

# Why We Love Dogs Eat Pigs And Wear Cows An Introduction To Carnism

**Why We Love and Exploit Animals** - Kristof Dhont 2019-11-08

This unique book brings together research and theorizing on human-animal relations, animal advocacy, and the factors underlying exploitative attitudes and behaviors towards animals. Why do we both love and exploit animals? Assembling some of the world's leading academics and with insights and experiences gleaned from those on the front lines of animal advocacy, this pioneering collection breaks new ground, synthesizing scientific perspectives and empirical findings. The authors show the complexities and paradoxes in human-animal relations and reveal the factors shaping compassionate versus exploitative attitudes and behaviors towards animals. Exploring topical issues such as meat consumption, intensive farming, speciesism, and effective animal advocacy, this book demonstrates how we both value and devalue animals, how we can address animal suffering, and how our thinking about animals is connected to our thinking about human intergroup relations and the dehumanization of human groups. This is essential reading for students, scholars, and professionals in the social and behavioral sciences interested in human-animal relations, and will also strongly appeal to members of animal rights organizations, animal rights advocates, policy makers, and charity workers.

**Beyond Beliefs** - Melanie Joy 2018-03-15

Vegans, vegetarians, and meat eaters can feel like they're living in different worlds. Many vegans and vegetarians struggle to feel understood and respected in a meat-eating culture, where some of their most pressing concerns and cherished beliefs are invisible, and where they are often met with defensiveness when they try to talk about the issue. They can become frustrated and struggle to feel connected with meat eaters. And meat eaters can feel disconnected from vegans and vegetarians whose beliefs they don't fully understand and whose frustration may spill over into their interactions. The good news is that relationship and communication breakdown among vegans, vegetarians, and meat eaters is not inevitable, and it is reversible. With the right tools, healthy connections can be cultivated, repaired, and even strengthened. In *Beyond Beliefs*, internationally recognized food psychology expert and longtime relationship coach Dr. Melanie Joy provides easy-to-understand, actionable advice so you can:

- Learn the principles and tools for creating healthy relationships
- Understand how to communicate about even the most challenging topics effectively
- Recognize how the psychology of being vegan/vegetarian or of being a meat eater affects your relationships with others, and with yourself

**Encyclopedia of Food and Agricultural Ethics** - David M. Kaplan 2014-12-12

This Encyclopedia offers a definitive source on issues pertaining to the full range of topics in the important new area of food and agricultural ethics. It includes summaries of historical approaches, current scholarship, social movements, and new trends from the standpoint of the ethical notions that have shaped them. It combines detailed analyses of specific topics such as the role of antibiotics in animal production, the Green Revolution, and alternative methods of organic farming, with longer entries that summarize general areas of scholarship and explore ways that they are related. Renewed debate, discussion and inquiry into food and agricultural topics have become a hallmark of the turn toward more sustainable policies and lifestyles in the 21st century. Attention has turned to the goals and ethical rationale behind production, distribution and consumption of food, as well as to non-food uses of cultivated biomass and the products of animal husbandry. These wide-ranging debates encompass questions in human nutrition, animal rights and the environmental impacts of aquaculture and agricultural production. Each of these and related topics is both technically complex and involves an – often implicit – ethical dimension. Other topics include methods for integrating ethics into scientific and technical research programs or development projects, the role of intensive agriculture and biotechnology in addressing persistent world hunger and the role of crops, forests and engineered organisms in making a transition to renewable, carbon-neutral sources of energy. The Encyclopedia of Food and Agricultural Ethics proves an indispensable reference point for future research and writing on topics in agriculture and food ethics for decades to come.

*Why We Love Dogs, Eat Pigs, and Wear Cows* - Melanie Joy 2020-08

"An important and groundbreaking contribution to the struggle for the welfare of animals." -- Yuval Harari, New York Times best-selling author of *Sapiens: A Brief History of Humankind* The book offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows*, Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever. "An absorbing examination of why humans feel affection and compassion for certain animals but are callous to the suffering of others." - Publishers Weekly "I think Gandhi would have loved *Why We Love Dogs, Eat Pigs, and Wear Cows*. For this is a book that can change the way you think and change the way you live. It will lead you from denial to awareness, from passivity to action, and from resignation to hope." - John Robbins, author of *Diet for a New America* and *The Food Revolution*

