No Easy Answers - 2007

No Easy Answers is the first comprehensive study of US sex offender registration, community notification and residency restriction laws, their public safety impact, and the effect they have on former offenders and their families. It concludes the laws are poorly crafted and misguided, failing to protect children from sex crimes but making it nearly impossible for former offenders to rebuild their lives. In many states, everyone convicted of a sex crime must register and the requirement can last for life. The requirements are overbroad in scope and overlong in duration. As a result, there are more than 600,000 registered sex offenders, including individuals convicted of sexual sex between teenagers, prostitution, and public urination, as well as those who committed their only offenses decades ago. Unfettered public access to online sex offender registries exposes registrants to harassment, ostracism, and even violence, with little evidence that this form of community notification protects anyone from sexual violence. Residency restrictions prohibit former offenders from living within a designated distance (anywhere from 500 to 2,500 feet) from places where children gather. The restrictions have the effect of banishing former offenders from entire towns, forcing them to live far from home, families, jobs, and treatment, and hindering law-enforcement supervision. The restrictions may have no impact on the likelihood of recidivism. Sex offender laws reflect public concern that children are at grave risk of sexual abuse by strangers who are repeat offenders. The real risks children face are quite different: statistics demonstrate that most sexual abuse of children is committed by family members or persons known and often trusted by the victim, and by someone who has not previously been convicted of a sex offense. The laws also reflect the widely shared but erroneous belief that sex offenders continually repeat their offenses. Authoritative studies, however, indicate that three out of four adult offenders do not reoffend.

Monstrous Crimes and the Failure of Forensic Psychiatry - John Douard 2012-11-13

The metaphor of the monster or predator—usually a sexual predator, drug dealer in areas frequented by children, or psychopathic murderer—is a powerful framing device in public discourse about how the criminal justice system should respond to serious violent crimes. The cultural history of the monster reveals significant features of the metaphor that raise questions about the extent to which justice can be achieved in both the punishment of what are regarded as "monstrous crimes" and the treatment of those who commit such crimes. This book is the first to address the connections between the history of the monster metaphor, the 19th century idea of the criminal as monster, and the 20th century conception of the psychopath: the new monster. The book addresses, in particular, the ways in which the metaphor is used to scapegoat certain categories of crimes and criminals for anxieties about our own potential for deviant, and, indeed, dangerous interests. These interests have long been found to be associated with the fascination people have for monsters in most cultures, including the West. The book outlines an alternative public health approach to sex offending, and crime in general, that can incorporate what we know about illness prevention while protecting the rights, and humanity, of offenders. The book concludes with an analysis of the role of forensic psychiatrists and psychologists in representing criminal defendants as psychopaths, or persons with certain personality disorders. As psychiatry and psychology have transformed bad behavior into mad behavior, these institutions have taken on the legal role of helping to sort out the most dangerous among us for preventive "treatment" rather than carceral "punishment."

Forensic GIS - Gregory A. Elmes 2014-07-08

A variety of disciplines and professions have embraced geospatial technologies for collecting, storing, manipulating, analyzing and displaying spatial data to investigate crime, prosecute and convict offenders, exonerate suspects and submit evidence in civil lawsuits. The applications, acceptability and relevance and procedural legality of each geospatial technologies vary. The purpose of this book is to explain the nature of geospatial technologies, demonstrate a variety of geospatial applications used to investigate and litigate civil and criminal activities and to provide a reference of current acceptability of geospatial technology in the production of evidence. This book is an introductory overview designed to appeal to researchers and practitioners across disciplinary boundaries. The authors of this book are researchers and practitioners across disciplines and professions, experts in the field.

