A Magazine of Her Own? Margaret Beetham 2003-09-02 Like the corset, the women's magazines which emerged in the nineteenth century produced a 'natural' idea of femininity: the domestic wife; the fashionable woman; the romancing and desirable girl. Their legacy, from agony aunts to fashion plates, are easily traced in their modern counterparts. But do these magazines and their promises empower or disempower their readers? *A Magazine of Her Own?* is a lively and revealing exploration of this immensely popular form from its beginnings. In fascinating detail Margaret Beetham investigates the desires, images and interpretations of femininity posed by a medium whose readership was and still is almost exclusively female. *A Magazine of Her Own* is at once a chronological tracing of the history, a collection of intriguing case studies and an intervention into recent debates about gender and sexuality in popular reading. It is a book which anyone who is interested in the unique, influential world of the woman's magazine - students, scholars and general readers alike - will want to read

Cutting to the Core David Benatar 2006 When the benefits of surgery do not outweigh the harms or where they do not clearly do so, surgical interventions become morally contested. *Cutting to the Core* examines a number of such surgeries, including infant male circumcision and cutting the genitals of female children, the separation of conjoined twins, surgical sex assignment of intersex children and the surgical re-assignment of transsexuals, limb and face transplantation, cosmetic surgery, and placebo surgery.

Female Entrepreneurs in the Long Nineteenth Century Jennifer Aston 2020-07-29 "This volume challenges those who see gender inequalities invariably defining and constraining the lives of women. But it also broadens the conversation about the degree to which business is a gender-blind institution, owned and managed by entrepreneurs whose gender identities shape and reflect economic and cultural change." - Mary A. Yeager, Professor Emerita, University of California, Los Angeles This is the first book to consider nineteenth-century businesswomen from a global perspective, moving beyond European and trans-Atlantic frameworks to include many other corners of the world. The women in these pages, who made money and business decisions for themselves rather than as employees, ran a wide variety of enterprises, from micro-businesses in the 'grey market' to large factories with international reach. They included publicans and farmers, midwives and property developers, milliners and plumbers, pirates and shopkeepers. Female Entrepreneurs in the Long Nineteenth Century: A Global Perspective rejects the notion that nineteenth-century

women were restricted to the home. Despite a variety of legal and structural restrictions, they found ways to make important but largely unrecognised contributions to economies around the world - many in business. Their impact on the economy and the economy's impact on them challenge gender historians to think more about business and business historians to think more about gender and create a global history that is inclusive of multiple perspectives. How Women can make money, married or single, in all branches of the arts and sciences, professions, etc. [With illustrations.] Virginia Penny 1870

The Ties That Buy Ellen Hartigan-O'Connor 2012-02 In 1770, tavernkeeper Abigail Stoneman called in her debts by flourishing a handful of playing cards before the Rhode Island Court of Common Pleas. Scrawled on the cards were the IOUs of drinkers whose links to Stoneman testified to women's paradoxical place in the urban economy of the late eighteenth and early nineteenth centuries. Stoneman did traditional women's work—boarding, feeding, cleaning, and selling alcohol—but her customers, like her creditors, underscore her connections to an expansive commercial society. These connections are central to *The Ties That Buy*. Historian Ellen Hartigan-O'Connor traces the lives of urban women in early America to reveal how they used the ties of residence, work, credit, and money to shape consumer culture at a time when the politics of the marketplace was gaining national significance. Covering the period 1750-1820, the book analyzes how women such as Stoneman used and were used by shifting forms of credit and cash in an economy transitioning between neighborly exchanges and investment-oriented transactions. In this world, commerce reached into every part of life. At the hearths of multifamily homes, renters, lodgers, and recent acquaintances lived together and struck financial deals for survival. Landladies,

enslaved washerwomen, shopkeepers, and hucksters sustained themselves by serving the mobile population. A new economic practice in America—shopping—mobilized hierarchical and friendly relationships into wide-ranging consumer networks that depended on these same market connections. Rhetoric emerging after the Revolution downplayed the significance of expanding female economic life in the interest of stabilizing the political order. But women were quintessential market participants, with fluid occupational identities, cross-class social and economic connections, and a firm investment in cash and commercial goods for power and meaning.

