Sex Trafficking - Mary De Chesnay, PhD, RN, PMHCNS-BC, FAAN 2012-12-05

Awarded third place in the 2013 AJN Book of the Year Awards in the Community-Public Health category

"[A]n indispensable volume for nurse educators to use to help to inform new generations of nurses about

the topic of sex trafficking...What is striking about this book is its readability. It draws the reader into the chapters with its engaging scenarios and pertinent information... A highly readable guide to sex trafficking

for U.S. nurses and other health care professionals." -- Journal of Transcultural Nursing "This is a valuable resource for emergency departments everywhere! It is the gold standard for information about this topic."-- Doody's Medical Reviews "This excellent text puts forensic nurses in an excellent position to make an impact one of the 27 million people who are victims, just in the United States, of sex trafficking crimes. It is incumbent on the forensic community to take a stand and lead a charge in first learning about and then

putting into action a plan to give a voice to the victims, caring for them as our patients and developing a strategy to help end this crime. This book will help to create the awareness and passion that is needed to accomplish just that."--Forensic Nursing News The statistics are staggering: nearly 27 million people worldwide are currently victims of human trafficking, most frequently girls between the ages of 12 and 14. This is the first clinical guide to assessing and treating victims of sex trafficking, encompassing best practices and strategies for overcoming the severe barriers that this group presents. These barriers most notably include separating victims from their pimps/handlers who exert tight control over their lives, speech, and interactions with healthcare providers. At the heart of the book are consistently organized chapters addressing the major injuries, diseases and psychological traumas for which trafficked victims are likely to seek treatment. These chapters include a description of each condition, culturally based best practices for treatment, special considerations for male, female, and child victims, and expected outcomes. Citing the specialized circumstances of this population, the book discusses how to adapt current treatments to the special needs of these young victims. Additional features include case studies, short bullet points, and easy-to-follow recommendations. The book also discusses human trafficking as a global issue with particular attention to the United States. The guide describes the countrywide resources available for practitioners to learn about sex trafficking in the United States, focusing on Georgia as the only state to offer a comprehensive approach to sex trafficking and a model for the rest of the country. It also addresses health policy implications for practitioners and how to harness the support of law enforcement entities. Key Features: Provides best practices to date in a concise reference-style guide to medical and psychological assessment and treatment of sex trafficking victims Includes case studies and easy-to-follow practice recommendations Describes strategies on overcoming handlers' control over their victims Provides phone numbers and contact information by state or region regarding how to safely involve law enforcement

Everyday Law for Immigrants - Victor C. Romero 2015-12-03

Immigration is one of the most controversial topics of the decade. Citizens and pundits from across the political spectrum argue for major and disparate changes to American immigration law. Yet few know what American immigration law actually is and how it functions. *Everyday Law for Immigrants* is an ideal guide for U.S. citizens who want a better understanding of our immigration laws as well as for migrants who make the United States their home. Romero deftly and comprehensively explains the basic challenges immigrants and foreign nationals face not only within formal immigration policy but also within American domestic law generally, including rules promulgated by federal, state, and local entities that affect noncitizens. A concise and accessible primer for interested citizens, noncitizens, and their advocates, this book provides a bird's-eye view of U.S. immigration history, practice, and procedure, and constructively addresses the many legal issues in areas such as education, housing, and employment that affect foreigners who reside here. It includes easy-to-understand examples and an extensive appendix of print and Internet resources for further help.

