**Sexual behaviour, debut and identity among Swedish**

**Schoolchildren - Åsa A.Kastbom 2015-12-02**

Background: Sexual behaviour among schoolchildren and adolescents is a sparsely researched area and there are delicate methodological

obstacles and ethical concerns when conducting such research. Still it is a subject that engages both parents and professionals. A sexualized behaviour or an early sexual debut (younger than 14 years) can be a sign of sexual abuse. It is therefore of importance to describe what is common and what is uncommon sexual behaviour among children and what the consequences of an early or a late sexual debut may be for the individual upon reaching late adolescence. Adolescents who identify themselves as lesbian, gay or bisexual (LGB) are also a group that needs further attention and research since they are often described as having a lower quality of life and more often experience child abuse than heterosexual teens. Aims: The research leading to this thesis had four goals: 1) to elucidate the sexual behaviour of children between the ages of 7 and 13 as observed by their parents, 2) to investigate the relationship between an early sexual debut (before 14 years of age) and socio-demographic data, sexual experience, health, experience of child abuse and behaviour at 18-years-of-age, 3) to explore associations with no sexual debut (no oral, vaginal or anal sex) at the age of 18, and 4) to describe the relationship between sexual identification and socio-demographic background data, sexual behaviour, health and health behaviour, experiences of child sexual and/or physical abuse and present behaviour among Swedish adolescents. Methods: The parents of 418 children answered questionnaires about their child's behaviour, both general and sexual, and a sample of 3432 Swedish high school students completed a survey about sexuality, health and abuse at the age of 18. In addition, 362 members of the Swedish Federation for Lesbian, Gay, Bisexual and Transgender Rights (RFSL) completed the same survey at a mean age of 21.4 years. Results: Most of the sexual behaviours among the schoolchildren were common, and in part related to, or varied with, age and gender. A small number of sexual behaviours often referred to as sexualised or problematic behaviours (for example, kissing adults with the tongue, imitating intercourse, masturbating in public, and touching other children's genitals with the mouth) were found to be very unusual or not reported by any parent in this normative group of Swedish children. Among the adolescents, an early debut (younger than 14 years

of age) correlated positively with number of partners, experience of oral and anal sex, smoking, drug and alcohol use and antisocial behaviour, such as being violent, lying, stealing and running away from home. Girls with an early sexual debut had significantly more experience of sexual abuse while boys with an early sexual debut were more likely to have a weak sense of coherence, low self-esteem and poor mental health, together with experience of sexual abuse, selling sex and physical abuse. A multiple logistic regression model showed that a number of antisocial acts and health behaviours remained significant, but early sexual debut did not increase the risk of psychiatric symptoms, low self-esteem or low sense of coherence at 18-years-of-age. Just under a quarter (24.6%) of the 3,380 adolescents had not had their sexual debut (no oral, anal or vaginal sex by the age of 18). There was a positive correlation between not debuting sexually at age 18 and a number of factors such as: being more likely to have caring fathers; parents born outside Europe; low sexual desire; lower pornography consumption; lower alcohol and tobacco consumption; less antisocial behavior and fewer experiences of sexual abuse than 18 year olds who had already made their sexual debut. Adolescents with a minority sexual identity more often described their relationship with their parents as based on low care and high overprotection than did their heterosexual peers. The minority adolescents used alcohol and drugs to a significantly higher degree than the heterosexual adolescents. Multivariate analysis showed a positive correlation between a minority sexual identity and experience of anal sex, higher sexual lust, experience of sexual abuse, physical abuse and sexual exploitation. It was more than twice as common to have experience of penetrating sexual abuse and physical abuse with a sexual minority identity. Conclusions: Behaviours usually referred to as sexualised and problematic are uncommon among children at 7-13 years of age. Professionals should give a child showing a sexualised behaviour special attention and investigate the reasons for the behaviour. Early sexual debut seems to be associated with problematic behaviours during later adolescence, indicating the fact that the early debut for some children is associated with an increased vulnerability,

which has to be addressed. Family socio-demographics such as family stability and/or cultural status matter when it comes to time of sexual debut. Personality also seems to matter and further studies are needed to investigate if there is any correlation between personality traits and late sexual debut. Adolescents with no sexual debut at 18 years of age reported fewer antisocial acts, were less likely to smoke and drink alcohol, had less sexual desire and less experience of sexual abuse. Young people with a sexual minority identity (homo- and bisexual) could be seen to have a lower quality of life compared to heterosexual peers and studies need to be done to further explore possible reasons. They have a higher risk of having experience of sexual and physical abuse compared to heterosexual adolescents. Professionals need to be more aware of this group's additional vulnerability including the increased risk of child abuse and offer different forms of support.

