Giselle and Beatrice - Benoit Feroumont 2017-06-21T00:00:00+02:00
Beatrice is stuck in a depressing office job: her hard work is overlooked, her paycheck's so small she's about to lose her apartment, and her boss won't give her a promotion unless she sleeps with him. But Beatrice just took a vacation to Africa, where she learned a very particular set of skills, both in and out of the bedroom. She's about to transform her boss's life in a way that he never saw coming. She'll get a maid to clean her dirty apartment. And maybe, in the process, Beatrice will finally find love . . .

The Life of August Wilhelm Schlegel, Cosmopolitan of Art and Poetry - Roger Paulin 2016-02-01

This is the first full-scale biography, in any language, of a towering figure in German and European Romanticism: August Wilhelm Schlegel whose life, 1767 to 1845, coincided with its inexorable rise. As poet, translator, critic and oriental scholar, Schlegel's extraordinarily diverse interests and writings left a vast intellectual legacy, making him a foundational figure in several branches of knowledge. He was one of the last thinkers in Europe able to practise as well as to theorise, and to attempt to comprehend the nature of culture without being forced to be a narrow specialist. With his brother Friedrich, for example, Schlegel edited the avant-garde Romantic periodical *Athenaeum*; and he produced with his wife Caroline a translation of Shakespeare, the first metrical version into any foreign language. Schlegel's Lectures on Dramatic Art and Literature were a defining force for Coleridge and for the French Romantics. But his interests extended to French, Italian, Spanish and Portuguese literature, as well to the Greek and Latin classics, and to Sanskrit. August Wilhelm Schlegel is the first attempt to engage with this totality, to combine an account of Schlegel's life and times with a critical evaluation of his work and its influence. Through the study of one man's rich life, incorporating the most recent scholarship, theoretical approaches, and archival resources, while remaining easily accessible to all readers, Paulin has recovered the intellectual climate of Romanticism in Germany and traced its development into a still-potent international movement. The extraordinarily wide scope and variety of Schlegel's activities have hitherto acted as a barrier to literary scholars, even in Germany. In Roger Paulin, whose career has given him the knowledge and the experience to grapple with such an ambitious project, Schlegel has at last found a worthy exponent.

Black Skin, White Masks - Frantz Fanon 2017

Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

Crescendo of the Virtuoso - Paul Metzner 2018-05-28

During the Age of Revolution, Paris came alive with wildly popular virtuoso performances. Whether the performers were musicians or chefs, chess players or detectives, these virtuosos transformed their technical skills into dramatic spectacles, presenting the marvelous and the outré for spellbound audiences. Who these characters were, how they attained their fame, and why Paris became the focal point of their activities is the subject of Paul Metzner's absorbing study. Covering the years 1775 to 1850, Metzner describes the careers of a handful of virtuosos: chess masters who played several games at once; a chef who sculpted hundreds of four-foot-tall architectural fantasies in sugar; the first police

detective, whose memoirs inspired the invention of the detective story; a violinist who played whole pieces on a single string. He examines these virtuosos as a group in the context of the society that was then the capital of Western civilization. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Politics of Piety - Saba Mahmood 2012

An analysis of Islamist cultural politics through the ethnography of a thriving, grassroots women's piety movement in the mosques of Cairo, Egypt. Unlike those organized Islamist activities that seek to seize or transform the state, this is a moral reform movement whose orthodox practices are commonly viewed as inconsequential to Egypt's political landscape. The author's exposition of these practices challenges this assumption by showing how the ethical and the political are linked within the context of such movements.

Distinction - Pierre Bourdieu 2013-04-15

Examines differences in taste between modern French classes, discusses the relationship between culture and politics, and outlines the strategies of pretension.

Globalizing Race - Dorian Bell 2018-04-15

Globalizing Race explores how intersections between French antisemitism and imperialism shaped the development of European racial thought. Ranging from the African misadventures of the antisemitic

Marquis de Morès to the Parisian novels and newspapers of late nineteenth-century professional antisemites, Dorian Bell argues that France's colonial expansion helped antisemitism take its modern, racializing form—and that, conversely, antisemitism influenced the elaboration of the imperial project itself. *Globalizing Race* radiates from France to place authors like Guy de Maupassant and Émile Zola into sustained relation with thinkers from across the ideological spectrum, including Hannah Arendt, Friedrich Nietzsche, Frantz Fanon, Karl Marx, Max Horkheimer, and Theodor Adorno. Engaging with what has been called the "spatial turn" in social theory, the book offers new tools for thinking about how racisms interact across space and time. Among these is what Bell calls racial scalarity. Race, Bell argues, did not just become globalized when European racism and antisemitism accompanied imperial penetration into the farthest reaches of the world. Rather, race became most thoroughly global as a method for constructing and negotiating the different scales (national, global, etc.) necessary for the development of imperial capitalism. As France, Europe, and the world confront a rising tide of Islamophobia, *Globalizing Race* also brings into fascinating focus how present-day French responses to Muslim antisemitism hark back to older, problematic modes of representing the European colonial periphery.

[Dark Ecology](#) - Timothy Morton 2016-04-12

Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. *Dark ecology* puts us in an uncanny position of radical

self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

Modern Peoplehood - John Lie 2011-04

"[A] most impressive achievement by an extraordinarily intelligent, courageous, and—that goes without saying—'well-read' mind. The scope of this work is enormous: it provides no less than a comprehensive, historically grounded theory of 'modern peoplehood,' which is Lie's felicitous umbrella term for everything that goes under the names 'race,' 'ethnicity,' and nationality." Christian Joppke, *American Journal of Sociology* "Lie's objective is to treat a series of large topics that he sees as related but that are usually treated separately: the social construction of identities, the origins and nature of modern nationalism, the explanation of genocide, and racism. These multiple themes are for him aspects of something he calls 'modern peoplehood.' His mode of demonstration is to review all the alternative explanations for each phenomenon, and to show why each successively is inadequate. His own theses are controversial but he makes a strong case for them. This book should renew debate." Immanuel Wallerstein, Yale University and author of *The Decline of American Power: The U.S. in a Chaotic World* *Scale, Space, and Canon in Ancient Literary Culture* - Reviel Netz 2020-02-20

A history of ancient literary culture told through the quantitative facts of canon, geography, and scale.
