[Sex Facts - Leslee Welch 1995](#)

Sex Facts provides a fascinating cultural perspective on human sexuality and its impact on our lives. According to a recent survey of 1,500 households, American adults have sex an average 57 times a year, or about once every week. Herodotus, Greek historian and storyteller of the fifth century B.C., claimed that the marriage customs of the Nasamonians of Libya required the bride to have sex with all of the male celebrants at the wedding party. In 1987, 368 females were arrested in the United States for forcible rape. Approximately 150 calories are expended during intercourse. This book presents hundreds of sexual facts and questions about the sexual customs of different cultures, ranging from the commonplace to bizarre. Sex: No other subject has so universally preoccupied the hearts and minds of people throughout the ages. Today we are continually bombarded by sexual images, both blatant and subliminal, and they influence every aspect of our lives - from the clothes

we wear to the food we eat. Sex Facts is a fun book for anyone who wishes to get a little. . . trivia, that is!

Studies in the Psychology of Sex VI: Sex in Relation to Society - Havelock Ellis 2016-08-25

The origin of these *Studies* dates from many years back. As a youth I was faced, as others are, by the problem of sex. Living partly in an Australian city where the ways of life were plainly seen, partly in the solitude of the bush, I was free both to contemplate and to meditate many things. A resolve slowly grew up within me: one main part of my life-work should be to make clear the problems of sex. That was more than twenty years ago. Since then I can honestly say that in all that I have done that resolve has never been very far from my thoughts. I have always been slowly working up to this central problem; and in a book published some three years ago—*Man and Woman: a Study of Human Secondary Sexual Characters*—I put forward what was, in my own eyes, an introduction to the study of the primary questions of sexual psychology. Now that I have at length reached the time for beginning to publish my results, these results scarcely seem to me large. As a youth, I had hoped to settle problems for those who came after; now I am quietly content if I do little more than state them. For even that, I now think, is much; it is at least the half of knowledge. In this particular field the evil of ignorance is magnified by our efforts to suppress that which never can be suppressed, though in the effort of suppression it may become perverted. I have at least tried to find out what are the facts, among normal people as well as

among abnormal people; for, while it seems to me that the physician's training is necessary in order to ascertain the facts, the physician for the most part only obtains the abnormal facts, which alone bring little light. I have tried to get at the facts, and, having got at the facts, to look them simply and squarely in the face. If I cannot perhaps turn the lock myself, I bring the key which can alone in the end rightly open the door: the key of sincerity. That is my one panacea: sincerity...
