Disposable Passions David Church 2016-09-22 From early twentieth-century stag films to 1960s sexploitation pictures to the boom in 1970s "porno chic," adult cinema's vintage forms are now being reappraised by a new generation of historians, fans, preservationists, and home video entrepreneurs—all of whom depend on and help shape the archive of film history. But what is the present-day allure of these artifacts that have since become eroticized more for their "pastness" than the explicit acts they show? And what are the political implications of recovering these rare but still-visceral films from a less "enlightened," pre-feminist past? Drawing on media industry analysis, archival theory, and interviews with adult video personnel, David Church argues that vintage pornography retains its retrospective fascination precisely because these culturally denigrated texts have been so poorly preserved on political and aesthetic grounds. Through these films' ongoing moves from cultural emergence to concealment to rediscovery, the archive itself performs a "striptease," permitting tangible contact with these corporeally stimulating forms at a moment when the overall physicality of media objects is undergoing rapid transformation. *Disposable Passions* explores the historiographic lessons that vintage pornography can teach us about which materials our society chooses to keep, and how a long-neglected genre is primed for serious rediscovery as more than mere autoerotic fodder.

Pranksters Kembrew McLeod 2014-04 Profiles history's notable tricksters—from P.T. Barnum to Stephen Colbert—and their spectacles from the 1600s to the present, considering how pranksters have used humor to expose larger truths and, on occasion, incited social change.

Berghoff 2012-10-29 This volume serves up a combination of broad questions, theoretical approaches, and manifold case studies to explore how people have sought to understand markets and thereby reduce risk, whether they have approached this challenge with a practical view based on their own business acumen or used the tools of scholarship.

Deceptive Advertising Jef Richards 2013-12-16 This is the first book designed to assist behavioral scientists in the preparation of scholarly or applied research regarding deceptive advertising which will ultimately affect public policy in this area. Because there was an inadequate foundation upon which to build a program of research for this topic, a three-part solution has been devised: 1) a review of how deception is viewed and regulated 2) a theory of how consumers process deceptive information 3) a sensitive and consistent means of measuring deceptiveness. This text provides detailed discussions regarding the intersection of law and behavioral science and its application to deceptive advertising. In so doing, it offers a solid foundation upon which to base expanded behavioral research into how consumers are deceived by advertising claims, and what cognitive processes are involved in that deception.

Swift Viewing Charles R. Acland 2012-01-02 Acland looks back at the strange history of subliminal seduction: a theory first propagated in the late 1950s by marketing researcher James Vicary, who claimed that movie audiences bought more refreshments if advertising messages too quick to be noticed were inserted into movies. The study was soon proven false, but that hasn't kept the concept from having a long afterlife in the popular imagination.

Adman's Dilemma Paul Rutherford 2018-01-01 *The Adman's Dilemma* is a cultural biography that explores the rise and fall of the advertising man

as a figure who became effectively a licensed deceiver in the process of governing the lives of American consumers. Apparently this personage was caught up in a contradiction, both compelled to deceive yet supposed to tell the truth. It was this moral condition and its consequences that made the adman so interesting to critics, novelists, and eventually filmmakers. The biography tracks his saga from its origins in the exaggerated doings of P.T. Barnum, the emergence of a new profession in the 1920s, the heyday of the adman's influence during the post-WW2 era, the later rebranding of the adman as artist, until the apparent demise of the figure, symbolized by the triumph of that consummate huckster, Donald Trump. In *The Adman's Dilemma*, author Paul Rutherford explores how people inside and outside the advertising industry have understood the conflict between artifice and authenticity. The book employs a range of fictional and nonfictional sources, including memoirs, novels, movies, TV shows, websites, and museum exhibits to suggest how the adman embodied some of the strange realities of modernity.

The Codes of Advertising Sut Jhally 2014-05-22 This book examines the commercial speech of advertising as a cultural phenomenon whose social significance far exceeds its economic influence. Jhally argues that by selling viewing time to advertisers, television converts audiences into laborers who "work" for the media in the same way that workers do in a factory. By watching commercial messages on TV, viewers actively create symbolic meaning, but also generate profit for the media in return for the wage of entertainment.

