Sexual Sabotage - Sherwin A. Kaufman 1981

Stress Treatment (First Time Lesbian Medical Erotica) - Olivia Ruin Stacy is a powerful, career-oriented woman. When she comes down with blinding headaches, she reluctantly takes time away from work to go and see the doctor. Dr. Burnett is a gorgeous young blonde woman, and she comes to a decision very quickly. Stacy has stress headaches, and needs some rest and physical pleasure to distract her from the pain. Luckily, this is the good doctor's specialty, and she gives Stacy a treatment right there in the office! Warning: This erotic short story contains scenes of explicit lesbian sex, including fingering and strap on play. Meant only for mature readers 18+. Excerpt: "Well, I think that was a pretty successful first treatment. How do you feel?" The doctor put a hand on Stacy's elbow to gently turn her around. Words failed her when she first attempted speech, so Stacy cleared her throat and tried again. "That was... I feel... wow. Thank you, Dr. Burnett. I have never felt anything like that before. That was absolutely wonderful!" The blonde cocked an eyebrow. "Never? Have you never had an orgasm before, Stacy?" Flushed, Stacy felt embarrassed. "Yes, of course. Well, I had thought I had. I mean... if that was a true orgasm, then no, I don't think I ever had." Dr. Burnett tapped her lips with a finger, as if she was thinking and considering something. "Hmm. Well, Stacy, I was just going to leave this treatment there for today since you seemed especially responsive, and I guess we now know why. I feel bad for you that you haven't been treated properly sexually. That was just a manual release, but if you were interested then I could give you another, fuller treatment this session. What are your thoughts on that?" Another one? How could I possibly turn that down after what I just experienced? Stacy licked her lips. "I think I would like that very much, doc. Please?"

Exploring the Biological Contributions to Human Health - Institute of Medicine 2001-07-02

It's obvious why only men develop prostate cancer and why only women get ovarian cancer. But it is not obvious why women are more likely to recover language ability after a stroke than men or why women are more apt to develop autoimmune diseases such as lupus. Sex differences in health throughout the lifespan have been documented. *Exploring the Biological Contributions to Human Health* begins to snap the pieces of the puzzle into place so that this knowledge can be used to improve health for both sexes. From behavior and cognition to metabolism and response to chemicals and infectious organisms, this book explores the health impact of sex (being male or female, according to reproductive organs and chromosomes) and gender (one's sense of self as male or female in society). *Exploring the Biological Contributions to Human Health* discusses basic biochemical differences in the cells of males and females and health variability between the sexes from conception throughout life. The book identifies key research needs and opportunities and addresses barriers to research. *Exploring the Biological Contributions to Human Health* will be important to health policy makers, basic, applied, and clinical researchers, educators, providers,

and journalists-while being very accessible to interested lay readers. *Best Choices from the People's Pharmacy* - Joe Graedon 2006-10-31 From the New York Times bestselling authors of *The People's Pharmacy*, a reliable resource for remedies and treatment After more than three decades as one of the world's premier sources for authoritative, trustworthy health information, *The People's Pharmacy* delivers its most groundbreaking resource yet, identifying best-choice treatments for the medical conditions that smart health-care consumers most want to know about. It can serve as a quick in-the-clinic reference between patients, or be used to steer curricular efforts in medical training programs, particularly tailored to internal medicine, family medicine, gynecology, nursing, and advanced practice provider programs. Organized to cover essential topics in women's health and gender based care, this text is divided into eight sections: Foundations of Women's Health and Gender Based Medicine, Gynecologic Health and Disease, Breast Health and Disease, Common Medical Conditions, Chronic Pain Disorders, Mental Health and Trauma, Care of Selected Populations (care of female veterans and gender diverse patients), and Obstetric Medicine. Using the Maintenance of Certification (MOC) and American Board of Internal Medicine blueprints for examination development, authors provide evidence-based reviews with several challenge questions and annotated answers at the end of each chapter. Migraines For Dummies - Diane Stafford 2011-04-20

If you get migraines you know how laughable it is to hear them described as "headaches." As one poet put it, "the migraine is a beast from Hell, a bone-crushing, brain-twisting, heart-rending, apocalyptic scourge—an insult to all that's holy." And that's putting it mildly. People have been trying to tame the migraine beast for thousands of years. Some early healers bored holes into their patients' skulls, the Greeks inhaled the smoke of burning coffee beans, while in ancient Egypt, doctors tied herb-stuffed clay crocodiles to migraine sufferer's heads. Fortunately, we live in more enlightened times and there are now medically sound approaches that are relatively simple and inexpensive—and they don't leave scars or involve extreme fashion statements. Your complete guide to taking charge of your migraines and getting your life back, *Migraines For Dummies* offers a focused, fleshed-out program that works in the real world. This friendly guide fills you in on what you need to know to: Understand migraines and why you get them Relieve symptoms Pinpoint pain triggers Sort through the various medications Evaluate alternative remedies Make simple migraine-busting lifestyle changes Stop migraines from disrupting your family and work lives Find a good doctor to help you manage the beast The authors look at the whole spectrum of the problem—from dealing with the number-one issue of pain relief, to handling the peripheral problems like absences from work skepticism from friends, and impact on family. They also explore a range of critical related issues, including: Different types of migraines, including abdominal, ocular, hemiplegic, ophthalmoplegic, and women's hormonal migraines Triggers, such as environmental allergens, stress, dietary triggers, and even exercises that can cause migraines Over-the-counter medications, vitamins and herbal supplements Biofeedback, meditation, massage, acupuncture, and other alternative remedies The pros and cons of prescription remedies, including ergotamine derivatives, antidepressants, nonsteroidal anti-inflammatory drugs, botox and more You've tried Aunt Edna's camphor-soaked head cloths. Now explore a sensible, medically sound approach, and get on the road to full-fledged pain relief with *Migraines For Dummies*.
