'China's West Region Development' Ding Lu 2004-06-29 ' In the last two decades, China's western inland region has largely been left out of the nation's economic boom. While its 355-million population accounts for 28% and its land area for 71% of China's total, the region's share of the national GDP is under 20%. Since 1999, Beijing has implemented the West China Development Program to boost the region's growth. Night Market Ryan Bishop 1998 In Thailand, a \$4 billion per year tourist industry is the linchpin of the modernization process called the "Thai Economic Miracle". And what is Thailand's main attraction? Sex for hire. Year after year young women are lured to Bangkok to staff the teeming brothels, massage parlors, and sex bars that cater to male tourists from the United States, Western Europe, Japan, Australia, the Gulf States, Malaysia, and Singapore. Developed from Lillian S. Robinson's article in The Nation, Night Market traces the historical, cultural, material, and textual traditions that have combined in unique ways to establish sex tourism as an integral part of the developing Thai economy. It explores international sex tourism from the perspectives of economic-development planning, forced labor market choices, international sexual alienation, and textual traditions that have constructed sexual "Other" cultures in Western imagination.

Sex Tourism in Africa Wanjohi Kibicho 2016-04-01 Illustrated by in-depth empirical research from Kenya - one of the most popular country

destinations in Africa for sex tourism - this book gathers much-needed statistics and data, and then critically examines the features of tourism and the sex trade, contextualizing this in relation to tourism development. It addresses the conditions which generate this 'social problem' and, while not taking a potentially problematic moralistic stance it questions whether this trade is exploitative in nature, particularly in cases of child sex tourism. It then critically evaluates the current policies in place to regulate the sex tourism industry and provides suggestions for future direction.

Tourism and Cuba Lauren Duffy 2020-05-07 Cuba has experienced many social, economic, and political changes since Raul Castro retained presidency of the island nation in 2008. This comprehensive volume examines how Cuba has restructured some of its core economic policies in order to tackle stagnation; these include allowing for more legalized private enterprises, reducing the number of State-employed workers, and fostering additional outside investments. The authors explore the surge of entrepreneurial activity in tourism among Cuban residents due to these reforms, whether that be offering new tourism products or expanding traditional ones. Though the current diplomatic climate suggests continued uncertainty, the ripple effect of a potentially thawing relationship between Cuba and the USA resulted in an unexpected surge of international tourists wishing to experience Cuba before it opened to the American travel market. This book highlights the factors that are influencing, and in some cases complicating, tourism planning and development in Cuba. The authors explore a wide range of topics including tourism and land-use policy, competitiveness, responsible practices, gender and ethical advertising, the role of tour guides, emergence of *casa particulares*, experiential learning and solidarity, and authenticity through local art. This book will interest students, researchers, politicians and investors with a focus on Cuba. It was originally published as a special issue of the journal *Tourism Planning & Development*.

Issue of Women in Tourism: Development Debate

Tourism in Southeast Asia Michael Hitchcock 2009 Tourism in Southeast Asia provides an up-to-date exploration of the state of tourism development and associated issues in one of the world's most dynamic tourism destinations. The volume takes a close look at many of the challenges facing Southeast Asian tourism at a critical stage of transition and transformation and following a recent series of crises and disasters. Building on and advancing the path-breaking *Tourism in South-East Asia*, produced by the same editors in 1993, it adopts a multidisciplinary approach and includes contributions from some of the leading researchers on tourism in Southeast Asia, presenting a number of fresh perspectives.

Tourism Adrian Franklin 2003-03-18 'Argued with a real verve, it makes a plea to rethink the role of tourism in modernity seeing it not as a fleeting and marginal element, but as something enduring, emblematic and constitutive of contemporary society. Tourism is seen as a key element of modern life, not an escape from it' - Mike Crang, Department of Geography, University of Durham Tourism is a rapidly growing area of student enrolment. Lecturers and students who have waited patiently for an up-to-date, lucid and indispensable teaching and research text, need wait no more. This book is a matchless guide to understanding the theory, practice, development and effects of tourism. *Tourism: An Introduction* - equips students with a critical perspective of the central processes of tourism and the relationship between tourism and culture - places tourism at the heart of modern life rather than as a peripheral feature added on after work - illuminates the relationship between tourism and nation formation, citizenship, consumerism and globalization - reveals the ritual, performative and embodied dimensions of tourist experience This book offers readers a major synthesis of modern thought on tourism. It breaks the mould of approaching tourism as a self-contained, compartment of contemporary life and treats it as a major and exciting cultural phenomenon. This is a landmark work in the study of tourism. Adrian Franklin is the editor of the acclaimed journal *Tourist Studies* (SAGE Publications).

Development Tourism Rochelle Spencer 2016-04-22 Tourism in Cuba - described by Fidel Castro as 'the evil we have to have' - has been regarded both with ambivalence, and as a crucial aspect of development and poverty alleviation. The result is a remarkable approach to tourism, one which often compels tourists to become agents of development through solidarity. Drawing on her experiences of working in an NGO in Cuba, the author uses a multi-sited ethnographic approach to investigate tourism motivations and experiences, and to examine the very nature of development. Her analysis covers a wide range of issues including social change, globalization, social theory, and sustainability. Also discussed is the way in which tourism in Cuba relates to broader debates surrounding transformation, capacity building, social action and solidarity.