**An Insider's View of Sexual Science Since Kinsey** - Ira L. Reiss 2006

Ira Reiss presents to those interested in the work of sexual science a view of this field. The text provides a personal account of the author's experiences in sexual science that helps the reader understand many of the major issues that confront those in sexual science.

*Cultural Conflict and the Swedish Sexual Myth* - Sven-Axel Mansson 1993-07-13

During the past fifty years immigrants from 160 nations have transformed Sweden from an ethnically relatively homogeneous society into an intensely multi-ethnic one. By the beginning of the 1990s, more than one million out of a population of eight and a half million were immigrants or children of immigrants. By the early 1990s some ten percent of the Swedish population are foreign born. This change in Swedish life and culture results in considerable tension and misunderstandings. Perhaps, Mansson would contend, in no area is this more evident than in love relationships. In this book he sets out to explore different aspects of the encounter between immigrant males and Swedish sexual and cohabitation culture, and to analyze this encounter in relationship to the important elements in the cultural patterns and processes that have shaped and still shape immigrant male's gender-role

specific socialization. In a world increasingly confronted with similar tensions and adaptations, this study is of considerable interests to sociologists and others concerned with contemporary multicultural society.

**Loneliness and Its Opposite** - Don Kulick 2015-03-13

Few people these days would oppose making the public realm of space, social services and jobs accessible to women and men with disabilities. But what about access to the private realm of desire and sexuality? How can one also facilitate access to that, in ways that respect the integrity of disabled adults, and also of those people who work with and care for them? Loneliness and Its Opposite documents how two countries generally imagined to be progressive engage with these questions in very different ways. Denmark and Sweden are both liberal welfare states, but they diverge dramatically when it comes to sexuality and disability. In Denmark, the erotic lives of people with disabilities are acknowledged and facilitated. In Sweden, they are denied and blocked. Why do these differences exist, and how do both facilitation and hindrance play out in practice? Loneliness and Its Opposite charts complex boundaries between private and public, love and sex, work and intimacy, and affection and abuse. It shows how providing disabled adults with access to sexual lives is not just crucial for a life with dignity. It is an issue of fundamental social justice with far reaching consequences for everyone.

**Sinners and Citizens** - Jens Rydström 2003-11-15

Sinners and Citizens explores how sexual habits changed in Sweden during its development from an agrarian society into a modern welfare state. Jens Rydström examines the history of homosexuality and bestiality in that country to consider why these sexual practices have been so closely linked in virtually all Western societies. He limns sharply the distinctive experience of rural life, showing that to regularly witness farm animals stirred passions and sparked ideas, especially among young farmhands. Based on medical journals, psychiatric reports, and court records from the period, as well as testimonies from men in diaries, letters, and interviews, Sinners and Citizens reveals that bestiality was once a dreaded crime in Sweden. But in time, mention of the practice

disappeared completely from legal and medical debates. This, Rydström contends, is because models of penetrative sodomy shifted from bestiality to homosexuality as Sweden transformed from a rural society into a more urban one. As the nation's economy and culture became less identified with the countryside, so too did its idea of deviant sexual behavior.

*Intimacy in Later Life* - Kate M. Davidson

To love and be loved is arguably one of the most powerful and fundamental driving forces sustaining self-esteem and self-identity throughout the lifecourse. Need for reciprocal loving does not change as we grow older, despite failures of health, loss of a partner, late divorce, and alterations of personality due to the aging process. However, most studies of human sexuality have ignored the problems and developing patterns of older adults entering into new partnerships. To fill this gap, *Intimacy in Later Life* brings together a wide range of distinguished international scholars to address this neglected research area.

