**Handbook on Gender in World Politics** - Jill Steans 2016-07-27

The Handbook on Gender in World Politics is an up-to-date, comprehensive, multi-disciplinary compendium of scholarship in gender studies. The text provides an indispensable reference guide for scholars and students interrogating gender issues in international and global contexts. Substantive areas covered include: statecraft, citizenship and the politics of belonging, international law and human rights, media and communications technologies, political economy, development, global governance and transnational visions of politics and solidarities.

*The Political Economy of Emerging Markets* - Richard Westra 2017-03-16

Rapid and sustained growth in the twenty-first-century global economy of large developing economies including Brazil, Russia, India, China, and South Africa, has captivated policy-makers and popular business press pundits alike. The

coining of the new acronym BRICS and widespread adoption in international economics discourse of the designation "emerging markets" is symptomatic of that interest. The Political Economy of Emerging Markets situates the BRICS phenomena in the global economic context of advanced economies continuing to languish in recession and hovering over a deflationary abyss several years after the meltdown. A key question this volume seeks to answer is whether the BRICS and so-called "emerging market" phenomenon is really the new miracle it is presented as, offering new or modified varieties of reloaded capitalist development to the world, or yet another mirage. Written by ten leading global experts, this book answers the tough questions over BRICS and emerging markets potentially realizing new varieties of reloaded capitalism. It is not only international and interdisciplinary but uniquely multiperspectival. Theories framing chapters are not of one genre, but generate

theoretical debate at the frontier of knowledge in political economy along with nuanced empirical analysis which flows from it. This book is of great importance to those who study political economy, development economics and international political economy.

**Body/State** - Jen Dickinson 2016-04-08

Body/State brings together original essays addressing various aspects of the evolving interaction between bodies and states. While each essay has different empirical and/or theoretical focus, authors consider a number of overlapping themes to appreciate the state's engagement with, and concern about, bodies. Divided into five parts, the first part, 'Bodies Modified and Divided' considers how the production, regulation, policing and maintenance of borders (physical, social, sexual, political, religious, etc.) are used to enable or constrain the physical (re)shaping of the body. Part two, 'Capital Bodies', extends the state's concern with the flows of bodies that make up

the nation to consider how they are enrolled in the complex structures of capitalist exchange that form the basis for maintaining and contesting a set of relationships between states and markets. Part three, 'Deviance and Resistance', examines both how states seek to discipline 'non-normal' bodies and appreciates the capacity of changes in the socio-cultural meaning and nature of bodies to resist and/or escape states. Part four, 'Sovereignty and Surveillance', develops themes of deviancy and resistance by considering the impact of new technologies both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. Finally, Part five, 'The Body Virtual', examines the impact of new technologies and online spaces both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. A varied collection of essays that address important and complex topics in a readable and creative way.

**Cultural Political Economy** - Jacqueline Best  
2010-01-21

The global political economy is inescapably cultural. Whether we talk about the economic dimensions of the "war on terror", the sub-prime crisis and its aftermath, or the ways in which new information technology has altered practices of production and consumption, it has become increasingly clear that these processes cannot be fully captured by the hyper-rational analysis of economists or the slogans of class conflict. This book argues that culture is a concept that can be used to develop more subtle and fruitful analyses of the dynamics and problems of the global political economy. Rediscovering the unacknowledged role of culture in the writings of classical political economists, the contributors to this volume reveal its central place in the historical evolution of post-war capitalism, exploring its continued role in contemporary economic processes that range from the commercialization of security

practices to the development of ethical tourism. The book shows that culture plays a role in both constituting different forms of economic life and in shaping the diverse ways that capitalism has developed historically - from its earliest moments to its most recent challenges.

Providing valuable insights to a wide range of disciplines, this volume will be of vital interest to students and scholars of International Political Economy, Cultural and Economic Geography and Sociology, and International Relations.

*Queer Sex Work* - Mary Laing 2015-03-05

Sex work is a subject of significant contestation across academic disciplines, as well as within legal, medical, moral, feminist, political and socio-cultural discourses. A large body of research exists, but much of this focuses on the sale of sex by women to men and ignores other performances, practices, meanings and embodiments in the contemporary sex industry. A queer agenda is important in order to challenge hetero-centric gender norms and to

develop new insights into how gender, sex, power, crime, work, migration, space/place, health and intimacy are understood in the context of commercial sexual encounters. *Queer Sex Work* explores what it might mean to 'be', 'do' and 'think' queer(ly) in the study and practice of commercial sex. It brings together a multiplicity of empirical case studies - including erotic dance venues, online sex working, pornography, grey sexual economies, and BDSM - and offers a variety of perspectives from academic scholars, policy practitioners, activists and sex workers themselves. In so doing, the book advances a queer politics of sex work that aims to disrupt heteronormative logics whilst also making space for different voices in academic and political debates about commercial sex. This unique and multidisciplinary volume will be indispensable for scholars and students of the global sex trade and of gender, sexuality, feminism and queer theory more broadly, as well as policymakers,