Sex Trafficking, Human Rights, and Social Justice - Tiantian Zheng 2010-09-13

The recognition of women's human rights to migrate and work as sex workers is disregarded and dismissed by anti-trafficking discourses of rescue in the latest United Nation's definition of trafficking. This volume explores the life experiences, agency, and human rights of trafficked women in order to shed light on the complicated processes in which anti-trafficking, human rights and social justice are intersected. In these articles, the authors critically analyze not only the conflation of trafficking with sex work in international and national discourses and its effects on migrant women, but also the global anti-trafficking policy and the root causes for the undocumented migration and employment. Featuring case studies on eleven countries including the US, Iran, Denmark, Paris, Hong Kong, and south east Asia and offering perspectives from transnational migrant population, the contributors rearticulate the trafficking discourses away from the state control of immigration and the global policing of borders, and reassert the social justice and the needs, agency, and human rights of migrant and working communities. This book will be of interest to students and scholars of politics, gender studies, human rights, migration, sociology and anthropology.

Identifying Factors in Human Trafficking - Patrice M. Broderick 2005-07-23

This thesis reviews the transnational problem of human trafficking, a form of slavery. Women and children are trafficked within and between countries at an alarming rate and it has become a prime agenda for the

Bush Administration and the Department of State to call for action and solutions to. This thesis opens with a defining of this problem and overview of the scope of the problem on a global scale. It reviews social, political and economic factors which play a role. It describes laws enacted and police responses and describes what research has been conducted to get a grasp of what is involved and what might be done. This author decided to explore factors that other researchers have suggested are compelling factors in victimization. This research hypothesis for this thesis explores the economic factors. Comparisons are made between countries of origin where victims originate from and destination countries where they are trafficked to. The research findings reveal some significant differences in economic factors exist between the origin and destination countries. The findings lend support in why victims feel compelled to seek entrance to countries like the U.S. and Australia or U.K. and might be easy prey for traffickers. This author makes it clear that the research here does not mean that this is why they are victimized. Further research with victim surveys and victim interviews will be helpful. Furthermore, it will be valuable to conduct more exploration of the economic factors, but more accurate data sources are needed. It is recommended that countries attempt to establish more standardized criteria for reporting economic data.

The Rhetoric of White Slavery and the Making of National Identity - Leslie J Harris 2023-07-01

At the turn of the twentieth century, the white slavery panic pervaded American politics, influencing the creation of the FBI, the enactment of immigration law, and the content of international treaties. At the core of this controversy was the maintenance of white national space. In this comprehensive account of the Progressive Era's sex trafficking rhetoric, Leslie Harris demonstrates the centrality of white womanhood, as a symbolic construct, to the structure of national space and belonging. Introducing the framework of the mobile imagination to read across different scales of the controversy—ranging from local to transnational—she establishes how the imaginative possibilities of mobility within public controversy work to constitute belonging in national space.

The War on Human Trafficking - Anthony DeStefano 2007-08-14

The United States has taken the lead in efforts to end international human trafficking—the movement of peoples from one country to another, usually involving fraud, for the purpose of exploiting their labor. Examples that have captured the headlines include the 300 Chinese immigrants that were smuggled to the United States on the ship *Golden Venture* and the young Mexican women smuggled by the Cadena family to Florida where they were forced into prostitution and confined in trailers. The public's understanding of human trafficking is comprised of terrible stories like these, which the media covers in dramatic, but usually short-lived bursts. The more complicated, long-term story of how policy on trafficking has evolved has been largely ignored. In *The War on Human Trafficking*, Anthony M. DeStefano covers a decade of reporting on the policy battles that have surrounded efforts to abolish such practices, helping readers to understand the forced labor of immigrants as a major global human rights story. DeStefano details the events leading up to the creation of the Trafficking Victims Protection Act of 2000, the federal law that first addressed the phenomenon of trafficking in persons. He assesses the effectiveness of the 2000 law and its progeny, showing the difficulties encountered by federal prosecutors in building criminal cases against traffickers. The book also describes the tensions created as the Bush Administration tried to use the trafficking laws to attack prostitution and shows how the American response to these criminal activities was impacted by the events of September 11th and the War in Iraq. Parsing politics from practice, this important book gets beyond sensational stories of sexual servitude to show that human trafficking has a much broader scope and is inextricable from the powerful economic conditions that impel immigrants to put themselves at risk.