Asian Tourism: Growth and Change Janet Cochrane 2007-12-20 Tourism in Asia is growing faster than anywhere else in the world, driven by the increasing wealth of countries like Taiwan, South Korea and Malaysia, and by the huge populations of China, India and Indonesia -the first second and fourth biggest countries in the world. Despite the significance of the tourism industry in this area it is still under researched. *Asian Tourism* is a unique book and the first to address this imbalance by providing a high quality edited collection of chapters which explore the domestic and intraregional tourism in Asia. Divided into three sections it explores: * Policy aspects of tourism development and the role of the public sector exploring issues such as: Cross-national tourism collaboration in Asia, The growth of aviation in Asia and Economic Corridors and Ecotourism. * Changing markets exploring issues such as: The role of Japanese popular culture in Asian tourism, Management Challenges for Bali's Tourism Industry and religious tourism in North India. * Destination and industry responses exploring issues such as: Tourism-Generated Employment in Cambodia, sex workers and tourism in India and responsible destination development in the Philippines. With contributions from well respected and eminent names in the field, *Asian Tourism* provides a ground breaking insight into topical, industry focused issues while benefiting from academic depth and rigour and an awareness of tourism history in this region.

Health and the International Tourist Stephen Clift 1996 This volume explores key relationships between tourism and health, covering the behaviour, life-styles and risk characteristics of tourists and mechanisms for reduction of tourist-related health problems. Providing an important framework for

Urban Tourism in the Developing World Christian Myles Rogerson 2007 Over the past decade, the field of urban tourism has consolidated with the appearance of several books that concentrate upon the Western European and North American experience. Recently, the scope and range of urban research has widened considerably, including the welcome appearance of studies that examine the tourism phenomenon in cities outside the Euro-American heartland. Despite this growing international body of debate and scholarship on tourism and cities, particularly in the developed North, literature that relates to the developing world as a whole, and to Africa in particular, remains sparse. The task of *Urban Tourism in the Developing World: The South African Experience* is to augment the current international scholarship concerning urban tourism in the developing world. More especially, the contributors draw attention to a range of case studies from South Africa that provide some starting points to address the uneven scholarly coverage of urban tourism the African context has received to date. In addition, the research material presented here seeks to contribute toward raising the South African, and indeed the African profile, within growing international scholarship concerning issues of urban tourism and development. This collection aims to expand an emerging South African and African tourism research "voice" concerning the tourism and development nexus, as well as to stem critiques that this body of research appears to have developed in a theoretical vacuum, divorced from broader international tourism research discourses. This collection of essays not only further develops an independent South African tourism perspective, but also presents research that is closely tied to international urban tourism research debates. In addition, this analysis of urban tourism in the South African context enriches the rather Western-oriented theories of urban tourism discourse through its emphasis on how urban tourism is evolving in urban Africa. Christian M. Rogerson is professor of human geography in the School of Geography, Archaeology and Environmental Studies, University of the Witwatersrand, Johannesburg, South Africa. Gustav Visser is senior lecturer in human geography in the Department of Geography, University of the Free State, Bloemfontein, South Africa.

Tourism and Inequality Stroma Cole 2010 Tourism has long been considered a source of social inequality, and as the industry continues to expand rapidly there is an increasing need for a better understanding of its consequences. Providing a synthesis of tourism as a source of injustice, *Tourism and Inequality* addresses a wide range of interrelated forms of inequality, investigating its association with class, nation, ethnicity, race, gender, disability and age. Chapters examine routes towards social justice and initiatives that aim to advance poverty alleviation, fair trade, ethics and human rights. The analysis of a wide variety of case studies from around the world allows an exploration into the ways that tourism can be used positively to alleviate the impacts of social injustice. Providing a unique multidisciplinary perspective, the authors aim to lead the way towards a more socially responsible future for tourism practice. This book provides a useful resource for students of tourism and tourism management, as well as industry professionals and policy makers.

Tourism is a manifestation of globalization and it intersects with human rights on so many levels. These implications are increasingly relevant in light of the COVID-19 pandemic and subsequent global economic hardship. Split into two main sections, the first establishes a background to human rights issues with reference to tourism, and the second provides a multi-disciplinary analysis of a range of selected human rights issues in tourism; these include displacement, security, privacy, discrimination, freedom of movement, the rights of Indigenous people, sex tourism and labour conditions. All chapters include case studies to showcase specific issues such as legal rulings or tourism policies/regulations. A Situational Analysis of Child Sex Tourism in India

