid. This year's edition of *Global Economic Prospects* focuses on remittances and migration. The bulk of the book covers remittances.

*A Biographical Dictionary of Dissenting Economists* - Philip Arestis 2001-01-01