Data and Research on Human Trafficking - Elzbieta M. Gozdiak 2011-01

This is a print on demand edition of a hard to find publication. The subject of human trafficking, or the use of force, fraud or coercion to transport persons across international borders or within countries to exploit them for labor or sex, has received renewed attention within the last two decades. This report provides a

detailed description of the processes involved in a project to identify English language research-based literature on human trafficking; the databases searched and the keywords used to identify pertinent references; discussion of the development of the taxonomy used to categorize identified research-based journal articles, reports, and books; and the results of the categorization of the research according to the taxonomy.

Sex Trafficking, Scandal, and the Transformation of Journalism, 1885-1917 - Gretchen Soderlund 2013-06-03

In *Sex Trafficking, Scandal, and the Transformation of Journalism*, Gretchen Soderlund offers a new way to understand sensationalism in both newspapers and reform movements. By tracing the history of high-profile print exposés on sex trafficking by journalists like William T. Stead and George Kibbe Turner, Soderlund demonstrates how controversies over gender, race, and sexuality were central to the shift from sensationalism to objectivity—and crucial to the development of journalism in the early twentieth century.

The Trafficking of Persons - Kimberly A. McCabe 2008

Over 700,000 people are trafficked across international borders every year. Of those, the U.S. Department of State estimates that between 14,500 and 17,500 are trafficked into the United States. Today, the U.S. and other nations are beginning to recognize the magnitude of the problem and attempt to address the victimization caused by human trafficking. This book investigates the types of human trafficking, and discusses U.S. and international responses to combat and end all forms of this criminal activity. With discussion-provoking questions at the end of each chapter and specific examples of trafficking activity, this book is appropriate for criminology courses, classes dedicated to victims and/or child abuse, and classes focused around the themes of international crime and international law.

'My Name is Not Natasha' - John Davies 2009

This book challenges every common presumption that exists about the trafficking of women for the sex trade. It is a detailed account of an entire population of trafficked Albanian women whose varied experiences, including selling sex on the streets of France, clearly demonstrate how much the present discourse about trafficked women is misplaced and inadequate. The heterogeneity of the women involved and their relationships with various men is clearly presented as is the way women actively created a panoptical surveillance of themselves as a means of self-policing. There is no artificial divide between women who were deceived and abused and those who "choose" sex work; in fact the book clearly shows how peripheral involvement in sex work was to the real agenda of the women involved. Most of the women described in this book were not making economic decisions to escape desperate poverty nor were they the uneducated nave entrapped into sexual slavery. The women's success in transiting trafficking to achieve their own goals without the assistance of any outside agency is a testimony to their resilience and resolve.

Global Report on Trafficking in Persons 2016 - United Nations Office on Drugs and Crime 2017-01-11

The worldwide response to trafficking in persons, particularly in terms of criminalization and prosecution of trafficking crimes, is also a focus of this edition of the Global Report. Also included are the Country Profiles.

Preventing Human Trafficking - Robert W. Spires 2016-03-03

This book explores human trafficking, examining the work of grass-roots, non-profit organizations who educate and rehabilitate human trafficking victims and at-risk youth. Through interviews with staff and children, the author compares the work of two NGOs on-the-ground in Thailand with the work of similar organizations overseas, shedding light on the ways in which they combine educational work with shelter settings to prevent human trafficking, protect young people and attempt to provide a future free of exploitation. Concentrating less on the details of exploitation itself than the work that is being done to prevent exploitation and protect those who have experienced human trafficking, *Preventing Human Trafficking* explores the many challenges faced by the organizations, their staff and the children they serve. Drawing on rich qualitative research to address significant gaps in our knowledge of the work of NGOs and propose solutions to the problems of trafficking and how to protect its victims, this book will appeal to social scientists and policy makers with interests in criminology, exploitation, people trafficking, non-formal education and the work of NGOs.