Persuasion and Influence in American Life Gary C. Woodward 2013-12-23 For more than twenty-five years, the authors have highlighted the complexities, subtleties, and pervasive influence of persuasive messages. The seventh edition again blends historical, rhetorical, and social psychological approaches to persuasion theory. The engaging discussions and multiple examples introduce the intricacies of social influence and highlight methods of presentation as well as evaluation. The dynamic topic of persuasion presents a constantly changing palette for analysis. The authors dissect theory and practice in multiple contexts—from interpersonal interactions to public communication and persuasive campaigns to advertising to politics. Twitter, YouTube, and social networking sites offer new media for persuasive appeals. The means of persuading one another changes constantly, yet much of what was written by Aristotle continues to be relevant. The production of persuasive messages and the study of message effects have been and will continue to be fertile ground for exploration. Persuasion is an interactive process requiring willing and attentive participants. Becoming responsible, ethical, and credible persuaders involves systematic thinking and informed preparation. The skills required for planning, composing, and delivering effective messages are equally useful for evaluating messages received. The seventh edition provides a

thorough, up-to-date discussion of classic and contemporary theories of persuasion to aid readers in developing skills as effective persuaders and as critical consumers of persuasive messages.

Lewd Looks Elena Gorfinkel 2017-10-15 One of the most fascinating phenomena of 1960s film culture is the emergence of American sexploitation films—salacious indies made on the margins of Hollywood. Hundreds of such films were produced and shown on both urban and small-town screens over the course of the decade. Yet despite their vital importance to the film scene, and though they are now understood as a gateway to the emergence of publicly exhibited hardcore pornography in the early 1970s, these films have been largely overlooked by scholars. Defined by low budgets, quick production times, unknown actors, strategic uses of nudity, and a sensationalist obsession with unbridled female sexuality, sexploitation films provide a unique window into a tumultuous period in American culture and sexual politics. In *Lewd Looks*, Elena Gorfinkel examines the social and legal developments that made sexploitation films possible: their aesthetics, their regulation, and their audiences. Gorfinkel explores the ways sexploitation films changed how spectators encountered and made sense of the sexualized body and set the stage for the adult film industry of today. *Lewd Looks* recovers a lost chapter in the history of independent cinema and American culture—a subject that will engross readers interested in media, sexuality, gender, and the 1960s. Gorfinkel investigates the films and their contexts with scholarly depth and vivid storytelling, producing a new account of the obscene image, screen sex, and adult film and media.

British Trash Cinema Ian Hunter 2019-07-25 BRITISH TRASH CINEMA is the first overview of the wilder shores of British exploitation and cult paracinema from the 1950s onwards. From obscure horror, science fiction and sexploitation, to art-house camp, Hammer's prehistoric fantasies and the worst British films ever made, author I.Q. Hunter draws on rare archival material and new primary research to take us through the weird and wonderful world of British trash cinema. Beginning by outlining the definitions of trash films and their place in British film history, Hunter explores topics including: Hammer's overlooked fantasy films, the emergence of the sexploitation film in the 1950s and 60s, the sex industry in the 1970s, Ken Russell's high camp Gothic and erotic adaptations since the 1980s, gross-out comedies, revenge films, and contemporary straight-to-DVD horror and erotica.

Messages, Signs, and Meanings Marcel Danesi 2004 "Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms." "The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages."--Jacket.

Divine Horror Cynthia J. Miller 2017-05-24 From *Rosemary's Baby* (1968) to *The Witch* (2015), horror films use religious entities to both inspire and combat fear and to call into question or affirm the moral order. Churches provide sanctuary, clergy cast out evil, religious icons become weapons, holy ground becomes battleground--but all of these may be turned from their original purpose. This collection of new essays explores fifty years of genre horror in which manifestations of the sacred or profane play a material role. The contributors explore portrayals of the war between good and

evil and their archetypes in such classics as *The Omen* (1976), *The Exorcist* (1973) and *Dracula Has Risen from the Grave* (1968), as well as in popular franchises like *Hellraiser* and *Hellboy* and cult films such as *God Told Me To* (1976), *Thirst* (2009) and *Frailty* (2001).

Explorations in Critical Studies of Advertising James F. Hamilton 2016-10-26 This volume provides a thoughtful and wide-ranging exploration of approaches to the critical study of advertising. Current and impending practices of advertising have in many ways exceeded the grasp of traditional modes of critique, due at least in part to their being formulated in very different historical conditions. To begin to address this lag, this edited collection explores through critical discussion and application a variety of critical approaches to advertising. Authors address a variety of concrete examples in their chapters, drawing on existing research while presenting new findings where relevant. In order to maintain the relevance of this collection past this particular historical moment, however, chapters do not simply report on empirical work, but develop a theoretical argument.

