Sharenthood - Leah A. Plunkett 2019-09-10
From baby pictures in the cloud to a high school's digital surveillance system: how adults unwittingly compromise children's privacy online. Our children's first digital footprints are made before they can walk—even before they are born—as parents use fertility apps to aid conception, post ultrasound images, and share their baby's hospital mug shot. Then, in rapid succession come terabytes of baby pictures stored in the cloud, digital baby monitors with built-in artificial intelligence, and real-time updates from daycare. When school starts, there are cafeteria cards that catalog food purchases, bus passes that track when kids are on and off the bus, electronic health records in the nurse's office, and a school surveillance system that has eyes everywhere. Unwittingly, parents, teachers, and other trusted adults are compiling digital dossiers for children that could be available to everyone—friends, employers, law

enforcement—forever. In this incisive book, Leah Plunkett examines the implications of “sharenthood”—adults' excessive digital sharing of children's data. She outlines the mistakes adults make with kids' private information, the risks that result, and the legal system that enables “sharenting.” Plunkett describes various modes of sharenting—including “commercial sharenting,” efforts by parents to use their families' private experiences to make money—and unpacks the faulty assumptions made by our legal system about children, parents, and privacy. She proposes a “thought compass” to guide adults in their decision making about children's digital data: play, forget, connect, and respect. Enshrining every false step and bad choice, Plunkett argues, can rob children of their chance to explore and learn lessons. The Internet needs to forget. We need to remember.

Victimology - William G. Doerner 2011-05-09

This breakthrough work provides an organizing structure for the history and current state of the field of victimology, and outlines the reasons compelling a separate focus on crime victims. Highly readable, Victimology explores the role of victimology in today's criminal justice system, examining the consequences of victimization and the various remedies now available for victims. In addition to adding the latest developments in victimology, the authors have included a new chapter on property victimization, and have enhanced and expanded the chapter on personal victimization. The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and a listing of related Internet sites. * The text provides a comprehensive overview of the origins and

scope of victimology, with detailed chapters on specific types of victimization * The authors offer analysis of policy decisions and historical events, with an eye toward future developments in the field * A key chapter highlights the important global impact of restorative justice on responding to the plight of victims * The ever-changing dynamics of contemporary work and school victimization are dissected with special attention to causes and societal responses * The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and listings of related Internet sites

Justice Perverted - Charles Patrick Ewing
2011-03-16

Over the past quarter century Congress, state legislatures and the courts have radically reshaped America's laws dealing with sex offenders in an effort to reduce the prevalence of sex offenses. Most convicted sex offenders must now register with the authorities, who then

make information about them available to the public. Possession of child pornography has been made an extremely serious crime often punishable by prison sentences that dwarf those meted out to child molesters, rapists, robbers, and even killers. Federal law now imposes a minimum sentence of ten years in prison for those convicted of using the internet to attempt to lure minors for sex. And the federal government and 20 states have "sexually violent predator" laws that allow the indefinite civil commitment of convicted sex offenders to secure institutions for treatment after they have served their full criminal sentences. All of these changes in sex offender law, as well as numerous others, have been based at least in part on input from psychology, psychiatry and the social sciences. Moreover, enforcement and administration of many of these laws relies to a large extent on the efforts of mental health professionals. However, many questions about this involvement remain largely unanswered. Are

these laws supported by empirical evidence, or even by well-reasoned psychological theories? Do these laws actually work? Are mental health professionals capable of reliably determining an offender's future behavior, and how best to manage it? Finally, are experts capable of providing effective treatment for sex offenders -- i.e., treatment that actually reduces the likelihood that an identified sex offender will re-offend? In *Justice Perverted*, Charles Patrick Ewing poses these difficult questions and others that few in either law or psychology have asked, much less tried to answer. Drawing on research from across the social and behavioral sciences, he weighs the evidence for the spectrum of sex offense laws, to occasionally surprising results. A rational look at an intensely emotional subject, *Justice Perverted* is an essential book for anyone interested in the science behind public practice.

Knowledge as Power - Wayne A. Logan 2009-07-21

Societies have long sought security by identifying potentially dangerous individuals in their midst. America is surely no exception. *Knowledge as Power* traces the evolution of a modern technique that has come to enjoy nationwide popularity—criminal registration laws. Registration, which originated in the 1930s as a means of monitoring gangsters, went largely unused for decades before experiencing a dramatic resurgence in the 1990s. Since then it has been complemented by community notification laws which, like the "Wanted" posters of the Frontier West, publicly disclose registrants' identifying information, involving

entire communities in the criminal monitoring process. *Knowledge as Power* provides the first in-depth history and analysis of criminal registration and community notification laws, examining the potent forces driving their rapid nationwide proliferation in the 1990s through today, as well as exploring how the laws have affected the nation's law, society, and governance. In doing so, the book provides compelling insights into the manifold ways in which registration and notification reflect and influence life in modern America.

Sex Offenders - J. V. Fenner 2008

This book deals with society's responses to sex offenders. This issue is of vital interest to law enforcement professionals and society at large. This subsection of the population generates as much or more fear than virtually any other segment in the community. The chapters in this book deal with recidivism, tracking and location, impulsivity, long-term care, and reunification.

Chapters provide emphasis and guidance on seeking counseling; pathways for victims to seek renewed, healthy, and productive lives; options available for rehabilitating abusers; personality traits common to abusers;

victim responses to the trauma of abuse; outlines of work now underway to understand neurobiological aspects of disorders that may lead to abuse; appropriate treatments for victims and offenders; and an overview of recommended books, websites, and other resources for further reading.

study of US sex offender registration, community notification and residency restriction laws, their public safety impact, and the effect they have on former offenders and their families. It concludes the laws are poorly crafted and misguided, failing to protect children from sex crimes but making it nearly impossible for former offenders to rebuild their lives. In many states, everyone convicted of a sex crime must register and the requirement can last for life. The requirements are overbroad in scope and overlong in duration. As a result, there are more than 600,000 registered sex offenders, including individuals convicted of sexual sex between teenagers, prostitution, and public urination, as well as those who committed their only offenses decades ago. Unfettered public access to online sex offender registries exposes registrants to harassment, ostracism, and even violence, with little evidence that this form of community notification protects anyone from sexual violence. Residency restrictions prohibit former

offenders from living within a designated distance (anywhere from 500 to 2,500 feet) from places where children gather. The restrictions have the effect of banishing former offenders from entire towns, forcing them to live far from home, families, jobs, and treatment, and hindering law-enforcement supervision. The restrictions may have no impact on the likelihood of recidivism. Sex offender laws reflect public concern that children are at grave risk of sexual abuse by strangers who are repeat offenders. The real risks children face are quite different: statistics demonstrate that most sexual abuse of children is committed by family members or persons known and often trusted by the victim, and by someone who has not previously been convicted of a sex offense. The laws also reflect the widely shared but erroneous belief that sex offenders continually repeat their offenses. Authoritative studies, however, indicate that three out of four adult offenders do not reoffend.