activists and practitioners interested in the politics and practice of sex work in local, national and international contexts. *Susan Strange and the Future of Global Political Economy* - Randall Germain 2016-04-28 This edited volume addresses the 2007/2009 financial crisis as the occasion to engage critically with the corpus of Susan Strange's work, in order to consider what changes (if any) this crisis portends for the structural organization of the global political economy. The contributors use Strange's rich conceptual framework to explore the financial crisis and its aftermath, and reflect critically on the broader contributions which her work has made to the discipline of IPE. The volume makes three valuable contributions for scholars and students. First, it raises the profile of Susan Strange, a unique and powerful contributor to the field of IPE whose ideas matter to our current circumstance and can provide deep and enduring insights into important questions and

issues. Secondly, each contributor to this volume combines her work and ideas with that of other traditions or individual theorists in ways that extend and/or deepen Strange's own efforts. Finally, this volume leaves us with a judicious optimism about the future of both IPE and the world as it actually is, on the ground. This book will be of interest to scholars and students who are interested in the dynamics shaping contemporary and future developments in the global political economy, as well as those who are interested in the theoretical debates about how to study IPE.

### **The Politics of European Competition Regulation**

- Hubert Buch-Hansen 2011-03-07

The Politics of European Competition Regulation provides an original and theoretically informed account of the political power struggles that have shaped the evolution of European competition regulation over the past six decades. Applying a critical political economy perspective, this book analyses the establishment and

development of competition regulation at European Community and national level since the 1950s. It puts forth the central argument that competition regulation came to reflect the broader shift towards a neoliberal order since the 1980s. Buch-Hansen and Wigger argue that this shift, which took place against the background of the gradual transnationalisation of capitalist production and the economic crisis of the late 1970s, was driven by the European Commission in alliance with the emerging transnational capitalist class. The authors examine the political responses to the current global economic crisis in the fields of state aid, cartel prosecution and merger control and conclude that an alternative type of competition regulation, which forms part of a much broader transformation of the current socioeconomic order, is needed. This book will be of interest to students and scholars of (global) political economy, European integration and competition law.

**The Global Political Economy of Intellectual Property Rights, 2nd Ed** - Christopher May

2015-04-10

The first edition established itself as one of the leading books to situate the issue of intellectual property within the discipline of International Political Economy (IPE). Since its publication, intellectual property has continued to rise up the global agenda, reflecting expanding interest in the area among policy-makers and advocacy groups, linked to the increasingly fraught politics of the global governance of IPRs. Significantly revised and updated to take account of developments within the World Trade Organization and the World Intellectual Property Organization, this edition incorporates the author's recent research on IPRs. It retains the theoretical and analytical elements of the first edition, whilst offering students and researchers a detailed analysis of how intellectual property is politically constructed, and how it is linked to the economics of knowledge and information in

the contemporary global political economy. Rapidly-developing issues addressed in the work include: arguments around the implementation of the Agreement on Trade Related Aspects of IPRs (TRIPs) the WIPO Development agenda and the 'resistance' to socialization programmes the AIDS crisis and the pharmaceutical industry Digital Rights Management This book will be of interest to students and researchers of international political economy, international relations and intellectual property law.

*The Global Political Economy of Trade Protectionism and Liberalization* - Tony Heron

2012-06-25

Given the widely-accepted premise that free trade is the best means of maximising overall societal welfare, why has it proven so difficult to achieve in certain industries? This book tackles arguably the most perennial and deep-rooted of all questions in political economy, and questions the incumbent orthodox liberal theories of collective action. Using a historical

institutionalist framework to explore and explain the political economy of trade protectionism and liberalization, this book is based on detailed case studies of the textiles and clothing sector in the EU, United States, China, Caribbean Basin and sub-Saharan Africa. From this, the book expands to discuss the origins of trade protectionism and examine the wider political effects of liberalization, offering an explanation of why a successful conclusion to the WTO 'Doha' round has proven to be so elusive. The book argues that the regulation of global trade - and the economic consequences that this has for both developed and developing countries - has been the result of the particular way in which trade preferences are mediated through political institutions. The Global Political Economy of Trade Protectionism and Liberalization will be of interest to those studying and researching international and comparative political economy, developing area studies, economics, law and geography.