Media, Communication, Culture James Lull 2013-05-02 *Media, Communication, Culture* offers a bold and comprehensive analysis of developments in the field amidst the effects of postmodernism and globalization. James Lull, one of the leading scholars in the discipline, draws from a wide range of social and cultural theory, including the work of John B. Thompson, Thomas Sowell, Nestor Garcia Canclini, Anthony Giddens and Samuel P. Huntington, to formulate a well balanced and highly original account of key contemporary developments worldwide. The first edition of *Media, Communication, Culture* became a well established introductory text. For this new edition coverage has been expanded from six to ten chapters, and has been thoroughly updated to include all new developments in the field. In his familiar and accessible style, Lull brings to life a diverse range of examples and mini case studies which will prove invaluable to the reader. These range from the hip-hop hybrids of New Zealand's Maori youth and the vastly divergent meaning of race and culture in Brazil and the United States to the global impact of McDonalds and Microsoft. Complex theoretical ideas such as globalization, symbolic power, popular culture, ideology, consciousness, hegemony, social rules, media audience, cultural territory, and superculture are explained in a clear and engaging way that challenges traditional understandings. By connecting major streams of theory to the latest trends in the global cultural mix, the book provides a fresh and unsurpassed introduction to media, communication and cultural studies. It will prove essential reading for undergraduates and above in the fields of media studies, communication studies, cultural studies and the sociology of culture.

Traps Rudolph P. Byrd 2001 "This is a valuable project. The editors are excellent, well-known scholars, and activists in the academy." --Darlene Clark Hine "After looking carefully at Traps' selections, I have to confess that I'm both excited and satisfied by what Rudolph Byrd and Beverly Guy-Sheftall have assembled here from the 19th century to the present. Educators genuinely need a text like this for opening their classroom to critical discussions on the well-worn subjects of race and gender." --Charles Johnson *Traps* is the first anthology of writings by 19th- and 20th-century

African American men on the overlapping categories of race, gender, and sexuality. The selections on gender in Sections I and II reveal what some may view as the unexpected commitment of African American men to feminism. Included here are critiques of the subordinate social, economic, and political position of black women. Sections III and IV analyze the taboos and myths in which black sexuality is enmeshed. These essays also stress the importance of rejecting homophobia and the need to contest the predominance of a heterosexual paradigm. Monolithic constructions of gender and sexuality, reinforced by sexism and historically sanctioned homophobia, are the "traps" that give this book its focus and its title.

A New Order of the Ages Collin Robert Bowling 2011-11-15 For millennia, the human race has been controlled and manipulated by forces beyond our own dimension or awareness. A carefully managed human/extra-dimensional breeding program has produced a hybrid slave race that isn't aware of its true origins or fate. Few know that these shadow puppeteers are actually in control—or that they even exist. They are not human ... but then again, neither are we. As the epic battle of consciousness expands into the outer dimensions, we know that one thing is for certain: When the Liberty Bell rings once again, their empire will be reduced to a heap of ashes. There will be an army of forces, backed by the highest of forces in the heavens, which will conduct this re-awakening of the masses. This story recounts the takeover of planet Earth by the Snake of Zion and shares everything you need to know to be truly free. The battleground is within each of us, and our captors are but a reflection of humanity. Unless we change ourselves, how will the reflection be changed? Hopefully, after this enduring encounter deep into the rabbit hole, you will realize how this reality has been manipulated by forces in the fourth dimension. In order to succeed, we must propel ourselves through the heart chakra and into the fifth dimension, where the beloved Terra will find the peace and dignity that she deserves. The fate of the world hangs in the balance. All we have to do now is make a choice.

British Low Culture Leon Hunt 1998 Flares, lava lamps and safari suits and a national cinema dominated by smutty comedy and cheap softcore have all made 1970s popular culture appear too gruesome to recycle as nostalgia and too offensive for academic study. But the generic artefacts of the seventies, such as sexploitation films, skinhead novels, wife-swapping suburbia, football terraces, James Bond and creepy country houses have become important reference points and are now embraced by contemporary popular culture. The book revisits the 1970s through some of its least respectable texts: television programmes such as Jason King and On the Buses; films such as Suburban Wives, House of Whipcord and Confessions of a Windowcleaner; and the prime-time titillation and pornification of Britain by comedians such as Benny Hill. Identifying permissive populism, the trickle down of permissiveness into mass consumption, as a key feature of the 1970s, Leon hunt considers the values of an ostensibly bad decade and analyzes the implications of the 1970s for issues of taste and cultural capital.

