

Multiculturalism And Integration A Harmonious Relationship

African Heritage Australian Youth Tebeje Molla 2023-07-28 In the last four decades, Australia has resettled thousands of African refugees. As a visibly different minoritised group, Black African youth are often represented as disengaged, dangerous, and undesirable. Even so, rarely are generative mechanisms that negatively affect the life-courses of the youth critically examined. Drawing on a wide range of theoretical resources, policy reviews, longitudinal statistical data, and in-depth interviews, this book reports on the educational attainment and integration outcomes of African heritage Australian youth from refugee backgrounds. The book also identifies intersectional factors of educational disadvantage, analyses equity provisions, and outlines policy ideas for improved educational attainment and integration of refugee youth. It is unique in its scope and focus and contributes to knowledge in African Australian studies. The book will appeal to researchers, postgraduate students, and policymakers interested in understanding the dynamics of refugee resettlement and integration.

Don't Go Back to Where You Came From Tim Soutphommasane 2013-01-01 Tim Soutphommasane boldly stakes a claim for the overwhelming success of multiculturalism in Australia. European governments are declaring multiculturalism a failure, with many conservatives in Australia hastening to agree. But is a multicultural approach to integration and diversity really as destructive as critics say? Have we been too quick to declare its demise? Offering an unflinching and informed

defence of cultural diversity, Soutphommasane shows that multiculturalism is more than laksa, kebabs or souvlaki and that it doesn't automatically spell cultural relativism, ethnic ghettos or reverse racism. In fact, multicultural Australia has been a national success story.

Wanted and Welcome? Triadafilos Triadafilopoulos 2013-03-25 This book considers the origins, performance and diffusion of national immigration policies targeting highly skilled immigrants. Unlike asylum seekers and immigrants admitted under family reunification streams, highly skilled immigrants are typically cast as “wanted and welcome” as a consequence of their potential economic contribution to the receiving society and putative assimilability. Testing the degree to which this assumption holds is the principle aim of this book. In contrast to publications which see highly skilled immigration as functional response to labor market needs, the book probes the political and sociological dimensions of policy, drawing on contributions from an international group of established and new scholars from the fields of history, law, political science, sociology, and public policy. The book is organized into four parts. Part I probes the origins of post-WWII immigration policies in Canada, Australia, and the United States. Part II analyzes recent debates on highly skilled immigration policy in the United States, whose origins go back to the 1965 Act by Congress which favored family reunification over skilled immigration. Part III considers the degree to which highly skilled immigrants are welcome, by focusing on the integration trajectories of foreign trained professionals in Canada. Paradoxically, just as Canada has succeeded in orienting its admissions system more explicitly toward privileging highly educated and skilled professionals, highly skilled immigrants have experienced worsening economic outcomes as reflected in rates of unemployment and falling earnings. Part IV considers the internationalization of highly skilled immigration policies, focusing on Europe's most important immigration countries, Germany and Britain. As is true in

Canada, the labor market outcomes for highly skilled immigrants in Europe are disappointing, and the final chapter discusses why this is the case and what might be done to improve matters. Given its combination of cross-disciplinary insights, cross-national comparisons, and empirical richness, the book will be of interest to both scholars and policymakers concerned with immigration policy.

Refugee Journeys Jordana Silverstein 2021-02-04 Refugee Journeys presents stories of how governments, the public and the media have responded to the arrival of people seeking asylum, and how these responses have impacted refugees and their lives. Mostly covering the period from 1970 to the present, the chapters provide readers with an understanding of the political, social and historical contexts that have brought us to the current day. This engaging collection of essays also considers possible ways to break existing policy deadlocks, encouraging readers to imagine a future where we carry vastly different ideas about refugees, government policies and national identities.