Women Who Made the News Marjory Lang 1999-08-26 The first newspaperwomen were employed to attract female subscribers and advertising revenue. Once hired, they found themselves confined to a narrow range of specialties that catered to conventionally defined women's interests - home-making, fashion, and high society - and most were patronized by their male peers. But these women journalists did more than simply deliver female consumers to advertisers. Some of them eventually made names for themselves as commercial reporters or political and even war correspondents. By making news about women for women, they created a distinctly female culture within the newspaper, chronicling the increasing participation of women in public affairs. *Women Who Made the News* is the story of the women who helped raise Canadian women's collective awareness of each other and of their achievements in the period leading up to World War II.

Capital Intentions Edith Sparks 2011-12-01 Late nineteenth-century San Francisco was an ethnically diverse but male-dominated society bustling from a rowdy gold rush, earthquakes, and explosive economic growth. Within this booming marketplace, some women stepped beyond their roles as wives, caregivers, and homemakers to start businesses that combined family concerns with money-making activities. Edith Sparks traces the experiences of these women entrepreneurs, exploring who they were, why they started businesses, how they attracted customers and managed finances, and how they dealt with failure. Using a unique sample of bankruptcy records, credit reports, advertisements, city directories, census reports, and other sources, Sparks argues that women were competitive, economic actors, strategizing how best to capitalize on their skills in the marketplace. Their boardinghouses, restaurants, saloons, beauty shops, laundries, and clothing stores dotted the city's landscape. By the early twentieth century, however, technological advances, new preferences for name-brand goods, and competition from large-scale retailers constricted opportunities for women entrepreneurs at the same time that new opportunities for women with families drew them into other occupations. Sparks's analysis demonstrates that these businesswomen were intimately tied to the fortunes of the city over its first seventy years.

Male and Female in Social Life Lloyd E. Sandelands Sex is a theoretical puzzle because it is much older than we are. A primary fact of biology, sex has defined society from nearly the beginning of life on earth, and as a result we cannot see its effects in our lives in evolutionary comparisons with near primate or mammalian relatives. Sex is a puzzle, too, because it is often misconstrued in social science. It is not, as many social scientists believe, a mere feature of a person, like hair or skin color. Rather it is a part played in the life of the species. This propensity to view sex as a personal feature has kept social science from seeing how sex figures in the social life of the species. *Male and Female in Social Life* presents a theoretical framework to describe how sex (the division of our species between male and female) brings life and order to society. It argues that sex is the mainspring of social life and it tells us the most about social dynamics and forms. The book centers on five chapters that describe four "moments" of human social life. Following an introduction, chapter 2

begins with the first moment of social life-unity of the species. Chapter 3 examines the second moment of social life-division of the species. Chapter 4, citing play of the sexes as the third moment, shows that sex is the main play of the species and thereby the main basis of social life. Chapters 5 and 6 describe the fourth moment-order of the species, which includes the most basic arrangements of human society, including female mate choice, male contest, female care of the young, sorority and fraternity, family and bureaucratic organization. These later chapters present a three-part theory of social order based on the play of the sexes, while then offering evidence in support of this theory by showing how disruptions and distortions in the play of the sexes in the recent history of the United States have brought compensating changes in social life. The book concludes with a summary of the book's main points and with directions for further inquiry. The volume raises thoughtful, long overdue questions about current trends in our culture that minimize or efface sex differences. It will be of interest to academics both in the social sciences and in the humanities while at the same time appealing to a more general audience. Lloyd E. Sandelands is professor at the University of Michigan in the Department of Psychology and in the school of business administration. He is author of *Feeling and Form in Social Life* as well as several articles in the areas of social psychology, sociology, organization studies, and philosophy.

Stuck Marc Sommers 2012 Young people are transforming the global landscape. As the human population today is younger and more urban than ever before, prospects for achieving adulthood dwindle while urban migration soars. Devastated by genocide, hailed as a spectacular success, and critiqued for its human rights record, the Central African nation of Rwanda provides a compelling setting for grasping new challenges to the world's youth. Spotlighting failed masculinity, urban desperation, and forceful governance, Marc Sommers tells the dramatic story of young Rwandans who are "stuck," striving against near-impossible odds to become adults. In Rwandan culture, female youth must wait, often in vain, for male youth to build a house before they can marry. Only then can male and female youth gain acceptance as adults. However, Rwanda's severe housing crisis means that most male youth are on a treadmill toward failure, unable to build their house yet having no choice but to try. What follows is too often tragic. Rural youth face a future as failed adults, while many who migrate to the capital fail to secure a stable life and turn fatalistic about contracting HIV/AIDS. Featuring insightful interviews with youth, adults, and government officials, Stuck tells the story of an ambitious, controlling government trying to govern an exceptionally young and poor

