Terror, Love and Brainwashing Alexandra Stein 2016-11-03 Written by a cult survivor and renowned expert on cults and totalitarianism, *Terror, Love and Brainwashing* draws on the author's 25 years of study and research to explain how almost anyone, given the right set of circumstances, can be radically manipulated to engage in otherwise incomprehensible and often dangerous acts. Illustrated with compelling stories from a range of cults and totalitarian systems, from religious to political to commercial, the book defines and analyses the common and identifiable traits that underlie almost all these groups. It focuses on how charismatic, authoritarian leaders control their followers' attachment relationships via manipulative social structures and ideologies so that, emotionally and cognitively isolated, they become unable to act in their own survival interests. Using the evolutionary theory of attachment to demonstrate the psychological impact of these environments, and incorporating the latest neuroscientific findings, Stein illustrates how the combined dynamic of terror and 'love' works to break down people's ability to think and behave rationally. From small local cults to global players like ISIS and North Korea, the impact of these movements is widespread and growing. This important book offers clarity and a unique perspective on the dynamics of these systems of control, and concludes with guidance to foster greater awareness and prevention. It will be essential reading for mental health professionals in the field, as well as policy makers, legal professionals, cult survivors, and their families, as well as anyone with an interest in these disturbing groups. Students of social and developmental psychology will also find it fascinating.

Traumatic Narcissism and Recovery Daniel Shaw 2021-07-27 This book looks at the trauma suffered by those in relationships with narcissists, covering topics such as surviving a cult, dysfunctional families, political dysfunction, and imbalances of power in places of work and education. This new volume by author and psychoanalyst Daniel Shaw revisits themes from his first book, *Traumatic Narcissism: Relational Systems of Subjugation*. Shaw offers further reflections on the character and behavior of the traumatizing narcissist, the impact such persons have on those they abuse and exploit and the specific ways in which they instill shame and fear in those they seek to control. In addition, this volume explores, with detailed clinical material, many of the challenges mental health professionals face in finding effective ways of helping those who have suffered narcissistic abuse. From within a trauma informed, relational psychoanalytic perspective, Shaw explores themes of attachment to internalized perpetrators, self-alienation, internalized aggression, and loss of faith in the value and meaning of being alive. This book will be especially illuminating and rewarding for mental health professionals engaged in helping patients heal and recover from complex relational trauma, and equally valuable to those individuals who have struggled with the tenacious, often crippling shame and fear that can be the result of relational trauma.

Claude Monet Angelica Daneo 2019 Spanning the artist's entire career, this book explores Claude Monet's enduring relationship with nature and the landscapes he returned to again and again. Capturing fleeting natural impressions played a central role in the art of Claude Monet. This lavishly illustrated volume explores the development of Monet's art from the 1850s to the 1920s, focusing on the places, both at home and on his frequent travels, from which he drew inspiration for his painting. In addition, the book traces the critical shift in Monet's art that occurred when he began to focus on series of the same subjects such as haystacks, poplars, and the water lilies and pond at his meticulously designed garden in Giverny. Traumatic Narcissism Daniel Shaw 2013-09-23 In this volume, Traumatic Narcissism: Relational Systems of Subjugation, Daniel Shaw presents a way of understanding the traumatic impact of narcissism as it is engendered developmentally, and as it is enacted relationally. Focusing on the dynamics of narcissism in interpersonal relations, Shaw describes the relational system of what he terms the 'traumatizing narcissist' as a system of subjugation - the objectification of one person in a relationship as the means of enforcing the dominance of the subjectivity of the other. Daniel Shaw illustrates the workings of this relational system of subjugation in a variety of contexts: theorizing traumatic narcissism as an intergenerationally transmitted relational/developmental trauma; and exploring the clinician's experience working with the adult children of traumatizing narcissists. He explores the relationship of cult leaders and their followers, and examines how traumatic narcissism has lingered vestigially in some aspects of the psychoanalytic profession. Bringing together theories of trauma and attachment, intersubjectivity and complementarity, and the rich clinical sensibility of the Relational Psychoanalysis tradition, Shaw demonstrates how narcissism can best be understood not merely as character, but as the result of the specific trauma of subjugation, in which one person is required to become the object for a significant other who demands hegemonic subjectivity.

Traumatic Narcissism presents therapeutic clinical opportunities not only for psychoanalysts of different schools, but for all mental health professionals working with a wide variety of modalities. Although primarily intended for the professional psychoanalyst and psychotherapist, this is also a book that therapy patients and lay readers will find highly readable and illuminating.
