Austria and America: 20th-Century Cross-Cultural Encounters - Joshua Parker 2017

Through literature, film, diplomatic relations, and academic exchanges, this volume examines key historical points in Austrian-American relations of the past century, pondering the roots of how and why "austrianness" was adapted to American culture, and how America's cultural lens focused on the two countries' exchanges. From Freud's early reception, to FDR's policy toward Austrian refugees in the Pacific, and from film adaptations to film-writing, literature and Freudianism during the

McCarthy era, it reviews encounters between Austria and the United States, between Austrians and Americans, between each's images of the other, and the lives of those caught in between. (Series: American Studies in Austria, Vol. 15) [Subject: Politics, American Studies, Austrian Studies, Sociology]

Der intellektuelle Polygamist - Ingrid Gehrke 2008

ger: Der weltberühmte Chemiker Carl Djerassi - vor allem bekannt als "Vater der Pille" - beginnt mit knapp 65 Jahren eine zweite Karriere als

Schriftsteller, in der er seit den späten 80er Jahren eine Sammlung von Kurzgeschichten, vier autobiographische Texte, fünf Romane (science-in-fiction) und sechs Theaterstücke (science-in-theatre) verfasst hat. Das zentrale Thema in allen Texten bildet die Darstellung der Naturwissenschaft als "Kultur" und die kritische Reflexion des Normensystems, an das sich Naturwissenschaftler zu halten haben, wenn sie innerhalb der academic community reüssieren wollen. Neben der Publikationspraxis, dem Streben nach Priorität und Anerkennung, stellt Djerassi kollegiale Formen der Zusammenarbeit ebenso in Frage wie den rein rationalen Anspruch von Naturwissenschaft, ausschließlich nach objektiven Kriterien vorzugehen. Wissenschaft wird als Machtspiel von egozentrischen Forschern portraitiert, das mehr durch persönliche Eitelkeiten als durch wissenschaftliche Neugier motiviert scheint. Neben der pädagogischen Intention verfolgt der Autor mit seinem Schreibprojekt auch persönliche Interessen: die Texte dokumentieren einen Reflexionsprozess über die eigene Entwicklung vom Wissenschaftler zum Schriftsteller. Durch die unterschiedlichen Zugänge in Autobiographie und Roman gelingt Djerassi die komplexe Identitätskonstruktion eines intellektuellen interkulturellen Polygamisten, der durch die positive Bewertung der Exilerfahrung auch seine verdrängten europäischen Wurzeln in sein Selbstbild erfolgreich integrieren kann. Die Dissertation stellt die erste Monographie zum literarischen Werk Carl Djerassis dar und versucht durch die Analyse der zentralen Texte einen Überblick über die thematische Vielfalt seines Schaffens zu geben.

DeLillo's *Cosmopolis*; Carl Djerassi on science-in-fiction; N. Katherine Hayles on Neal Stephenson's *Cryptonomicon*; Ursula Heise on risk and narrative in the contemporary novel; John Johnston on network theory; Brian McHale on Harry Mathews, Kathy Acker, and Gilbert Sorrentino; Joseph Tabbi on William Gaddis; and Curtis White on the "Great American Disaster Machine."

Introducing Science Communication - Mark L. Brake 2017-09-16

From discussions of climate change to the latest arguments around stem cell research, science has never been more topical and relevant to our everyday lives. Yet its intricacies are often hard for the general public to grasp. The key challenge for scientists and science communicators is to explain these scientific ideas and engage different groups with current debates. This long-overdue book explores how to successfully communicate complex and sometimes controversial scientific issues. Investigating the practices behind a range of traditional media and more interactive approaches, the book looks at how professional communicators interact with and present science communication in all its guises. It explores the historical background of science communication and examines how science continues to be referred to and used throughout popular culture, the media, and museums. Practical chapters explain key methods and give tips on overcoming communication issues and problems, whilst introducing the reader to a theoretical understanding of science communication. Written and edited by pioneering and experienced professionals in the field, this is an essential text for students and practitioners learning how to effectively communicate science.

An Immaculate Misconception - Carl Djerassi 2000-01-01

One of the most challenging issues of the 21st century is the impending separation of sex (in bed) and reproduction (under the microscope) as a result of recent advances in contraception and assisted reproduction. Many of the ethical and societal issues associated with these new reproductive technologies, notably intracytoplasmic sperm injection (ICSI), are raised in an unusual format -- namely in dialogic form -- which is both entertaining and pedagogically informative.

The Drama of DNA - Karen H. Rothenberg 2014

Through the use of dramatic narratives, *The Drama of DNA* brings to life the complexities raised by the application of genomic technologies to health care and diagnosis. This creative, pedagogical approach shines a unique light on the ethical, psychosocial, and policy challenges that emerge as comprehensive sequencing of the human genome transitions from research to clinical medicine. Narrative genomics aims to enhance understanding of how we evaluate, process, and share genomic information, and to cultivate a deeper appreciation for difficult decisions encountered by health care professionals, bioethicists, families, and society as this technology reaches the bedside. This innovative book includes both original genomic plays and theatrical excerpts that illuminate the implications of genomic information and emerging technologies for physicians, scientists, counselors, patients, blood relatives, and society. In addition to the plays, the authors provide an analytical foundation to frame the many challenges that often arise.

