**Creating Connection** - Judith V. Jordan 2014-05-01  
Relational-Cultural Therapy (RCT) is developed to accurately address the relational experiences of persons in de-valued cultural groups. As a model, it is ideal for work with couples: it encourages active participation in relationships, fosters the well-being of everyone involved, and acknowledges that we grow through and toward relationships throughout the lifespan. Part and parcel with relationships is the knowledge that, whether intentionally or not, we fail each other, misunderstand each other, and hurt each other, causing an oftentimes enduring disconnect. This book helps readers understand the

pain of disconnect and to use RCT to heal relationships in a variety of settings, including with heterosexual couples, lesbian and gay couples, and mixed race couples. Readers will note a blending of approaches (person-centered, narrative, systems, and feminist theory), all used to change the cultural conditions that can contribute to problems: unequal, sometimes abusive power arrangements, marginalization of groups, and rigid gender, race, and sexuality expectations. Readers will learn to help minimize economic and power disparities and encourage the growth of mutual empathy while looking at a variety of relational challenges, such as parenting, stepfamilies, sexuality, and

**Connection** - Judith V. Jordan  
2004-04-23

In this important third volume from the Stone Center at Wellesley College, founding scholars and new voices expand and deepen the Center's widely embraced psychological theory of connection as the core of human growth and development. Demonstrating the increasing sophistication of Relational-Cultural Theory (RCT), the volume presents an absorbing and practical examination of connection and disconnection at both individual and societal levels. Chapters explore how experiences of race, ethnicity, sexual orientation, class, and gender influence relationships, and how people can connect across difference and disagreement. Also discussed are practical implications of the theory for psychotherapy, for the raising of sons, and for workplace and organizational

### Transforming the Disciplines -

Renee P Prys 2013-10-31

A jargon-free, non-technical, and easily accessible introduction to women's studies! All too many students enter academia with the hazy idea that the field of women's studies is restricted to housework, birth control, and Susan B. Anthony. Their first encounter with a women's studies textbook is likely to focus on the history and sociology of women's lives.

While these topics are important, the emphasis on them has led to neglect of equally important issues.

*Transforming the Disciplines: A Women's Studies Primer* is one of the first women's studies textbooks to show feminist scholarship as an active force, changing the way we study such diverse fields as architecture, bioethics, history, mathematics, religion, and sports studies. Although this text was designed as an introduction to women's studies, it is also rewarding for upper-level or graduate

students who want to understand the pervasive effects of feminist theory. Most chapters provide a bibliography or list of further reading of significant works. Its clear, jargon-free prose makes feminist thought accessible to general readers without sacrificing the revolutionary power of its ideas. In almost thirty essays, covering a broad range of subjects from anthropology to chemistry to rhetoric, *Transforming the Disciplines* exemplifies the changes achieved by feminist thought. *Transforming the Disciplines*: combines a high standard of writing and scholarship with personal insight includes both traditional academic arguments and alternative, non-agonistic forms of discussion embraces an international scope challenges traditional assumptions, models, and methodologies offers an inter- and multidisciplinary approach strengthens readers' understanding of the big picture not only for women

but for all disempowered groups critiques feminism as well as patriarchal society Feminist theory is grounded in a questioning of traditional assumptions about what is right, natural, and self-evident, not just about the roles and nature of men and women but about how we think, what we teach, whose experience matters, and what is important. *Transforming the Disciplines* is the first textbook to show the consequences of those questions -- not the answers themselves, but the consequences of the willingness to ask and the transformations that have occurred when the "right" answers changed.

Association. This volume, through a series of diverse approaches and considerations, has dispelled for all time the monolithic notion that dual relationships are always harmful and should be avoided...remarkable and refreshing. -- Nicholas A. Cummings, PhD, ScD, Former President., American Psychological Association This book, the first of its kind, covers the clinical, ethical and legal aspects of non-sexual dual relationships. It provides detailed guidelines on how to navigate the complexities of intended and unintended crossings of the boundaries of the therapeutic relationship. Contributors representing various therapeutic approaches and work settings challenge the prevailing interpretations of ethical standards as presented by the American Psychological and the American Counseling Associations' Code of Ethics. Through case examples, they demonstrate how non-sexual dual relationships may result in increased trust, familiarity, and

therapeutic effectiveness. Discussions include concerns of rural, military, church, hearing impaired and other small communities; behavioral, cognitive, humanistic, and feminist views on DR; and more. This is a book for all practicing therapists.

