Weed Science Godfrey Pearlson 2020-07-11 WHAT DO WE KNOW ABOUT MARIJUANA AND HOW DO WE KNOW IT? Marijuana is the most frequently consumed illicit drug worldwide, with over 158.8 million users, according to the UN. Responding to public pressure, the US federal government is likely to legalize recreational marijuana within the next few years. With increasing numbers of people using cannabis both medically and recreationally there are many looming questions that only science can answer. These include: What's likely to happen, both good and bad, if the US legalizes marijuana? What are some simple, science-based rules to separate fact from fiction and to help guide policy in the highly contentious marijuana debate? Exactly what is cannabis doing in the brain that gets us high? A journey through THC neuroscience Does cannabis really have medical benefits - what's the evidence? To what extent does cannabis impair driving? Can smoking marijuana in adolescence affect IQ or risk for developing schizophrenia? Is marijuana safe to use during pregnancy? Reviews the endocannabinoid system and why our bodies are full of "weed receptors" Introduces readers to the various forms of marijuana: flower, dabs, hash, edibles, shatter, vapes, tinctures, oils and synthetics, THC, CBD and terpenes. Demonstrates how and why cannabis affects different people very differently. Discusses how MRI and PET scans can help show the effects of

marijuana on the brain. Discusses long-term effects of adolescent and adult cannabis use. Examines the evidence for cannabis's role in increasing the risk for schizophrenia-like illnesses.

Contemporary Bioethics Mohammed Ali Al-Bar 2015-05-27 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

Christian Martyrs Under Islam Christian C. Sahner 2020-03-31 A look at the developing conflicts in Christian-Muslim relations during late antiquity and the early Islamic era How did the medieval Middle East transform from a majority-Christian world to a majority-Muslim world, and what role did violence play in this process? *Christian Martyrs under Islam* explains how Christians across the early Islamic caliphate slowly converted to the faith of the Arab conquerors and how small groups of individuals rejected this faith through dramatic acts of resistance, including apostasy and blasphemy. Using previously untapped sources in a range of Middle Eastern languages, Christian

Sahner introduces an unknown group of martyrs who were executed at the hands of Muslim officials between the seventh and ninth centuries CE. Found in places as diverse as Syria, Spain, Egypt, and Armenia, they include an alleged descendant of Muhammad who converted to Christianity, high-ranking Christian secretaries of the Muslim state who viciously insulted the Prophet, and the children of mixed marriages between Muslims and Christians. Sahner argues that Christians never experienced systematic persecution under the early caliphs, and indeed, they remained the largest portion of the population in the greater Middle East for centuries after the Arab conquest. Still, episodes of ferocious violence contributed to the spread of Islam within Christian societies, and memories of this bloodshed played a key role in shaping Christian identity in the new Islamic empire. *Christian Martyrs under Islam* examines how violence against Christians ended the age of porous religious boundaries and laid the foundations for more antagonistic Muslim-Christian relations in the centuries to come.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice;

community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Rust Programming Language (Covers Rust 2018) Steve Klabnik 2019-08-12 The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: Ownership and borrowing, lifetimes, and traits Using Rust's memory safety guarantees to build fast, safe programs Testing, error handling, and effective refactoring Generics, smart pointers, multithreading, trait objects, and advanced pattern matching Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendixes on Rust development tools and editions.

Inside Inequality in the Arab Republic of Egypt Paolo Verme 2014-04-16 This book joins four papers prepared in the framework of the Egypt inequality study financed by the World Bank. The first paper prepared by Sherine Al-Shawarby reviews the studies on inequality in Egypt since the 1950s with the double objective of illustrating the importance attributed to inequality through time and of presenting and compare the main published statistics on inequality. To our knowledge, this is the first time that such a comprehensive review is carried. The second paper prepared by Branko Milanovic turns to the global and spatial dimensions of inequality. The objective here is to put Egypt inequality in the global context and better understand the origin and size of spatial inequalities within Egypt using different forms of measurement across regions and urban and rural areas. The Egyptian society remains deeply divided across space and in terms of welfare and this study unveils some of the hidden features of this inequality. The third paper prepared by Paolo Verme studies facts and perceptions of inequality during the period 2000-2009, the period that preceded the