This volume explores how older people today think and behave in relation to partner change. Contributors consider the choices and constraints that influence decisions about new romantic relationships after divorce or the death of a spouse, along with how these differ with respect to age, gender, and culture. The authors discuss the considerable social variety to be found between "permissive" and morally conservative societies and cultural milieux, as well as how standards of sexual behavior have changed over time. Contributions include: Kate Davidson and Graham Fennell, "New Intimate Relationships in Later Life," Sofie Ghaanfareon Karlsson and Klas Borell, "Intimacy and Autonomy, Gender and Ageing: Living Apart Together," Deborah Carr and Rebecca Ut, "Late-Life Widowhood in the United States: New Directions in Research and Theory," Nan Stevens, "Re-Engaging: New Partnerships in Late-Life Widowhood," Kate Davidson, "Gender Differences in New Partnership Choices and Constraints for Older Widows and Widowers," Jenny De Jong Gierveld, "The Dilemma of Repartnering: Considerations of Older Men and Women Entering New Intimate Relationships in Later Life," Deborah K. Van Den Hoonaard, "Attitudes of Older Widows and Widowers in New

Brunswick, Canada Towards New Partnerships," Aldine J. Moore and Dorothy C. Stratton, "The 'Current Woman' in an Older Widower's Life," and Kalyani K. Mehta, "Perceptions of Remarriage by Widowed People in Singapore." Kate Davidson is lecturer in the Department of Sociology, University of Surrey, UK, and is co-director of the Centre for Research on Ageing and Gender. Graham Fennell is professor of sociology and social policy in the School of Business and Social Sciences, Roehampton University of Surrey, UK and European editor of *Ageing International*.

**LIFE** - 1969-08-15

LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.

*Cultural Conflict and the Swedish Sexual Myth* - Sven-Axel Mansson  
1993-07-13

During the past fifty years immigrants from 160 nations have transformed Sweden from an ethnically relatively homogeneous society into an intensely multi-ethnic one. By the beginning of the 1990s, more than one million out of a population of eight and a half million were immigrants or children of immigrants. By the early 1990s some ten percent of the Swedish population are foreign born. This change in Swedish life and culture results in considerable tension and misunderstandings. Perhaps, Mansson would contend, in no area is this more evident than in love relationships. In this book he sets out to explore different aspects of the encounter between immigrant males and Swedish sexual and cohabitation culture, and to analyze this encounter in relationship to the important elements in the cultural patterns and processes that have shaped and still shape immigrant male's gender-role specific socialization. In a world increasingly confronted with similar tensions and adaptations, this study is of considerable interest to sociologists and others concerned with contemporary multicultural society.

*Too Hot to Handle* - Jonathan Zimmerman 2016-09-13

The first comprehensive history of sex education around the world *Too Hot to Handle* is the first truly international history of sex education. As Jonathan Zimmerman shows, the controversial subject began in the West and spread steadily around the world over the past century. As people crossed borders, however, they joined hands to block sex education from most of their classrooms. Examining key players who supported and opposed the sex education movement, Zimmerman takes a close look at one of the most debated and divisive hallmarks of modern schooling. In the early 1900s, the United States pioneered sex education to protect citizens from venereal disease. But the American approach came under fire after World War II from European countries, which valued individual rights and pleasures over social goals and outcomes. In the so-called Third World, sex education developed in response to the deadly crisis of HIV/AIDS. By the early 2000s, nearly every country in the world addressed sex in its official school curriculum. Still, Zimmerman demonstrates that sex education never won a sustained foothold: parents and religious leaders rejected the subject as an intrusion on their authority, while teachers and principals worried that it would undermine their own tenuous powers. Despite the overall liberalization of sexual attitudes, opposition to sex education increased as the century unfolded. Into the present, it remains a subject without a home. *Too Hot to Handle* presents the stormy development and dilemmas of school-based sex education in the modern world.

[Sexual Life in Sweden](#) - Hans L. Zetterberg

A review of sexual behaviour in Sweden. Sponsored by the Royal Commission on Sexual Education, it uses a randomly-selected adult population sample, with a 92 per cent response rate. It explores the evolution of western sexual behaviour in the light of controversies about sexual education.

**Incest in Sweden, 1680-1940** - Bonnie Clementsson 2020-08-18

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. In early modern Sweden, if a man and his deceased wife's sister were found guilty of engaging in sexual intercourse they would be sentenced to death by beheading.

Today the same relationship is not even illegal. Covering the period 1680-1940, this book analyses both incest crimes and applications for dispensation to marry, revealing the norms underpinning Swedish society's shifting attitudes to incestuous relations and comparing them with developments in other European countries. It demonstrates that, even though the debate on incest has been dominated by religious, moral and - in due course - medical notions, the values that actually determined the outcome of incest cases were frequently of quite a different character.

