Basic Psychoanalytic Concepts on the Libido Theory - Humberto Nagera 1969

The libido theory is one of the major areas of interest in psychoanalysis. Freud's insights in this field have been widely applied and used by psychoanalysts, adult and child psychiatrists, psychologists, educationalists, experts on child development and social workers. They have thrown light on the normal and abnormal aspects of sexual development from childhood to adulthood and on the role played by sexual development in neurotic disturbances. Further they have made possible an understanding of the complex field of sexual perversions. Originally published in 1969, in this volume the reader will find twenty-four basic psychoanalytic concepts concerning the libido theory including oral erotism, anal erotism, phallic erotism, genital erotism, the Oedipus complex of the girl, the Oedipus complex of the boy, autoerotism, narcissism, masochism, sadism and bisexuality. As in the other volumes in this series, the historical development of each concept and references to Freud's works are clearly given so that students and scholars can pursue any aspect of special interest.

Ace - Angela Chen 2020-09-15

An engaging exploration of what it means to be asexual in a world that's obsessed with sexual attraction, and what the ace perspective can teach all of us about desire and identity. What exactly is sexual attraction and what is it like to go through life not experiencing it? What does asexuality reveal about gender roles, about romance and consent, and the pressures of society? This accessible examination of asexuality shows that the issues that aces face—confusion around sexual activity, the intersection of sexuality and identity, navigating different needs in relationships—are the same conflicts that nearly all of us will experience. Through a blend of reporting, cultural criticism, and memoir, Ace addresses the misconceptions around the “A” of LGBTQIA and invites everyone to rethink pleasure and intimacy. Journalist Angela Chen creates her path to understanding her own asexuality with the perspectives of a diverse group of asexual people. Vulnerable and honest, these stories include a woman who had blood tests done because she was convinced that “not wanting sex” was a sign of serious illness, and a man who grew up in a religious household and did everything “right,” only to realize after marriage that his experience of sexuality had never been the same as that of others. Disabled aces, aces of color, gender-nonconforming aces, and aces who both do and don't want romantic relationships all share their experiences navigating a society in which a lack of sexual attraction is considered abnormal. Chen's careful cultural analysis explores how societal norms limit understanding of sex and relationships and celebrates the breadth of sexuality and queerness.

Peak Libido - Dominic Pettman 2020-09-29

What is the carbon footprint of your libido? In this highly original book, Dominic Pettman examines the mutual influence and impact of human desire and ecological crisis. His account is premised on a simple but startling observation: the decline of libido among the world's population, the loss of the human sex drive, closely tracks the destruction of environments worldwide. The advent of the Anthropocene leads to the decline of eros, the weakening of the link between sexual pleasure and human reproduction, and thus, potentially, to human extinction. Our capacity to care for one another in any meaningful way is being replaced by a restless, technologically-enhanced zombie drive. The environmental crisis of our time is also, and simultaneously, a crisis of human reproduction and of interpersonal intimacy. What Freud called 'libidinal economy' has morphed into libidinal ecology. Drawing on the work of a wide range of thinkers from Georges Bataille to Donna Haraway, Pettman explores the implications of peak libido, linking this development to the new cultural interest in eco-sexuality, polyamory, and other cases of the 'greening of the libido'. Peak Libido is a forceful reminder that our hearts and loins are primarily ecological organs, beholden to their wider environments, and, as such, they share the same fate.

Sex Drives - Laura Frost 2018-08-06

Salvador Dalí's autobiography confesses that "Hitler turned me on in the highest," while Sylvia Plath maintains that "every woman adores a Fascist." Susan Sontag's famous observation that art reveals the seamier side of fascism in bondage, discipline, and sexual deviance would certainly appear to be true in modernist and postwar literary texts. How do we account for eroticized representations of fascism in anti-fascist literature, for sexual desire that escapes the bounds of politics? Laura Frost advances a compelling reading of works by D. H. Lawrence, Virginia Woolf, Jean Genet, Georges Bataille, Marguerite Duras, and Sylvia Plath, paying special attention to undercurrents of enthrallment with tyrants, uniforms, and domination. She argues that the first generation of writers raised within psychoanalytic discourse found in fascism the libidinal unconscious through which to fantasize acts—including sadomasochism and homosexuality—not permitted in a democratic conception of sexuality without power relations. By delineating democracy's investment in a sexually transgressive fascism, an investment that persists to this day, Frost demonstrates how politics enters into fantasy. This provocative and closely-argued book offers

both a fresh contribution to modernist literature and a theorization of fantasy.

Perfectly Normal - Sandra Pertot 2005

Challenging current assumptions about sex in our society, a noted sex therapist shows women how to start living and loving with genuine pleasure regardless of where they fall on the libido meter How strong does a woman's sex drive have to be to be considered 'normal'? Is realistic (but not real) sex in the movies, in the magazines and just about everywhere else setting standards no couple can live up to? At various points in their lives one woman in every three will rate herself as lacking any interest in sex. Exposing unrealistic expectations in the modern world, Sandra Pertot reassures women who fear that diminished desire means there is something terribly wrong with them or their relationships. It makes no sense, she insists, to label low libido as sexual dysfunction when the numbers suggest it is 'perfectly normal'. Her thought-provoking and helpful book points the way to a new view of relationship sex and shows that living with low libido does not mean living without good loving.

Come As You Are: Revised and Updated - Emily Nagoski 2021-03-02

A revised and updated edition of Emily Nagoski's game-changing New York Times bestseller *Come As You Are*, featuring new information and research on mindfulness, desire, and pleasure that will radically transform your sex life. For much of the 20th and 21st centuries, women's sexuality was an uncharted territory in science, studied far less frequently—and far less seriously—than its male counterpart. That is, until Emily Nagoski's *Come As You Are*, which used groundbreaking science and research to prove that the most important factor in creating and sustaining a sex life filled with confidence and joy is not what the parts are or how they're organized but how you feel about them. In the years since the book's initial publication, countless women have learned through Nagoski's accessible and informative guide that things like stress, mood, trust, and body image are not peripheral factors in a woman's sexual wellbeing; they are central to it—and that even if you don't always feel like it, you are already sexually whole by just being yourself. This revised and updated edition continues that mission with new information and advanced research, demystifying and decoding the science of sex so that everyone can create a better sex life and discover more pleasure than you ever thought possible.

Sex Drive - Bella Ellwood-Clayton 2012-03-01

When it comes to women's priorities, is sex on top? Lack of libido is women's most common sexual problem and once in a secure relationship, women's sex drive begins to plummet. Exploring what our libido is and why it is being depleted, sexual anthropologist Dr Bella Ellwood-Clayton argues that women don't want sex because they don't feel sexy. At a time when women's libidos are being threatened by the wider forces of media, marketing and medication and our increasingly pressured lives, who can blame them? With increasing numbers of women with low libido being diagnosed as 'sexually dysfunctional', the race to create a 'pink Viagra' is on. But do we have unrealistic expectations about our sex drive? Who defines what is normal and abnormal? And could 'low libido' in fact be the natural order of things? Provocative, authoritative and engaging, *Sex Drive: In pursuit of female desire* is both fascinating reading and a book that is creating passionate debate.
