

The Mystery Of Sex In Racial Progression

The Subject of Race in American Science Fiction Sharon DeGraw 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars, racial identity is a key element of the subjectivity constructed in American SF. In his Mars series, Edgar Rice Burroughs primarily supported essentialist constructions of racial identity, but also included a few elements of racial egalitarianism. Writing in the 1930s, George S. Schuyler revised Burroughs' normative SF triangle of white author, white audience, and white protagonist and promoted an individualistic, highly variable concept of race instead. While both Burroughs and Schuyler wrote SF focusing on racial identity, the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored. Beginning in the 1960s, Samuel R. Delany more fully joined SF and African American literature. Delany expands on Schuyler's racial constructionist approach to identity, including gender and sexuality in addition to race. Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature. Connecting the popular fiction of Burroughs, the controversial career of Schuyler, and the postmodern texts of Delany illuminates a gradual change from a stable, essentialist construction of racial identity at the turn of the century to the variable, social construction of poststructuralist subjectivity today.

Progress and Its Discontents Gabriel A. Almond 2023-11-10 Events of the past two decades have challenged many of the fundamental beliefs, institutions, and values of modern western culture--the culture of "progress." Are science and technology really progressive and beneficial? Have they led to the enhancement of welfare, greater happiness, and moral improvement? Is the continued growth of material productivity possible? Desirable? Are the institutions of progress viable? Progress and Its Discontents assembles the views on progress of some of America's leading humanists, scientists, and social scientists. Citing disappointed expectations of progress in spheres from science to morals and politics, and the many problems created or left untouched by progress, the editors conclude that the term no longer refers to "an inevitable sequence of improvements" but rather to "an aspiration and compelling obligation." Divine Feminine Joy Dixon 2003-05-01 Honorable Mention for the Wallace K. Ferguson Prize from the Canadian Historical Association Chosen by Choice Magazine as an Outstanding Academic Title of 2003 In 1891, newspapers all over the world carried reports of the death of H. P. Blavatsky, the mysterious Russian woman who was the spiritual founder of the Theosophical Society. With the help of the equally mysterious Mahatmas who were her teachers, Blavatsky claimed to have brought the "ancient wisdom of the East" to the rescue of a materialistic West. In England, Blavatsky's earliest followers were mostly men, but a generation later the Theosophical Society was dominated by women, and theosophy had become a crucial part of feminist political culture. *Divine Feminine* is the first full-length study of the relationship between alternative or esoteric spirituality and the feminist movement in England. Historian Joy Dixon examines the Theosophical Society's claims that women and the East were the repositories of spiritual forces which English men had forfeited in their scramble for material and imperial power. Theosophists produced arguments that became key tools in many feminist campaigns. Many women of the Theosophical Society became suffragists to promote the spiritualizing of politics, attempting to create a political role for women as a way to "sacralize the public sphere." Dixon also shows that theosophy provides much of the framework and the vocabulary for today's New Age movement. Many of the assumptions about class, race, and gender which marked the emergence of esoteric religions at the end of the nineteenth century continue to shape alternative spiritualities today.

Sex Segregation in Sports Adrienne N. Milner 2016-02-12 Why isn't segregation based on sex illegal in sports just as race segregation is? This book examines this issue, arguing that "separate but equal" is neither achievable nor constitutional. The authors present both legal and social arguments for the elimination of sports-related sex segregation. They examine how sex and race are social constructions and considers their connected plights.

The Physiology of Sexist and Racist Oppression Shannon Sullivan 2015 This book argues that gender and race are physiologically constituted through the biopsychosocial effects of sexism and racism. Sullivan skillfully combines feminist and critical philosophy of race with the biological and health sciences to provide new strategies for fighting male and white privilege.

Constitutional Context Kathleen S. Sullivan 2007-04-23 This provocative reassessment of the 19th century American women's movement calls into question its attack on common law traditions. While the United States was founded on principles of freedom and equality, its legal traditions are based in British common law. In the nineteenth-century, women's rights advocates argued that this led to a contradiction: common law rules concerning property and the status of married women were at odds with the nation's principles. Conventional wisdom suggests that this tactic was successful. But in *Constitutional Context*, historian Kathleen S. Sullivan offers a fresh perspective. In revisiting the era's congressional debates, state legislation, judicial opinions, news accounts, and work of political activists, Sullivan finds that the argument for universal, abstract rights was not the only—or even the best—path available for social change. Rather than establishing a new paradigm of absolute rights, the women's movement unwittingly undermined common law's ability to redress grievances. This contributed to the social, cultural, and political stagnation that characterizes the movement today. A challenging and thoughtful study of what is commonly thought of as an era of progress, *Constitutional Context* provides the groundwork for a more comprehensive understanding and interpretation of constitutional law.

