*Finding a Replacement for the Soul* - Brett Bourbon 2009-06-30

Approaching the study of literature as a unique form of the philosophy of language and mind--as a study of how we produce nonsense and imagine it as sense--this is a book about our human ways of making and losing meaning. Brett Bourbon asserts that our complex and variable relation with language defines a domain of meaning and being that is misconstrued and missed in philosophy, in literary studies, and in our ordinary understanding of what we are and how things make sense. Accordingly, his book seeks to demonstrate how the study of literature gives us the means to understand this relationship. The book itself is framed by the literary and philosophical challenges presented by Joyce's *Finnegans Wake* and Wittgenstein's *Philosophical Investigations*. With reference to these books and the problems of interpretation and meaning that they pose, Bourbon makes a case for the fundamental philosophical character of the study of literature, and for its dependence on theories of meaning disguised as theories of mind. Within this context, he provides original accounts of what sentences, fictions, non-fictions, and poems are; produces a new account of the logical form of fiction and of the limits of interpretation that follow from it; and delineates a new and fruitful domain of inquiry in which literature, philosophy, and science intersect. Table of Contents: Preface Note on Abbreviations Introduction: What Are We When We Are Not? Part I The Surface of Language and the Absence of Meaning 1. From Soul-Making to Person-Making 2. The Logical Form of Fiction 3. The Emptiness of Literary Interpretation 4. To Be But Not To Mean 5. How Do Oracles Mean? Part II Senses and Nonsenses: Joyce's *Finnegans Wake* and Wittgenstein's *Philosophical Investigations* 6. A Twitterlitter of Nonsense: Askesis at *Finnegans Wake* 7. The Analogy between Persons and Words 8. "The Human Body Is the Best Picture of the Human Soul" 9. The Senses of Time 10. Being Something and Meaning Something Bibliography Acknowledgments Index This is an adventurous and unusual book. Bourbon moves back and forth between literary and philosophical contexts with ease, showing in multifarious ways how the one can, often in unexpected ways, illuminate the other. Throughout these wide-ranging explorations Bourbon uncovers a good deal about both the nature of literary meaning and our distinctive -- if tellingly irreducible -- relations to literary texts. --Garry L. Hagberg, author of *Art as Language: Wittgenstein, Meaning, and Aesthetic Theory* and *Meaning and Interpretation: Wittgenstein, Henry James, and Literary Knowledge*

Meaning, Understanding, and Practice - Barry Stroud 2002

Meaning, Understanding, and Practice is a selection of the most notable essays of a leading contemporary philosopher on a set of central topics in the subject. Barry Stroud offers penetrating studies of meaning, understanding, necessity, and the intentionality of thought. One question running through many of the essays is how much can be expected from a philosophical account of a person's understanding the meaning of something, and whether it can succeed without implying that the person understands many other things as well. Five of the essays focus on the philosophy of Wittgenstein, and at least that many others work with

ideas derived from Wittgenstein. In a helpful introduction Stroud explains how the essays are related to one another and how some of his ideas about these questions developed over the years.

**Meaning** - David E. Cooper 2014-12-18

Meaning is one of our most central and most ubiquitous concepts. Anything at all may, in suitable contexts, have meaning ascribed to it. In this wide-ranging book, David Cooper departs from the usual focus on linguistic meaning to discuss how works of art, ceremony, social action, bodily gesture, and the purpose of life can all be meaningful. He argues that the notion of meaning is best approached by considering what we accept as explanations of meaning in everyday practice and shows that in these situations we are explaining the appropriate fit of an item - whether a word or an artwork - with something larger than or outside of itself. This fuller account of meaning explores questions of the meaning of meaning and tackles issues such as whether meaning is just a misleading 'folk' term for something more basic, whether there really is meaning at all, and whether we should strive for meaning or let our lives 'just be' rather than mean. By taking the problem of meaning out of the technical philosophy of language and providing a more general account, Cooper is able to offer new insights into the import, function, and status of meaning that will be of interest not only to philosophers of language but to students and philosophers working in areas such as epistemology and metaphysics.

