[Media-Mediated Relationships](#) -
Frank Hoffmann 2023-07-28
Creating a nexus between
techno-science and more
fundamental disciplines, a
phenomenon is emerging in
our personal lives: we are
beginning to preempt
traditional sources for
relationship formation; we are
becoming more insular and
more cautious in starting
relationships. The media play
an enormous role in our
activities, encouraging us to
self-advertise in newspapers
and magazines, to participate
vicariously through
pornographic and borderline
books, talk radio, and tabloid
television, to use our
telephones and computers for

the ultimate in “safe sex,” to engage in video dating, and to explore many other aspects in the field of technoeroticism. As straight and gay people alike live in a time of reluctant commitments, a period of playtime, and the Age of AIDS, the time has come to chronicle the role of mass communication in our search for interpersonal connections. Media-Mediated Relationships investigates the historical, economic, psychological, and sociocultural ramifications of the print and broadcast media, motion pictures, music, and new communications technologies (computers, video, interactive media, virtual reality, phone sex) in terms of both our individual and societal concerns. An extension of “cultivation analysis” by means of systems theory, it reports on a baseline survey of over 200 people regarding relationship mediation--demonstrating yet one more example of the symbiosis among and between various media sources. A descriptive case study, Media-

Mediated Relationships provides a barometer for better understanding the many “singles” and others searching for meaning and relationships in the sociocultural milieu of the 1990s and beyond.

Shrinking Violets and Caspar Milquetoasts -

Patricia McDaniel 2003-11
Since World War II Americans' attitudes towards shyness have changed. The women's movement and the sexual revolution raised questions about communication, self-expression, intimacy, and personality, leading to new concerns about shyness. At the

same time, the growth of psychotherapy and the mental health industry brought shyness to the attention of professionals who began to regard it as an illness in need of a cure. But what is shyness? How is it related to gender, race, and class identities? And what does its stigmatization say about our culture? In *Shrinking Violets* and *Caspar Milquetoasts*, Patricia McDaniel tells the story of shyness. Using popular self-

help books and magazine articles she shows how prevailing attitudes toward shyness frequently work to disempower women. She draws on evidence as diverse as 1950s views of shyness as a womanly virtue to contemporary views of shyness as a barrier to intimacy to highlight how cultural standards governing shyness reproduce and maintain power differences between and among women and men.