Medicine in Quotations Edward J. Huth 2006 Who was the first to write about a certain disease, diagnose it, and treat it? This book answers those questions for a wide range of diseases, from Abetalipoproteinemia to Zollinger-Ellison syndrome. What were the medical practitioners of previous generations hoping to achieve? What were their patients expecting of them? The answers are found in these quotations. Containing over 3,000 entries, and now updated with more than 450 new quotations, this new edition of "Medicine in Quotations" is the most comprehensive collection of its type published in over 30 years. It is much more than a random collection of famous sayings relating to sickness and health, disease and treatment; it is a portrait of medicine throughout recorded history. You will discover how medical concepts and practices have developed and shifted through the millennia, and how many illnesses recognized today were first identified a thousand or more years ago. Quotations are organized by topic, and each is fully referenced, allowing curious readers to return to the original source. Subject and author indices make it easy to find quotations of interest. "Medicine in Quotations" is an invaluable resource for writers, speakers, and all those interested in the history of medicine.

Life and Love Margaret Warner Morley 2014-01 An excerpt from the INTRODUCTION: IN all ages of the world, among all peoples, the same question, What is life? has been asked, and has never been answered. To-day we are all eagerly asking it. The great men of science accumulate observations about it, but cannot satisfy us. The poet and the philosopher give us the inspiring and consoling reply that life, somehow, is a part of a Divine Life, manifested. But aside from this thought of the poet, we seem to ourselves to come nearest to some understanding of this mystery when we speak the great companion, word "love," — love, the great continuer of life. It is in itself a mystery nearly as deep as the mystery of life; its high office is that of drawing together, uniting, perfecting, renewing, — the same power working in the single cell, in the complex structure, and — with what a sublime difference — in the human being! Human love has been the poetic theme of man from the beginning, the one imperishable theme, the theme appealing most powerfully to the imagination and the heart, promising solution to the hard problems of life, and offering consolation and satisfaction to the yearning soul. Man is ever looking towards the ideal love to lift and save him; the universal reproductive instinct seems to him to promise continuance and progress to his spirit as well as to his body. The primitive form of love, the root from which all love has grown, is the reproductive instinct, the instinct that attracts one sex to the other for the purpose of re-creation. From this germinal love has grown and blossomed that altruistic love which finally distinguishes man from all other earthly life. The understanding of human love in all its manifestations, physical and spiritual, is necessary to the well-being of the world. To understand the universality of the reproductive instinct in all the life of the earth, to understand the meaning and power of the sex-instinct, the grandeur of the sex-idea, and the immense beauty of its manifestations, — is necessary to the understanding of human love, and is the immediate duty of our day. To understand love in all its aspects, to know it in its beauty, its greatness, and its power, and to free it from all ideas of grossness and evil is the instant duty, as it is the best hope of our race. Consciously to relate love to the great cosmic forces which we see everywhere operating throughout nature, to withdraw it from the realm of shame and superstition it has so long inhabited, to depose the sensual usurper which has been worshipped in the name of love, and to set Love herself upon the throne, fair, luminous, and pure to save and bless, is the effort of multitudes of minds in the present day. The following pages are not an attempt to add to the wealth of discovery made by science in the present remarkable era; they are intended solely to place within reach of the ordinary reader truths as a rule so encased in technical phraseology that many people,

desirous of knowing the mysteries of the living being, so far as these have been revealed by modern research, cannot get at the facts because of lack of time or inclination to become familiar with the technical forms of expression.

Goodnight, Beautiful Women Anna Noyes 2016-06-07 Interconnected stories of women of all ages. "If the fiction of Stephen King and Alice Munro had a literary love child, it might look like this" (The Washington Post). Moving along the Maine coast and beyond, the stories in *Goodnight, Beautiful Women* bring us into the sultry, mysterious inner lives of New England women and girls as they navigate the dangers and struggles of their outer worlds. With novelistic breadth and a quicksilver emotional intelligence, Noyes explores the ruptures and vicissitudes of growing up and growing old, and shines a light on our most uncomfortable impulses while masterfully charting the depths of our murky desires. A woman watches her husband throw—one by one—their earthly possessions into the local quarry, before vanishing himself; two girls from very different social classes find themselves deep in the throes of a punishing affair; a motherless teenager is sexually awakened in the aftermath of a local trauma; and a woman's guilt from a childhood lie about her intellectually disabled cousin reverberates into her married years. Dark and brilliant, rhythmic and lucid, *Goodnight, Beautiful Women* marks the arrival of a fearless and unique new young voice in American fiction. "Anna Noyes's stunning debut collection concerns girls and women struggling to break away, dealing with burdens like mental illness and neglect that threaten to transform and define them." —The Wall Street Journal, "The Season's Most Exciting Fiction Reads"

