**The History of US-Japan Relations** Makoto Iokibe 2017-03-15 Examining the 160 year relationship between America and Japan, this cutting edge collection considers the evolution of the relationship of these two nations which straddle the Pacific, from the first encounters in the 19th century to major international shifts in a post 9/11 world. It examines the emergence of Japan in the wake of the 1905 Russo-Japanese War and the development of U.S. policies toward East Asia at the turn of the century. It goes on to study the impact of World War One in Asia, the Washington Treaty System, the issue of Immigration Issue and the deterioration of US-Japan relations in the 1930s as Japan invaded Manchuria. It also reflects on the Pacific War and the Occupation of Japan, and the country's postwar Resurgence, democratization and economic recovery, as well as the maturing and the challenges facing the US Japan relationship as it progresses into the 21st century. This is a key read for those interested in the history of this important relationship as well as for scholars of diplomatic history and international relations.

*The Nature Fix: Why Nature Makes Us Happier, Healthier, and More Creative* Florence Williams 2017-02-07 "Highly informative and remarkably entertaining." —Elle From forest trails in Korea, to islands in Finland, to eucalyptus groves in California, Florence Williams investigates the science behind nature's positive effects on the brain. Delving into brand-new research, she uncovers the powers of the natural world to improve health, promote reflection and innovation, and strengthen our relationships. As our modern lives shift dramatically indoors, these ideas—and the answers they yield—are more urgent than ever.

**Flight Stability and Automatic Control** Robert C. Nelson 1998 The second edition of Flight Stability and Automatic Control presents an organized introduction to the useful and relevant topics necessary for a flight stability and controls course. Not only is this text presented at the appropriate mathematical level, it also features standard terminology and nomenclature, along with expanded coverage of classical control theory, autopilot designs, and modern control theory. Through the use of extensive examples, problems, and historical notes, author Robert Nelson develops a concise and vital text for aircraft flight stability and control or flight dynamics courses.

*Profitably Soaked* Henry David Thoreau 2003 A century of academic scholarship has left us with an incredibly dull and dry image of Thoreau as the moping detached intellectual or the reflective nature mystic. In this collection of quotations compiled from all of Thoreau's works and arranged under the headings Adventure, Joy, Contact, and Contemplation, editor Robert France counters this prevalent view through nothing less than resurrecting Thoreau—bringing him back to the life that he so fully lived. This work clearly demonstrates that Thoreau was very much the thirsting sensualist, using his body at every opportunity as the way in which to engage the world. And it was water, above all else, that served as the means for Thoreau's deepest immersion into nature.

*Waymarking Italy's Influence on the American Environmental Imagination While on Pilgrimage to Assisi* Robert Lawrence France 2020-09-10 Undertaking a peripatetic pilgrimage that is equal parts a daily description of a 200-kilometre walk from the wounded mountain of La Verna to the tortured river in Assisi, and an examination of the debt owed to Italy in terms of ecocultural and environmental scholarship, this book provides an innovative addition to the nascent field of ecocritical narrative scholarship. Through a process that has been referred to as “deep-travel” or “mind-walking,” the text fulsomely reviews how time spent in Italy influenced the writings of notable North American environmental historians, geographers, scientists, nature writers, landscape architects, and restoration theorists about the conception and manipulation of the natural world. This literary field study highlights how the phenomenological co-traversing of texts and trails can be a valued methodology for undertaking environmental criticism.

*Historical Painting Techniques, Materials, and Studio Practice* Arie Wallert 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

*Introduction to Watershed Development* Robert Lawrence France 2006 "Sprawl" - the spread of development from urban centers into the countryside - is recognized as one of the most serious threats to watershed functionality and health. *Introduction to Watershed Development: Understanding and Managing the Impacts of Sprawl* presents a logical framework to measure, minimize, and manage the problem of development. From the viewpoint of understanding the responses of watersheds to sprawl, this book addresses issues such as: how water bodies are linked to the land, what the horizon issues and problems are in watershed management, which surveying approaches can be used to monitor the change to watersheds, and how new, water-sensitive developments can be planned. Exploring what landscape architecture approaches can be used to mitigate the problems of development, *Introduction to Watershed Development* is Robert L. France's distinctive and extremely well-informed perspective on watershed management, culled from the author's many years of research, scholarship, consulting, and teaching. -- from back cover.

