Reshaping the Work-Family Debate - Joan C. Williams 2012-01-01

The United States has the most family-hostile public policy in the developed world. Despite what is often reported, new mothers don't Óopt outÓ of work. They are pushed out by discriminating and inflexible workplaces.

Today's workplaces continue to idealize the worker who has someone other than parents caring for their children. Conventional wisdom attributes women's decision to leave work to their maternal traits and desires. In this thought-provoking book, Joan Williams shows why that view is misguided and how workplace practice disadvantages menÑboth those who seek to

avoid the breadwinner role and those who embrace itÑas well as women. Faced with masculine norms that define the workplace, women must play the tomboy or the femme. Both paths result in a gender bias that is exacerbated when the two groups end up pitted against each other. And although work-family issues long have been seen strictly through a gender lens, we ignore class at our peril. The dysfunctional relationship between the professional-managerial class and the white working class must be addressed before real reform can take root. Contesting the idea that women need to negotiate better within the family, and redefining the notion of success in the workplace, Williams reinvigorates the work-family debate and offers the first steps to making life manageable for all American families.

Careers In and Out of Organizations - Douglas T. Hall 2001-12-20

Careers In and Out of Organizations provides an overview of the changing context of careers and describes the role of interpersonal relationships as influences on development of a person's identity and learning. The author examines the nature of the new career contract and the different approaches that have been taken to studying career decision making. He explores how career choices are made, the developmental stages people pass through during the course of their working lives in organizations, and the factors related to career effectiveness including integrating career and personal life. The latter third of the book turns from research to the practical issues involved in applying theory including a look at how an understanding of career dynamics can be employed to make careers work better for individuals and for the work communities where they are employed.

Getting to 50/50 - Sharon Meers 2013-09-10

Sharon Meers and Joanna Strober are professionals, wives, and mothers. They understand the challenges and rewards of two-career households. They also know that families thrive not in spite of working mothers but because of them. You can have a great career, a great marriage, and be a great mother. The key is tapping into your best resource and most powerful ally—the man you married. After interviewing hundreds of parents and employers, surveying more than a thousand working mothers, and combing through the latest government and social science research, the authors have discovered that kids, husbands, and wives all reap huge benefits when couples commit to share equally as breadwinners and

caregivers. Mothers work without guilt, fathers bond with their kids, and children blossom with the attention of two involved parents. The starting point? An attitude shift that puts you on the road to 50/50—plus the positive step-by-step advice in this book. From “baby boot camp” for new dads to exactly what to say when negotiating a leave with the boss, this savvy book offers fresh ideas to today’s families offering encouragement, hope, and confidence to any woman who has ever questioned her choices regarding work and family.

Not Your Mother's Life - Joan Peters
2001-04-19

The next generation of women want a career and a life, but they don't know how to get both. Having watched the boomer generation, they know they don't want their options: sacrificing family life for high-powered careers or consigning themselves to the "mommy track." Not Your Mother's Life shows how today's young women are uniquely poised to reach out and take-or create-the work/life balance that proved so elusive for the boomers. The key, Peters argues, is for women to use their newfound economic power to choose their lives instead of letting their lives choose them. Not only can they decide on the career, the company, and the workday they want, they can choose a spouse who shares their goals and will shape their relationship to support them. Full of real-life examples of women who are doing it their

own way, Not Your Mother's Life offers this new generation a vision of how to remake the work world according to their own needs-ultimately benefiting women and men.
