*Punk 57* - Penelope Douglas 2016

"MISHA I can't help but smile at the lyrics in her letter. She misses me. In fifth grade, my teacher set us up with pen pals from a different school. Thinking I was a girl, with a name like Misha, the other teacher paired me up with her student, Ryen. My teacher, believing Ryen was a boy like me, agreed. It didn't take long for us to figure out the mistake. And in no time at all, we were arguing about everything. The best take-out pizza. Android vs. iPhone. Whether or not Eminem is the greatest rapper ever... And that was the start. For the next seven years, it was us. Her letters are always on black paper with silver writing. Sometimes there's one a week or three in a day, but I need them. She's the only one who keeps me on track, talks me down, and accepts everything I am. We only had three rules. No social media, no phone numbers, no pictures. We had a good thing going. Why ruin it? Until I run across a photo of a girl online. Name's Ryen, loves Gallo's pizza, and worships her iPhone. What are the chances? F\*ck it. I need to meet her. I just don't expect to hate what I find. RYEN He hasn't written in three months. Something's wrong. Did he die? Get arrested? Knowing Misha, neither would be a stretch. Without him around, I'm going crazy. I need to know someone is listening. It's my own fault. I should've gotten his phone number or

picture or something. He could be gone forever. Or right under my nose, and I wouldn't even know it. \*Punk 57 is a stand alone New Adult romance. It is suitable for ages 18+."--Amazon.com

**Mystifying the Monarch** - Jeroen Deploige 2006

The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority.

In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy has been one of constant tension between mystification and demystification.

**Scuttlers** - Rona Munro 2015

A thrillingly fast-paced play about youthful disaffection, protest and violence, drawing on the history of youth gangs of nineteenth-century Manchester.

Uncle Vanya - Anton Chekhov 2017-07-09

Uncle Vanya is a play by the Russian playwright Anton Chekhov. It was first published in 1897 and received its Moscow premiere in 1899 in a production by the Moscow Art Theatre, under the direction of Konstantin Stanislavski. The play portrays the visit of an elderly professor and his

glamorous, much younger second wife, Yelena, to the rural estate that supports their urban lifestyle. Two friends-Vanya, brother of the professor's late first wife, who has long managed the estate, and Astrov, the local doctor-both fall under Yelena's spell, while bemoaning the ennui of their provincial existence. Sonya, the professor's daughter by his first wife, who has worked with Vanya to keep the estate going, suffers from her unrequited feelings for Dr. Astrov. Matters are brought to a crisis when the professor announces his intention to sell the estate, Vanya and Sonya's home, with a view to investing the proceeds to achieve a higher income for himself and his wife. Anton Chekhov (29 January 1860 - 15 July 1904) was a Russian playwright and short story writer, who is considered to be among the greatest writers of short fiction in history. His career as a playwright produced four classics and his best short stories are held in high esteem by writers and critics. Along with Henrik Ibsen and August Strindberg, Chekhov is often referred to as one of the three seminal figures in the birth of early modernism in the theatre. Chekhov practiced as a medical doctor throughout most of his literary career: "Medicine is my lawful wife", he once said, "and literature is my mistress."

*Foucault as Educator* - Stephen J. Ball 2016-12-01

This book considers Foucault as educator in three main ways. First, through some consideration of what his work says about education as a social and political practice. That is, education as a form of what Allen (2014) calls benign violence - which operates through mundane, quotidian disciplinary technologies and expert knowledges which together construct a 'pedagogical machine'. Second, through an exploration of his 'method' as a form of critique. That is, as a way of showing that things are 'not as necessary as all that', a way of addressing what is intolerable. This suggests that critique is education of a kind. Third, through a discussion of some of Foucault's later work on subjectivity and in particular on 'the care of the self' or what we might call 'a pedagogy of the self'. Each chapter introduces and discusses some relevant examples from educational settings to illustrate and enact Foucault's analytics.

*The Ten Greatest Revivals Ever* - Elmer L. Towns 2004-01-31

Over the centuries God has touched the earth with revival, lifting men and women into his presence in extraordinary ways. And in some epochs the divine hand seems to have rested on us longer and to have caused more profound changes in the church and the culture. Authors Towns and Porter have studied revival eras throughout history in order to identify the ten which seem to have been the greatest of all time. If you want to understand revival and if you long to see revival in our day, this book will speak to both your mind and your heart.

*The Craft of Scientific Presentations* - Michael Alley 2006-05-17

This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what

makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.