**Why We Love Dogs** - Kim Levin 1998-09

This endearing gift book celebrates the unique connection between dogs and their human companions. There are reasons dogs are our best friends: They are loyal, affectionate, and totally committed to us. Or as photographer/writer Kim Levin puts it: "Because they look us in the eye." "Because they have wrinkles, too." "Because they are family." In this charming book, Levin artfully combines photographs with simple, insightful prose; the result is an ode that celebrates the wonders of dogs. Soulful beagle eyes. A grinning hound luxuriating in the sun. In these poignant photos, Levin captures each dog's essence and illuminates the myriad reasons why we love dogs. In America alone, 40 million people own more than 50 million dogs. Of those dedicated dog owners, about 13 million Americans say they're as attached to their dogs as they are to their best friends; some six million people rank their dogs right up there with their children. That's why everyone who has ever cherished a beloved dog—whether large or small, pure-bred or mutt—will delight in this book filled with heartwarming words and pictures to commemorate their special closeness.

**This Is Vegan Propaganda** - Ed Winters 2022-01-06

Our choices can help alleviate the most pressing issues we face today: the climate crisis, infectious and chronic diseases, human exploitation and, of course, non-human exploitation. Undeniably, these issues can be uncomfortable to learn about but the benefits of doing so cannot be overstated. It is quite literally a matter of life and death. Through exploring the major ways that our current system of animal farming affects the world around us, as well as the cultural and psychological factors that drive our behaviours, *This Is Vegan Propaganda* answers the pressing question, is there a better way? Whether you are a vegan already or curious to learn more, this book will show you the other side of the story that has been hidden for far too long. Based on years of research and conversations with slaughterhouse workers and farmers, to animal rights philosophers, environmentalists and everyday consumers, vegan educator and public speaker Ed Winters will give you the knowledge to understand the true scale and enormity of the issues at stake. *This Is Vegan Propaganda* is the empowering and groundbreaking book on veganism that everyone, vegan and sceptic alike, needs to read.

**Ethical Vegan** - Jordi Casamitjana 2020-12-03

'Powerful and poignant.' Virginia McKenna OBE, Born Free Ethical veganism is not just a diet. Not just an opinion; nor a trend. This is a 21st-century revolution which began more than twenty centuries ago. Ethical veganism is not only about the food you choose to consume, it is a coherent philosophical belief that affects most areas of your life, and which could be the answer to today's global crises. Jordi Casamitjana is the vegan zoologist and animal protection campaigner whose landmark

Employment Tribunal in 2020 made ethical veganism a protected belief in Great Britain. Ethical Vegan describes Jordi's extraordinary life and the animal encounters which led him to veganism and legal victory. It debunks myths and dispels preconceptions, offering a comprehensive analysis of veganism as a philosophy and as a socio-political transformative movement. Taking in history, science and everyday living, it explores how it is possible to dress ethically, travel, consume and work responsibly and, of course, eat well without compromising vegan ethics. Ethical Vegan is a riveting read - Jordi Casamitjana argues passionately for humans to interact with the world in a positive and compassionate way. This thought-provoking manifesto for doing no harm has the power to open people's minds and help to achieve a better future for all living things and the planet. As informative as it is incisive, as inspiring as it is inviting, this book will become one of the stand-out pieces of literature in the animal liberation movement. A must read whether you are vegan, vegetarian or otherwise!' Jay Brave

Why We Love Dogs, Eat Pigs, and Wear Cows - Melanie Joy 2019-06

The book offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows* Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever. \* \* \* "An absorbing examination of why humans feel affection and compassion for certain animals but are callous to the suffering of others."--Publishers Weekly "I think Gandhi would have loved *Why We Love Dogs, Eat Pigs, and Wear Cows*. For this is a book that can change the way you think and change the way you live. It will lead you from denial to awareness, from passivity to action, and from resignation to hope." --John Robbins, author of *Diet for a New America* and *The Food Revolution* "An altogether remarkable book that could transform the way society feels about eating animals." --Jeffrey Moussaieff Masson, author of *The Face on Your Plate* **How to Create a Vegan World** - Leenaert, Tobias 2017-07-05

Why We Love Dogs, Eat Pigs, and Wear Cows - Melanie Joy 2011-09-01

In this paperback edition is a foreword by activist and author John Robbins and a reader's group study guide. This ground-breaking work, voted one of the top ten books of 2010 by VegNews Magazine, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. *Some We Love, Some We Hate, Some We Eat [Second Edition]* - Hal Herzog 2021-12-07