### **The Political Economy of Global Remittances** - Rahel Kunz 2011-06-09

Over the last decade, a new phenomenon has emerged within the international community: the Global Remittances Trend (GRT). Thereby, government institutions, international (financial) organisations, NGOs and private sector actors have become interested in migration and remittances and their potential for poverty reduction and development, and have started to devise institutions and policies to harness this potential. This book employs a gender-sensitive governmentality analysis to trace the emergence of the GRT, to map its conceptual and institutional elements, and to examine its broader implications. Through an analysis of the GRT at the international level, combined with an in-depth case study on Mexico, this book demonstrates that the GRT is instrumental in spreading and deepening specific forms of gendered neoliberal governmentality. This innovative book will be of interest to students

**Gender and Global Restructuring** - Marianne H. Marchand 2010-09-13

In this new edition of this best selling text, interdisciplinary feminist experts from around the world provide new analyses of the ongoing relationship between gender and neoliberal globalization under the new imperialism in the post-9/11 context. Divided into Sightings, Sites and Resistances, this book examines: the disciplining politics of race, sexuality and modernity under securitized globalization, including case studies on domestic workers in Hong Kong heteronormative development policies and responses to the crisis of social reproduction and colonizing responses to AIDS in sub-Saharan Africa migration, human rights and citizenship, including studies on remittances, the emergence of neoliberal

subjectivities among rural Mexican women, Filipina migrant workers and women's labor organizing in the Middle East and North Africa feminist resistance, incorporating the latest scholarship on transnational feminism and feminist critical globalization movement activism, including case studies on men's violence on the Mexico/US border, pan-indigenous women's movements and cyberfeminism. Providing a coherent and challenging approach to the issues of gender and the processes of globalization in the new millennium, this important text will be of interest to students and scholars of IPE, international relations, economics, development and gender studies.

Handbook of Research on Present and Future Paradigms in Human Trafficking - Essien, Essien D. 2022-05-20

Human trafficking is currently regarded as a contemporary form of slavery. However, despite many initiatives undertaken over the last two

decades to tackle the problem, there seems to be a disproportionate emphasis on the social phenomenon. Trafficking in persons remains a little-explored area in scholarship with many inconsistencies and ambiguities yet to be attended to. Human trafficking is a multifaceted issue that requires a multidisciplinary approach that must be studied and considered thoroughly and with heavy regard to the many layers of the issue. The Handbook of Research on Present and Future Paradigms in Human Trafficking presents a comprehensible view of what constitutes the underpinning of human trafficking, the means of combating it, its moral implications, and offers possible solutions toward curbing its excesses, inconsistencies, and ambiguities. Covering a range of topics such as social change, human rights, and ethics, this major reference work is ideal for researchers, scholars, practitioners, government officials, policymakers, instructors, academicians, and students.

*Dangerous Sex, Invisible Labor* - Prabha

Kotiswaran 2011-07-25

Popular representations of third-world sex workers as sex slaves and vectors of HIV have spawned abolitionist legal reforms that are harmful and ineffective, and public health initiatives that provide only marginal protection of sex workers' rights. In this book, Prabha Kotiswaran asks how we might understand sex workers' demands that they be treated as workers. She contemplates questions of redistribution through law within the sex industry by examining the political economies and legal ethnographies of two archetypical urban sex markets in India. Kotiswaran conducted in-depth fieldwork among sex workers in Sonagachi, Kolkata's largest red-light area, and Tirupati, a temple town in southern India. Providing new insights into the lives of these women--many of whom are demanding the respect and legal protection that other workers get--Kotiswaran builds a persuasive theoretical case for recognizing these women's sexual labor.

Moving beyond standard feminist discourse on prostitution, she draws on a critical genealogy of materialist feminism for its sophisticated vocabulary of female reproductive and sexual labor, and uses a legal realist approach to show why criminalization cannot succeed amid the informal social networks and economic structures of sex markets. Based on this, Kotiswaran assesses the law's redistributive potential by analyzing the possible economic consequences of partial decriminalization, complete decriminalization, and legalization. She concludes with a theory of sex work from a postcolonial materialist feminist perspective.

*The Industrial Vagina* - Sheila Jeffreys

2008-11-19

The industrialization of prostitution and the sex trade has created a multibillion-dollar global market, involving millions of women, that makes a substantial contribution to national and global economies. *The Industrial Vagina* examines how prostitution and other aspects of the sex

industry have moved from being small-scale, clandestine, and socially despised practices to become very profitable legitimate market sectors that are being legalised and decriminalised by governments. Sheila Jeffreys demonstrates how prostitution has been globalized through an examination of: the growth of pornography and its new global reach the boom in adult shops, strip clubs and escort agencies military prostitution and sexual violence in war marriage and the mail order bride industry the rise in sex tourism and trafficking in women. She argues that through these practices women's subordination has been outsourced and that states that legalise this industry are acting as pimps, enabling male buyers in countries in which women's equality threatens male dominance, to buy access to the bodies of women from poor countries who are paid for their sexual subservience. This major and provocative contribution is essential reading for all with an interest in feminist, gender and