Multiculturalism as a distinct form of liberal-democratic governance gained widespread acceptance after World War II, but in recent years this consensus has been fractured. Multiculturalism in the British Commonwealth examines cultural diversity across the postwar Commonwealth, situating modern multiculturalism in its national, international, and historical contexts. Bringing together practitioners from across the humanities and social sciences to explore the legal, political, and philosophical issues involved, these essays address common questions: What is postwar multiculturalism? Why did it come about? How have social actors responded to it? In addition to chapters on Australia, Britain, Canada, and New Zealand, this volume also covers India, Malaysia, Nigeria, Singapore, and Trinidad, tracing the historical roots of contemporary dilemmas back to the intertwined legacies of imperialism and liberalism. In so doing it demonstrates that multiculturalism has implications that stretch far beyond its current formulations in public and academic discourse.

Islamic Studies with other various aspects. All papers have been scrutinized by a panel of reviewers who provide critical comments and corrections, and thereafter contributed to the improvement of the quality of the papers. Research in Islamic studies and Muslim societies today also increasingly uses interdisciplinary methods and approaches. In order to produce more objective findings, the researchers looked at the need to combine several methods or approaches to an object of study, so that they had additional considerations needed. These additional considerations add a more comprehensive perspective. In this way, in turn they can come up with better findings.

Interdisciplinary Islamic studies dispute that Islam is monolithic, militaristic, and primarily Middle Eastern. We strongly believe that ICIIS conference has become a good forum for all researcher, developers, practitioners, scholars, policy makers, especially post graduate students to discuss their understandings of current processes and findings, as well as to look at possibilities for setting-up new trends in SDG and Islamic Interdisciplinary Studies. We also expect that the future ICIIS conference will be as successful and stimulating, as indicated by the contributions presented in this volume.

Political Theory and Australian Multiculturalism Geoffrey Brahm Levey 2012 Multiculturalism has been one of the dominant concerns in political theory over the last decade. To date, this inquiry has been mostly informed by, or applied to, the Canadian, American, and increasingly, the European contexts. This volume explores for the first time how the Australian experience both relates and contributes to political thought on multiculturalism. Focusing on whether a multicultural regime undermines political integration, social solidarity, and national identity, the authors draw on the Australian case to critically examine the challenges, possibilities, and limits of multiculturalism as a governing idea in liberal democracies. These essays by distinguished Australian scholars variously

Thucydides' Meditations on Fear Raymond Taras 2023-09-12 Understanding contemporary global politics by connecting them to the meditations of a classical Greek philosopher may seem farfetched and counterintuitive. But for political theorists, policymakers, the new influencers, journalists and engaged students, Thucydides' ancient wisdom provides insights into diagnosing and even undermining an endemic of political fear spreading across the world's borders. With his help, this book probes six case studies of aspiring great powers and the brittle identities that they may have unwittingly constructed. Raymond Taras questions the motives of the manipulators of fear whether found in authoritarian states or increasingly in backsliding liberal democratic ones. The urgency of returning to and respecting tolerance in states establishing relations with arriving refugees and migrants takes on critical importance.

The volume brings together a variety of perspectives, inter-related by ecclesiological and theological concerns. *Multiculturalism and Integration* Michael Clyne 2011-07-01 Multiculturalism has been the official policy of all Australian governments (Commonwealth and State) since the 1970s. It has recently been criticised, both in Australia and elsewhere. Integration has been suggested as a better term and policy. Critics suggest it is a reversion to assimilation. However integration has not been rigorously defined and may simply be another form of multiculturalism, which the authors believe to have been vital in sustaining social harmony.

Theoretical perspectives on current debates about cultural diversity, religious minorities and minority rights emerge in this volume. and contributed by leading experts from around the world. Readers will discover a fresh re-examination of prominent multicultural settings such as Canada and Australia but also an emphasis on less examined case studies among multicultural societies, as with New Zealand and Italy. Authors engage critically and innovatively with the various ethical challenges and policy dilemmas surrounding the management of cultural and religious diversity in our contemporary societies. Comparative perspectives and a focus on core questions related to multiculturalism, not only at the level of practice but also from historical and philosophical perspectives, tie these chapters from different disciplines together. This work will appeal to a multi-disciplinary audience, including scholars of political philosophy, sociology, religious studies and those with an interest in migration, culture and religion in contemporary societies.