Triumph of the Spirit Lionel D. Lyles 2000-12 One of the most formidable tasks that an individual faces today is to learn this simple truth: That is, life is a journey of self-realization. "Getting" thoughts create barriers that prohibit understanding. An affected person is unconsciously misled to believe that the only reality that exists is the one experienced by the five senses. As such, spirituality is reduced to a mechanical affair, where the soul is bound and heaven is perceived as being a distant place that is unexperienceable until after death. The message contained in this book illuminates the idea "heaven is a choice, and it can be experienced NOW." To claim this miracle for self, it is necessary to re-work the thoughts in the mind. Those that create what is not wanted must be "let go," and, as a mother bear protects her cub, one must guard the thoughts allowed into the mind. Taking personal responsibility is at the heart of this self-work. This personal revolution is a process. Any courageous enough to claim it can expect to create the following: intimate social relationships, responsive political systems, schools that teach children Who They Are, and loving families.

Hardcore Spirituality Robin Sacredfire I do not notice much change between those that are in one religion or another, from the most popular to the

most secretive. In general, all religions promote one truth, that very few are able to acknowledge or recognize, even when spending their entire life inside a certain path, no matter how advanced it might seem. The only apparent difference seems to be that, the followers do care more about each other when addressing those that are inside their circle as being special. It is really impressive to notice, in these modern times, how much most people believe that their religion is supreme to all others. Indeed, arrogance never stops impressing me. Because, in itself, arrogance neglects its own and obvious level of ignorance supporting it. I always hear things like, "when I found this group, I never had to search for another any longer", as if such individuals had found the best. And yet, such quest often lasted no more than two to three religions. The sense of feeling stupid seems to easily get deceived by the sense of feeling special. It makes us wonder if, in ancient times, people behaved in the same way and said to each other, "I used to be like you, praying to thirty-three different gods, but now I only have one and I feel much more enlightened". The content exposed in all groups that I have met for the past thirty years of my life hasn't show any improvement. Quite the opposite. Religion is very commonly becoming a kindergarten for adults. It is as if people predisposed themselves to feel accommodated with the sense of feeling good about being happy and stupid. In fact, the ones attending more secretive meetings could be compared to the children that enjoy playing games that need to be hidden from adults. And that, when you look at what they're doing, doesn't seem like anything that needs to be kept secretive. The question nonetheless, remains: Is there such thing as a mature and truthful religion? While for many this question has been answered, I truly believe that the answer evolved with humanity. Otherwise, I would not have written this book. Here, I will show you in which direction religion, and spiritually in general, should be going, because the one and unifying religion of the future must be complete in all ways, and that is only possible when maintained by superior minds, supported by superior hearts and strengthen by superior souls. In this sense, this book intends to give you a glimpse of such future, and such religion, at least, to make you part of it in spirit before such reality comes to this world. This is an introduction to the supreme religion of the future, the only religion that will never change over thousands of years.

Sexploitation Michèle Alexandre 2014-12-17 Michèle Alexandre's innovative study examines how sexual profiling represses, oppresses, and hinders various aspects of life for both genders, and explores the ways in which the law and the community can help eradicate the practice of sexual profiling. Alexandre defines "sexploitation" as the perpetuation of myths and stereotypical notions regarding men and women in order to further an agenda of oppression and subordination in certain spheres of society. The most popular means through which this sexploitation is achieved is through a method Alexandre coins as "sexual profiling." She argues that sexual profiling ultimately stifles the growth of our society by creating inefficient as well as oppressive systems, and that its eradication can help increase the productivity as well as the morale of society. Alexandre opens the book by exploring in detail the various ways in which normative views of gender are constructed and perpetuated through media and societal norms. She then focuses on the ways in which recent legal opinions and developments contribute to perpetuate these restrictive and oppressive norms. Finally, Alexandre outlines a plan to help eliminate the presence of these destructive norms and attitudes from different sectors of society.

HISTORICAL DEVELOPMENT OF CAPITALISM IN THE UNITED STATES AND ITS AFFECTS ON THE AMERICAN FAMILY: 1920 TO 1960 Lionel Lyles 2008-06-15 Since the 18th Century, Americans have engaged in the pursuit of happiness through the consumption of material things. It is written in the Preamble to the U.S. Constitution that Americans have a right to life, liberty, and the pursuit of happiness. Interestingly, the pursuit has resulted in suicide for more white males 65 years old and over than any other age group. Louisiana is the second most unhealthiest state in America, and 40 million Americans live without any health insurance. These signs of unhappiness have continued to evolve over time. By 1950, Americans produced \$43.7 billion worth of manufactured goods, and by 1958, \$141 billion. The average annual salary for males was \$2,831 in 1958; \$1,559 for females. During this time, the American household was classified as husband-wife. In 1920, 86.0 percent were husband-wife; by

1960, this percent declined to 70.0 percent. Divorce accelerated by 1960. During the 1950s, the husband-wife household was already rapidly giving way to a new form-"Single-Parent." If this pursuit of happiness through object consumption is working, then, the reverse would be true. To grasp the social decay occurring in American society today, it is essential to understand the 1920 to 1960 period.