Egyptian revolution. The objective of this part is to provide some initial elements that could explain the apparent mismatch between inequality measured with household surveys and inequality aversion measured by values surveys. No such study has been carried out before in the Middle-East and North-Africa (MENA) region and this seemed a particular important and timely topic to address in the light of the unfolding developments in the Arab region. The fourth paper prepared by Sahar El Tawila, May Gadallah and Enas Ali A. El-Majeed assesses the state of poverty and inequality among the poorest villages of Egypt. The paper attempts to explain the level of inequality in an effort to disentangle those factors that derive from household abilities from those factors that derive from local opportunities. This is the first time that such study is conducted in Egypt. The book should be of interest to any observer of the political and economic evolution of the Arab region in the past few years and to poverty and inequality specialists that wish to have a deeper understanding of the distribution of incomes in Egypt and other countries in the MENA region.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-12-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during

the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

A Taste of Honey Habeeb Akande 2015-08-12 A Taste of Honey provides a scholarly exposition on the prominent place that sexuality and erotology enjoyed in traditional Islam. The book is divided into two parts; part one presents a critical examination of sexual ethics and part two consists of a concise treatise on the art of seduction and lovemaking. The central aim of this book argues that Islam is a sexually enlightened religion which teaches that sensuality should not be devoid of spirituality. The book also argues that the loss of sacred sensuality afflicting modern society can be reclaimed by a revival of the classical erotological tradition. Drawing upon the Qur'ān, ḥadīth and traditional erotological literature, the book follows the style and composition of classical Eastern and Afro-Arab love texts such as the Kama Sutra and Jalāl ad-Dīn aś-Śuyūṭī's erotic treatises. A Taste of Honey is a thought-provoking work on a highly sensitive, yet extremely important subject.

Islamic Guide to Sexual Relations Muhammad Ibn Adam al-Kawthari 2020-08-19 Fulfilment of sexual desire and needs are key in sustaining a harmonious marital relationship. However, in today's society, sexual boundaries are being pushed further and further, and often, sexual deviance is openly practised. In such circumstances, there is a need to identify which sexual activities are permissible in Shari'ah. Islamic Guide to Sexual Relations is a serious endeavour to tackle these sensitive matters in a clear and concise manner. While being respectful and dignified in the language he employs, the author does not shy away from discussing sensitive issues. He records, in thorough detail, the guidance Islam provides regarding sexual encounters with one's spouse. The book covers a wide range of issues, and thus, answers many frequently asked questions on the topic of sexual relations. It concludes with a short chapter addressing Islamic etiquettes and practises pertaining to newlyweds on their first night.

Female Sexual Function and Dysfunction Elisabetta Costantini 2017-06-19 This book discusses all aspects of sexuality in women and in particular explores sexual function and dysfunction in a variety of settings, including the different stages of life and a wide range of major diseases and local conditions. The aim is to refocus attention on the needs and sexual realities of women, providing a fresh point of view that will assist gynecologists, sexual medicine physicians, and urologists in delivery of high-quality care and help women themselves to understand and address sexual problems relating to desire, arousal, orgasm, and sexual pain. Psychological aspects of female sexuality and the impacts of the aging process, pregnancy, and childbirth are carefully examined. Extensive consideration is then given to the effects on sexual function of such conditions as cardiovascular disease, cancer, diabetes, neurological disease, endometriosis, pelvic organ prolapse, urinary incontinence, reproductive disorders, sexual abuse, and drug abuse. Issues of sexual identity and female dysmorphophobias are also considered. The authors are all experts in the field and have a deep understanding of the complexities of female sexuality.

Three Contributions to the Theory of Sex Sigmund Freud 2015-11-16 The fact of sexual need in man and animal is expressed in biology by the assumption of a "sexual impulse." This impulse is made analogous to the impulse of taking nourishment, and to hunger. The sexual expression corresponding to hunger not being found colloquially, science uses the expression "libido." Popular conception makes definite assumptions concerning the nature and qualities of this sexual impulse. It is supposed to be absent during childhood and to commence about the time of and in connection with the maturing process of puberty; it is supposed that it manifests itself in irresistible attractions exerted by one sex upon the other, and that its aim is sexual union or at least such actions as would

lead to union. But we have every reason to see in these assumptions a very untrustworthy picture of reality. On closer examination they are found to abound in errors, inaccuracies and hasty conclusions. If we introduce two terms and call the person from whom the sexual attraction emanates the sexual object, and the action towards which the impulse strives the sexual aim, then the scientifically examined experience shows us many deviations in reference to both sexual object and sexual aim, the relations of which to the accepted standard require thorough investigation.