Appendices contain guidelines to nonsexual dual relationships in psychotherapy.

### **The Role of Sisters in Women's Development** - Sue A. Kuba 2011-04

Psychological theory has traditionally overlooked or minimized the role of siblings in development, focusing instead on parent-child attachment relationships. The importance of sisters has been even more marginalized. Sue A. Kuba explores this omission in *The Role of Sisters in Women's Development*, seeking to broaden and enrich current understanding of the psychology of women. This unique work is distinguished by Kuba's phenomenological method of research, rooted in a single prompt: "Tell me about your relationship with your

sister." Rich in detail, the responses (many of which are reproduced at length within the book) provide a complex picture of sister relationships across the lifespan. Integrating these stories with current literature about gender and family composition for sisters of difference (disabled and lesbian sisters) and ethnic sisters, this book provides useful recommendations for therapeutic understanding of the significance of sisters in everyday life, integrating diverse perspectives in order to address the ways clinicians can enhance psychological work with women clients. A valuable contribution to the field of mental health, *The Role of Sisters in Women's Development* is highly recommended for therapists who wish to broaden their inquiry into the sister connection, as well as anyone who wants to further understand the importance of sisterhood.

Theory: Guiding Reflective Practice, by Richard D. Parsons and Naijian Zhang, presents theory as an essential component to both counselor identity formation and professional practice. Drawing on the contributions of current practitioners, the text uses both classical and cutting-edge theoretical models of change as lenses for processing client information and developing case conceptualizations and intervention plans. Each chapter provides a snapshot of a particular theory/approach and the major thinkers associated with each theory as well as case illustrations and guided practice exercises to help readers internalize the content presented and apply it to their own development as counselors.

research and psychotherapy - women with serious mental illnesses (i.e., schizophrenia, severe depression, bipolar disorder, and complex posttraumatic stress disorder). *Women with Serious Mental Illness* focuses on the history of mistreatment, marginalization, and oppression they have encountered in the general public and within the mental health system. This book provides an overview of recovery-oriented care for women with serious mental illness - a process of seeking hope, empowerment, and self-determination beyond the effects of mental illness. Chapters provide a historical overview of the treatment of women with mental illness, their resilience and recovery experiences, as well as issues pertaining to relationships, work, class, culture, trauma, and sexuality. This book also offers the new model of Gender-Sensitive and Recovery Oriented Care (G-ROC) for working with this group from a gender-sensitive framework. The book is a useful tool for

mental health educators and providers, with each chapter containing case studies, clinical strategies lists, discussion questions, experiential activities, diagrams, and worksheets that can be completed with clients, students, and peers"--  
Feminist Therapy with Latina Women - Debra M. Kawahara 2013-10-18  
*Feminist Therapy with Latina Women* highlights the principles of feminist and multicultural counselling and therapy with Latinas and Latin American women, providing both theoretical approaches and applied frameworks. The authors are all experienced therapists and researchers with a deep understanding of the issues relevant to this particular population. In presenting their expertise, they discuss individual concerns and social context, applying it concretely to the personal and collective lives of Latina women. Chapters focus on the intersecting principles of feminism and multiculturalism, providing a much needed

### **Counseling the Contemporary Woman -**

Suzanne Degges-White  
2020-05-22

This book provides a comprehensive exploration of the challenges women may face as they navigate the multiple roles that they carry. Attention is given to the unique cultural identities that women embody and suggestions are provided to help counselors acknowledge the various aspects of each client's intersectional identity. In addition to theory, we provide suggestions for practical application of relevant interventions and strategies for helping women achieve their goals. A foundation is provided that explores the multiple layers of development that occur during adolescence, adulthood, midlife, and older adulthood. Women face numerous challenges related to identity development and relationships.