Women and Tourism: Invisible Hosts, Invisible Guest

The Tourism we do not talk about. A study on Sexual Exploitation of Children in Tourism, with a focus on Argentina and Brazil Alana Hartmann Matschulat 2018-01-05 Countries facing substantial socioeconomic problems where tourism acts as an engine for development often become vulnerable to the phenomenon known as „sex tourism“. South America is a region that shows a high incidence of commercial activities of this kind, which also hides many forms of exploitation, sex trade of children being one of the most serious. What leaves room for its occurrence often are the gaps present in the legislations, along with the obsolete applicability of such laws, or even our indifference as actors capable of provoking social change. This book contains a study that seeks to identify the origins of the occurrence and the legal apparatus available to deal with the incidence of commercial sexual exploitation of children in the region, focusing on Brazil - as a pioneer - and Argentina - a recent country dealing with such an issue. Through an analysis of the evolution of the legal framework in both countries and the international mechanisms the book is also an invitation to the reader to reflect on this unmentioned side of tourism.

Tourism, Sex Tourism and the Increase in Prostitution Colleen Daniels 1997

Tourism in Development Peter U.C. Dieke 2020-11-20 Over the last fifty years, tourism has become firmly established as a development option around the world. Commensurate with this, the study of tourism's developmental role has also expanded significantly. There now exists a broad understanding of the policies and processes, opportunities and challenges that apply to tourism's potential contributions to development. As the tourism environment now faces numerous challenges and transformations, it is timely to reflect on contemporary understandings of the relationship between tourism and development and to consider future directions. This thought-provoking volume challenges the orthodoxy of tourism and development, highlights past and current events and considers longer term repercussions and developments. It will be a relevant and enduring resource for academics and undergraduate and postgraduate students in tourism.

Development And Implications Of Sex Tourism Praveen Sethi 1999

Tourism and Development in the Third World John Lea 2006-12-05 What is the truth behind the paradise beaches in travel brochures? What can a developing country do when one exotic holiday seems much like another, when political instability or environmental disaster can deter tourist for years, when the tourism industry slips into foreign control? *Tourism and Development in the Third World* assess the diverse social, economic, and environmental factors which impact on the Third World. Illustrating the analysis with cases which range across tourism in game parks, sex tours and the after-effects of political turmoil, the book explores ways of managing tourism as a resource and evaluates its long-term contribution towards national development.

The Sociology of Tourism Yiorgos Apostolopoulos 2013-04-15 The rapid expansion of the tourism industry has provided many economic benefits and affected every facet of contemporary societies including employment, government revenue and cultural manifestations. However, tourism can also be considered a problematic phenomenon, promoting dependency, underdevelopment and adverse sociocultural effects, especially for developing countries. This pioneering work provides a comprehensive review of these complex tourism issues from a sociological perspective. Various theoretical and empirical approaches are introduced and the following issues are discussed: * identifiable and stable forms of touristic behaviour and roles * social divisions within tourism * the interdependence of tourism and social institutions * the effects of transnational tourism and commodification on the ecosystem. Featuring international contributions from nine different countries, this book brings together the most noted theoretical and empirical studies and enriches them with diverse experiences and perspectives.

Yet such activities can also create social, cultural and environmental problems. This book provides a review of many of the key issues involved in tourism in developing countries and presents a range of case studies. Tourism Vivian Kinnaird 1994-06-30 Examines the impact of tourism from the viewpoint of gender studies focusing on women's needs, expectations, roles and opportunities in this rapidly changing and important global industry. Contains a selection of case studies ranging from sex tourism in South-East Asia and gender in tourism planning to the impact of tourism on women in traditional societies. Awake Aida F. Santos 1992

The Ethics of Tourism Development Rosaleen Duffy 2004-03-01 Drawing upon a variety of important philosophical traditions, this book develops an original perspective on the relations between ethical, economic and aesthetic values in a tourism context. It considers the ethical/political issues arising in many areas of tourism development, including: the profound cultural and environmental impacts on tourist destinations the reciprocity (or lack of) in host-guest relations the (un)fair distribution of benefits and revenues the moral implications of issues such as sex tourism, staged authenticity and travel to oppressive regimes. The book concludes with a detailed investigation of the potential and pitfalls of ecotourism, sustainable tourism and community-based tourism, as examples of what is sometimes termed 'ethical tourism.' Until now, the ethical issues that surround tourism development have received little academic attention. Explaining philosophical arguments without the use of excessive jargon, this fascinating book interweaves theory and practice, aided by the use of text boxes to explain key terms in ethics, politics, and tourism development, and drawing on contemporary case studies from South Africa, Mexico, Zambia, Honduras, Ethiopia and Madagascar.

Sex Tourism Michael C. Hall 2005-07-08 Sex Tourism examines the issues which emerge from sex worker-client interactions and from tourists visiting 'sex destinations'. It is a comprehensive summary of past research by academics and original primary and secondary research by the authors and has examples from Asia, Australasia and the USA. The authors have generated new models to show different dimensions of sex tourism, which normalise at least some components of the sex industry, and represent a new way of looking at sex tourism by challenging the preconceived perceptions that some people have of sex tourism or confirm the impression of others. Sex Tourism looks at issues of importance to those working in tourism, women's studies, gender studies and social change.