Children Talking Television David Buckingham 2004-08-02 Is television harmful to children? Does it destroy imagination, provide delinquency and violence, undermine family life and have other detrimental effects on children?; The author, himself a parent, teacher and researcher investigates the complex ways in which children actively make meaning and take pleasure from television. Chapters cover the popular debates about children and television from a general and academic perspective. The characteristics of children's talk about television are explored, as children interact with other children and other family members in "family viewing" sessions.; Key concepts which inform children's talk about television are investigated i. e. genre, narrative, character, modality, and agency. Finally, conclusions are presented and issues outlined for further research.; Drawing on theories and ideas developed within media and cultural studies, English, education, psychology, sociology, linguistics and other related areas, this book will be useful to both students and teachers in the field, and to the general reader with an interest in children and the media.

Evil in Modern Myth and Ritual Richard Stivers 2020-04-28 Richard Stivers' concern is with the social construction of evil, that is, with how modern societies, in a partly unconscious way, create evil as a category of the sacred and how symbols, myths, and rituals of evil are related to this. He is interested, moreover, in how modern societies provoke individuals to commit evil actions. This fascinating and stimulating book is the first attempt to work out in detail how the concepts of the sacred, symbol, myth, and ritual form a cultural configuration in modern technological societies, and not just in traditional societies.

Sleaze Artists Jeffrey Sconce 2007-10-24 Bad Girls Go to Hell. Cannibal Holocaust. Eve and the Handyman. Examining film culture's ongoing fascination with the low, bad, and sleazy faces of cinema, Sleaze Artists brings together film scholars with a shared interest in the questions posed by

disreputable movies and suspect cinema. They explore the ineffable quality of “sleaze” in relation to a range of issues, including the production realities of low-budget exploitation pictures and the ever-shifting terrain of reception and taste. Writing about horror, exploitation, and sexploitation films, the contributors delve into topics ranging from the place of the “Aztec horror film” in debates about Mexican national identity to a cycle of 1960s films exploring homosexual desire in the military. One contributor charts the distribution saga of Mario Bava’s 1972 film *Lisa and the Devil* through the highs and lows of art cinema, fringe television, grindhouse circuits, and connoisseur DVD markets. Another offers a new perspective on the work of Doris Wishman, the New York housewife turned sexploitation director of the 1960s who has become a cult figure in bad-cinema circles over the past decade. Other contributors analyze the relation between image and sound in sexploitation films and Italian horror movies, the advertising strategies adopted by sexploitation producers during the early 1960s, the relationship between art and trash in Todd Haynes’s oeuvre, and the ways that the *Friday the 13th* series complicates the distinction between “trash” and “legitimate” cinema. The volume closes with an essay on why cinephiles love to hate the movies. Contributors. Harry M. Benshoff, Kay Dickinson, Chris Fujiwara, Colin Gunckel, Joan Hawkins, Kevin Heffernan, Matt Hills, Chuck Kleinhans, Tania Modleski, Eric Schaefer, Jeffrey Sconce, Greg Taylor

Sexploitation Cindy Pierce 2016-10-04 As surprising as it may be to parents, young people today are immersed in porn culture everywhere they look. Through Internet porn, gaming, social media, marketing, and advertising, kids today have a much broader view of social and sexual possibilities, which makes it difficult for them to establish appropriate expectations or to feel adequate in their own sexuality. Even more important, no one is talking to kids directly about the problem. Parents tend to convince themselves that their children are immune to cultural influences, wait until it comes up, or hope schools and pediatricians will address the issues. Educators and doctors may be able to start the conversation but it is fundamentally a parent's job to provide information about sex and relationships early and often to help young people find their way through their social and sexual lives. Delaying the necessary but awkward conversations with their kids leaves them vulnerable. The media, marketers, and porn and gaming industries are eager to step in anywhere parents choose to hold back. Sexploitation exposes the truth to parents, kids, educators, and the medical profession about the seen and unseen influences affecting children, inspiring parents to take the role as the primary sexuality educator. With more information, parents will gain conviction to discuss and develop values, expectations, boundaries, and rules with their kids. Kids who enter their teens with accurate information and truths stand a better chance of developing an "inner compass" when it comes to sex and relationships, which sets them up for a healthy adulthood. In her comic and straightforward style, Pierce brings together the latest research with anecdotal stories shared with her by high school and college students in the thick of it. Above all else, her goal is to get people to develop more comfort around those difficult conversations so that kids gain more confidence and courage about drawing boundaries based on their own values not those put upon them.