One Thousand Ways to Make a Living; or, An Encyclopædia of Plans to Make Money Harold Morse Dunphy 2022-07-21 This is not a "get-rich-quick" book. It is a work to teach people how to get a livelihood. Of course, a great many people who commence in business through reading this book, and adopting one or more of the plans, will naturally push ahead and accumulate wealth. That, however, is not the object of the book. The author maintains, as all decent citizens must believe, that every soul on this planet has a right to a decent existence. But it grieves him to see so many people, young and old, foot-sick, walking about looking for a "job," which employers of labor are unable to

Gospel women or focusing on a single theme, Richard Bauckham studies in great depth both the individual women who appear in the Gospels and the specific passages in which they appear. This unique approach reveals that there is much more to be known about such women than previous studies have assumed. Employing historical and literary readings of the biblical texts, Bauckham successfully captures the particularity of each woman he studies. An opening look at the Old Testament book of Ruth introduces the possibilities of reading Scripture from a woman's perspective. Other studies examine the women found in Matthew's genealogies, the prophet Anna, Mary of Clopas, Joanna, Salome, and the women featured in the Gospel resurrection narrative. A number of these women have never been the subject of deep theological enquiry. Unlike most recent books, Bauckham's work is not dominated by a feminist agenda. It does not presume in advance that the Gospel texts support patriarchal oppression, but it does venture some of the new and surprising possibilities that arise when the texts are read from the perspective of their female characters. Astute, sensitive to issues of gender, and written by one of today's leading theologians, *Gospel Women* will be of interest to a wide range of readers.

Creating the Fictional Female Detective Carla T. Kungl 2006-05-02 This study examines a number of previously overlooked or undervalued women detective fiction writers of the late 19th and early 20th centuries and traces their relationship to later women writers who shaped the future of the genre: Dorothy Sayers, Agatha Christie, and Gladys Mitchell. This work argues that their use of the female detective character served as a means through which they were able to establish their professional authority in the detective fiction genre. Women writers employed a variety of narrative strategies to explore the tensions between society's underlying domestic ideology and women's entrance into the work force during this time period. Creating female detectives and employing

these narrative strategies helped women writers establish professional authority by providing them with ways of expressing their ability to write in this genre and adapting it as a vehicle for women's writing. The study examines the critical importance of early female detectives. Many critics and editors have dismissed these early detectives as conventional and trite, ignoring the genre's rich variety. Yet female fictional detectives appear as both paid professionals and gifted amateurs; single, married, widowed; older spinsters and young adventurers; detecting for pleasure and to clear their own or a loved one's name. In choosing to create female detectives who were both varied and unusual, women writers confronted some of their own literary anxieties and ultimately were able to explore the ways they would create new routes to women's authority within a male-dominated culture and specifically in the genre of detective fiction.

Men, Women, and Money David R. Green 2011-04-28 The late nineteenth and early twentieth centuries witnessed significant developments in the structure, organization, and expansion of financial markets and opportunities for investment in Britain and its empire. But very little is known about how men and women engaged with these markets and with new opportunities for money-making. In what ways did the composition of personal fortunes alter in response to these developments? How did individuals make use of new financial opportunities to further their own priorities and ensure their families' well-being? What choices of securities did they make, and how did these reflect their attitudes to investment risk? What were the implications of a rapidly growing investor population for corporate governance and the regulation of markets? How significant is gender in understanding new patterns of wealth holding and investment? This interdisciplinary book brings together a range of leading international scholars to answer these questions and to develop important new research agendas. Foremost among these is a concern for gender, with several of the chapters exploring the growing importance of women within investment markets. These findings open up dialogues between economic and financial historians with social, gender, and feminist historians, and add a significant new dimension to existing research on women's economic agency. The volume also breaks fresh ground by analysing aspects of wealth holding and finance in British colonial settings: Canada and Australia. Understanding the extent to which global financial processes shaped the economic lives of those on the 'periphery' as well as at the 'heart' of empire will offer new insights into the social and geographical diffusion of financial markets.
