News Framing Effects Sophie Lecheler, Claes H. de Vreese, 2018-09-03 News Framing Effects is a guide to framing effects theory one of the most prominent theories in media and communication science Rooted in both psychology and sociology framing effects theory describes the ability of news media to influence people's attitudes and behaviors by subtle changes to how they report on an issue The book gives expert commentary on this complex theoretical notion alongside practical instruction on how to apply it to research The book's structure mirrors the steps a scholar might take to design a framing study The first chapter establishes a working definition of news framing effects theory The following chapters focus on how to identify the independent variable i.e. the news frame and the dependent variable i.e. the framing effect The book then considers the potential limits or enhancements of the proposed effects i.e. the moderators and how framing effects might emerge i.e. the mediators Finally it asks how strong these effects are likely to be The final chapter considers news framing research in the light of a rapidly and fundamentally changing news and information market in which technologies platforms and changing consumption patterns are forcing assumptions at the core of framing effects theory to be re-evaluated

Perspectives on Framing Gideon Keren, 2011-02-11 Language comprises a major mark of humans compared with other primates and is the main vehicle for social interaction. A major characteristic of any natural language is that the same communication idea or intention can be articulated in different ways; in other words, the same message can be framed differently. The same medical treatment can be portrayed in terms of chance of success or chance of failure; energy reduction can be expressed in terms of savings per day or savings per year; and a task can be described as 80% completed or 20% uncompleted. In this book, contributors from a variety of disciplines—psychology, linguistics, marketing, political science, and medical decision making—come together to better understand the mechanisms underlying framing effects and assess their impact on the communication process.

Framing Matters William Anthony Donohue, Randall G. Rogan, Sandra Kaufman, 2011 The framing metaphor is commonly used in negotiation and communication research to characterize how individuals place interpretive and linguistic boundaries around phenomena, objects, or events. This book develops this construct, exploring its potential to provide research insights and illustrating new strategies for further development. Divided into three sections, the book first captures the breadth of the theoretical framing construct, then focuses on the many ways in which the construct has been researched and applied. The final section reflects on the construct's potential and its value in understanding negotiation. An inspiring group of contributors, all experts in framing theory and conflict negotiation management, outline how the framing construct is viewed theoretically by research scholars and in the field by conflict resolution practitioners.

Doing News Framing Analysis II Paul D'Angelo, 2018-05-11 This volume presents original big picture perspectives on news framing. Each chapter in this volume will feature an individual or team of framing analysts who take a reflective look at their own empirical work. The editors' goals are to identify the influences that determine the use of different theoretical and methodological approaches and to provide interpretive guides to news framing scholars regarding what news frames are, how they can be observed in news texts, and how framing effects are uncovered and substantiated in cultural group and individual sites. *Doing News Framing Analysis II* will continue the work of its predecessor by giving talented framing scholars the space to write about their work and bring readers closer to the framing research project. Chapter 9 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

The Oxford Handbook of Political Communication Kate Kenski, Kathleen Hall Jamieson, 2017 The Oxford Handbook of Political Communication provides contexts for viewing the field, examines political discourse, media, and interpersonal and small group political communication, and considers political communication's evolution inside the altered political communication landscape. Agendas for future research and innovation are presented.

Framing in Discourse Deborah Tannen, 1993 The concept of framing has been pivotal in research on social interaction among anthropologists, sociologists, psychologists, and linguists. This collection shows how the discourse analysis of frames can be applied to a range of social contexts. Tannen provides a seminal theoretical framework for conceptualizing the relationship between frames and schemas, as well as a methodology for the discourse analysis of framing in interaction. Each chapter makes a unique theoretical contribution to frames theory while showing how discourse analysis can elucidate the linguistic means by which framing is accomplished in a particular interactional setting. Applied to such a wide range of contexts as a medical examination, psychotic discourse, gender differences in sermon performance, boys sportscasting their own play, teasing among friends, a comparison of Japanese and American discussion groups, and sociolinguistic interviews, the discourse analysis of framing emerges here as a fruitful new avenue for interaction analysis.

The Art of Framing Gail T. Fairhurst, Robert A. Sarr, 1996-01-26 Leadership doesn't just exist behind the podium. This thoughtful practical guide shows how the best leaders seize every opportunity from the dramatic to the mundane to manage meaning, gain support for their vision and spur action from their constituents.

Integrative Framing Analysis Viorela Dan, 2017-09-13 Much of framing scholarship focuses either exclusively on the analysis of words or of visuals. This book aims to address this gap by proposing a six-step approach to the analysis of verbal frames, visual frames, and the interplay between them: an integrative framing analysis. This approach is then demonstrated through a study investigating the way words and visuals are used to frame people living with HIV/AIDS in various communication contexts: the news, public service announcements, and special interest publications. This application of integrative framing analysis reveals differences between verbal frames and visual frames in the same messages, underscoring the importance of looking at these frames together.