A maverick scientist who co-founded the field of anthrozoology offers a controversial, thought-provoking, and unprecedented exploration of the psychology behind the inconsistent and often paradoxical ways we think, feel, and behave towards animals. How do we reconcile our love for cats and dogs (and rabbits, snakes, hamsters, gerbils, and goldfish) with our appetite for hamburgers and chicken breast and our use of medications that have been tested on lab mice? Why do so many of us—as meat eaters, recreational hunters and fishermen, and visitors of zoos and circuses—take the moral high ground when it comes to condemning activities like cockfighting? And why are dogs considered pets in America but dinner in Korea? With *Some We Love, Some We Hate, Some We Eat*, Hal Herzog offers a lively and deeply intelligent look inside our complex and often paradoxical relationships with animals. Drawing on over two decades of research in the interdisciplinary field of anthrozoology, the science of human-animal relations, Herzog examines the moral and ethical decisions we all face when it comes to the furry and feathered creatures with whom we share this planet. Alternately poignant and laugh-out-loud funny, *Some We Love, Some We Hate, Some We Eat* takes readers on a highly entertaining and illuminating journey through the full spectrum of human-animal relations, relating Dr. Herzog's groundbreaking research on animal rights activists, cockfighters, professional dog show handlers, veterinary students, biomedical researchers, and circus animal trainers. Through psychology, history, biology, sociology, cross-cultural analysis, current animal rights debates, and the morality and ethics surrounding the use and abuse of animals, Herzog carefully crafts a seamless narrative composed of real life anecdotes, academic and scientific research, cross-cultural examples, and his own sense of moral confusion. Combining the intellectual rigor of Michael Pollan's *The Omnivore's Dilemma* with the wry observation of Bill Bryson's *A Walk in the Woods*, Herzog offers a refreshing new perspective on our lives with animals—one that will forever change the way we look at our relationships with other creatures and, in so doing, will also change the way we look at ourselves.

The Sexual Politics of Meat - Carol J. Adams 2000-01-01

New Tenth Anniversary edition of this classic text with a new preface by the author, compares myths about meat-eating with myths about manliness, and seeks to explore the literary, scientific, and social connections between meat-eating, male dominance, and war.

**Strategic Action for Animals** -

**Getting Relationships Right** - Melanie Joy 2020-01-29

Relationships are complicated. Yet it's an unfortunate reality that while most of us have to learn complex geometry that we'll probably never use, we don't get a single formal lesson in how to relate to others. In this one-stop guide, psychologist Melanie Joy reveals the common psychological dynamics that underlie all kinds of relationships—with a romantic partner, friends, family members, colleagues—in short, with anyone in any situation. Understanding these dynamics will help you make all your relationships healthier and more resilient. Relationships are like bodies: they get sick when their immune system is weaker than the germs that stress them. Drawing on the most relevant research as well as on her own extensive experience as a psychologist, Joy explains how to strengthen your relational immune system to resist not only interpersonal stressors but also largely invisible yet potentially devastating societal stressors like racism and sexism. With this understanding, you can cultivate relationships that consistently reflect core moral values and honor the dignity of everyone involved. Resilient relationships are not only a source of joy and fulfillment for those who are in them, they also support the thriving of the organizations and communities of which we all are a part.

*Powerarchy* - Melanie Joy 2019-09-03

Harvard-educated psychologist and bestselling author Melanie Joy exposes the psychology that underlies all forms of oppression and abuse and the belief system that gives rise to this psychology—which she calls powerarchy. Melanie Joy had long been curious as to why people who were opposed to one or more forms of oppression—such as racism, sexism, speciesism, and so forth—often stayed mired in many others. She also wondered why people who were working toward social justice sometimes engaged in interpersonal dynamics that were unjust. Or why people who valued freedom and democracy might nevertheless vote and act against these values. Where was the disconnect? In this thought-provoking analysis, Joy explains how we've all been deeply conditioned by the invisible system of powerarchy to believe in a hierarchy of moral worth—to view some individuals and groups as either more or less worthy of moral consideration—and to treat them accordingly.

Powerarchy conditions us to engage in power dynamics that violate integrity and harm dignity, and it creates unjust power imbalances among social groups and between individuals. Joy describes how powerarchies—both social and interpersonal—perpetuate themselves through cognitive distortions, such as denial and justification; narratives that reinforce the belief in a hierarchy of moral worth; and privileges that are granted to some and not others. She also provides tools for transformation. By illuminating powerarchy and the psychology it creates, Joy helps us to work more fully toward transformation for ourselves, others, and our world.

**Every Twelve Seconds** - Timothy Pachirat 2011-11-18

The author relates his experiences working five months undercover at a slaughterhouse, and explores why society encourages this violent labor yet keeps the details of the work hidden.

