Human Motivation and Interpersonal Relationships Netta Weinstein 2014-07-08 This volume summarizes and organizes a growing body of research supporting the role of motivation in adaptive and rewarding interpersonal interactions with others. The field of human motivation is rapidly growing but most studies have focused on the effects of motivation on individuals' personal happiness and task engagement. Only recently have theorists and empiricists begun to recognize that dispositional and state motivations impact the ways individuals approach interpersonal interactions. In addition, researchers are now recognizing that the quality of interpersonal interactions influences consequent happiness and task engagement, thus helping to explain previous findings to this end. Similarly social psychology and relationships researchers have focused on the impact of cognitions, emotions, and behaviors on people's relationships. In their work,

relationships researchers demonstrate that both contextual characteristics and individual differences influence the quality of interactions. Many of these studies seek to understand which characteristics strengthen the bonds between people, encourage empathy and trust and create a sense of well-being after a close interaction. This work seeks to integrate the field of human motivation and interpersonal relationships. Both fields have seen extensive growth in the past decade and each can contribute to the other. However, no single compiled work is available that targets both fields. This is the case, in part because only now is there enough work to make a strong and compelling case for their integration. In the previous years, research has been conducted to show that motivation is relevant and important for interactions among strangers and in close relationships. In addition developmental mechanisms for these relations are identified and mechanisms by which motivation strengthens people's relationships. Finally recent work has demonstrated the many implications for interpersonal relationships, showing that motivation impacts a range of interpersonal processes from prejudice regulation and objectification of others to empathy and care. This book seeks to summarize and organize all these findings and present them in a way that is relevant to both motivation researchers and social and relationship researchers.

The Oxford Handbook of Parasocial Experiences Forster
2023-04-28 "Many media users feel as if they are engaging in an interaction or have a personal relationship with people they see in

the media. These psychological experiences, that are collectively referred to as parasocial experiences (PSEs). This Handbook offers a thorough synthesis of the fast-growing, international, and multi-disciplinary research of PSEs, celebrating the field's accomplishments to date but also outlining a blueprint for future growth. The book is organized in six sections covering: (1) theoretical, conceptual, and operational definitions of PSEs; (2) theoretical models and state-of-the-art review of research on PSEs across the lifespan; (3) the effects of PSEs on media users' self and their social life (e.g., intergroup relationships, marginalized sexual groups); (3) the effects of PSEs in various contexts such as health, politics, and marketing; and (4) identifying understudied areas of research that call for further investigation (comparative cross-cultural research, marginalized racial/ethnic identities, non-amicable PSRs). In addition to a thorough synthesis of the literature, the handbook identifies several critical theoretical questions that the PSEs research faces today. Across the thematic chapters, the authors debate several overarching critical theoretical issues in PSEs research, such as the boundaries between parasocial and social phenomena and the distinctions between PSEs and other forms of involvement with media. The book also includes a hands-on methodological chapter that provides detailed information about measurement and manipulation of PSEs"--

Interpersonal Communication in Friend and Mate

Relationships Anne Maydan Nicotera A concentration on communication processes is essential to sorting out fundamental problems in interpersonal relationships. This book provides a general theory of the role of communication in interpersonal relationships that is grounded in the rules perspective and focuses on self-concept and interaction as the generative mechanisms of relationship formation and growth. The authors explore the kind of information that is exchanged in the process of initiating, developing, and maintaining friend and mate

relationships. Both types of relationships are explored in numerous cultural settings—including America and American subcultures as well as Korea, Nigeria, Japan, and China. The inclusion of Nigerian culture is particularly significant because the research literature in interpersonal communication is lacking any information from the continent of Africa. Implications are then considered for communication exchange across three categories of interpersonal communication—culture, conflict, and quality.

Communication in Interpersonal Relationships Donald P.

Cushman 1985-06-30 This book discusses communication principles, processes, and skills from four different perspectives by explaining four related propositions. First, human communication is guided by socially established rules, the knowledge of which allows interacting persons to exert influence over the outcome of their interactions. Second, self concepts are formed and sustained in our interactions with others. Third, the formation of sustained interpersonal relations depends upon the attraction resulting from reciprocal self concept support. And fourth, organizations and the cultural system provide the parameters within which self concepts and interpersonal relations are formed. The implications of these propositions are examined in chapters two through ten. The authors develop their system in terms of results. What patterns of communication—what patterns of signal exchange—increase the probability of the development of affective relationship? What patterns erode interpersonal systems or prevent them from forming? The book also examines patterns

of communication within task-oriented organizations and in situations involving cultural differences.