Institutional Disrespect Ibolya Losoncz 2019-06-24 This book is about the institutional disrespect experienced by refugee immigrants at the hands of the state and its institutions. The desire to be treated respectfully is not felt only by refugees, but they are a much higher risk of not receiving it. Using a case study of recently settled South Sudanese Australians, the author uncovers the social realities of their marginalisation and examines how blocked pathways to cultivate collective and self-identities can lead to a breakdown of social bonds between immigrants and social institutions. Institutional Disrespect invites us to take a fresh look at whose responsibility it is to address the disrespect felt by immigrants and other marginalised groups, and argues that when disrespect is systemic in governance arrangements, or comes in the forms of injustice and institutional mistreatment, the responsibility lies not with individuals but with the state, its institutions and its appointed bureaucrats.

It provides a comprehensive overview of Muslim conceptualisation of integration, and the author explores the various meanings Muslims ascribe to it, such as participation, belonging and contributing to the wider society. By gaining an understanding of how Muslims define integration, this research can help policy makers, academics and settlement service providers to appreciate how culture and faith influence the meanings diverse groups give to certain accepted terms. It will be of interest to scholars and students in the fields of migration, mobility, integration and social cohesion.

The Asia Literacy Dilemma Rebecca Cairns 2022-10-21 The Asia literacy dilemma brings forward a novel approach to the long-standing global debates of Asia-related teaching and learning. By bringing into focus 'Asia' as a curriculum area, the book provides original commentary on the rationale and feasibility of 'Asia literacy' and its role and significance within and for twenty-first-century education. The book's unique contribution lies in a comprehensive problematisation of 'Asia' as planned, enacted and experienced curriculum, bringing together policy, teacher practice and student experiences to present an extensive discussion. By contextualising the problematics of Asia-related curriculum within contemporary national and transnational curriculum challenges, Cairns and Weinmann take account of conflicting discourses of nation-building, ethnocentrism, transnationalism, geo-economics and the purposes of twenty-first-century education. Its use of interview data with teachers and students recentres key actors that are often sidelined in official curriculum policy discourse. The book also introduces the concept of curricularisation to describe the process through which objects and discourses of curriculum are produced and reproduced. In doing so, the book presents a comprehensive discussion of the impossibilities and possibilities of

Southeast Asian Migration Khatharya Um 2015-10-01 Southeast Asia has long been a crossroad of cultural influence and transnational movement, but the massive migration of Southeast Asians throughout the world in recent decades is historically unprecedented. Dispersal, compelled by economic circumstance, political turmoil, and war, engenders personal, familial, and spiritual dislocation, and provokes a questioning of identity and belonging. This volume features original works by scholars from Asia, America, and Europe that highlight these trends and perspectives on Southeast Asian migration within and beyond the Asia-Pacific region. Adopting an interdisciplinary approach -- with contributions from sociology, political science, anthropology, and history -- and anchored in empirical case studies from various Southeast Asian countries, it extends the scope of inquiry beyond the economic concerns of migration, and beyond a single country source or destination, and disciplinary focus. Analytic focus is placed on the forces and factors that shape migration trajectories and migrant incorporation experiences in Asia and Europe; the impact of migration and immigration status on individuals, families, and institutions, on questions of equity, inclusion, and identity; and the triangulated relationships between diasporic communities, the sending and receiving countries. Of particular importance is the scholarly attention to lesser known populations and issues such as Vietnamese in Poland, children and the 1.5 generation immigrants, health and mental consequences of state sponsored violence and protracted encampment, ethnic