**Pornography** - Max Waltman 2021

Supply, demand, and production harms -- Harm caused by consumers -- Democracy and hierarchy -- The antipornography civil rights ordinances, 1983-1991 -- Federal responses, 1984-2014 -- Legislative attempts, 1983-1988 -- Judicial challenges, 1982-2019 -- Challenging production, 1993-2005 -- Substantive equality prostitution law, 1999-2019.

**Sexual Life in Sweden** - Hans Lennart Zetterberg 2002

Now available in English for the first time, *Sexual Life in Sweden* is a classic piece of sex research by one of Sweden's most distinguished social scientists. Sponsored by the Royal Commission on Sex Education more than thirty years ago, it remains the only study of sexual behavior in a randomly selected adult population sample ever funded by a government. Because an astonishing response rate was achieved (91 percent) during the course of Zetterberg's research, the claim that Sweden is one of the few countries where generalizations about national sexual behavior can be made may be stated with confidence. Zetterberg's study matches the gender of interviewers to that of subjects. From a theoretical perspective, Zetterberg analyzes the change in Sweden from a "restrictive" to a "contraceptive" society. The study makes it clear that, with over 1,000 acts of intercourse for every live birth, 90 percent of sexual activity between consenting adults in modern Sweden does not result simply for procreation. Nevertheless, the research yields a picture of a highly responsible society. Zetterberg explores the emergence of two powerful new norms: "when having sex, you must use contraception,"

and "when in an existing sexual relationship, you must not start another one." He also examines the issue of abortion as part of a concept of social justice. The author compares the behavior of those who experience an unwanted pregnancy with those who do not, and explains that abortion is seen by Swedes as part of the provision of the welfare and social justice system. Included is an examination of the sexual behavior of young people-the age of their first sexual experience, the circumstances surrounding it, whether positive parental involvement in their children's lives has any influence on their sexual conduct, and sex education programs in the schools. This translation of Zetterberg's study has been prepared by British sociologist Graham Fennell, who also authored a new introduction positioning Zetterberg's work in the history of sex research and comparing its findings with contemporary studies in Scandinavia, Western Europe, and North America. In light of the ongoing controversies about sex education, its conclusions remain relevant to policy discussions today.

[Sexually harassed at work: An overview of the research in the Nordic countries](#) - Svensson, Malin 2020-06-30

Online publication: <https://pub.norden.org/temanord2020-521/> Abstract [en] Sexual harassment is a major social problem in working life in the Nordic countries, which the Me Too movement of autumn 2017 demonstrated in particular. This research overview has been compiled on behalf of the Nordic Council of Ministers for Gender Equality with the purpose to provide an account of current knowledge about sexual harassment in the workplace in the Nordic countries and to identify the knowledge gaps to form the basis for a Nordic research initiative. The work is based on a survey of the research into the various ways in which sexual harassment is expressed in people's working lives based on occupations of varying nature, in professional situations, in peer relations, and in meetings with customers, patients and clients. The overview is based on a systematic review of the research and other relevant literature from the Nordic countries between the years 2014-2019.

*Sweden* - Irene Scobbie 1972

**Population Crisis** - United States. Congress. Senate. Committee on Government Operations. Subcommittee on Foreign Aid Expenditures 1966

**Sex in Sweden** - Bo Lewin 2000

**Equality for Same-Sex Couples** - Yuval Merin 2010-02-15

During the past three decades, nations all over the world have been debating whether to allow same-sex couples to marry, or at least grant these couples various rights associated with marriage. In *Equality for Same-Sex Couples*, Yuval Merin presents the first comparative study of the legal regulation of same-sex partnerships worldwide, as well as a unique survey of the status of same-sex couples in Europe. Merin begins by providing a historical overview of the transformation of marriage from antiquity to the present. He then identifies and critically compares four principal models for the legal regulation and recognition of same-sex partnerships: civil marriage, registered partnership, domestic partnership, and cohabitation. Merin concludes that all of the models except civil marriage discriminate against gays and lesbians just as the "separate but equal" doctrine discriminated against African Americans; thus, so-called alternatives to marriage, even if they provide the same rights and benefits as marriage, are inherently unequal and therefore unconstitutional.