*Why We Love Dogs, Eat Pigs, and Wear Cows* - Melanie Joy 2020-08-01

An Introduction to Carnism. "An important and groundbreaking contribution to the struggle for the welfare of animals." — Yuval Harari, New York Times best-selling author of *Sapiens: A Brief History of Humankind* "An absorbing examination of why humans feel affection and compassion for certain animals but are callous to the suffering of others." — Publishers Weekly *Why We Love Dogs, Eat Pigs, and Wear Cows* offers an absorbing look at what social psychologist Melanie Joy calls carnism, the belief system that conditions us to eat certain animals when we would never dream of eating others. Carnism causes extensive animal suffering and global injustice, and it drives us to act against our own interests and the interests of others without fully realizing what we are doing. Becoming aware of what carnism is and how it functions is vital to personal empowerment and social transformation, as it enables us to make our food choices more freely—because without awareness, there is no free choice.

**Mind If I Order the Cheeseburger** - Sherry F. Colb 2013-06-18

What about plants? Don't animals eat other animals? There are no perfect vegans, so why bother? If you're vegan, how many times have you been asked these, and other similarly challenging, questions from non-vegans? Using humor and reason, Sherry F. Colb takes these questions at face value and also delves deeply into the motivations behind them, coming up with answers that are not only intelligent but insightful about human nature. Through examples, case studies, and clear-eyed logic, she provides arguments for everything from why veganism is compatible with the world's major religions to why vegetarianism is not enough. In the end, she shows how it is possible for vegans and non-vegans to engage in a mutually beneficial conversation without descending into counterproductive name-calling, and to work together to create a more hospitable world for human animals and non-human animals alike. "A rare fusion of passion and logic, idealism and pragmatism, style and substance, and—in its measured confrontation of the most challenging questions vegans face—a revolutionary guide for advocates seeking to engage the ethics of eating animals through authentic dialogue rather

than bombastic rhetoric. Colb's literary touch is something to behold. She writes in a way that will appeal to non-vegans and vegans alike, building bridges across an all too turbulent divide. This is food writing at its best and food writing as it should be: honest, inclusive, inspirational, and, more than you might imagine, timely."--James McWilliams, Professor of History, Texas State University, San Marcos, and author of *Just Food and The Politics of the Pasture* "With compassion, humor, and eloquence, Sherry Colb provides a clear and engaging account of what motivates vegans to eat and live the way we do. A must-read for anyone who has ever wondered (or been asked) 'Why do vegans think it is okay to kill plants but not animals?' or 'Why avoid dairy and eggs?'"--Rory Freedman, New York Times bestselling co-author of *Skinny Bitch* and author of *Beg* "Sherry Colb provides thoughtful, articulate, intelligent answers to the commonly asked questions faced by every vegan.

Intertwining information, reason, and her own personal experience, Colb offers an invaluable aid both for those answering the questions and for those posing them. The perfect companion "--Colleen Patrick-Goudreau, bestselling author and creator of *The 30-Day Vegan Challenge* "A powerful, compelling, and thoroughly engaging defense of veganism from an absolutely terrific legal scholar."--Gary L. Francione, Board of Governors Professor of Law and Katzenbach Distinguished Scholar of Law and Philosophy, Rutgers University, author of *Introduction to Animal Rights: Your Child or the Dog?* "With crystal clear logic and an empathic voice, Sherry Colb has written a must-read source for anyone curious, skeptical, or downright antagonistic towards vegan living. This book is destined to be a classic of the emerging vegan oeuvre."--Jonathan Balcombe, Ph.D., author of *The Exultant Ark* "Full of thoughtful analyses of some of the most common, perplexing, and often challenging reactions to vegans and veganism. Any vegan or vegetarian who has wished they'd had a more informed response to a question or challenge about their ideology--and anyone who wants to better understand some of the fundamental concepts of veganism--will benefit from reading Sherry Colb's in-depth exploration of the issues."--Melanie Joy, Ph.D., author of *Why We Love Dogs, Eat Pigs, and Wear Cows*

*The Vegan Matrix* - Melanie Joy 2020

"In *The Vegan Matrix*, psychologist, longtime vegan advocate, and organizational head Dr. Melanie Joy explores a serious problem in the vegan movement: unexamined privilege. She also examines the struggle to talk effectively about this problem in a way that helps offset it. Using simple, straightforward language and a compassionate tone, Joy explains what privilege is, why it's so important for vegans to become aware of it, and how to talk about it in a way that deepens understanding and helps transform it. In so doing, Joy unpacks some of the many privileges that must be acknowledged and addressed, and calls for more inclusivity and diversity within vegan organizations and the movement as a whole. *The Vegan Matrix* is a call to awareness and action, empowering vegans to reach a broader audience and to help create a more compassionate and just world"--
