**Bassoon Reed Making** Christin Schillinger 2015-12-14 Withheld by leading pedagogues in an effort to control competition, the art of reed making in the early 20th century has been shrouded in secrecy, producing a generation of performers without reed making fluency. While tenets of past decades remain in modern pedagogy, Christin Schillinger details the historical pedagogical trends of bassoon reed making to examine the impact different methods have had on the practice of reed making and performance today. Schillinger traces the pedagogy of reed making from the earliest known publication addressing bassoon pedagogy in 1687 through the publication of Julius Weissenborn's *Praktische Fagott-Schule* and concludes with an in-depth look at contemporary methodologies developed by Louis Skinner, Don Christlieb, Norman Herzberg, and Lewis Hugh Cooper. Aimed at practitioners and pedagogues of the bassoon, this book provides a deeper understanding of the history and technique surrounding reed-making craft and instruction.

**The God of Small Things** Arundhati Roy 2017-06-13 Still, to say that it all began when Sophie Mol came to Ayemenem is only one way of looking at it . . . It could be argued that it actually began thousands of years ago. Long before the Marxists came. Before the British took Malabar, before the Dutch Ascendancy, before Vasco da Gama arrived, before the Zamorin’s conquest of Calicut. Before Christianity arrived in a boat and seeped into Kerala like tea from a teabag. That it really began in the days when the Love Laws were made. The laws that lay down who should be loved, and how. And how much.

**Edible Insects** Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

**A Master's Guide to Building a Bamboo Fly Rod** Everett E. Garrison 2016-05-31 Learn the science and art of creating a one-of-a-kind bamboo fly rod. Fly fishing has a long and storied history. While many flyfishermen will find and purchase their favorite fly rod, there are those who desire to go a step further. For those discerning flyfishermen and women, simply buying a rod is not enough—they must build one. And just as fly fishing is an art, so is the creation of the bamboo fly rod. Many people believe that the best-feeling rods, particularly for trout fishing, are made from bamboo, and today’s bamboo rod-making tradition is particularly indebted to one man: Everett E. Garrison. Using principles he learned as an engineering student, Garrison created an exacting method of building rod—a method that for decades was a well-kept secret. These techniques are presented to the reader in *A Master’s Guide to Building a Bamboo Fly Rod*, a classic volume written by Hoagy B. Carmichael to honor and maintain Garrison’s legacy. Completely illustrated with

black-and-white drawings and over three hundred and sixty black-and-white photographs, along with copious notes on the mathematical and engineering principles that underlie Garrison's unique rod-making technique, this book will guide you through each step of creating a classic bamboo fly rod. Skyhorse Publishing is proud to publish a broad range of books for fishermen. Our books for anglers include titles that focus on fly fishing, bait fishing, fly-casting, spin casting, deep sea fishing, and surf fishing. Our books offer both practical advice on tackle, techniques, knots, and more, as well as lyrical prose on fishing for bass, trout, salmon, crappie, baitfish, catfish, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

**Tools for Thought** Howard Rheingold 2000-04-13 In a highly engaging style, Rheingold tells the story of what he calls the patriarchs, pioneers, and infonauts of the computer, focusing in particular on such pioneers as J. C. R. Licklider, Doug Engelbart, Bob Taylor, and Alan Kay. The digital revolution did not begin with the teenage millionaires of Silicon Valley, claims Howard Rheingold, but with such early intellectual giants as Charles Babbage, George Boole, and John von Neumann. In a highly engaging style, Rheingold tells the story of what he calls the patriarchs, pioneers, and infonauts of the computer, focusing in particular on such pioneers as J. C. R. Licklider, Doug Engelbart, Bob Taylor, and Alan Kay. Taking the reader step by step from nineteenth-century mathematics to contemporary computing, he introduces a fascinating collection of eccentrics, mavericks, geniuses, and visionaries. The book was originally published in 1985, and Rheingold's attempt to envision computing in the 1990s turns out to have been remarkably prescient. This edition contains an afterword, in which Rheingold interviews some of the pioneers discussed in the book. As an exercise in what he calls "retrospective futurism," Rheingold also looks back at how he looked forward.

It seeks to contribute towards achieving the goal of establishing international responsibility for the ethical collection, preservation, dissemination and application of fishers' knowledge.

**The Book of Bamboo** David Farrelly 1984 Bamboo's amazing versatility, strength, and beauty have given it a larger role in human culture than any other plant. Both sustainable and plentiful, it has been used for millennia to make objects ranging from clothing and housing to more exotic luxuries like phonograph needles and children's toys, to name but a few. This acclaimed sourcebook--part history, part illustrated catalog, part cultivation guide--details the myriad uses of bamboo, along with an immense bounty of information and lore on how to grow, maintain, and harvest this extraordinary plant; how to use it in craft and construction projects, including floors, fences, papers, and play equipment; and bamboo's place in the literary, visual, and musical arts. An encyclopedic roster of more than 1,200 bamboo species is a book in itself, as is author David Farrelly's A-to-Z catalog of artifacts made from bamboo: acupuncture needles, blowguns, bridges, kites, ships, violins, windmills, and a thousand other things. Strong, flexible, and beautiful in both its natural and finished states, bamboo is an abundant resource that could beneficially replace many less sustainable materials currently in use, and continue to transform our culture in the process.