Literatur und Medizin - Bettina von Jagow 2005

Das Interesse an 'Schnittstellen' von Literatur und Medizin ist groß und nimmt stetig zu, die Thematik ist vielfältig und nicht leicht überschaubar. Hier bietet das im Entstehen begriffene Lexikon Orientierung und Überblick. Es schafft Grundlagen und fördert darüber hinaus den Dialog zwischen Geistes- und Naturwissenschaften. Sachlich-systematisch orientiert und alphabetisch angeordnet sind einschlägige medizinische Sujets verzeichnet, die in der Literatur von der Antike bis in die Gegenwart eine Rolle spielen. In über 250 Artikeln von Abtreibung bis Zwang wird die medizinische und historische Begriffsgeschichte sowie die geistes-, ideen- und kulturhistorische Bedeutung im Wandel der Zeiten dargestellt. Zu jedem Artikel gibt es weiterführende Literaturhinweise; Personen-, Werk- und Sachregister erleichtern das Suchen und Nachschlagen.

Textmaschinenkörper - 2016-08-09

Textmaschinenkörper ist ein Neologismus, aufgebaut aus drei Lexemen, die, auf unterschiedliche Weise zu Neukombinationen verbunden - Textmaschine, Maschinenkörper, Textkörper -, jeweils das Sprachliche, Mechanische oder Leibliche betonen. Das Hyperonym der einzelnen Wörter ist indes Konstruktion: Texte, Maschinen und Körper sind Artefakte, deren Herstellungsgeschichte und Wirkung zwar sehr unterschiedlich sein kann, aber deren Signum der menschlichen Konstruktion sie jeweils zu Elementen der Kulturpraxis im weitesten Sinn macht und deren Bedeutung immer wieder neu erfasst werden muss. Die unter dem Titel "Textmaschinenkörper" gesammelten Aufsätze befassen sich mit der Darstellung des Maschinenkörpers in literarischen, filmischen und digitalen Texten. Sie analysieren Körper-, Geschlechter- und Menschenkonstruktionen, die auf einer Skala von Medien, vom schriftlich fixierten literarischen Text bis zur digitalen Vorstellung im Computerspiel, repräsentiert und thematisiert werden. Der Band präsentiert erstmals dezidiert genderorientierte Analysen zum Motiv des künstlichen Menschen vor allem zur deutschsprachigen Literatur - von Automaten in der Dichtung des Mittelalters über Marionetten, Puppen und Automaten in der Romantik und in der Literatur des fin de siècle bis hin zu aktuellen Reflexionen über Körper, Technik und Reproduktion - und zur Variation des Motivs im Film des 20. Jahrhunderts - von Metropolis bis Matrix.

Science--dramatic - Eva-Sabine Zehelein 2009

Science Plays form a flourishing dramatic sub-genre. The present study provides an informative overview shedding light on the diversity of ways in which the natural sciences and/or scientists are put on stage. Detailed text-based analyses of eighteen plays, many of them previously unexamined elsewhere, exemplify the genre's remarkable variety.

"Classics" such as 'Copenhagen' and 'Arcadia' are discussed, as well as e.g. 'Proof', 'QED', 'Taboos', 'Remembering Miss Meitner', 'An Experiment With an Air Pump', 'Blinded by the Sun' and 'Einstein's Gift'. All plays look critically at scientific progress or promise, pointing at socio-political and ethical challenges for today as well as the future. The

plays' analyses are embedded into discussions of two vital discourses, the Two Cultures and the Science Wars, as well as the drama vs. performance studies paradigm. Together with background material on various themes, events and personae, 'Science: Dramatic' broadens into a comprehensive work on the science-drama-society interface.

Wears scholarship lightly, using wit and humor to smuggle in serious scientific ideas."The Economist "... wry and witty ... the play airs some of the ethical and social issues raised by in vitro fertilization ... appeals because of unusual plot, well-drawn characters, and the simple but effective touches of modern technology."Science "... Brings science and theatre together in a way rarely seen ... an enjoyable and thought-provoking play."Chemistry in Britain "The play is fast-paced, entertaining and sprinkled with witty dialogue ... fascinating."New Scientist "An alternative to the usual fluff of the Edinburgh Festival Fringe."The Independent "The triumph of Carl Djerassi's first theatrical work is to present the language of the laboratory in an involving, accessible fashion ... Engage your brain and see it."The List, Edinburgh "Djerassi's writing exhibits wit and warmth... a good, healthy 90-minute drama."Time Out "Engrossing entertainment ... This production of Carl Djerassi's comedy

screen drama is pretty much faultless."Stage "Djerassi has taken one of the most contentious, headline-grabbing and deeply personal issues on the front lines of modern science ... to write a play that is both intellectually engaging and personally dramatic."San Francisco Examiner "The show [invites] an audience to stretch into the strange new territory of reproductive science ... it uses dramatic suspense to animate real-world issues of personal and social responsibility."San Francisco Chronicle "A humdinger of a play ... excellent theater which engages its audience with a well written story, well directed, and well acted."Marin Independent Journal "... unique combination of drama, wit, and science ... a fascinating production."Barre-Montpelier Times Argus