Assessing Multiculturalism in Global Comparative Perspective Yasmeeen Abu-Laban

2022-12-30 In *Assessing Multiculturalism in Global Comparative Perspective*, a group of leading scholars come together in a multidisciplinary collection to assess multiculturalism through an international comparative perspective. Multiculturalism today faces challenges like never before, through the concurrent rise of populism and white supremacist groups, and contemporary social movements mobilizing around alternative ideas of decolonization, anti-racism and national self-determination. Taking these challenges head on, and with the backdrop that the term multiculturalism originated in Canada before going global, this collection of chapters presents a global comparative view of multiculturalism, through both empirical and normative perspectives, with the overarching aim of comprehending multiculturalism's promise, limitations, contemporary challenges, trajectory and possible futures. Collectively, the chapters provide the basis for a critical assessment of multiculturalism's first 50 years, as well as vital insight into whether multiculturalism is best equipped to meet the distinct challenges characterizing this juncture of the 21st century. With coverage including the Americas, Europe, Oceania, Africa and Asia, and thematic coverage of citizenship, religion, security, gender, Black Lives Matter and the post-pandemic order, *Assessing Multiculturalism in Global Comparative Perspective* presents a comprehensively global collection that is indispensable reading for scholars and students of diversity in the 21st century.

interpret the present state of multiculturalism theories and the ways they apply to politics and education. The book presents a variety of axiological positions, scientific disciplines, theoretical concepts and methodological approaches of different disciplines, namely of philosophy, pedagogy, psychology and sociology. The first part of the book includes critical evaluation of the ways of defining the key notion of multiculturalism, characteristics of theoretical approaches to the research and study of multiculturalism as well as various concepts of implementation of the idea of multiculturalism in societies. In the second part of the book, the role of education in overcoming the crisis of multiculturalism is in the centre of attention. Although migration is not a new phenomenon, its scale in the present-day world requires new models of behavior and response, creating and maintaining relationships, meeting the needs and problem solving. This part also shows the educational system as one of the key sources of consensus and co-operation.

Chinese Immigration and Australian Politics Jia Gao 2020-07-14 This book analyses how an increasing number of new Chinese migrants have integrated into Australian society and added a new dimension to Australian domestic politics as a result of Australia's merit-based immigration system and its shift towards Asia. These policies have helped Australia sustain its growth without a recession for decades, but have also slowly changed established patterns in the distribution of job opportunities, wealth, and political influence in the country. These transformations have recently triggered a strong Sinophobic campaign in Australia, the most disturbing aspect of which is the denial of the successful integration of Chinese migrants into Australian society. Based on evidence gathered through a longitudinal study of Chinese migrants in Australia, this book examines the misconceptions troubling Australia's current China debate from six important but overlooked perspectives, ranging from migration policy changes, economic factors, grassroots responses, the

Belonging to the Nation Edmund Terence Gomez 2016-04-14 This study reviews developments in the ethnic and national identity of the descendants of migrants, taking ethnic Chinese as a case study. Our core question is why, in spite of debates worldwide about identity, exclusion and rights, do minority communities continue to suffer discrimination and attacks? This question is asked in view of the growing incidence in recent years of 'racial' conflicts between majority and minority communities and among minorities, in both developed and developing countries. The study examines national identity from the perspective of migrants' descendants, whose national identity may be more rooted than is often thought. Concepts such as 'new ethnicities', 'cultural fluidity', and 'new' and 'multiple' identities feature in this examination. These concepts highlight identity changes across generations and the need to challenge and reinterpret the meaning of 'nation' and to review problems with policy initiatives designed to promote nation-building in multi-ethnic societies. This book was originally published as a special issue of *Ethnic and Racial Studies*.

Global Perspectives on the Politics of Multiculturalism in the 21st Century Fethi Mansouri 2014-06-05 Multiculturalism is now seen by many of its critics as the source of intercultural and social tensions, fostering communal segregation and social conflicts. While the cultural diversity of contemporary societies has to be acknowledged as an empirical and demographic fact, whether multiculturalism as a policy offers an optimal conduit for intercultural understanding and social harmony has become increasingly a matter of polarised public debate. This book examines the contested philosophical foundations of multiculturalism and its, often controversial, applications in the context of migrant societies. It also explores the current theoretical debates about the extent to which multiculturalism, and related conceptual constructs, can account for the various ethical

challenges and policy dilemmas surrounding the management of cultural diversity in our contemporary societies. The authors consider common conceptual and empirical features from a transnational perspective through analysis of the case studies of Australia, Canada, Columbia, Germany, New Zealand, the United Kingdom and Uruguay. This book will be of interest to students and scholars of political science, comparative politics, international studies, multiculturalism, migration and political sociology.