*Moral Repair* Margaret Urban Walker 2006-09-18 *Moral Repair* examines the ethics and moral psychology of responses to wrongdoing. Explaining the emotional bonds and normative expectations that keep human beings responsive to moral standards and responsible to each other, Margaret Urban Walker uses realistic examples of both personal betrayal and political violence to analyze how moral bonds are damaged by serious wrongs and what must be done to repair the damage. Focusing on victims of wrong, their right to validation, and their sense of justice, Walker presents a unified and detailed philosophical account of hope, trust, resentment, forgiveness, and making amends - the emotions and practices that sustain moral relations. *Moral Repair* joins a multidisciplinary literature concerned with transitional and restorative justice, reparations, and restoring individual dignity and mutual trust in the wake of serious wrongs.

**Making Eye Health a Population Health Imperative** National Academies of Sciences, Engineering, and Medicine 2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. *Making Eye Health a Population Health Imperative: Vision for Tomorrow* proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

*The Financial Crisis Inquiry Report* Financial Crisis Inquiry Commission 2011-05-01 The *Financial Crisis Inquiry Report*, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." **Environmental Restoration and Design for Recreation and Ecotourism** Robert L. France 2016-04-19 A wetland center in London, parks in downtown San Francisco, a wildlife sanctuary in Arcata, and a wetlands

park on the outskirts of Las Vegas—what do these urban and suburban locations have in common? They are leading examples of a new restoration design approach that is squarely placed at the interface of nature and culture. This multidisciplinary paradigm bridges the gap between an ecological approach preoccupied with returning damaged landscapes to an imagined original state and a landscape design approach concerned with creating a place for people to reinhabit. *Environmental Restoration and Design for Recreation and Ecotourism* is the first book to provide a detailed examination of the entire process of restoring damaged or abandoned landscapes to benefit both nature and people, specifically for the purposes of recreation and ecotourism. With a focus on history, planning, methodology, design, and construction, it explores five case studies of successful regenerative landscape design projects and gives readers an inside look at the evolution of design projects. Two of the cases offer a particularly comprehensive review of award-winning projects: the reparation of the degraded Las Vegas Wash into Clark County Wetlands Park and the transformation of the abandoned Barn Elms Reservoirs into the London Wetland Centre. Supported by extensive photographs, tables, maps, sketches, and schematics, these case studies trace how ideas are first conceived and then adopted, transformed, or even abandoned along the way. Each case study also includes a questions-and-answers discussion with designers and managers. Emphasizing the need for interdisciplinary cooperation, the book presents lessons learned from some of the most innovative projects in regenerative landscape design.

*Britain, France and the Decolonization of Africa* Andrew W.M. Smith 2017-03-01 Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power.

**Restorative Redevelopment of Devastated Ecocultural Landscapes** Robert L. France 2016-04-19 A fusion of ecological restoration and sustainable development, restorative redevelopment represents an emerging paradigm for remediating landscapes. Rather than merely fixing the broken bits and pieces of nature, restorative development advocates the reuse of devastated landscapes to improve the value and livability of a location for humans at the same time as effectively reinstating natural processes and functions. *Restorative Redevelopment of Devastated Ecocultural Landscapes* explores the use of this approach to address the long-term, sustainable reparation of the fabled marshlands of southern Iraq destroyed by Saddam Hussein, as well as numerous examples of other ecologically sensitive regions. Case studies presented include: Southern marshlands Iraq Hula swamp, Israel Azraq Oasis, Jordan Las Vegas Wash, USA Xochimilco, Mexico Pantanal, Brazil Clark County Wetlands Park, USA Tonle Sap, Cambodia Lake Titicaca, Peru Nature Reserves, Jordan The book reviews successfully-implemented and celebrated case studies from more than 15 countries around the world which, either in whole or in part, can offer valuable insight into the restorative development of the Iraqi marshlands as well as other devastated ecocultural landscapes. It presents practical approaches for sustaining the process of restoration efforts, both during and after the reparation work has been accomplished. The editor suggests solutions targeted for Iraq but that also have resonance in other regions devastated by conflict and natural disasters. He takes a synoptic or cross-system approach to problem solving when repairing large-scale landscapes that have been devastated by conflict or natural disasters such as tsunami-damaged Indonesia and earthquake-ravaged Haiti.

**Rewire Your Brain** John B. Arden 2010-03-22 How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: *Brain-Based Therapy-Adult*, *Brain-Based Therapy-Child*, *Improving Your Memory For Dummies* and *Heal Your Anxiety Workbook* Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, *Rewire Your Brain* will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.
