**Emotional Labor in the 21st Century** - Alicia Grandey 2013-05-07

This book reviews, integrates, and synthesizes research on emotional labor and emotion regulation conducted over the past 30 years. The concept of emotional labor was first proposed by Dr. Arlie Russell Hochschild (1983), who defined it as "the management of feeling to create a publicly observable facial and bodily display" (p. 7) for a wage. A basic assumption of emotional labor theory is that many jobs (e.g., customer service, healthcare, team-based work, management) have interpersonal, and thus emotional, requirements and that well-being and effectiveness in these jobs is determined, in part, by a person's ability to meet these requirements. Since Hochschild's initial work, psychologists, sociologists, and management scholars have developed distinct theoretical approaches aimed at expanding and elaborating upon

Hochschild's core ideas. Broadly speaking, emotional labor is the study of how emotion regulation of oneself and others influences social dynamics at work, which has implications for performance and well being in a wide range of occupations and organizational contexts. This book offers researchers and practitioners a review of emotional labor theory and research that integrates the various perspectives into a coherent framework, and proposes an agenda for future research on this increasingly relevant and important topic. The book is divided into 5 main sections, with the first section introducing and defining emotional labor as well as creating a framework for the rest of the book to follow. The second section consists of chapters describing emotional labor theory at different levels of analysis, including the event, person, dyad, and group. The third section illustrates the diversity of emotional labor in

distinct occupational contexts: customer service (e.g. restaurant, retail), call centers, and caring work. The fourth section considers broader contextual influences – organizational-, societal-, and cultural-level factors – that modify how and when emotional labor is done. The final section presents a series of ‘reflective essays’ from eminent scholars in the area of emotion and emotion regulation, where they reflect upon the past, present and future of emotion regulation at work.

*Good and Cheap* - Leanne Brown 2015-07-14

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee

Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace. *Emerging Trends in Real Estate 2019* - Alan Billingsley 2018-10-15 Now in its 40th year, Emerging Trends in Real Estate is one of the most highly regarded and widely read forecast reports in the real estate industry. **Hal Wallis** - Bernard F. Dick 2021-11-21

Hal Wallis (1898-1986) might not be as well known as David O. Selznick or Samuel Goldwyn, but the films he produced—Casablanca, Jezebel, Now, Voyager, The Life of Emile Zola, Becket, True Grit, and many other classics (as well as scores of Elvis movies)—have certainly endured. As producer of numerous films, Wallis made an indelible mark on the course of America's film industry, but his contributions are often overlooked. Bernard Dick offers the first comprehensive assessment of the producer's incredible career. A former office boy and salesman, Wallis first engaged

with the film business as the manager of a Los Angeles movie theater in 1922. He attracted the notice of the Warner brothers, who hired him as a publicity assistant. Within three months he was director of the department, and appointments to studio manager and production executive quickly followed. Wallis went on to oversee dozens of productions and formed his own production company in 1944. Dick draws on numerous sources such as Wallis's personal production files and exclusive interviews with many of his contemporaries to finally tell the full story of his illustrious career. Dick combines his knowledge of behind-the-scenes Hollywood with fascinating anecdotes to create a portrait of one of Hollywood's early power players.

Bicycling advocates envision a future in which bikes are a widespread daily form of transportation, but this reality is still far away. Will we ever witness a true "bike boom" in cities? What can we learn from past successes and failures to make cycling safer, easier, and more accessible? In *Bike Boom*, journalist Carlton Reid uses history to shine a spotlight on the present and demonstrates how bicycling has the potential to grow even further, if the right measures are put in place by the politicians and planners of today and tomorrow. He explores the benefits and challenges of cycling, the roles of infrastructure and advocacy, and what we can learn from cities that have successfully supported and encouraged bike booms. In this entertaining and thought-provoking book, Reid sets out to discover what we can learn from the history of bike "booms."

*Reflections on My Life* - Thomas H. Olbricht 2012-04-25

Thomas H. Olbricht grew up in Churches of Christ, has taught in several of their universities, and has given religious lectures on six continents and in most states in the United States. He has met most leaders in Churches of Christ globally. He has been active in several religious and rhetoric societies and has worked with leaders in all these organizations to bring about changes over the past sixty years. C. Clifton Black and Duane F. Watson wrote about Olbricht, "Tom Olbricht possesses a memory of elephantine proportions. Not only does he have at his fingertips the names and places and dates; better than most he understands how the study of rhetoric has flourished among, while cross-pollinating, multiple disciplines in the humanities, classics, English, speech communication, and religion."