*Rural Structures in the Tropics* Geoffrey C. Mrema 2011-01-01 "This book is an effort by FAO to compile an up-to-date, comprehensive text on rural structures and services in the tropics, focusing on structures for small- to medium-scale farms and, to some extent, village-scale agricultural infrastructure. The earlier edition, entitled *Farm structures in tropical climates: a textbook for structural engineering and design*, published in 1986, has been used for over two decades as a standard textbook for teaching undergraduate and postgraduate courses on rural structures and services in universities throughout sub-Saharan Africa. This second edition will help to improve teaching - at all educational levels - on the subject of rural buildings in developing countries in the tropics and it will assist professionals currently engaged in providing technical advice on rural structures and services, from either agricultural extension departments or non-governmental rural development organizations. This book will also provide technical guidance in the context of disaster recovery and rehabilitation, for rebuilding the sound rural structures and related services that are key to development and economic sustainability. While this book is intended primarily for teaching university - and college-level agricultural engineering students about rural structures and services, resources might be made available to produced textbooks based on this material for teaching at other educational levels. Although parts of the background material relate specifically to East and Southeast Africa, the book's principles apply to the whole of tropical Africa, Latin America and South Asia because, while building traditions may vary, the available materials are similar."--Back cover.

**Handcrafting Bamboo Fly Rods** Wayne Cattanach 2005-11-01 The bamboo fly rod still represents the pinnacle of the fly-fishing art; its apparent simplicity and delicacy belie the craftsmanship and strength that are the hallmarks of all great rods. A growing number of people have tried to learn the art of making bamboo rods from a shrinking number of secretive craftsmen. The revised and expanded *Handcrafting Bamboo Fly Rods* is the definitive reference for beginners and experts alike. Wayne Cattanach begins by explaining the qualities that distinguish bamboo from all other materials: It has a tensile strength akin to steel, yet it is very light. He describes the process that will take anyone from lengths of hard, raw bamboo to a beautiful finished rod with clear, step-by-step instructions and illustrations, including how to find the best supplies; select tools and materials; make heat treaters and binders; cut culms; straighten bamboo strips; plane and stagger strips; bind strips; apply finishes; mount the reel seat, ferrules, and tip-top; and much more. This is surely the most thorough book available for those who wish to make and fish their own bamboo fly rods.

*Resources of the Southern Fields and Forests, Medical, Economical, and Agricultural* Francis Peyre Porcher 1863

*The Lovely Reed* Jack Howell 1998 Once considered relics doomed by modern materials, bamboo fly rods are enjoying a renaissance. Culled from conversations with respected rod builders and his own considerable experience building bamboo rods, Jack Howell provides a lively, step-by-step book on how to build one's own bamboo fly rod. Through humor and reflection, he encourages an attitude of devotion to an angling tradition. Bamboo rods feel great; in addition to carrying all the aesthetic advantages of an object lovingly handcrafted from natural materials, they more vividly transfer every physical sensation of fly-fishing: the cast, the strike,

the fight. Indeed, bamboo rod making reaffirms fly fishing's genteel underpinnings as it recalls the romance, folklore, and literature of the sport. Experienced rod builders will find new insights into time-honored techniques. For the beginner, this book demystifies the complexities of the craft, making bamboo rod building accessible and enjoyable. Comprehensive chapters instruct on the best bamboo for fly rods, treating and caring for bamboo cane prior to construction, essential tools and materials, bamboo preparation, rod design, care for the rod, and selecting a reel seat. Over 150 photos illustrate each step and complement the book's accessible approach to a complex craft. A book by an enthusiast for enthusiasts, readers will find bamboo rod building an engrossing occupation for the hands and an escape for the mind.

Everything I Never Told You Celeste Ng 2014-08-14 'There is much here that might impress Pulitzer and Man Booker judges...Ng brilliantly depicts the destruction that parents can inflict on their children and on each other' Mark Lawson, Guardian Lydia is the favourite child of Marilyn and James Lee; a girl who inherited her mother's bright blue eyes and her father's jet-black hair. Her parents are determined that Lydia will fulfill the dreams they were unable to pursue - in Marilyn's case that her daughter become a doctor rather than a homemaker, in James's case that Lydia be popular at school, a girl with a busy social life and the centre of every party. But Lydia is under pressures that have nothing to do with growing up in 1970s small town Ohio. Her father is an American born of first-generation Chinese immigrants, and his ethnicity, and hers, make them conspicuous in any setting. When Lydia's body is found in the local lake, James is consumed by guilt and sets out on a reckless path that may destroy his marriage. Marilyn, devastated and vengeful, is determined to make someone accountable, no matter what the cost. Lydia's older brother, Nathan, is convinced that local bad boy Jack is somehow involved. But it's the youngest in the family - Hannah - who observes far more than anyone realises and who may be the only one who knows what really happened. And if you loved *Everything I Never Told You*, don't miss Celeste Ng's second novel *Little Fires Everywhere* What readers are saying: 'Devastating...A truly tragic but devastatingly well written book' 'Ng is a true craftsman. I implore you to read this. Also my favourite ending of a novel so far this year' 'This is the best book I have read this year' 'Really enjoyed this book, deeply moving, sad and thought provoking'