Naming and Framing Viktor Smith, 2021-02-17 This book offers an innovative unified theoretical model for better understanding the processes underpinning naming and framing and the power that words exert over human minds. The volume integrates theoretical paradigms and empirical insights from across a broad array of research disciplines, several of which have not been combined before, and uses this foundation as a point of departure for introducing its four-layered model of distinct but connected levels of analysis. Bringing together insights from cognitive linguistics and psycholinguistics together with multimodal perspectives, Smith establishes new cross-disciplinary links, further integrating work from neighbouring fields such as marketing, health communication, and political communication that indicate paths for future research and implications for communicative ethics. This book will be of particular interest to students and scholars in multimodality, communication semiotics, cognitive psychology, and linguistics, as well as those in related disciplines such as marketing, political communication, and health communication.

Don't Think of an Elephant! George Lakoff, 2005 Don't Think of an Elephant is the antidote to decades of conservative strategising and the right's stranglehold on political dialogue. More specifically, it is the definitive handbook for understanding and communicating effectively about key social and political issues. George Lakoff explains in detail exactly how the right has managed to co-opt traditional values in order to popularise its political agenda. He also provides examples of how the centre-left can address the community's core values and re-frame political debate to establish a civil discourse that reinforces progressive positions. Don't Think of an Elephant provides a compelling linguistic analysis of political campaigning. But more importantly, it demonstrates that real political values and ideas must provide the foundation for political progress by the centre-left.

The Routledge Handbook of Environment and Communication Anders Hansen, Robert Cox, 2015-03-05 This Handbook provides a comprehensive statement and reference point for theory research and practice with regard to environment and communication and it does this from a perspective which is both international and multi disciplinary in scope Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication the chapters of this handbook together demonstrate the strengths of multi disciplinary and cross disciplinary approaches to understanding the centrality of communication to how the environment is constructed and indeed contested socially politically and culturally Organised in five thematic sections The Routledge Handbook of Environment and Communication includes contributions from internationally recognised leaders in the field The first section looks at the history and development of the discipline from a range of theoretical perspectives Section two considers the sources communicators and media professionals involved in producing environmental communication Section three examines research on news entertainment media and cultural representations of the environment The fourth section looks at the social and political implications of environmental communication with the final section discussing likely future trajectories for the field The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research this authoritative text is a must for scholars of environmental communication across a range of disciplines including environmental studies media and communication studies cultural studies and related disciplines

Framing and Perspectivising in Discourse Titus Ensink, Christoph Sauer, 2003-05-14 In discourse verbal messages are framed speakers offer cues on the basis of which hearers are able to anchor the verbal message to the context Furthermore speakers cannot contribute to the discourse without at the same time showing their view on the subject matter of the discourse the content of a discourse is necessarily displayed from a certain perspective Both the framing and perspectivising of verbal messages are not static but subject to possible changes during the development of the discourse Both concepts function at the intersection of a psychological cognitive and a social functional approach to discourse In this volume eight contributions are brought together which offer theoretical tools for describing and explaining framing and perspectivising devices in the production and comprehension of discourse and apply them to the analysis of several types of discourse such as political satire letters to the editor everyday narrations and newspaper reports

The Oxford Handbook of Cognitive Sociology Wayne H. Brekhus, Gabe Ignatow, 2019 In recent years there has been a growing interest in cognition within sociology and other social sciences Within sociology this interest cuts across various topical subfields including culture social psychology religion race and identity Scholars within the new subfield of cognitive sociology also referred to as the sociology of culture and cognition are contributing to a rapidly developing body of work on how mental and social phenomena are interrelated and often interdependent In The Oxford Handbook of Cognitive Sociology Wayne H Brekhus and Gabe Igantow have gathered some of the most influential scholars working in cognitive sociology to present an accessible introduction to key research areas in a diverse field While classical sociological and newer interdisciplinary approaches have been covered separately by scholars in the past this volume alternatively presents a broad range of cognitive sociological perspectives The contributors discuss a range of approaches for theorizing and analyzing the social mind including macro cultural approaches interactionist approaches and research that draws on Pierre Bourdieu s major concepts Each chapter further investigates a variety of cognitive processes within these three approaches such as attention and inattention perception automatic and deliberate cognition cognition and social action stereotypes categorization classification judgment symbolic boundaries meaning making metaphor embodied cognition morality and religion identity construction time sequencing and memory A comprehensive look at cognitive sociology s main contributions and the central debates within the field the Handbook will serve as a primary resource for social researchers faculty and students interested in how cognitive sociology can contribute to research within their substantive areas of focus

Winning with Words Brian F. Schaffner, Patrick J. Sellers, 2009-09-10 Today s politicians and political groups devote great attention and care to how their messages are conveyed From policy debates in Congress to advertising on the campaign trail they carefully choose which issues to emphasize and how to discuss them in the hope of affecting the opinions and evaluations of their target audience This groundbreaking text brings together prominent scholars from political science communication and psychology in a tightly focused analysis of both the origins and the real world impact of framing Across the chapters the authors discuss a broad range of contemporary issues from taxes and health care to abortion the death penalty and the teaching of evolution The chapters also illustrate the wide ranging relevance of framing for many different contexts in American politics including public opinion the news media election campaigns parties interest groups Congress the presidency and the judiciary