The Future of Us: Demography gets a makeover Liz Allen 2020-04-01 Demography is far more important than destiny. By tracing connections between a population's past and present, demographers can foresee its future. The true wonder of demography, though, is not its ability to predict the future but to shape it. Bold, fearless and revealing, The Future of Us does more than help you find your inner statistician. She also dissects how the word 'population' became so charged, daring to ask what Australia might look like in 20 years if we had zero immigration. Rethinking Second Language Learning Marisa Cordella 2016-05-19 This book evaluates a project where formal classroom learning of a second language was supplemented with informal, natural interactions with older native speakers of the target language, delivering a number of pedagogical and societal benefits. The authors introduce a model of intergenerational, intercultural encounters which aims to promote the use of community language resources; enrich the experiences of young learners; foster greater understanding between generations; break down cultural stereotypes; encourage appreciation of different cultures and enhance the quality of life and community engagement of older people with a bi/multilingual background. It draws on theories of language acquisition, discourse analysis and psychosocial perspectives to propose a model of language learning for students that can be used for any language or locality. It is therefore an essential resource for graduate students, researchers and language teachers as well as for education, aged and youth care policy makers, practitioners and community services workers who are interested in innovative language pedagogy.

Muslim Active Citizenship in the West Mario Peucker 2014-04-03 *Muslim Active Citizenship in the West* investigates the emergence and nature of Muslims' struggle for recognition as full members of society in Australia, Great Britain and Germany. What actions have been taken by Muslims to achieve equal civic standing? How do socio-political and socio-economic factors impact on these processes? And how do Muslims negotiate their place in a society that is often regarded as sceptical - if not hostile - towards Muslims' desire to belong? This book sheds new light on Muslims' path towards citizenship in Australia, Great Britain and Germany. Existing research and statistics on Muslims' socio-economic status, community formation, claim-making and political responses, and the public portrayal of Islam are systematically examined. These insights are tested 'through the eyes of Muslims', based on in-depth interviews with Muslim community leaders and other experts in all three countries. The findings offer unique perspectives on Muslim resilience to be recognised as equal citizens of Islamic faith in very different socio-political national settings. Pursuing an

interdisciplinary and comparative approach, this book examines the country-specific interplay of historical, institutional, political, and identity dimensions of Muslims' active citizenship and will be invaluable for students and researchers with an interest in Sociology, Religious Studies and Political Science.

Immigration, Public Policy, and Health Dennis Raphael 2016-12-19 This timely edited collection by Dennis Raphael critically analyzes how public policy directions affect the health outcomes of immigrants. Using a comparative case study methodology, the contributing authors consider the immigration experience in nine developed nations: Australia, Austria, Belgium, Canada, Denmark, Germany, Norway, Sweden, and the United Kingdom. *Immigration, Public Policy, and Health* sets out to ascertain if the form of the welfare state—whether social democratic, conservative, or liberal—interacts with the politics of a nation to shape the lived experiences and health of newcomers. Highlighting the importance of understanding how public policies determine the quality and distribution of the social determinants of health, this volume identifies numerous issues that are common across the nine nations and suggests future directions for immigration policy and research. The contributors address current topics, including the “healthy immigrant effect,” the experiences of immigrants versus refugees, the influence of anti-immigration political parties, and the link between multiculturalism policies and successful integration. Featuring chapter objectives, critical thinking questions, glossaries, and annotated lists of recommended readings and websites, this highly accessible text is the perfect resource for instructors and students in health sciences, sociology, and immigration studies.