*Wittgenstein's Definition of Meaning as Use* - Garth L. Hallett 1967

Talking the Talk - Trevor A. Harley 2009-12-18

Language makes us human, but how do we use it and how do children learn it? Talking the Talk is an introduction to the psychology of language. Written for the reader with no background in the area or knowledge of psychology, it explains how we actually "do" language: how we speak, listen, and read. This book provides an accessible and comprehensive introduction to psycholinguistics, the study of the psychological processes involved in language. It shows how it's possible to study language experimentally, and how psychologists use these experiments to build models of language processing. The book focuses on controversy in modern psycholinguistics, and covers the all the main topics, including how children acquire language, how language is related to the brain, and what can go wrong - and what can be done when something does go wrong. Structured around questions that people often ask about language, the emphasis of Talking the Talk is how scientific knowledge can be applied to practical problems. It also stresses how language is related to other aspects of psychology, particularly in whether animals can learn language, and the relation between language and thought. Lively and amusing, the book will be essential reading for all undergraduate students and those new to the topic, as well as the interested lay reader.

**Meaning, Understanding, and Practice** - Barry Stroud 2000-05-18

Meaning, Understanding, and Practice is a selection of the most notable essays of a leading contemporary philosopher on a set of central topics in analytic philosophy. Barry Stroud offers penetrating studies of meaning, understanding, necessity, and the intentionality of thought. A question which runs through much of this work is what can be expected from a philosophical account of one's understanding of the meaning of something. Five of the essays are focused specifically on the philosophy of Wittgenstein, and most of the rest work with ideas derived from Wittgenstein. Stroud's introduction puts the papers in context by explaining how his ideas and aims developed over the years, and drawing out the recurring themes of the book.

Acts of Meaning - Jerome Bruner 1993-01-01

Jerome Bruner argues that the cognitive revolution, with its current fixation on mind as "information processor," has led psychology away from the deeper objective of understanding mind as a creator of meanings. Only by breaking out of the limitations imposed by a computational model of mind can we grasp the special interaction through which mind both constitutes and is constituted by culture.

*Wittgenstein on Thought, Language and Philosophy* - Christoffer Gefwert 2017-11-22

This title was first published in 2000: What was Wittgenstein's relation to "theory of meaning" in his post-1937 writings and what was his characterization of "philosophy" ? How does "philosophy" in Wittgenstein's later writings differ from what is usually accepted in modern academic 'analytic' philosophy?

This book discusses problems encountered in looking at Wittgenstein's texts after-1937, focusing particularly on whether the problem of philosophy amounts to a systematic or a theoretical activity. Arguing that philosophy can be characterized as a form of conceptual investigation, Gefwert aims to demonstrate that a theoretical view does not correspond to Wittgenstein's conception of philosophy. For example, philosophy is not transcendental as he thought it was before 1929. Neither is philosophical language universal as Wittgenstein 1929-1936 thought it was. Proposing that a philosophical conceptual investigation is analogous to a psychotherapeutical session of Freud, with the common aim to dissolve the conceptual problems in language that haunt us in our everyday life, Gefwert's examination of the post-1937 writings of Wittgenstein concludes that "philosophical investigation" is a very different activity than that assumed by the Logical Positives and others adhering to a theoretical view.

First published in 1987. Routledge is an imprint of Taylor & Francis, an informa company.

*Varieties of Belief* - Paul Helm 2013-12-19

First published in 2002. This is Volume IV of seven in the Library of Philosophy series on the Philosophy of Religion. The Library of Philosophy was designed as a contribution to the History of Modern Philosophy under the heads: first of Different schools of Thought - Sensationalist, Realist, Idealist, Intuitivist; secondly of different Subjects - Psychology, Ethics, Aesthetics, Political Philosophy, Theology. Written in 1973, work in the philosophy of religion in the last thirty years has focused increasingly on the language of religion.

Too often it seems that unless one happens to share the particular religious outlook of the writer, religious or theological premises are being made to yield philosophical conclusions. There is an obvious need for a less question-begging procedure, one that separates the philosophy from the religion. The aim of the study is to make a point about philosophical methodology no grounds are offered for preferring one analysis of religious belief to another.

**Semantics** - Danny D. Steinberg 1971-10-31