[The Ethics of Total Confinement](#) - Bruce A. Arrigo 2011-06-29

In three parts, this volume in the AP-LS series explores the phenomena of captivity and risk management, guided and informed by the theory, method, and policy of psychological jurisprudence. The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent "conditions of control." These conditions impose barriers to justice and set limits on citizenship for one and all. Situated at the nexus of political/social theory, mental health law and jurisprudential ethics, the book examines and critiques constructs such as offenders and victims; self and society; therapeutic and restorative; health; harm; and community. So, too, are three "total confinement" case law data sets on which this analysis is based. The volume stands alone in its efforts to systematically "diagnose" the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting: (1) the rights of juveniles found competent to stand criminal trial, the mentally ill placed in long-term disciplinary isolation, and sex offenders subjected to civil detention and community re-entry monitoring; (2) the often unmet needs of victims; and (3) the demands of an ordered society. Carefully balancing sophisticated insights with concrete and cutting-edge applications, the book concludes with a series of provocative, yet practical, recommendations for future research and meaningful reform within institutional practice, programming, and policy. The Ethics of Total Confinement is a thought-provoking and timely must-read for anyone interested in the ethical and legal issues regarding madness, citizenship, and social justice. "It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us. Instead, the path forward must run through a return to the ethical and psychological roots of security and justice. The Ethics of Total

Confinement is a quantum step forward in defining and advancing that path."--Jonathan Simon, Adrian A. Kragen Professor of Law, Jurisprudence and Social Policy Program, UC Berkeley School of Law

"This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness. It focuses on three outcast groups--juveniles tried as adults, people with mental illness subjected to hospitalization, and sex offenders committed as dangerous--and, based on an innovative analysis of the relevant caselaw and empirics, shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest, most uninformed fears. Relying on Aristotelian philosophy, therapeutic and restorative principles, and commonsense justice, the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing."--Christopher Slobogin, Milton Underwood Professor of Law, Vanderbilt University Law School

"The Ethics of Total Confinement: A Critique of Madness, Citizenship, and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines. By bridging gaps among relevant disciplines, the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological, ethical, or justice-based standards. The book's provocative conclusions and recommendations offer much food for thought and suggest potential directions for action."--Dennis Fox, Emeritus Associate Professor of Legal Studies and Psychology, University of Illinois at Springfield

"The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept. It is a book that synthesises in creative new ways reformist visions of justice, virtue and the cultivation of habits of character. This is profound work that opens new paths to dignity, healing and social justice."--John Braithwaite, Australian Research Council Federation Fellow, Australian National University

"The Ethics of Total Confinement offers a useful and wide-ranging perspective grounded in psychological jurisprudence. With its emphasis on the harm done to those most vulnerable to extremes of risk-management, this volume makes a welcome addition to the literature on confinement."--Lorna Rhodes, Professor, Department of Anthropology, University of Washington

"The provocative thesis of this book develops psychological

jurisprudence to conceptualize the ethics of existing total confinement practices, aspiring to greater justice and human flourishing for all. A timely intervention of this kind is most welcome."--George Pavlich, Associate Vice-President (Research), Professor of Law and Sociology, University of Alberta

The Shaming of Sexual Offenders - Anne-Marie McAlinden
2007-04-05

Winner of the 2008 British Society of Criminology Book Prize Sex offenders, particularly those who offend against children, feature prominently in contemporary law and order debates. Child sexual abuse is a small component of the broader category of 'gendered and sexualised violence' which causes significant trauma for victims yet continues to evade conventional approaches to justice. This is evidenced not only by the low number of prosecutions, due mostly to low levels of reporting and evidential difficulties at trial, but also by the failure of the justice system to prevent re-offending, largely due to the limited availability and effectiveness of prison treatment programmes. Following Braithwaite's dichotomy of 'reintegrative' and 'disintegrative' shaming, this book argues that contemporary popular and state-led responses to the risk posed by sex offenders are largely disintegrative in nature. At best, the offender may be labelled, stigmatised and ostracised from the community, while at worst, he may be subjected to violence and vigilante action and ultimately return to offending behaviour. The failure of these retributive responses means there is considerable scope for exploring alternative forms of justice and their potential for improving the outcome for victims, offenders and communities affected by sexual offences. This book examines the controversy of whether restorative justice can be applied to child sexual abuse as one of the most intractable of contemporary societal problems, and if so, what special considerations might apply. Although restorative schemes with sex offenders are in short supply, a few initiatives have developed in Canada and parts of the United States which have effected significant benefits in 'reintegrative shaming.' The book examines whether such ad hoc schemes may be of general application with child sexual abuse and whether they may be implemented on a more holistic basis.
