Meeting Your Match Online Tamsen Butler 2009 Recent studies show that more than 20 million people will visit at least one online dating service a month. Internet dating has several advantages, among them the ability to discover everything about a potential partner before ever meeting them. You can learn their age, religious affiliations, education, expectations, interests, hobbies, and so on. Internet dating allows you to chat online and get to know someone before meeting them. There is also the ability to meet people on a varied schedule you do not have to meet them face-to-face right away. Other advantages include protection of your personal identity, the exchange of photos, the ability to be yourself, less cost, and the ability to search by sexual or ethnic preference, all of which will increase the chances of finding that special someone. Aside from the many advantages, online dating has disadvantages as well. For example, you could be starting an online relationship with someone who, in actuality, does not look like they do in their photos or their personality is not as they described, it might have to be a long distance relationship, or they have a hidden criminal agenda. This is why you need the assistance of this groundbreaking new book that covers it all, allowing you to find the right partner and make your online dates safe and secure. The book features