Mystery of Mysteries Lucyle T Werkmeister Professor of Philosophy and Director of the Program in the History and Philosophy of Science Michael Ruse 2009-06-01 With the recent Sokal hoax--the publication of a prominent physicist's pseudo-article in a leading journal of cultural studies--the status of science moved sharply from debate to dispute. Is science objective, a disinterested reflection of reality, as Karl Popper and his followers believed? Or is it subjective, a social construction, as Thomas Kuhn and his students maintained? Into the fray comes "Mystery of Mysteries," an enlightening inquiry into the nature of science, using evolutionary theory as a case study. Michael Ruse begins with such colorful luminaries as Erasmus Darwin (grandfather of Charles) and Julian Huxley (brother of novelist Aldous and grandson of T. H. Huxley, "Darwin's bulldog") and ends with the work of the English game theorist Geoffrey Parker--a microevolutionist who made his mark studying the mating strategies of dung flies--and the American paleontologist Jack Sepkoski, whose computer-generated models reconstruct mass extinctions and other macro events in life's history. Along the way Ruse considers two great popularizers of evolution, Richard Dawkins and Stephen Jay Gould, as well as two leaders in the field of evolutionary studies, Richard Lewontin and Edward O. Wilson, paying close attention to these figures' cultural commitments: Gould's transplanted Germanic idealism, Dawkins's male-dominated Oxbridge circle, Lewontin's Jewish background, and Wilson's southern childhood. Ruse explicates the role of metaphor and metavalues in evolutionary thought and draws significant conclusions about the cultural impregnation of science. Identifying strengths and weaknesses on both sides of the "science wars," he demonstrates that a resolution of the objective and subjective debate is nonetheless possible.

Stamped from the Beginning Ibram X. Kendi 2017-07-06 *Stamped from the Beginning* is a redefining history of anti-Black racist ideas that dramatically changes our understanding of the causes and extent of racist thinking itself. ** Winner of the US National Book Award** Its deeply researched and fast-moving narrative chronicles the journey of racist ideas from fifteenth-century Europe to present-day America through the lives of five major intellectuals - Puritan minister Cotton Mather, President Thomas Jefferson, fiery abolitionist William Lloyd Garrison, brilliant scholar W.E.B. Du Bois, and legendary anti-prison activist Angela Davis - showing how these ideas were developed, disseminated and eventually enshrined in American society. Contrary to popular conception, it reveals that racist ideas did not arise from ignorance or hatred. Instead, they were devised and honed by some of the most brilliant minds of each era, including anti-slavery and pro-civil rights advocates, who used their gifts and intelligence wittingly or otherwise to rationalize and justify existing racial disparities in everything from wealth to health. Seen in this piercing new light, racist ideas are shown to be the result, not the cause, of inequalities that stretch back over centuries, brought about ultimately through economic, political and cultural self-interest. *Stamped from the Beginning* offers compelling new answers to some of the most troubling questions of our time. In forcing us to reconsider our most basic assumptions about racism and also about ourselves, it leads us to a true understanding on which to build a real foundation for change. **INCLUDED IN BARACK OBAMA'S BLACK HISTORY MONTH READING LIST**

Fighting Modern Evils that Destroy Our Homes Frederick Scott Miller 1913

Introduction to Sex Gilad James, PhD The concept of sex has been a topic of interest and discussion for centuries. It is defined as a biological process that enables living organisms to reproduce by combining genetic material from two individuals. Sexual reproduction involves the transfer of genetic material from a male gamete, such as sperm, to a female gamete, such as an egg. This process can occur through various means, including sexual intercourse, artificial insemination, and in vitro fertilization. Sex is not only a biological process, but it also has social and cultural implications. Societies throughout history have placed various taboos and restrictions on sexual behavior, and the concept of sex has been subjected to moral scrutiny. Additionally, gender identity and sexual orientation are significant factors in sexual behavior and identity. Gender identity refers to one's sense of being male or female, while sexual orientation refers to the gender(s) to which a person is attracted. Together, these factors shape individual experiences of sex and sexuality, highlighting the complex interplay between biological, social, and cultural factors.