Kafka Reiner Stach 2017-09-05 The eagerly anticipated final volume of the award-winning, definitive biography of Franz Kafka How did Kafka become Kafka? This eagerly anticipated third and final volume of Reiner Stach's definitive biography of the writer answers that question with more facts and insight than ever before, describing the complex personal, political, and cultural circumstances that shaped the young Franz Kafka (1883–1924). It tells the story of the years from his birth in Prague to the beginning of his professional and literary career in 1910, taking the reader up to just before the breakthrough that resulted in his first masterpieces, including "The Metamorphosis." Brimming with vivid and often startling details, Stach's narrative invites readers deep inside this neglected period of Kafka's life. The book's richly atmospheric portrait of his German Jewish merchant family and his education, psychological development, and sexual maturation draws on numerous sources, some still unpublished, including family letters, schoolmates' memoirs, and early diaries of his close friend Max Brod. The biography also provides a colorful panorama of Kafka's wider world, especially the convoluted politics and culture of Prague. Before World War I, Kafka lived in a society at the threshold of modernity but torn by conflict, and

Stach provides poignant details of how the adolescent Kafka witnessed violent outbreaks of anti-Semitism and nationalism. The reader also learns how he developed a passionate interest in new technologies, particularly movies and airplanes, and why another interest—his predilection for the back-to-nature movement—stemmed from his “nervous” surroundings rather than personal eccentricity. The crowning volume to a masterly biography, this is an unmatched account of how a boy who grew up in an old Central European monarchy became a writer who helped create modern literature.

It is a thing we have and also a thing we do; a supposedly private act laden with public meaning; a personal preference shaped by outside forces; a place where pleasure and ethics can pull wildly apart. Since #MeToo many have fixed on consent as the key framework for achieving sexual justice. Yet consent is a blunt tool. To grasp sex in all its complexity - its deep ambivalences, its relationship to gender, class, race and power - we need to move beyond 'yes and no', wanted and unwanted. We need to interrogate the fraught relationships between discrimination and preference, pornography and freedom, rape and racial injustice, punishment and accountability, pleasure and power, capitalism and liberation. We need to rethink sex as a political phenomenon. Searching,

[Islam, Women's Sexuality and Patriarchy in Indonesia](#) Irma Riyani 2020-11-26 This book explores the intimate marital relationships of Indonesian Muslim married women. As well as describing and analysing their sexual relationships, the book also investigates how Islam influences discourses of sexuality in Indonesia, and in particular how Islamic teachings affect Muslim married women's perceptions and behaviour in their sexual relationships with their husbands. Based on extensive original research, the book reveals that Muslim women perceive marriage as a social, cultural, and religious obligation that they need to fulfil; that they realise that finding an ideal marriage partner is complicated, with some having the opportunity for a long courtship and others barely knowing their partner prior to marriage; and that there is a strong tendency, with some exceptions, for women to consider a sexual relationship in marriage as their duty and their husband's right. Religious and cultural discourses justify and support this view and consider refusal a sin (dosa) or taboo (pamali). Both discourses emphasise obedience towards husbands in marriage.

Penile Disorders Hartmut Porst 2012-12-06 This book contains a compilation of papers based on presentations made at the International Symposium on Penile Disorders held in Hamburg, Germany, 26-27 January 1996, under the Chairmanship of Hartmut Porst. This was a unique conference in that it comprehensively addressed various disorders that affect the organ situated at the "center of the male", the penis. As an important beginning, the sociocultural aspects of the erect phallus were presented by G. Wagner from Copenhagen. The anatomy of the penis and the physiological conditions of erection were then discussed by K. -P. J Unemann from Mannheim, Germany. Previous conferences on the penis had concentrated only on specific areas of disease such as impotence.

However, it became readily apparent that at this conference something new for almost every aspect of disease would be discussed, including congenital disorders such as hypospadias and epispadias, sexually transmitted and noninfectious dermatological diseases, and congenital and acquired penile curvatures and penile fractures. An excellent presentation of managing penile cancer by stage related therapeutic decision was presented by S. C. Müller from Bonn, Germany. There is no better person to present a discussion of Peyronie's disease in 1996 from a historical and management perspective than J. Pryor from London, UK. This same degree of expertise was also demonstrated by I. Saenz de Tejada from Madrid, Spain, regarding priapism.

New York Times Book Review At midnight, December 31, 1925, citizens of the newly proclaimed Turkish Republic celebrated the New Year. For the first time ever, they had agreed to use a nationally unified calendar and clock. Yet in Istanbul—an ancient crossroads and Turkey's largest city—people were looking toward an uncertain future. Never purely Turkish, Istanbul was home to generations of Greeks, Armenians, and Jews, as well as Muslims. It welcomed White Russian nobles ousted by the Russian Revolution, Bolshevik assassins on the trail of the exiled Leon Trotsky, German professors, British diplomats, and American entrepreneurs—a multicultural panoply of performers and poets, do-gooders and ne'er-do-wells. During the Second World War, thousands of Jews fleeing occupied Europe found passage through Istanbul, some with the help of the future Pope John XXIII. At the Pera Palace, Istanbul's most luxurious hotel, so many spies mingled in the lobby that the manager posted a sign asking them to relinquish their seats to paying guests. In beguiling prose and rich character portraits, Charles King brings to life a remarkable era when a storied city stumbled into the modern world and reshaped the meaning of cosmopolitanism.
