**The Afterlife of Piet Mondrian** Nancy J. Troy, 2013 Dutch painter Piet Mondrian died in New York City in 1944 but his work and legacy have been far from static since then From market pressures to personal relationships and scholarly agendas posthumous factors have repeatedly transformed our understanding of his oeuvre In *The Afterlife of Piet Mondrian* Nancy J Troy explores the controversial circumstances under which our conception of the artist's work has been shaped since his death an account that describes money driven interventions and personal and professional rivalries in forthright detail Troy reveals how collectors curators scholars dealers and the painter's heirs all played roles in fashioning Mondrian's legacy each with a different reason for seeing the artist through a particular lens She shows that our appreciation of his work is influenced by how it has been conserved copied displayed and publicized and she looks at the popular appeal of Mondrian's instantly recognizable style in fashion graphic design and a vast array of consumer commodities Ultimately Troy argues that we miss the evolving significance of Mondrian's work if we examine it without regard for the interplay of canonical art and popular culture A fascinating investigation into Mondrian's afterlife this book casts new light on how every artist's legacy is constructed as it circulates through the art world and becomes assimilated into the larger realm of visual experience

**Paths to the Absolute** John Golding, 2023-10-17 A groundbreaking account of the meaning of abstract painting From Mondrian's bold geometric forms to Kandinsky's use of symbols to Pollock's dripped paintings the richly diverse movement of abstract painting challenges anyone trying to make sense of either individual works or the phenomenon as a whole Applying his insights as an art historian and a painter John Golding offers a unique approach to understanding the evolution of abstractionism by looking at the personal artistic development of seven of its greatest practitioners He re-creates the journey undertaken by each painter in his move from representational art to the abstract a journey that in most cases began with cubism but led variously to symbolism futurism surrealism theosophy anthropology Jungian analysis and beyond For each artist spiritual quest and artistic experimentation became inseparable And despite their different techniques and philosophies these artists shared one goal to break a path to a new ultimate pictorial truth The book first explores the works and concerns of three pioneering European abstract painters Mondrian Malevich Kandinsky and then those of their American successors Pollock Newman Rothko and Still Golding shows how each painter sought to see the world and communicate his vision in the purest or most expressive form possible For example Mondrian found his way into abstraction through a spiritual response to the landscape of his native Holland Malevich through his apprehension of the human body Kandinsky through a blend of religious mysticism and symbolism Line and color became the focus for many of their creative endeavors In the 1940s and 50s the Americans raised the level of pictorial innovation beginning most notably with Pollock and his Jung inspired concept of action Golding makes a powerful case that at its best and most profound abstract painting is heavily imbued with meaning and content Through a blend of biography art analysis and cultural history *Paths to the Absolute* offers remarkable insights into how a sense of purpose is achieved in painting and how abstractionism engaged with the intellectual currents of its time Please note All images in this ebook are presented in black and white and have been reduced in size

*Fractal Geometry in Architecture and Design* Carl Bovill, 2013-03-11 In a broad sense Design Science is the grammar of a language of images rather than of words Modern communication techniques enable us to transmit and reconstitute images without needing to know a specific verbal sequence language such as the Morse code or Hungarian International traffic signs use international image symbols which are not specific to any particular verbal language An image language differs from a verbal one in that the latter uses a linear string of symbols whereas the former is multi dimensional Architectural renderings commonly show projections onto three mutually perpendicular planes or consist of cross sections at different altitudes capable of being stacked and representing different floor plans Such renderings make it difficult to imagine buildings comprising ramps and other features which disguise the separation between floors and consequently limit the creative process of the architect Analogously we tend to analyze natural structures as if nature had used similar stacked renderings rather than for instance a system of packed spheres with the result that we fail to perceive the system of organization determining the form of such structures Perception is a complex process Our senses record they are analogous to audio or video devices We cannot however claim that such devices perceive

**Survival Boogie Woogie. Neo-Japonisme, Architectural Photography & Abstraction** Jean-Sébastien Cluzel, 2024-07-01 What links are there between Piet Mondrian s unfinished work Victory Boogie Woogie 1942 4 and post war Japanese and Japanese style architectural photography As far back as the mid 1950s critics and photographers were inclined to link Mondrian s painting with modern Japanese architecture and some historians were to go so far as to assert that Mondrian himself had been influenced by traditional Japanese architecture Powerful associations such as these contributed to the coming together of Western and Japanese architectural modernity They also underpinned the survival of Japonisme in architecture or put another way of the neo Japonisme that emerged after the Second World War However while this kinship between Mondrian s abstraction and the aesthetic of Japanese architecture is little apparent in architecture it does show in architectural photography This book which takes a sidelong look at Mondrian examines the works of the foremost among Japanese and American architectural photographers in an effort to interpret the dynamics of how the world of architecture was Japanized between 1945 and 1985

*Painting and Reality* Etienne Gilson, 2023-08-15 A classic study of the art of painting and its relationship to reality In this book tienne Gilson puts forward a bold interpretation of the kind of reality depicted in paintings and its relation to the natural order Drawing on insights from the writings of great painters from Leonardo Reynolds and Constable to Mondrian and Klee Gilson shows how painting is foreign to the order of language and knowledge Painting he argues seeks to add new beings to nature not to represent those that already exist For this reason we must distinguish it from another art that of picturing which seeks to produce images of actual or possible beings Though pictures play an important part in human life they do not belong in the art of painting Through this distinction Gilson sheds new light on the evolution of modern painting A magisterial work of scholarship by an acclaimed historian of philosophy *Painting and Reality* features paintings from both classical and modern schools and includes extended selections from the writings of Reynolds Delacroix Gris Gill and Ozenfant
