Chinese Lexical Semantics -

Pengyuan Liu 2013-12-12

This book constitutes the refereed selected papers from the 14th Chinese Lexical Semantics Workshop, CLSW 2013, held in Zhengzhou, China, in May 2013. The 68 full papers and 4 short papers presented in this volume were carefully reviewed and selected from 153 submissions. They are organized in topical sections covering all major topics of lexical semantics; lexical resources; corpus linguistics and applications on natural language processing.

The Relations between Defence and Civil

Technologies - Philip

Gummett 2013-03-09

This book arises from a meeting held at Wiston House, Sussex, UK, in September 1987. The meeting brought together academic, governmental and industrial experts from eight countries to discuss the increasingly important subject of the relations between civil and defence technologies. It was primarily funded under the

Advanced Research Workshops Programme of NATO's Scientific Affairs Division, and was the first science policy workshop funded by the Programme. Additional financial support came from the Leverhulme Trust. The choice of topic, of speakers and, finally, of papers to be published was entirely ours. The conclusions reached were our own and those of the participants. They were not in any way guided by NATO; nor do they represent NATO policy. We speak for all the participants in offering our thanks to the NATO Scientific Affairs Division, especially Secretary General Durand and Dr. Craig Sinclair, for their generosity and encouragement. Without them this book would not exist. We thank the Leverhulme Trust for enabling assistance to be provided to the Workshop Directors, in the form of Iain Bate, who himself played a major part in the success of the meeting. The staff of Wiston House must also be thanked for providing an admirable environment for the

meeting. For secretarial support prior to the meeting we thank Gill Miller and Lesley Price. Finally, we offer special thanks to Mrs. Yvonne Aspinall for converting all the papers, in whatever state they were presented, into camera-ready copy with such professionalism and good humour.

The relationship between Project Management Office (PMO) and project management success within organizations

- Theres Mitscherling 2019-09-11 Literature Review from the year 2016 in the subject Business economics - Business Management, Corporate Governance, Queensland University of Technology (Science and Engineering), course: IFN600, language: English, abstract: Project Management Offices (PMOs) have been established by organisations over the past decades. The literature review investigates the relationship of project management success and the existence of PMOs. My research topic is to look into how a PMO function can help

with successful project delivery and what PMO model in particular is proven to manifest. This study is important when considering the monetary loss of US\$122 million for every US\$1 billion invested.

Guns & Roses: Comparative Civil-Military Relations in the Changing Security Environment

- Steven Ratuva 2019-01-04

This edited volume provides a critical and comparative discussion of the changing synergy between the military and society in the dramatically transforming global security climate, drawing on examples from the Asian, Pacific, African, Middle Eastern, European and South American regions. The book is interdisciplinary and covers wide-ranging issues relating to civil military relations, democratization, regional security, ethnicity, peace-building and peace keeping, civilian oversight, internal repression, gender, regime change and civil society.

Billion Dollar Lie - Linnea
May 2023-04-04

I need a fake fiancée, she needs my money. It's the perfect solution to all our problems — and a dangerous game of deception. I made it to the top, among the richest of the rich. But I have one more goal in my sights... to become a member of the illustrious Vanguard Society. Being a billionaire is not enough to join their ranks. They want a family man, and I'm anything but that. So, what do I do? Fake it, of course. I just need one thing to win their trust: A fake fiancée.

When Kat stumbles into my arms at an elite nightclub, I know that she is perfect for the job. She's beautiful, smart and feisty — and totally off limits. But she's desperate. She needs me just as much as I need her. One million dollars is all it takes to make her play along. She agrees to become my fake fiancée. My partner in crime. My plaything. The moment I'm alone with her, the urge to break her becomes overwhelming. It's all a lie, a contract between us, just for as long as I need her. Hell will freeze over before I tie myself down to one woman. No matter how enticing my name sounds as it drips from her lips when she moans. But Kat is not who I thought she was. And when things take a dangerous turn, I find myself in the risk of losing everything—including her.

This Working Group III contribution to the IPCC Sixth Assessment Report provides a comprehensive and transparent assessment of the literature on climate change mitigation. The report assesses progress in climate change mitigation options for reducing emissions and enhancing sinks. With greenhouse gas emissions at the highest levels in human history, this report provides options to achieve net zero, as pledged by many countries. The report highlights for the first time the social and demand-side aspects of climate mitigation, and assesses the literature on human behaviour, lifestyle, and culture, and its implications for mitigation action. It brings a wide range of disciplines, notably from the social sciences, within the scope of the assessment. IPCC reports are a trusted source for decision makers, policymakers, and stakeholders at all levels (international, regional, national, local) and in all

branches (government, businesses, NGOs). Available as Open Access on Cambridge Core.

Post-Cold War Relations between Turkey and Syria -

Demet Şenbaş 2018-07-05
After 2000, there was a closeness in the relations of Syrian and Turkey. However, Turkey and Syria were in dispute about water, Hatay and terrorism. Especially there was an intense tension over terrorism. This tension brought the two countries to the brink of a war in 1998. We can say that the relations between Syria and Turkey normalized after Adana Agreement in 1998. When Bashar Al-Assad came to power in Syria and as did AKP in Turkey, the relations improved even further leading to the abolishment of visas in 2009. However, with the Arab Spring, the relations turned sour and reached to a point that can't be normalized anymore. This book analyses the relations between Syria and Turkey between 1998 and 2018. The Science of God - Gerald

L. Schroeder 2009-06-16
For the readers of The Language of God, another instant classic from "a sophisticated and original scholar" (Kirkus Reviews) that disputes the idea that science is contrary to religion. In The Science of God, distinguished physicist and Biblical scholar Gerald L. Schroeder demonstrates the surprising parallels between a variety of Biblical teachings and the findings of biochemists, paleontologists,

astrophysicists, and quantum physicists. In a brilliant and wide-ranging discussion of key topics that have divided science and religion—free will, the development of the universe, the origin of life, and the origin of man—Schroeder argues that the latest science and a close reading of the Bible are not just compatible but interdependent. This timely reissue of *The Science of God* features a brand-new preface by Schroeder and a compelling appendix that addresses the highly publicized experiment in

2008 in which scientists attempted to re-create the chemical composition of the cosmos immediately after the Big Bang. It also details Schroeder's lucid explanations of complex scientific and religious concepts, such as the theory of relativity, the passage of time, and the definitions of crucial Hebrew words in the Bible. Religious skeptics, Biblical literalists, scientists, students, and physicists alike will be riveted by Schroeder's remarkable contribution to the raging debate between science and religion.
