**Hello, My Name Is Riley** - Tricia Jacobs 2018-09-03

This is the true story of Riley, a 5 month old kitten who was adopted from an animal shelter. He originally had a different name and lived in the shelter for several months. He was caught in a humane trap with his mother and two siblings as a part of a local trap and release program. His mother was spayed and released. He and his brother and sister were kept at the shelter, spayed and neutered until families came and adopted them. The story is directed towards elementary and middle school aged children. There are 20+ pages with full color illustrations. Included is a vocabulary list and definitions at the back of the book, with a brief description of what spaying and neutering are. In a poem at the back of the book, the author gives praise to our Creator for such a beautiful pet for their family. Excerpt from the "Statistics" page in the book: "There is an animal overpopulation problem in America. Millions of unwanted and uncared for animals go into shelters each year and are euthanized (put to death). Please, study these statistics before allowing your pets to become pregnant. Careless litters of puppies and kittens add to the animal overpopulation problem. These statistics are startling and very sad! Please spay or neuter your pets! Kittens can become pregnant as early as 6 months old. They can have three litters of kittens a year, averaging 4 kittens in each litter. That is 12 kittens or more per unspayed female cat per year! Then, if any of those kittens are female they can also start having kittens at 6 months of age. The number of kittens and unwanted cats adds up quickly!"

How to Listen to Your Cat - Kim O. Morgan 2016-11-30

Love your cat, but hate its bad behavior? According to The Humane Society of the United States, body language, behavior, and vocalizations are keys to understanding the feline mind. If your cat seems to be constantly aloof or is exhibiting bad behavior, you may often wish you could speak directly to it about what it is thinking. Fortunately, you can communicate and understand your pet by studying its behavior and using the techniques found throughout this book. By observing a cat's body language and actions, we can guess at how it might be feeling. Want to know why your cat constantly hisses at strangers, frequently sulks, or attacks your feet while you are sleeping? How to Listen to Your Cat covers major aspects of feline behavior, including social behavior, protection of territory, hunting tactics, reproduction, and interaction with people and other pets. This book explores an array of behaviors often found in cats and what these behaviors should signal to their owners. Learning to communicate with your kitty can help you know when it's hungry, ready to play, content, or lonely. You will learn the importance of positive reinforcement, details on how a cat learns, how to develop a bond with your cat, and the basics of cat training. This book explores how to teach your feline friend to use the litter box, come when you call its name, and tolerate touch and grooming. Teach your cat useful behaviors, such as walking on a leash, sitting, staying, and standing, along with fun behaviors, such as shaking hands, begging, and fetching. Comfort, fright, and hunger are the main feelings displayed among cats. The feelings result in a variety of behaviors. This book provides a breakdown of how these feelings are shown through changes in a cat's eyes, ears, mouth, tail, and posture. The tone of a cat's cry, the perk of its ears, and the sway of its tail can provide clues as to its intentions. This book also analyzes the different sounds cats make, including purring, hissing, spitting, and growling, and how these sounds tell owners what their cat is feeling. A variety of emotions displayed in cats will be analyzed, such as behaviors that suggest comfort, satisfaction with food, a welcomed greeting, sleepiness, safety, and much

more. This book also offers photos so you can spot similar behavior in your own pet. Cats are known to have a variety of personalities. These personalities and how they relate to different breeds are explored. Tips on training your cat and preventing or stopping bad behavior are given to promote peacefully cohabitation with your feline friend. Advice is provided for addressing typical problem behaviors among cats, including destructive scratching, spraying, aggression, eating plants, and litter box issues. We have spent hundreds of hours interviewing veterinarians, animal trainers/behaviorists, and cat owners like yourself to compile useful information that will create a more harmonious relationship between you and your cat. As pet owners, we have a responsibility to ensure our pets are happy and safe; this book will serve as a tool for measuring these factors. Now, with the help of this book, you can love your cat and understand its behavior.

**Animalkind** - Ingrid Newkirk 2021-01-19

The founder and president of PETA, Ingrid Newkirk, and bestselling author Gene Stone explore the wonders of animal life with "admiration and empathy" (The New York Times Book Review) and offer tools for living more kindly toward them. In the last few decades, a wealth of new information has emerged about who animals are: astounding beings with intelligence, emotions, intricate communications networks, and myriad abilities. In Animalkind, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way, detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish "sing" underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away. Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. Whether it's medicine, product testing, entertainment, clothing, or food, there are now better options to all the uses animals once served in human life. We can substitute warmer, lighter faux fleece for wool, choose vegan versions of everything from shrimp to marshmallows, reap the benefits of animal-free medical research, and scrap captive orca exhibits and elephant rides for virtual reality and animatronics. Animalkind provides a fascinating look at why our fellow living beings deserve our respect, and lays out the steps everyone can take to put this new understanding into action.

The Amazing Cat Family - Susan Fadler 2015-06-13

The Amazing Cat Family is an Animal Based Curriculum of the RUFF Program. The book is 133 pages and takes a comprehensive look at the entire cat family with emphasis on cultural use, science, biology, history, genetics and geography. Each species is noted with Navajo names. R.U.F.F. is an acronym that stands for Reservations' Unwanted Four-Footed Friends organized for establishing homes for the unwanted and neglected animals on the Navajo Reservation. Rescued animals went into classrooms to help teach the children about animal behavior, care and health, but the animals ended up helping the kids by extrapolating expressions of emotions which would otherwise be harbored or unexpressed by the child. It incorporated self-esteem where all else had failed. Using a natural catalyst, puppies and kittens, to teach responsible behavior proved to be extremely effective. Teacher nominated, this curriculum won 1st place Golden Bell Award from the ASBA as the best new innovative curriculum in 1996. [www.ruffprogram.com](http://www.ruffprogram.com)
