The Woman in the Surgeon's Body - Joan Cassell 2009-07-01

Surgery is the most martial and masculine of medical specialties. The combat with death is carried out in the operating room, where the intrepid surgeon challenges the forces of destruction and disease. What, then, if the surgeon is a woman? Anthropologist Joan Cassell enters this closely guarded arena to explore the work and lives of women practicing their craft in what is largely a man's world. Cassell observed thirty-three surgeons in five North American cities over the course of three years. We follow these women through their grueling days: racing through corridors to make rounds, perform operations, hold office hours, and teach residents. We hear them, in their own words, discuss their training and their relations with patients, nurses, colleagues, husbands, and children. Do these women differ from their male colleagues? And if so, do such differences affect patient care? The answers Cassell uncovers are as complex and fascinating as the issues she considers. A unique portrait

of the day-to-day reality of these remarkable women, *The Woman in the Surgeon's Body* is an insightful account of how being female influences the way the surgeon is perceived by colleagues, nurses, patients, and superiors--and by herself.

Genital Sex Reassignment Surgery - A. Ilancheran 1989

The Male Patient in Aesthetic Medicine - Mauricio de Maio 2009-07-26

are growing among core specialists in the aesthetic field, aesthetic medicine is advancing exponentially. The two authors of this text have worked together to provide a knowledgeable and practical approach to the male patient in aesthetic medicine. April 2009 Timothy Corcoran Flynn, M.D. Clinical Professor, University of North Carolina at Chapel Hill Medical Director, Cary Skin Center, Cary, NC 27608, USA Preface Men are different from women in many ways. Male aesthetics are different from female aesthetics. Most readers would agree with this statement. However, as the majority of our patients are still female, even

cosmetic physicians may tend to treat their male patients like female patients. This can lead to dissatisfaction of the patient and consequently of the cosmetic physician. As the demand for aesthetic procedures in male patients is rising, there is a need for good textbooks on this subject. The aim of this book is to explain the specificities of the ageing process and facial aesthetics in men and to present the treatments available. In addition, common skin conditions and diseases that also influence the male aesthetic appearance will be discussed. The book written from the perspectives of a plastic surgeon and a dermatologist should enable us to treat our male patients better, and by that increase the satisfaction of our patients and, last not least, our satisfaction as the treating physicians.