Debtfare States and the Poverty Industry -

Susanne Soederberg 2014-09-19

WINNER of the BISA IPEG Book Prize 2015

<http://www.bisa-ipeg.org/ipeg-book-prize-2015-winner-announced/>

Under the rubric of 'financial inclusion', lending to the poor -in both the global North and global South -has become a highly lucrative and rapidly expanding industry since the 1990s. A key inquiry of this book is what is 'the financial' in which the poor are asked to join. Instead of embracing the mainstream position that financial inclusion is a natural, inevitable and mutually beneficial arrangement, Debtfare States and the Poverty Industry suggests that the structural violence inherent to neoliberalism and credit-led accumulation have created and normalized a reality in which the working poor can no longer afford to live without expensive credit. The book further transcends economic treatments of credit and

debt by revealing how the poverty industry is extricably linked to the social power of money, the paradoxes in credit-led accumulation, and 'debtfarism'. The latter refers to rhetorical and regulatory forms of governance that mediate and facilitate the expansion of the poverty industry and the reliance of the poor on credit to augment/replace their wages. Through a historically grounded analysis, the author examines various dimensions of the poverty industry ranging from the credit card, payday loan, and student loan industries in the United States to micro-lending and low-income housing finance industries in Mexico. Providing a much-needed theorization of the politics of debt, Debtfare States and the Poverty Industry has wider implications of the increasing dependence of the poor on consumer credit across the globe, this book will be of very strong interest to students and scholars of Global Political Economy, Finance, Development Studies, Geography, Law, History, and Sociology.

Watson 2008-12-11

This pioneering volume argues for the inclusion of children, and the structure known as 'childhood', as a permanent social category worthy of continued study within the discipline of international political economy (IPE). Fundamentally, and very simply, IPE is concerned with the dynamics of interaction across the economic and political domains; the

relationship between the domestic and the international levels of analysis, and the role of the state. This book presents a convincing argument for the discussion of children within each of these areas. This volume:

- provides the first book length examination of the child within IPE
- draws on work from a variety of disciplines
- brings rich analyses to debates about the role of the child in society

Contributing insights that may be fundamental to the development of IPE as a discipline, *The Child in International Political Economy* will be vital reading to students and scholars of IPE, Childhood Studies, and International Relations.

**Handbook of the International Political Economy of Production** - Kees van der Pijl  
2015-01-30

This Handbook provides a state-of-the-art overview of the changing world of global production. Chapters cover the geography of why and where jobs are moving in both manufacturing and services. The authors discuss

topics relating to the human and natura

**The International Political Economy of Transition** - Stuart Shields 2014-10-03  
Shortlisted for the 2013 BISA IPEG Book Prize, this book explores how Eastern Europe's post-communist transition can only be understood as part of a broader interrogation of neoliberal hegemony in the global political economy, and provides a detailed historical account of the emergence of neoliberalism in Eastern Central Europe. Adopting an innovative Gramscian approach to post-communist transition, this book charts the rise to hegemony of neoliberal social forces. Using transition in Poland as a starting point, the author traces how particular social forces most intimately associated with transnational capital successful in the struggle over competing reform strategies. Transition is broken down into three stages; the "first wave" illustrates how the rise of particular social forces shaped by global change gave rise to a neoliberal strategy of capitalism from the 1970s.

It goes on to show how the political economy of Europeanization, associated with EU enlargement instilled a "second wave" of neoliberalisation. Finally, exploring recent populist and left wing alternatives in the context of the current financial crisis, the book outlines how counter-hegemonic struggle might oppose a "third wave" neoliberalisation. The International Political Economy of Transition will be of interest to students and scholars of international political economy, post-communist studies and European politics

*The Political Economy of Global Capitalism and Crisis* - Bill Dunn 2014-03-21

The book provides a theoretically and historically informed analysis of the global economic crisis. It makes original contributions to theories of value, of crisis and of the state and uses these to develop a rich empirical study of the changing character of capitalism in the twentieth century and beyond. It defends, uses

and develops Marxist theory while arguing particularly against jumping too quickly from abstract concepts to a concrete understanding of the crisis. Instead, it uses what Marx described in his notebooks as an 'obvious' analytical ordering to progress from a general analysis of economy and society to a discussion of recent economic transformations and the specifics of the crisis and its aftermath. Dunn argues that appropriately reconceived, a critical Marxism can incorporate and enrich rather than rejecting insights from other traditions. He disputes general characterisations of capitalism to the crisis and theories which see finance and the contemporary financial crises as largely detached from other aspects of the economy and society. Providing a thoroughly socialised and historically based account, this book will be vital reading for students and scholars of political economy, international political economy, Marxism, sociology, geography and development studies.