These challenges can generate psychological and emotional distress that lead women to seek professional assistance in finding solutions to their issues. With more choices than in generations past, women can face unexpected and unanticipated challenges and barriers to their individual and relational development. This book is organized around contemporary developmental and relational rites of passage women experience in adulthood. Traditional rites of passage include birth, menarche, marriage, and death. These events still hold significance but women's lives today follow expanded and complex trajectories. Numerous transitions, such as attending college, navigating employment opportunities and the relational challenges that women face in various areas of life, are presented and addressed in this book from a clinician's perspective providing practitioners with insight and practical knowledge. In this book, we cover choices related to such

topics as career, relationships, parenthood, and support networks. We also explore the struggles that women face including abuse, depression, anxiety, feelings of low self-worth, loss, and addictions. Best practices in counseling women are highlighted and utilized in case study examples. The relationships created by women impact their lives and this book helps the reader to gain insight into how women can take ownership for their relationships and choices. Cases on Cross-Cultural Counseling Strategies - King, Bonnie C. 2019-08-30 It is essential for counselors and counseling professionals to understand the impact of their personal biases and how these biases can impact the counseling process, in addition to respecting and honoring the beliefs of their clients. Communication and the sharing of experiences between counsellors is an effective strategy for perfecting methods to identify and address these biases. comprehensive research book that explores creative healing approaches used by counselors working with diverse clients in a variety of geographical locations, developmental levels, and complex and varied identities. Each case study applies the Multicultural and Social Justice Counseling Competencies (MSJCCs) to the counseling relationship and looks at unique aspects of the client's identity, specific approaches taken by the counselor, and the outcomes of the counseling relationship. Featuring a broad range of topics such as higher education, international counseling, and gender bias in counseling, this book is ideal for counselors, therapists, psychologists, counselor educators, graduate students, practitioners, academicians, and researchers.

*The Power of Connection* - Judith V. Jordan 2013-09-13  
Relational-Cultural theory (RCT) proposes that all people grow through and toward relationships throughout the lifespan. RCT challenges

**In Therapy And In Life**  
~~prevailing theories that depict~~ the "separate self" as the hallmark of maturity. Rather than movement toward autonomy and separation, RCT suggests we develop ever more differentiated ways of connecting. An increase in growth-fostering relationships results in: a sense of vitality and zest; increasing clarity about ourselves and others; augmented creativity and ability to take action; an experience of worth and empowerment; and a desire for more connectedness with others. Disconnections are inevitable in relationships and RCT focuses on relational resilience, the ways people can re-establish positive and growth-fostering relationships. RCT further emphasizes the importance of cultural and societal forces in causing either growth-fostering connection or destructive disconnection. This volume explores the process of change in therapy and in other relationships; how race and other forms of stratification create pain; and how people

develop resilience and strength in relationships characterized by mutuality. This book was based on a special issue of *Women and Therapy*. *Pray Without Ceasing* - Deborah van Deusen Hunsinger 2006-08-10 Taking seriously Paul's exhortation in 1 Thessalonians to pray without ceasing, Deborah van Deusen Hunsinger challenges pastors and congregations to put prayer at the center of their Christian practice and theological reflection. In this thought-provoking book Hunsinger reclaims spiritual practices from token use and unites them in a dynamic network of interdependent caring traditions. The book begins with the three foundational disciplines of spiritual reading, careful listening, and self-reflection. Hunsinger then explores prayers of petition, intercession, confession, lament, and thanksgiving. Finally she offers practical, workable suggestions for developing pastoral care

groups and teaching caregiving skills at the congregational level. Clergy and laity alike will reap the benefits of this revitalizing look at the spiritual disciplines as dynamic forces in the life of the church.

*The Healing Connection* - Jean Baker Miller 1997-10-30 In this wonderfully readable book, Jean Baker Miller & Irene Stiver argue that relationships are the integral source of psychological health. They offer a new understanding of human development that points a way to change in all our institutions -- work, community, school, & family -- & is sure to transform lives. Miller & Stiver, both legendary therapists, discuss how we form & sustain intimate relationships through crises, frailties, betrayals, deep disagreements & long arid stretches. They provide a useful lens through which to view our atomistic culture & the therapeutic process. They have added chapter & verse documenting the importance of connection for women. Reading
